1 Preventive detention: background, history and practice 1

A definition of 'preventive detention' 5
First: preventive detention permits 'detention' 6
Second: preventive detention is an executive order 7
Third: preventive detention is for a 'preventive purpose'
and not for the purpose of criminal charge, prosecution
or interrogation  7

Examples of preventive detention can be found in
times of war, for the purposes of public order
and counter-terrorism  9

Preventive detention as a response to Northern Ireland
terrorism in the 1970s 9

Preventive detention as a response to the First and
Second World Wars in the United Kingdom
and United States 10

Preventive detention for the purpose of public order
across the world 11

Binding over as a form of preventive detention 12

'Dangerous person' preventive detention 12

Preventive detention of the mentally ill, vagrants,
drug addicts and infectious 15

Immigration detention for a preventive purpose 16

The legality of preventive detention in
international law 16

The structure of this monograph 22
The right to personal liberty in international human rights law as a legal framework for the consideration of state preventive detention laws

The history of personal liberty 34
An interpretation of Article 9 ICCPR 39
The prohibition on arbitrary arrest and detention in Article 9(1) ICCPR imposes a higher standard than the principle of legality 40
The meaning of the prohibition on arbitrary detention was further clarified in the Mandate of the Working Group on Arbitrary Detention 43
The meaning of the prohibition on arbitrary detention in Article 9(1) ICCPR can be further ascertained from several key cases of the Human Rights Committee 44
The Human Rights Committee provided some early guidance on the meaning of Article 9(1) ICCPR 44
'Arbitrary detention' includes elements of 'inappropriateness', 'injustice', 'lack of predictability' and 'necessity': Hugo van Alphen 46
'Arbitrary detention' also requires necessity and proportionality: A v Australia 47
The Human Rights Committee has emphasised the requirement of 'proportionality' in applying Article 9(1) ICCPR on several occasions 49
The meaning of the principle of proportionality in Article 9(1) ICCPR in international law and in times of terrorism 50
Article 5 ECHR as an alternative legal framework for the consideration of state preventive detention laws 52
Article 5(1)(c) ECHR requires detention to be linked to a 'concrete and specific offence' 53
Article 5(1)(c) ECHR incorporates the principle of proportionality 56
Minimum procedural human rights safeguards apply under Article 9(2)–(5) ICCPR and Article 5(2)–(5) ECHR 57
The right to be informed of the reasons for detention 57
The right to be brought promptly before a judge or other judicial officer, right to trial within a reasonable time 58
Length of pre-trial detention: does it apply to preventive detention? 60
The wider application of Article 5(3) ECHR 61
The right to challenge detention through habeas corpus or similar proceeding 65
The right to compensation for unlawful arrest or detention 66
The prohibition on arbitrary arrest and detention and the principle of proportionality in this monograph 66
3 The preventive detention of suspected terrorists pursuant to a state of emergency in international human rights law

Detention pursuant to a state of emergency in international human rights law 79

The principle of exceptional threat – is a terrorist threat the kind of emergency that could justify the declaration of a state of emergency in international law? 80

The principle of exceptional threat requires the threat to be ‘actual or imminent’ 82

A state of emergency must have effects that involve the entire State 85

A state of emergency can only be declared if the measures are strictly necessary (the condition of strict necessity) 88

A State must declare with the principle of non-derogability when declaring a state of emergency 90

Habeas corpus during a state of emergency under the ICCPR 91

Habeas corpus in non-binding instruments 92

A state of emergency must also comply with the principle of consistency 93

A state of emergency should not be declared to implement preventive detention as a counter-terrorism strategy 94

4 Legitimate and illegitimate purposes of preventive detention

A framework by which to assess State counter-terrorism laws 103

The approach to assessing legitimate purpose in this monograph is informed by the margin of appreciation doctrine 104

Example: the use of the margin of appreciation doctrine in Australian law 107

The application of the margin of appreciation doctrine to assess the legitimate purpose of preventive detention in this monograph 109

Claims that preventive detention could serve an illegitimate purpose 110

Preventive detention based on group profiling would not be for a legitimate purpose 110

A preventive detention order issued against a 'dangerous person' would not be for a legitimate purpose 113

The claim that preventive detention can lead to arbitrary detention as a consequence of insufficient human rights safeguards 117

Claims that preventive detention could serve a legitimate purpose 119

The argument that preventive detention serves a purpose unable to be met by the criminal law 122

The principle of proportionality to assess whether preventive detention can serve a legitimate or illegitimate purpose 126
The way forward: a model law for the detention of suspected terrorists within a criminal law framework

Features of a pre-charge detention model based in the criminal law 137
Length of detention 137
The purpose of pre-charge detention 138
'Reasonable suspicion' as the grounds for detention under the pre-charge detention model 141
Criminal propensity and associations as the basis for pre-charge detention in terrorist cases 142
Protecting sensitive and national security facts and information in terrorist cases 144
Pre-charge detention should provide for a relaxation of evidentiary rules and adjustment to other rules of evidence 146
Pre-charge detention should be a measure of last resort 147
Pre-charge detention situates detention within State criminal law 149
Adjusting the criminal law is not unprecedented in States 151
The United Kingdom has changed from preventive detention to a criminal law detention model 152
The United Nations and International Commission of Jurists recommend a criminal law framework 153
Pre-charge detention provides established human rights procedural safeguards to a person in detention 154
Summary of the features of the proposed pre-charge detention model 155

Conclusions as to the preventive detention of suspected terrorists in international law

The imperative of state compliance with international human rights law, particularly in a time of global terrorism 165
Preventive detention can be used for a legitimate purpose, but also for an illegitimate purpose 168
Pre-charge detention is a less intrusive measure than preventive detention 169
