Contents

ANDERSON
Psychology and Intelligent Tutoring ................................................................. 1

BAKER
A Model for Tutorial Dialogues based on Critical Argument .............................. 2

BEESEN
The User Model in MATHPERT: An Expert System for Learning Mathematics ....... 9

BÖCKER
ELAB - An Electronics Laboratory ....................................................................... 15

BOULET
A Design Task Advisor ......................................................................................... 25

BRECHT
Planning the Content of Instruction ....................................................................... 32

CAUZINILLE
Naiade, a Knowledge Based System for Explanation ........................................... 42

CAWSEY
The Structure of Tutorial Discourse ....................................................................... 47

CHEN
XTRA-TE: Using Natural Language Processing Software to Develop an ITS for Language Learning ................................................................. 54

CORBETT
Feedback Timing and Student Control in the Lisp Intelligent Tutoring System .... 64

CUMMING
Collaborative Intelligent Educational Systems ...................................................... 73

DERRY
Fuzzy Remedies to Problems in Diagnostic Modeling .......................................... 81

DERRY
Characterizing the Problem Solver: A System for On-line Error Detection......... 86

DILLENBOURG
Towards reflective tutoring systems: self-representation and self-improvement ...... 92

EISENSTADT
AI in (Education in AI): What does 'domain visualisation' have to offer ITS? ....... 100

EVERTSZ
Refining the Student's Procedural Knowledge Through Abstract Interpretations ................................................................. 101

GREER
Incorporating Granularity-Based Recognition into SCENT ................................. 107

HALL
Qualitative Diagrams: Supporting the Construction of Algebraic Representations in Applied Problem Solving ............................................................. 116

KOEGEL
A Tutoring System with Incomplete Domain Expertise ........................................ 123

KURLAND
Tutor, Tool & Training Environment: Teaching Troubleshooting Using AI ........... 129

LEES
An Interactive Learning Environment for Computing Systems Concepts ............ 136

MOYSE
Knowledge Negotiation Implies Multiple Viewpoints ......................................... 140
MURRAY

Control for Intelligent Tutoring Systems:
A Blackboard-based Dynamic Instructional Planner

150

NATHAN

Unintelligent Tutoring System for Solving Word Algebra Problems

169

NEWMAN

Is a Student Model Necessary? Apprenticeship as a Model for ITS

177

OR-BACH

PROBIT - Developing a diagnostic intelligent tutor

185

O'SHEA

Magnets, Martians and Microworlds: Learning with and learning by OOPS

193

PETRIE-BROWN

Intelligent Tutoring Dialogue: The Structures of an Interaction

195

PY

MENTONIEZH: an Intelligent Tutoring System in geometry

202

QUIGLEY

Computer Tutoring of Linear Equations

210

REIMANN

Modeling Scientific Discovery Learning Processes with Adaptive Production Systems

218

REISER

Facilitating Students' Reasoning with Causal Explanations and Visual Representations

228

SCHANK

Discovery Systems

236

SCHOFIELD

Artificial Intelligence in the Classroom: The Impact of a Computer-Based Tutor on Teachers and Students

238

SELF

The Case for Formalising Student Models (and Intelligent Tutoring Systems generally)

244

SELKER

Cognitive Adaptive Computer Help (COACH)

245

SHARPLES

The Radiology Tutor: Computer-Based Teaching of Visual Categorization

252

SHUTE

An Investigation of Learner Differences in an ITS Environment: There's No Such Thing as a Free Lunch

260

SINGLEY

The Algebra Word Problem Tutor

267

SPENSLEY

Generating domain representations for ITS

276

SWAN

The Teaching and Learning of Problem Solving through LOGO Programming

281

TOWNE

Artificial Intelligence in Training Diagnostic Skills

291

TWIDALE

Intermediate representations for student error diagnosis and support

298

VALLEY

Realising the Potential of Expert System Shells in Education

307
WINKELS

Methodology and Modularity in ITS design ................................................................. 314

WITSCHIAL

First Experiences with the Learning Game "TRAPS" .................................................. 323

WOLZ

Tutoring That Responds to User Questions and Provides Enrichment ......................... 330

YAZDANI

Second Generation ICAI Systems ................................................................................. 338
