Introduction ....................................................................................... xix

Making the Best of Two Worlds: Diadromy in the Evolution, Ecology, and Conservation of Aquatic Organisms ......................... 1
Robert M. McDowall

Thomas P. Quinn, Katy Doctor, Neala Kendall, and Harry B. Rich, Jr.

Section 1: The Dynamic Nature of Diadromy

Preamble ......................................................................................... 43
Roger A. Rulifson

The Origin of Fish Migration: The Random Escapement Hypothesis ................................................. 45
Katsumi Tsukamoto, Michael J. Miller, Aya Kotake, Jun Aoyama, and Kazuo Uchida

Contrasting Evolutionary Pathways of Anadromy in Euteleostean Fishes ........................................ 63
Julian J. Dodson, Jérôme Laroche, and Frédéric Lecomte

Postglacial Recolonization and the Loss of Anadromy in Rainbow Smelt from Coastal Newfoundland ................................................................. 79
Ian R. Bradbury, Mark W. Coulson, Steven E. Campana, Eric Baggs, and Paul Bentzen

Diadromy as a Conditional Strategy: Patterns and Drivers of Eel Movements in Continental Habitats ................................................................. 97
James D. McCleave and Eric Edeline

Variability in Diadromous Behavior of a Northern Coregonid Based on Scanning Proton Microprobe Analysis of Otolith Strontium ........................................ 121
Kimberly L. Howland, John A. Babaluk, Doug Chiperzak, Ross F. Tallman, and George Low

Migration Patterns of Striped Bass through Nonnatal Estuaries of the U.S. Atlantic Coast .......... 135
Thomas M. Grothues, Kenneth W. Able, Jacque Carter, and Timothy W. Arienti

Section 2: Climate Change and Anthropogenic Influences

Preamble ......................................................................................... 151
Christine M. Moffitt

Planning the Management of Pacific Salmon in a Changing Climate ................................................. 155
Richard J. Beamish, Ruston M. Sweeting, and Chrys M. Neville

Learning from the Past to Predict the Future: Responses of European Diadromous Fish to Climate Change ................................................................. 175
Géraldine Lassalle, Mélanie Béguer, Laurent Beaulaton, and Éric Rochard
Taking It with You When You Go: How Perturbations to the Freshwater Environment, Including Temperature, Dams, and Contaminants, Affect Marine Survival of Salmon

Stephen D. McCormick, Darren T. Lerner, Michelle Y. Monette, Katherine Nieves-Puigdoller, John T. Kelly, and Björn T. Björnsson

Models of Past, Present, and Future Stream Temperatures for Selected Atlantic Salmon Rivers in Northeastern North America

Wendy A. Monk and R. Allen Curry

Review of Ocean-Atmospheric Factors in the Atlantic and Pacific Oceans Influencing Spawning and Recruitment of Anguillid Eels

Michael J. Miller, Shingo Kimura, Kevin D. Friedland, Brian Knights, Heeyong Kim, Donald J. Jellyman, and Katsumi Tsukamoto

Section 3: Ocean Migration of Diadromous Fishes in a Changing Global Environment

Preamble

Michael J. Dadswell

Modeling Larval Migration Routes and Spawning Areas of Anguillid Eels of New Zealand and Australia

Donald J. Jellyman and Melissa M. Bowen

Migration of Silver American Eels through a Macrotidal Estuary and Bay

Rodney G. Bradford, Jonathan W. Carr, Fred H. Page, and Fred Whoriskey

Assessing Estuarine and Coastal Migration and Survival of Wild Atlantic Salmon Smolts from the Narraguagus River, Maine Using Ultrasonic Telemetry

John F. Kocik, James P. Hawkes, Timothy F. Sheehan, Paul A. Music, and Kenneth F. Beland

Tracking Diadromous Fishes at Sea: The Electronic Future Using Hybrid Acoustic and Archival Tags

Michael J. W. Stokesbury, Michael J. Dadswell, Kim N. Holland, George D. Jackson, W. Don Bowen, and Ronald K. O’Dor

What Comes Down Must Go Up: The Migration Cycle of Juvenile-Return Anadromous Taxa

Kim N. I. Bell

Duration of the Oceanic Phase for Inanga Whitebait (Galaxiidae) Is Inversely Related to Growth Rate at Sea

David K. Rowe and Greg Kelly

Life History Characteristics of a Sicydiinae Goby in Japan, Compared with Its Relatives and Other Amphidromous Fishes

Midori Iida, Shun Watanabe, and Katsumi Tsukamoto

Section 4: Linkages with Ecosystem Energetics

Preamble

Richard A. Cunjak

Tracking Sockeye Salmon Population Dynamics from Lake Sediment Cores: A Review and Synthesis

Irene Gregory-Eaves, Daniel T. Selbie, Jon N. Sweetman, Bruce P. Finney, and John P. Smol
Pacific Salmon, Marine-Derived Nutrients, and the Characteristics of Aquatic and Riparian Ecosystems ................................................................. 395
Robert J. Naiman, James M. Helfield, Krista K. Bartz, Deanne C. Drake, and Jon M. Honea

Detecting Marine Nutrient and Organic Matter Inputs into Multiple Trophic Levels in Streams of Atlantic Canada and France ........................................ 427
Timothy D. Jardine, Jean-Marc Roussel, Sean C. Mitchell, and Richard A. Cunjak

Spatial and Temporal Variability in the Trophic Ecology of Atlantic Salmon in the North Atlantic Inferred from Analyses of Stable Isotope Signatures ................ 447
R. Niloshini Sinnatamby, J. Brian Dempson, Gerald Chaput, François Caron, Eero Niemelä, Jaakko Erkinaro, and Michael Power

A Preliminary Investigation of the Effects of Anadromous Arctic Charr on Food Web Structure and Nutrient Transport in Coastal Arctic Lakes ................. 465
Heidi K. Swanson and Karen A. Kidd

The Role of Anadromous Sea Lamprey in Nutrient and Material Transport between Marine and Freshwater Environments ........................................ 485
Keith H. Nislow and Boyd E. Kynard

Section 5: Population and Habitat Restoration

Preamble ........................................................................................................ 495
Alex Haro

Restoration and Enhancement of Salmonid Populations and Habitats with Special Reference to Atlantic Salmon ........................................... 497
Bror Jonsson and Nina Jonsson

Lexicon of Life Cycle Diversity in Diadromous and Other Fishes .................. 537
David H. Secor and Lisa A. Kerr

Fishway Evaluations for Better Bioengineering: An Integrative Approach .... 557
Theodore Castro-Santos, Aline Cotel, and Paul Webb

Status of Diadromous Fish Species in the Restored East Hammar Marsh in Southern Iraq ........................................................................................................ 577
Abdul-Razak M. Mohamed, Najah A. Hussain, Sajed S. Al-Noor, Brian Coad, and Falah M. Mustak

Ryan J. Woodland, David H. Secor, and Edwin J. Niklitschek

Section 6: Management and Governance of Diadromous Fishes: Sociological, Economic, Political, and Ecological Considerations

Preamble ........................................................................................................ 605
Ronald J. Klauda and Katherine L. Smith

Challenges to Sustaining Diadromous Fishes through 2100: Lessons Learned from Western North America ......................................................... 609
Robert T. Lackey
Salmon and Eulachon in Ecosystem Space and Time: A Plea for Wider Collaboration and Data Integration

Nigel Haggan, George D. Jackson, and Paul Lacroix

Assessing Management Plans for the Recovery of the European Eel: A Need for Multi-Objective Analyses

Daniele Bevacqua, Paco Melià, Alain Crivelli, Marino Gatto, and Giulio A. De Leo

Can the Ecosystem Approach Improve Management of Tropical Estuarine Fisheries for Diadromous Species?

Stephen J. M. Blaber

Whose Fish? Managing Salmonidae and Humans in Complex Social–Ecological Systems: Examples from the Baltic Sea Region

Monica Hammer

Socioeconomic and Biopolitical Linkages in the Management of Tropical Shads

Stephen J. M. Blaber

Identification of Diadromous Fish Species on Which to Focus River Restoration: An Example Using an Eco-Anthropological Approach (The Seine Basin, France)

Eric Rochard, Patricia Pellegrini, Julie Marchal, Mélanie Béguer, Dominique Ombredane, Géraldine Lasalle, Erwan Menvielle, and Jean-Luc Bagliniere

Natural Heritage, Anthropogenic Impacts, and Biopolitical Issues Related to the Status and Sustainable Management of American Eel: A Retrospective Analysis and Management Perspective at the Population Level

Rob MacGregor, John M. Casselman, William A. Allen, Tim Haxton, John M. Dettmers, Alastair Mathers, Steve LaPan, Thomas C. Pratt, Peter Thompson, Max Stanfield, Lucian Marcogliese, and Jean-Denis Dutil

Challenges and Opportunities for Co-Management of a Migratory Fish (Prochilodus nigricans) in the Peruvian Amazon

Elizabeth P. Anderson, Mariana Montoya, Aldo Soto, Hernán Flores, and Michael McCain

Conservation of Juvenile Hilsa (Jatka) in Bangladesh: Need to Address the Livelihood of Fishers

Mohammad Abdul Latif Siddique

The Santee River Basin Accord: Restoring Diadromous Fish through Prioritization of Subbasins

Amanda K. Hill

Antioxidants, Irrigation, and Atlantic Salmon

Joan G. Trial

How Policy, Politics, and Science Shaped a 25-Year Conflict over Alewife in the St. Croix River, New Brunswick–Maine

Theodore V. Willis

Synopses

Concluding Remarks on the Halifax Diadromy Symposium

Robert M. McDowall

Changing Themes in the Study of Diadromous Fishes

Thomas P. Quinn
CONTENTS ix

Poster Sessions

Preamble .......................................................................................................................... 829
  John E. Cooper

Bay-Scale Population Differentiation among Anadromous Rainbow Smelt......................... 831
  Mark W. Coulson and Paul Bentzen

Population Structure of American Shad within and among Canadian Rivers....................... 835
  Daniel J. Hasselman, Rod G. Bradford, and Paul Bentzen

A Comprehensive Approach to Understanding Diadromy at the Species Level: Learning from
the Spawning Migration of Hickory Shad ....................................................................... 837
  Joshua G. Muraskas and Roger A. Rulifson

Stream Water Creates a Discernable Odor Gradient that Migratory, Juvenile American Eels
May Follow Inshore ....................................................................................................... 841
  Peter W. Sorensen

Partial Evolutionary Divergence of a Migratory Pheromone between Northern and Southern
Hemisphere Lampreys ................................................................................................. 845
  Cindy F. Baker, Michael Stewart, Jared M. Fine, and Peter W. Sorensen

Spawning Areas of Anguillid Eels in the World ................................................................ 847
  Jun Aoyama

Migratory Characteristics as a Key Factor for Determining the Population Structure of a
Diadromous Species: Eels Tend to Be Panmictic while Salmon Divide Populations with
Ease ................................................................................................................................. 851
  Yuki Minegishi, Jun Aoyama, and Katsumi Tsukamoto

Climate Change May Have Affected Growth and Life History in Atlantic Salmon Juveniles
over the Past 30 Years ................................................................................................. 855
  Etienne Rivot, Charle Perrier, Céline Jouanin, Jean-Marc Roussel, Pascal Riera,
  Jean-Pierre Porcher, and Jean-Luc Baglinière

The Spawning Habitat of Anadromous Rainbow Smelt: Trouble at the Tidal Interface ............. 859
  Bradford C. Chase

Differences in Accumulation Pattern of Organochlorine Compounds in Masu Salmon between
Fluvial and Sea-Run Forms ......................................................................................... 863
  Mayuko Oka, Takaomi Arai, and Nobuyuki Miyazaki

A Contemporary Understanding of the Delaware River Atlantic Sturgeon: Survival in a
Highly Impacted Aquatic Ecosystem ............................................................................. 867
  Philip C. Simpson and Dewayne A. Fox

European Eels from Deep Mediterranean Waters .............................................................. 871
  Marco L. Bianchini, Gloria Vaggelli, Roberto Cosio, Giovanni Battista Palmegiano,
  Francesco Gai, Luciana Sola, Anna Rita Rossi, Donatella Crosetti, Giovanni Battista Giusto,
  Salvatore Gancitano, and Sergio Ragonese

Feeding and Prey of Pacific Lamprey in Coastal Waters of the Western North Pacific .............. 875
  Alexei M. Orlov, Richard J. Beamish, Andrei V. Vinnikov, and Dmitry Pelenev

The Early Life History and Migration of Japanese Eel Larvae ............................................. 879
  Akira Shinoda and Katsumi Tsukamoto
First Microchemical Examination of Abnormal Otoliths of Amphidromous Ayu ........................................883
Tao Ma, Mari Kuroki, Rikizo Ishida, and Katsumi Tsukamoto

Migration Scales of Catadromous Eels: Diversity and Evolution of Larval Migration Based on Their Distribution, Morphology, and Early Life History .........................................................887
Mari Kuroki, Jun Aoyama, Heeyong Kim, Michael J. Miller, Shingo Kimura, and Katsumi Tsukamoto

Using Physiological Telemetry and Intervention Experiments to Examine the Maladaptive Shift in Fraser River’s Late-Run Sockeye Salmon Spawning Migration ........................................891
Scott G. Hinch, Anthony P. Farrell, Steven J. Cooke, David A. Patterson, Mike F. LaPointe, David W. Welch, Karl K. English, Glenn T. Crossin, Kristi Miller, Richard E. Thompson, Glen van der Kraak, Ivan Olsens, Mark Shrimpton, and Michael S. Cooperman

Modeling the Migratory Patterns and Habitat Use of Migratory Coregonids in the Mackenzie River System .................................................................................................................895
Kimberly L. Howland, M. Van-Gerwen-Toyne, and R. Tallman

Rainbow Smelt Population Monitoring and Restoration on the Gulf of Maine Coast of Massachusetts .........................................................................................................................899
Bradford C. Chase, Matthew H. Ayer, and Scott P. Elzey

Restoration of Diadromy in an Endangered Fish: Do Atlantic Whitefish Covet the Sea? ..........................903
Adam M. Cook and Paul Bentzen

An Evaluation of Nature-Like Fishways for Passage of Anadromous Alewife ..............................................907
Abigail Franklin, Alex Haro, and Theodore Castro-Santos

Why Has the Japanese Eel Not Declined to the Levels of the European and American Eels? A Possible Explanation from the Movement and Age Structure of Growth-Phase Eels........911
Kazuki Yokouchi, Jun Aoyama, and Katsumi Tsukamoto

Evaluating Small Barrier Removal and Passage Improvement Scenarios to Enhance Diadromous Fish Restoration in the Penobscot Basin, Maine .........................................................915
Wesley S. Patrick and Rory Saunders

How Dammed Is Your Watershed: First Approximation of an Index to Relative Dammed-ness of U.S. Watersheds ....................................................................................................919
Mark A. Cantre and Amanda K. Hill

Poster Abstracts

Greater Genetic Differentiation and Complex Migratory Behavior of Striped Bass in the Canadian Portion of the Species’ Range ..................................................................................923
Paul Bentzen, Rod G. Bradford, and Ian G. Paterson

Buoyancy Regulation during the Freshwater–Marine Transition: Differential Use of Lipid by Hatchery and Wild Coho Salmon ....................................................................................923
Laurie A. Weitkamp

Diverse Life History Strategies amongst Brown Trout in a New Zealand Lowland River Catchment .................................................................924
Esben A. Kristensen, Gerard P. Closs, Ricky Olley, and Jonathan P. Kim

New Insights on American Eel Life History from Otolith Microchemistry ................................................925
Brian M. Jessop, David K. Cairns, Isabel Thibaults, and Wann-Nian Tseng
CONTENTS

Physiological Mechanisms of European Eel Upstream Migration Plasticity Are Stage-Dependant .............................................. 925
Helene Imbert, Rory Arrowsmith, Sylvie Dufour, and Pierre Elie

Silver Eel Tagging as a Method to Investigate the Migration Pattern in the Baltic Sea .......................................................... 926
Niklas B. Sjoberg, Erik Petersson, Willem Dekker, and Hakkan Wickstrom

Homing and Ranging Concepts Are Compatible with Low Recapture Rate of Yellow European Eels ....................................................... 926
Helene Imbert, Patrick Lambert, and Christian Rigaud

What Promotes Nondiadromous Recruitment in Migratory Galaxiids? ................................................................. 927
Andy S. Hicks, Gerry P. Class, Bruno David, Jon Waters, and Jonathan P. Kim

The Anadromous Arctic Char of Quttinirpaaq National Park, Ellesmere Island, Canada, as Determined by Otolith Strontium Distribution .................................................. 927
John A. Babaluk, James D. Reist, Richard J. Wastle, John (Iain) L. Campbell, and Norman M. Halden

Seasonal Substrate and Water Flow Preference of Year-0 White, Green, Pallid, Shovelnose, Lake, Shortnose, and Gulf Sturgeons .................................................................................................................................................. 928
Erika Parker, Boyd Kynard, and Martin Horgan

Eel Growth under the Influence of Global Warming and Ecosystem Perturbation ......................................................... 929
Francoise Daverat, Laurent Beaulaton, Russel Poole, Hakkan Wickstrom, Geraldine Lamaison, Jan Anderson, and Geraldine Lassalle

Behavior at High Temperature: Can Physiology Explain Movement of Atlantic Salmon to Cool Water? ........................................... 929
Cindy Breau, Richard A. Cunjak, and Steve J. Peake

Biological Characteristics and Population Status of Anadromous Brook Trout 66 Years after an Initial Study in Moser River, Nova Scotia, Canada ............................................................. 930
John L. MacMillan and Reginald J. Madden

From Local to Global Climate Change: Effects on Southern European Atlantic Salmon ......................................................... 931
Francis Juanes, America Valiente, Steve Gephard, and Eva Garcia-Vazquez

Behavior, Activity, and Movements of Juvenile Atlantic Salmon in Early Winter .......................................................... 931
Tommi Linnansaari and Richard A. Cunjak

Mark C. Sullivan, Marcy Howland, and Kenneth W. Able

Investigation into the Role of Water Velocity on Fish Habitat Selection ................................................................. 933
Zoya A. Pawlowsky, Mark Abrahams, Chris Katopodis, and Ross Tallman

Dealing with Changing Environments: Emerging Diseases and Invasive Species in Changing Landscapes ........................................ 933
Christine M. Moffitt

The Nature of Dispersal in Atlantic Salmon: Source-Sink Reversals Revealed by Contemporary and Long-Term Genetic Analyses ................................................................................................................. 934
Friso P. Palstra and Daniel E. Ruzzante

American Shad Migrations Revisited: Otolith Chemistry, Natal Origins, and Mixed Stock Compositions ......................................................... 934
Benjamin D. Walther and Simon R. Thorrold
Inshore Migration of Glass Eel Phase of Japanese Eel in Lake Hamana, Japan: Periodicity, Seasonality, and Recruitment Mechanisms ......................................................... 935
Nobuto Fukuda, Jun Aoyama, and Katsumi Tsukamoto

Migration Patterns of American Eel Determined with Fin Tissue Stable Isotope and Otolith Microchemistry Analyses ................................................................. 936
Marie Clément, Alyre Chiasson, Geoff Veinott, and David K. Cairns

The Oceanic Distribution of Alewives: An Examination of Seasonal and Interannual Patterns, and Bycatch Risk ............................................................. 936
Jacob Kritzer and Peter Black

Habitat Use and Timing by Bull Trout in Marine Waters of Northern Puget Sound, Washington, USA ................................................................. 937
Reg Reisenbichler, Steve Rubin, Michael Hayes, Fred Goetz, and Mike Parsley

Dynamic Network Topology: Towards Developing a Stream Network Perspective ................................................................. 938
Rebecca L. Flitcroft, Reeves Gordon, and Kelly Burnett

Evolutionary and Ecological Significance of Anadromy for Brook Char ................................................................. 938
R. Allen Curry, Eric Chernoff, and Tim D. Jardine

Beyond Diadromous Fishes: Diadromous Invertebrates Are Strong Interactors Too ................................................................. 939
Effie A. Greathouse and Jenna E. Compton

Quantification of Regional Differences in River Habitat Capacity for Atlantic Salmon in Eastern Canada—A Pilot Study ................................................................. 939
Robert G. Randall and Peter G. Amiro

Genetic Evaluation of Restoration Success in American Shad Returning to the James River, Virginia, USA ................................................................. 940
Aaron W. Aunins, Tom P. Gunter, John M. Epifanio, and Bonnie L. Brown

Conservation Concerns for Galaxias maculatus in Chile, South America ................................................................. 941
Evelyn Habit, Priscila Piedra, Roberto Cifuentes, Mark Belk, Pedro Victoriano, Juan Jose Ortiz, Daniel Ruzante, Victor Cussac, and Jorge Gonzalez

The Atlantic Coast Fish Habitat Partnership: Forming a Coast-Wide Alliance to Protect and Restore Diadromous Fish Habitat, USA ................................................................. 942
Jessie C. Thomas

Sustainability of American Eel in the St. Jones River, Delaware, USA: A Collaborative Approach towards Understanding Population Ecology ................................................................. 942
Collette M. Cairns, Dewayne A. Fox, Larissa L. Bailey, and Kyle Shertzer

Challenges of Conservation and Management of Anadromous Fish in Relicensing Proceedings for Hydropower Projects, USA ................................................................. 943
Melanie Harris and Jane Hannuksela
