Mitteilung 346

Proceedings of the
International Workshop on
Petri Nets and Software Engineering
PNSE'12

FBI-HH-M-346/12

Editors:
Lawrence Cabac
Michael Duvigneau
Daniel Moldt
Universität Hamburg
Fachbereich Informatik

Juni 2012
Contents

Part I Invited Talks

What Should we Teach About Petri Nets?
Wolfgang Reisig ................................................................. 11

Part II Long Presentations

Using Integer Time Steps for Checking Branching Time Properties of Time Petri Nets
Agata Janowska, Wojciech Penczek, Agata Pótrola and Andrzej Zbrzezny 15

Grade/CPN: Semi-automatic Support for Teaching Petri Nets by Checking Many Petri Nets Against One Specification
Michael Westergaard, Dirk Fahland and Christian Stahl ................. 32

When Can We Trust a Third Party? - A Soundness Perspective
Kees van Hee, Natalia Sidorova and Jan Martijn van der Werf .......... 47

Modeling and Analyzing Wireless Sensor Networks with VeriSensor
Yann Ben Maissa, Fabrice Kordon, Salma Mouline and Yann
Thierry-Mieg ................................................................. 60

SMT-based parameter synthesis for L/U automata
Michał Knapik and Wojciech Penczek ...................................... 77

Model-Driven Middleware Support for Team-Oriented Process Management
Matthias Wester-Ebbinghaus and Michael Köhler-Bußmeier .......... 93
From Code to Coloured Petri Nets: Modelling Guidelines
Anna Dedova and Laure Petrucci ................................................ 109

Hierarchy of persistency with respect to the length of action’s
disability
Kamila Agata Barylska and Edward Ochmański ............................ 125

Local state refinement on Elementary Net Systems: an
approach based on morphisms
Luca Bernardinello, Elisabetta Mangioni and Lucia Pomello ............ 138

Part III Short Presentations

Context Petri Nets: Enabling Consistent Composition of
Context-dependent Behavior
Nicolás Cardozo, Jorge Vallejos, Sebastián González, Kim Mens and
Theo D’Hondt ................................................................. 155

MuPSi - a multitouch Petri net simulator for transition steps
Thomas Irgang, Andreas Harrer and Robin Bergenthum ................. 170

PetriPad – A Collaborative Petri Net Editor
Julian Burkhart and Michael Haustermann ................................. 181

Part IV Poster Abstracts

Agentworkflows for Flexible Workflow Execution
Thomas Wagner ............................................................... 199

Cloud Transition: Integrating Cloud Calls into Workflow
Petri Nets
Sofiane Bendoukha and Thomas Wagner ................................. 215

A Concurrent Simulator for Petri Nets Based on the
Paradigm of Actors of Hewitt
Luca Bernardinello and Francesco Adalberto Bianchi ................. 217

A Petri Net Approach to Synthesize Intelligible State
Machine Models from Choreography
Toshiyuki Miyamoto and Yasuwo Hasegawa ............................ 222

SYNOPS - Generation of Partial Languages and Synthesis of
Petri Nets
Robert Lorenz, Markus Huber, Christoph Etzel and Dan Zecha ........ 237
Modeling and Simulation-Based Design Using Object-Oriented Petri Nets: A Case Study
Radek Kočí and Vladimír Janoušek ...................................................... 253

Porting the Renew Petri Net Simulator to the Operating System Android
Dominic Dibbern ................................................................. 267

SonarEditor: A Tool for Multi-Agent-Organizations Modelling
Jan Bolte .............................................................. 269
