

Vowel Raising in Spanish Historical Phonology

A Feature Geometry Analysis

A/456453

Lucía I. Llorente

TABLE OF CONTENTS

	Page
Acknowledgements.....	i
Preface.....	iii
Chapter One: Introduction	1
Chapter Two: The development from Latin to Spanish.....	7
2.1. The vowel system	7
2.1.1. A description from a traditional perspective.....	7
2.1.1.1. Simple vowels.....	7
2.1.1.2. Diphthongs.....	9
2.1.1.3. Diphthongization of mid-open (lax) stressed vowels [ɛ] and [ɔ]	10
2.1.1.3.1. Lack of diphthongization in the presence of yod.....	11
2.1.2. A description following a standard feature system.....	13
2.1.2.1. Introduction.....	13
2.1.2.2. Different stages in the development of Latin vowels	14
2.1.3. A description following Particle Phonology (an alternative non-linear approach)	21
2.1.3.1. Introduction.....	21
2.1.3.2. Analysis.....	25
2.1.3.2.1. Stressed vowels.....	26
2.1.3.2.2. Unstressed vowels.....	30
2.1.3.2.3. Monophthongization of diphthongs.....	32
2.2. The consonant system	32
2.2.1. Introduction.....	32

2.2.2. Classical Latin.....	33
2.2.3. From Classical Latin to Late Latin	34
2.2.4. From Late Latin to Old Spanish.....	39
2.2.5. From Old Spanish to Medieval Spanish	40
2.2.5.1. Development of /j/	41
2.2.5.2. Development of /k/	44
2.2.5.3. Development of /c/.....	44
Chapter Three: The yod and the vowels. Basic data and some interpretations	46
3.1. Traditional descriptions	47
3.1.1. Menéndez Pidal.....	48
3.1.2. Alarcos	60
3.1.3. Lloyd and Craddock.....	61
3.2. Some generative treatments of the problem.....	68
3.2.1. Introduction.....	68
3.2.2. Bybee (1970).....	69
3.2.3. Otero (1971).....	77
3.2.4. Hartman (1974).....	88
3.2.5. Pensado (1984).....	95
Chapter Four: Summary of the data to be explained	100
4.1. Introduction.....	100
4.2. Cases of direct palatalization by yod	102
4.3. Cases of preservation of the original Classical Latin sequence.....	104

4.4. Cases where the yod is born as a consequence of the vocalization of a velar consonant in the position of a syllable coda	105
4.4.1. Vocalization of /gn/, /g'l/, /k'V/, /t'V/, /kt/, /ks/	106
4.4.2. The process of metathesis and its variants	110
4.4.3. Cases of syncope of the posttonic vowel (or loss of a voiced intervocalic consonant)	112
4.4.4. Charts	113
Chapter Five: A feature geometry analysis.....	116
5.1. Theoretical background	116
5.1.1. Introduction.....	116
5.1.1.1. Basic objective	117
5.1.1.2. Basic motivation	117
5.1.1.3. Tools. Basic operations and constraints.....	118
5.1.2. The geometry of the features	121
5.1.2.1. Sagey 1986.....	123
5.1.2.2. The place of articulation node.....	127
5.1.2.3. Jung 1991	129
5.2. Analysis.....	135
5.2.1. Introduction.....	135
5.2.2. Detailed account.....	138
5.2.2.1. Introduction.....	138

5.2.2.2. Description of the sounds.....	141
5.2.2.2.1. Classical Latin consonants	141
5.2.2.2.2. Late Latin-Old Spanish consonants	143
5.2.2.2.3. Classical Latin vowels	147
5.2.2.2.4. Late Latin-I vowels	149
5.2.2.2.5. Late Latin-Old Spanish vowels.....	150
5.2.2.2.6. The palatal glide (yod).....	152
5.2.2.3. Implementation of the analysis to the actual data to be accounted	153
5.2.2.3.1. Examples with a palatalized result of the sequence “consonant + yod”.....	155
5.2.2.3.2. Cases of preservation of the original Latin sequence “consonant +yod”.....	163
5.2.2.3.3. Cases where the yod is born as a consequence of the vocalization of a velar consonant in the position of a syllable coda.....	168
Chapter Six: Summary and Conclusions	183
Notes	194
References.....	203
