CONTENTS

AVANT-PROPOS J. AUDOUZE ix
PREFACE xi

I - INTRODUCTION 1
Trends in the astrophysics of light elements: cosmology and stellar physics H. REEVES 3

II. EARLY NUCLEOSYNTHESIS 23
Primordial nucleosynthesis: the observational data D. KUNTH 25
Lithium abundances in samples of dwarf stars of population II and very old population I J. BECKMAN 29
P. MOLARO R. REBOLO
Primordial nucleosynthesis and chemical evolution of galaxies J. AUDOUZE 47
P. DELBOURGO-SALVADOR E. VANGIONI-FLAM
Helium, nitrogen and oxygen in blue compact galaxies and the primordial helium abundance B. E. J. PAGEL 53
Photinos and primordial nucleosynthesis P. SALATI 63
Primordial nucleosynthesis in inhomogeneous cosmologies: $\Omega = 1$ with baryonic dark matter G. J. MATHEWS 75
K. E. SALE

III. SOLAR NEUTRINOS 83
The Gallex project of solar neutrino detection T. KIRSTEN 85
About the standard solar model S. CAHEN 97
Solar neutrinos, solar oscillations and turbulent diffusion mixing Y. LEBRETON 105

IV. NUCLEOSYNTHESIS AND STELLAR EVOLUTION 111
Nucleosynthesis: A brief overview M. ARNould 113
Time dependent turbulent convection in stars R. KUHFUS 135
Convective overshooting in low mass stars C. CHIOSI A. BRESSAN G. BERTTELLI 155

Supernova from Wolf-Rayet stars

Pancake stars and nuclear astrophysics

VI. NUCLEAR GAMMA RAY LINES

Gamma-ray line astronomy

Gamma-ray line astronomy: the case of $^{26}$Al

Massive stars, "X-ray ridge" and galactic $^{26}$Al gamma ray line emission

Gamma rays from the decay of $^{26}$Al: evidence for The explosion of a supermassive star?

VII. NUCLEOSYNTHESIS OF HEAVY NUCLEI

Status of the classical s-process

S-process studies using single and pulsed neutron exposures

Neutron captures in massive stars

Cosmic rays: material from coronae of ordinary stars and from He-burning zones, but not from s-process sites

Isotopic Zirconium as a probe of AGB nucleosynthesis theory

$^{13}$C ($\alpha$, n) $^{16}$O: the neutron source for Ba II stars?

The search for the site of the r-process

VIII. NUCLEOCOSMOCHRONOLOGY AND GALACTIC EVOLUTION

Limits on the galaxy's age

Correlated isotopic effects near the Fe abundance peak

Cr isotopic anomalies in the early solar system
