Anca-Diana Barbu

Investing in Renewable Energy Sources

*An Assessment of Non-Technological Issues
in Central and Eastern Europe*

Verlag Dr. Kovač
Hamburg 2007

TABLE OF CONTENT

Chapter one Introduction

1.1. Scope and structure of the paper.....	1
1.2. The new Member States and more than a decade of transition	5
1.2.1 The transition and some of its contentious effects.....	6
1.2.2. The role of the initial condition	15
1.3. Conclusions.....	17
References.....	19

Chapter two Promotion of renewable energy sources in the European Union

2.1. The Renewable Directive and its implications.....	22
2.2. Myths and facts about renewable technologies.....	32
2.3. Developing renewable energy: lessons learnt from EU-15.....	42
2.4. Promoting renewable energy sources in the new Member States.....	44
2.4.1. The driving forces for RES development in the new Member States	45
2.4.2. Renewable energy policies in the new Member States	50
2.5. Establishing an adequate RES-E framework in the NMS: a complex issue.....	54
References	56
Annex 2.I.....	61
Annex 2.II.....	62
Annex 2.III.....	67
Annex 2.VI.....	68

Chapter three Energy markets and the development of renewable energy sources in the new Member States

3.1. Liberalisation of the European energy market	74
3.1.1. Two drivers for energy market liberalisation	76
3.1.1.1. Market dominance by incumbent utilities	76
3.1.1.2. Scarcity of natural resources	81

3.1.2. The impact of liberalisation in European energy market ...	85
3.1.2.1 The Electricity Directive	87
3.1.2.2. Directive of the European Parliament and of the council on energy end-use efficiency and energy services.....	96
3.1.3. Energy systems in the new Member States	99
3.1.3.1. Energy market reforms in the NMS	100
3.1.3.2. Energy market developments	101
3.2. Challenges concerning the development of renewable energy sources in the new Member States	112
3.2.1. The relationship between Central and Eastern Europe region and Russian Federation and its impact on the energy sector development	113
3.2.2. The nuclear power question	117
3.2.3. The "low-hanging fruit" of energy efficiency	122
3.3. The European energy sector: a fast changing environment and a challenge for renewable energy proponents	131
References.....	136
Annex 3.I.....	143
Annex 3.II.....	144
Annex 3.III.....	152

Chapter four Investment context for RES-E in the new Member States

4.1. The macroeconomic context	154
4.1.1. External pressures and their potential impact on the European economy	155
4.1.1.1. Some developments in the global economy and their impact on European economies	156
4.1.1.2. Changes in commodity prices and their impact on European markets	158
4.1.2. Fiscal policies and labour markets and their impact on economic growth: lessons learnt from EU-15	165
4.2. The status quo in the new Member States	168
4.2.1. Monetary and fiscal policies in the new Member States ...	169
4.2.2. Labour markets in the new Member States	177
4.2.3. New Member States: between a rock and a hard place ...	181
4.3. Investing in renewable energy sources: a comparative analysis between the new Member States and the EU-15	183

4.3.1. RES-E market: lead-times, transaction costs and risk factors; a comparative analysis between EU-15 and the new Member States	184
4.3.2. The ADMIRE-REBUS analytical framework for risk factors; experience with EU-15.....	194
4.3.3. Risk factors associated with investments in RES-E in the new Member States	196
4.3.4. Investing in the new Member States in renewable energy: how risky it really is?	200
4.4. Financing RES-E in the new Member States: the “who” and “how” questions	201
4.4.1. Financing renewable energy sources: issues at hand	203
4.4.2. Financing renewable energy sources in the new Member States	204
4.5. EU Structural funds, one window of opportunity for investments in RES-E in the new Member States	221
4.5.1. Pre-accession instruments: lessons learnt	224
4.5.2. Structural Funds: one option to finance renewable energy sources in the new Member States	227
4.6. Some answers to the ‘who’ and ‘how’ questions: author’s recommendations.....	232
References.....	241
Annex 4.I.....	249
Annex 4.II.....	251

Chapter five The ADMIRE-REBUS model: description of the model mechanisms, input data, main assumptions, scenarios and results

5.1. Model description	258
5.1.1. Demand and supply curves and the calculation of the equilibrium price	259
5.1.1.1. The demand curves	259
5.1.1.2. The supply curves	261
5.1.1.3. Matching demand and supply curves and the formation of the equilibrium price	262
5.1.2. The calculation of the Required Green Price	265
5.1.3. Risk assessment in the ADMIRE-REBUS model	266
5.1.3.1. The Value at Risk Concept	267
5.1.3.2. Risk adjustment in the ADMIRE-REBUS model	268

5.1.4. Estimation of potentials for electricity production generated with renewable energy sources in the model.....	271
5.1.4.1. Estimating the potential for electricity generation from biomass and waste	271
5.1.4.2. Estimating the potentials for electricity generation from wind onshore and solar photovoltaics in the new Member States.....	282
5.2. Case studies and model results	284
5.2.1. Description of the base scenarios COP and HOP05	285
5.2.1.1. Continuation of present policies scenario (COP)	286
5.2.1.2. Harmonised Europe starting with year 2005 (HOP05).....	286
5.2.2. Case study I: Electricity production from renewable energy sources in the new Member States in COP and HOP05 scenarios	287
5.2.3. Case study II: Development of renewable energy sources in the new Member States under the assumption of a more developed capital market in the region (e.g. increased availability of risk capital financing) and higher degree of policy harmonisation across Europe	289
5.2.4. Case study III: An assessment of the premiums paid to investors in RES-E technologies in Central and Eastern Europe under the COP scenario and within the context of a more developed capital market	290
5.2.5. Case study IV: Assessment of the potential for electricity generation from renewable energy sources in Romania by 2010	291
5.2.5.1. Country background	292
5.2.5.2. Energy markets and renewable energy sources in Romania	293
5.2.5.3. Renewable energy policy in Romania	297
5.2.5.4. Estimation of the potential for electricity generation from renewable energy sources in Romania	299
5.2.5.5. Scenarios used to develop the case study	313
5.3. Suggestions for model improvements	319
References.....	322
Annex 5.I.....	328
Annex 5.II.....	335
Annex 5.III.....	336
Annex 5.VI.....	337

Annex 5.V.....	338
Annex 5.VI.....	341
Annex 5.VII.....	343
Annex 5.VIII.....	345
