<b>Part I Introduction and Overview</b>	<b>1</b>
<b>1 Introduction to <i>Sharks of the Open Ocean</i></b>	<b>3</b>
<i>Ellen K. Pikitch, Merry D. Camhi and Elizabeth A. Babcock</i>	
Introduction	3
The need for oceanic shark research and management	4
Evaluating the conservation status of open ocean sharks	6
The future of oceanic sharks	8
References	10
<b>2 Pelagic Elasmobranch Diversity</b>	<b>14</b>
<i>Leonard J. V. Compagno</i>	
Introduction	14
Pelagic shark diversity	15
Pelagic sharks in perspective	20
Acknowledgments	22
References	22
<b>3 The Reproductive Biology of Pelagic Elasmobranchs</b>	<b>24</b>
<i>Franklin F. Snelson Jr., Brenda L. Roman and George H. Burgess</i>	
Introduction	24
Methods and definitions	25
Modes of reproduction	25
Reproductive trends in pelagic elasmobranchs	27
Reproduction in lamniform sharks	28
Litter size	28
Birth size	30
Gestation period	31
Reproductive periodicity	32

Age and size at maturity	34
Development	36
Reproduction in requiem sharks	37
Litter size	37
Birth size	38
Gestation period	39
Reproductive periodicity	39
Age and size at maturity	39
Development	40
Reproduction in the pelagic stingray	41
Litter size	41
Birth size	41
Gestation period	41
Reproductive periodicity	42
Age and size at maturity	42
Development	42
Discussion	43
References	45
<b>Part II Life History and Status of Pelagic Elasmobranchs</b>	<b>55</b>
Introduction	57
Biology and ecology	57
Fisheries and status	58
Conclusion	59
<b>4 The Biology and Ecology of Thresher Sharks (Alopiidae)</b>	<b>60</b>
<i>Susan E. Smith, Randall C. Rasmussen, Darlene A. Ramon and Gregor M. Cailliet</i>	
Introduction	60
Distribution and movements	60
Biology and ecology	62
Age and growth	62
Reproduction	64
Diet	64
Threats and status	65
Acknowledgments	66
References	66
<b>5 The Biology and Ecology of the White Shark, <i>Carcharodon carcharias</i></b>	<b>69</b>
<i>Barry D. Bruce</i>	
Introduction	69
Distribution, movements, and stock structure	70
Geographic distribution	70
Tagging studies and in situ observations	71

Seasonal movements	71
Effects of temperature	71
Stock structure	72
Biology and ecology	72
Age and growth	72
Mortality	74
Reproduction	74
Diet	75
Threats and status	75
Acknowledgments	76
References	76
<b>6 Case Study: White Shark Movements in the North Pacific Pelagic Ecosystem</b>	<b>82</b>
<i>Andre M. Boustany, Kevin C. M. Weng, Scot D. Anderson, Peter Pyle and Barbara A. Block</i>	
Introduction	82
Methods and Results	83
References	85
<b>7 The Biology and Ecology of the Shortfin Mako Shark, <i>Isurus oxyrinchus</i></b>	<b>87</b>
<i>John D. Stevens</i>	
Introduction	87
Biology and ecology	88
Age and growth	88
Reproduction	89
Diet	89
Distribution and movements	89
Distribution	89
Migration and movements	89
Threats and status	90
Fisheries	90
Stock structure and status	91
References	91
<b>8 The Biology and Ecology of the Salmon Shark, <i>Lamna ditropis</i></b>	<b>95</b>
<i>Kenneth J. Goldman and John A. Musick</i>	
Introduction	95
Biology and ecology	96
Distribution and movements	98
Threats and status	100

Acknowledgments	101
References	102
<b>9 The Biology and Ecology of the Porbeagle Shark, <i>Lamna nasus</i></b>	<b>105</b>
<i>Malcolm P. Francis, Lisa J. Natanson and Steven E. Campana</i>	
Introduction	105
Distribution, movements, and stock structure	106
Biology and ecology	107
Length–length and length–weight relationships	107
Length at birth and maturity	107
Growth, maturity, and recruitment	107
Maximum length, longevity, and natural mortality	109
Length, age, and sex composition	109
Reproduction	110
Diet	110
Threats and status	110
Fisheries	110
Stock status	111
Acknowledgments	111
References	111
<b>10 The Biology and Ecology of the Silky Shark, <i>Carcharhinus falciformis</i></b>	<b>114</b>
<i>Ramón Bonfil</i>	
Introduction	114
Distribution, movements, and stock structure	115
Geographic, depth, and age-related distribution	115
Movements and migrations	117
Stock structure and genetic studies	117
Biology and ecology	119
Reproduction	119
Age and growth	121
Diet	122
Threats and status	122
Silky sharks in tropical fisheries	122
Stock assessment and fisheries management	123
Conservation of silky sharks	124
References	125
<b>11 The Biology and Ecology of the Oceanic Whitetip Shark, <i>Carcharhinus longimanus</i></b>	<b>128</b>
<i>Ramón Bonfil, Shelley Clarke and Hideki Nakano</i>	
Introduction	128
Distribution and movements	129

Biology and ecology	131
Diet	131
Reproduction	131
Age and growth	132
Demographic analyses	133
Fisheries	134
Catch and catch-rate data	134
Utilization	135
Management and conservation	136
Acknowledgments	137
References	137
<b>12 The Biology and Ecology of the Blue Shark, <i>Prionace glauca</i></b>	<b>140</b>
<i>Hideki Nakano and John D. Stevens</i>	
Introduction	140
Biology and ecology	141
Age and growth	141
Reproduction	141
Diet	142
Distribution and movements	143
Distribution	143
Migration and movements	143
Threats and status	145
Fisheries	145
Population status	147
Acknowledgments	148
References	148
<b>13 The Biology and Ecology of the Pelagic Stingray, <i>Pteroplatytrygon violacea</i> (Bonaparte, 1832)</b>	<b>152</b>
<i>Julie A. Neer</i>	
Introduction	152
Biology and ecology	153
Distribution and movements	155
Threats and status	157
Conclusions	157
Acknowledgments	158
References	158
<b>Part III Trends in Catches and Abundance of Pelagic Sharks</b>	<b>161</b>
Introduction	163
Description of fisheries and catch data	163

	Abundance trends from catch-rate data	164
	Recommendations	165
	References	165
<b>14</b>	<b>A Global Overview of Commercial Fisheries for Open Ocean Sharks</b>	<b>166</b>
	<i>Merry D. Camhi, Elizabeth Lauck, Ellen K. Pikitch and Elizabeth A. Babcock</i>	
	Introduction	166
	Data limitations and collection efforts	167
	Global elasmobranch catches	170
	Pelagic sharks in Atlantic Ocean fisheries	172
	Pelagic sharks in Pacific Ocean fisheries	174
	Pelagic sharks in Indian Ocean fisheries	175
	A catalog of pelagic-shark-fishing nations	176
	Major pelagic-shark-fishing nations	179
	Moderate pelagic-shark-fishing nations	182
	Discussion	185
	Acknowledgments	186

<b>17 Catches of Pelagic Sharks by Subsurface Longline Fisheries in the South Atlantic Ocean during the Last Century: A Review of Available Data with Emphasis on Uruguay and Brazil</b>	<b>213</b>
<i>Fabio H. V. Hazin, Matt K. Broadhurst, Alberto F. Amorim, Carlos A. Arfelli and Andres Domingo</i>	
Introduction	214
Catches of pelagic sharks by distant-water longline fleets	215
Japan	215
China	215
Taiwan	215
Korea	216
Spain	216
Catches of pelagic sharks by longline fleets from coastal nations	216
Uruguay	217
Brazil	219
Factors influencing small-scale temporal and spatial trends in catches of blue shark	223
Management of pelagic sharks and directions for future research	225
Conclusions	226
Acknowledgments	226
References	227
<b>18 Case Study: Blue Shark Catch-Rate Patterns from the Portuguese Swordfish Longline Fishery in the Azores</b>	<b>230</b>
<i>Alexandre Aires-da-Silva, Rogério Lopes Ferreira and João Gil Pereira</i>	
Introduction	230
Fishing seasons	231
Standardized catch rates	232
Length–frequency samples	233
Conclusions	233
Acknowledgments	234
References	234
<b>19 Case Study: Trends in Blue Shark Abundance in the Western North Atlantic As Determined by a Fishery-Independent Survey</b>	<b>236</b>
<i>Robert E. Hueter and Colin A. Simpfendorfer</i>	
Introduction	236
Survey catch records	237

	Trends in abundance	238
	Acknowledgments	240
	References	241
<b>20</b>	<b>Case Study: Elasmobranch Bycatch in the Pelagic Longline Fishery off the Southeastern United States, 1992–1997</b>	<b>242</b>
	<i>Lawrence R. Beerkircher, Enric Cortés and Mahmood S. Shivji</i>	
	Introduction	242
	Methods and Results	242
	Acknowledgments	246
	References	246
<b>21</b>	<b>Pelagic Shark Fisheries in the Indian Ocean</b>	<b>247</b>
	<i>Malcolm J. Smale</i>	
	Introduction	247
	Shark catches	248
	Commonly caught species	252
	Lamnidae	252
	Alopiidae	253
	Carcharhinidae	253
	Management and conservation	254
	Acknowledgments	255
	References	255
<b>22</b>	<b>Case Study: The Bycatch of Pelagic Sharks in Australia's Tuna Longline Fisheries</b>	<b>260</b>
	<i>John D. Stevens and Sally E. Wayte</i>	
	Introduction	260
	Species composition	261
	Catch rates and catch	262
	Length and sex composition	265
	Stock status	267
	Acknowledgments	267
	References	267
<b>23</b>	<b>Case Study: Catch and Management of Pelagic Sharks in Hawaii and the US Western Pacific Region</b>	<b>268</b>
	<i>Paul J. Dalzell, R. Michael Laurs and Wayne R. Haight</i>	
	Introduction	268
	Catches and catch rates	269
	Stock status	271
	Economics and management	272
	Conclusions	273
	Acknowledgments	273
	References	273

<b>24</b>	<b>Case Study: Pelagic Shark Fisheries along the West Coast of Mexico</b>	<b>275</b>
	<i>Oscar Sosa-Nishizaki, J. Fernando Márquez-Farías and Carlos J. Villavicencio-Garayzar</i>	
	Introduction	275
	Artisanal fishery	276
	Pelagic longline fishery	277
	Gill-net fisheries	277
	Shrimp trawl bycatch	278
	Fisheries interactions and stock assessment	278
	Regulations	279
	Conclusions	280
	References	281
<b>Part IV</b>	<b>Methods to Improve Understanding of Pelagic Sharks: Demographics, Assessment, and Stock Structure</b>	<b>283</b>
	Introduction	285
	Demography	285
	Stock structure and movement	286
	Stock assessment	286
	Conclusion	287
<b>25</b>	<b>Intrinsic Rates of Increase in Pelagic Elasmobranchs</b>	<b>288</b>
	<i>Susan E. Smith, David W. Au and Christina Show</i>	
	Introduction	288
	Methods	290
	Estimating the intrinsic rate of increase $r_{Z(MSY)}$ or rebound potential	290
	Choosing and applying life-history parameters	291
	Precision	292
	Results	292
	Discussion	292
	Acknowledgments	294
	References	294
<b>26</b>	<b>Shark Productivity and Reproductive Protection, and a Comparison with Teleosts</b>	<b>298</b>
	<i>David W. Au, Susan E. Smith and Christina Show</i>	
	Introduction	298
	Methods	299
	Estimating productivity	299
	Parameters of rebound potential	299
	Reproductive protection against collapse and time for recovery	302
	Results	303
	The mortality corresponding to MSY	303

Productivities: sharks and teleosts	303
Reproductive protection against collapse and recovery times from depletion	304
Discussion	306
Acknowledgments	306
References	306
<b>27 Comparative Life History and Demography of Pelagic Sharks</b>	<b>309</b>
<i>Enric Cortés</i>	
Introduction	309
Methods	310
Analysis of differences in life-history traits among species	310
Estimation of population parameters and elasticities	311
The simulation and projection process	313
Results	314
Differences in life-history traits among pelagic shark species	314
Simulation of population parameters and elasticities, and position of the inflection point of population growth curves	314
Discussion	316
Links between life-history traits and population statistics of pelagic sharks: conservation and management implications	316
Interpretation of rates of increase and the position of the inflection point of population growth curves	318
Acknowledgments	320
References	320
<b>28 Molecular Markers and Genetic Population Structure of Pelagic Sharks</b>	<b>323</b>
<i>Edward J. Heist</i>	
Introduction	323
Molecular markers	325
Genetic stock structure of pelagic sharks	328
Conclusions	329
Acknowledgments	330
References	330
<b>29 Case Study: Rapid Species Identification of Pelagic Shark Tissues Using Genetic Approaches</b>	<b>334</b>
<i>Mahmood S. Shivji, Melissa Pank, Lisa J. Natanson, Nancy E. Kohler and Michael J. Stanhope</i>	
Introduction	334
General methods	335
Case studies	335
Conclusions	337

Acknowledgments	337
References	338
<b>30 Stock Structure of the Blue Shark (<i>Prionace glauca</i>) in the North Atlantic Ocean Based on Tagging Data</b>	<b>339</b>
<i>Nancy E. Kohler and Patricia A. Turner</i>	
Introduction	339
Methods	341
Results and discussion	341
Distribution of sizes and sex ratios	342
Transregional movements	342
Summary	347
Acknowledgments	348

<b>31 Why Are Bayesian Methods Useful for the Stock Assessment of Sharks?</b>	<b>351</b>
<i>Murdoch K. McAllister, Ellen K. Pikitch and Elizabeth A. Babcock</i>	
Introduction	351
What should be the main goal of stock assessment for sharks?	352
How has advice been provided for shark fishery management?	352
Demographic analysis	352
Fitting surplus production models to times-series of observations on relative abundance	354
Age-structured, length-structured, or stage-structured modeling	355
Some problems encountered with conventional assessment methods	355
Compiling basic biological and fishery data	355
Integrating different types of data and results	356
Reconciling contradictory data, information, and results	356
Thoroughly accounting for uncertainty	356
Conveying uncertainty in a meaningful way to decision makers	357
How should uncertainty be dealt with in stock assessment?	357
Identify alternative plausible hypotheses	358
Evaluate the weight of evidence in support of each hypothesis	358
Use decision tables without mathematical probabilities	358
Bayesian methods	359
Bayes' theorem	359
Example: National Marine Fisheries Service assessment of Atlantic coastal sharks	361
A Bayesian stock assessment of Atlantic large coastal sharks	361
Recommendations for learning Bayesian stock assessment methods	363
Conclusions	364
Acknowledgments	364
References	364

<b>32</b>	<b>Embracing Movement and Stock Structure for Assessment of <i>Galeorhinus galeus</i> Harvested off Southern Australia</b>	<b>369</b>
	<i>Terence I. Walker, Bruce L. Taylor, Lauren P. Brown and André E. Punt</i>	
	Introduction	369
	Stock structure and movement patterns	373
	Spatially aggregated stock assessment	374
	Stock assessment incorporating movement rates and stock structure	375
	Movement simulation model	376
	Spatially structured stock assessment model	377
	Movement estimation within an integrated tag model	377
	Conclusions	384
	Appendix: movement estimation within an integrated tag model	385
	Model parameters	385
	Likelihood function	386
	Movement and survival	386
	Mortality	387
	Growth	388
	Acknowledgments	388
	References	389
<b>Part V</b>	<b>Conservation and Management Outlook for Pelagic Sharks</b>	<b>393</b>
	Introduction	395
	Data collection and assessment	395
	Shark fishery management	395
	New technologies	396
	Conclusion	396
<b>33</b>	<b>Conservation Status of Pelagic Elasmobranchs</b>	<b>397</b>
	<i>Merry D. Camhi</i>	
	Introduction	397
	Threats	398
	Conservation status	400
	Discussion	410
	Acknowledgments	412
	References	412
<b>34</b>	<b>Domestic and International Management for Pelagic Sharks</b>	<b>418</b>
	<i>Merry D. Camhi, Sonja V. Fordham and Sarah L. Fowler</i>	
	Introduction	418
	Management tools available for pelagic sharks	419
	Fishing restrictions	420

Prohibitions on finning	420
Species protections	423
International and regional management action	425
Fisheries agreements	425
Wildlife conservation agreements	430
Domestic management action	433
Conclusions	437
Recommendations	438
Acknowledgments	439
