# TABLE OF CONTENTS

Preface

**METALS AND ALLOYS**

Diffusion in Metals – An Overview  
*D. Lazarus*

Solvent Diffusion in Dilute b.c.c. Alloys  
*R. P. Agarwala*

Atom Movement in Lead and Lead Tin Solders  
*H. B. Huntington and C.-K. Hu*

Grain Boundary Diffusion  
*M. Mohan Rao and S. Ranganathan*

**NON-METALLICS: HALIDES**

Diffusion and Defects in Silver Halides  
*A. L. Laskar*

Subsurface Effects in Ionic Crystals  
*L. M. Slifkin*

**NON-METALLICS: OXIDES**

Point Defects and Diffusion Mechanisms in the Monoxides of the Iron-Group Metals  
*N. L. Peterson*
SEMI-CONDUCTORS
The Role of Vacancies and Self-Interstitials in Impurity Diffusion in Silicon 109
   R. B. Fair

Inter-Diffusion in Thin Films 133
   K. N. Tu

SUPER-IONIC CONDUCTORS
Ionic and Molecular Transport in $\beta$ and $\beta''$-Alumina 135
   J. B. Bates

Fast Proton Transport in Solids 153
   S. Chandra

THEORY OF DIFFUSION
Diffusion in Metals – A Phenomenological Approach 171
   G. P. Tiwari

Recent Developments in the Theory of Rate Processes 187
   J. Jacucci, M. Toller, G. DeLorenzi, and C. P. Flynn

Monte Carlo Calculation of Correlation and Vacancy Wind Effects in Diffusion 199
   G. E. Murch
Molecular Dynamics Studies of Structural Transformation in Solids 211

A. Rahman

SPECIAL TOPICS
Radiation Induced Diffusion and Solute Segregation 223

R. A. Johnson

Short Range Diffusion during Phase Transformations 239

S. Banerjee

Special Aspects of Diffusion in Polycrystalline and Amorphous Metallic Thin Films at Low Temperatures 257

D. Gupta

Diffusion Studies using Neutrons 269

B. A. Dasannacharya

PRINCIPAL SUBJECT INDEX 279
