CHAPTER 1
Introduction
1. Why study information structure 1
2. The goals of the present monograph and methodological considerations 3
   2.1 A brief note on the methodology 5
3. Data set and background on focalization in Spanish 5
4. A brief look at the framework and the questions that arise in the study of focus 9
5. Detailed description of the contents of each chapter 12
   5.1 Chapter 2: An overview of the syntax of focus in Spanish 12
   5.2 Chapter 3: The syntax of corrective focus at the right edge 13
   5.3 Chapter 4: Rightward movement under ellipsis 14

CHAPTER 2
An overview of the syntax of focus in Spanish 17
1. Neutral focus and sentential stress 17
2. New information focus 20
3. On the properties of focus fronting 25
   3.1 A note on other closely related fronting processes 26
   3.2 The relevance of focus fronting for syntactic theory 29
   3.3 Previous approaches to focus fronting in Spanish 31
      3.3.1 Obligatory subject-verb inversion and the properties of Spec-TP under focus fronting 33
4. On the EPP in Spanish 39
   4.1 Bever’s (2008) analysis of the EPP 40
   4.2 Technical implementation of the EPP 41
   4.3 Previous proposals on subject-oriented EPP in Spanish 43
   4.4 Subjects vs. topics 45
   4.5 Evidence in favor of null expletives 49
      4.5.1 On the nullness of null expletives 56
      4.5.2 Do null expletives have an effect on the output? 57
CHAPTER 3
The syntax of corrective focus at the right edge 83
1. Previous approaches to focalization processes at the right edge 84
2. The data 86
3. The origin of the subject at the right edge 90
   3.1 The licensing of subject NPIs at the right edge 90
   3.2 The c-command domain and locality properties of the object
       in the V1 V2-INF O2 S1 order 94
   3.3 The V1 V2-INF S1 O2 order 97
       3.3.1 Derivational alternatives for the V1 V2-INF S1 O2 order 103
       3.3.2 A note on the V1 V2-INF Si O2 order and phases 106
4. The height of the subject in the structure 107
   4.1 Parasitic gaps 108
   4.2 The scope of negation 112
5. Evidence that these are contrastively focused subjects 114
6. Alternative analyses 118
   6.1 Alternatives where the syntax of the presupposed constituents
       is complex 119
   6.2 Alternatives where the syntax or the PF of subject is complex 120
   6.3 Alternatives where the syntax of the subject and the presupposed
       constituents is complex 123
7. Other derivational options for subjects to appear at the right edge 125
   7.1 VS in unaccusatives and beyond 126
       7.1.1 A locative inversion analysis of the VS order 126
   7.2 Postverbal subjects at the right edge in wh-questions 131
   7.3 Rightmost subjects under the scope of negation 134
8. Conclusion 135
CHAPTER 4
Rightward movement under ellipsis

1. Evidence for ellipsis in WS, GP and MS 139
   1.1 Connectivity effects 139
   1.2 Further evidence in favor of the ellipsis analysis 144
2. On the properties of rightward movement 145
3. Evidence for rightward movement in WS, GP, MS 146
   3.1 Locality 146
   3.2 P-stranding 154
       3.2.1 On the unavailability of P-stranding for the first remnant 157
4. Why is rightward movement licensed in this syntactic context? 160
   4.1 An OT analysis of rightward movement under ellipsis 166
5. Remaining issues 174
   5.1 Further details on rightward movement in Spanish 174
   5.2 Ellipsis and phases 174
   5.3 Alternative analyses 176
6. Conclusion 178

CHAPTER 5
Conclusion 179

1. Summary and general comments on this work 179
2. Future research 182
