Chemistry and Biology of Pteridines

Pteridines and Folic Acid Derivatives

Editor
John A. Blair

Walter de Gruyter · Berlin · New York 1983
Contents

The Gowland Hopkins Lecture:
Transport of Folate and Pterin Compounds
F.M. Huennekens, M.R. Suresh, C.E. Grimshaw,
D.W. Jacobsen, E.T. Quadros, K.S. Vitols,
G.B. Henderson ................................................................. 1

Chemical Aspects (1)

Scottish International Education Trust Lecture:
Synthetic Methods in Pteridine Chemistry: Some Applications to Pteridine Natural Products
E.C. Taylor ................................................................. 23

Synthesis, Chemical and Enzymatic Properties, and Therapeutic Potential of 6,6-Disubstituted Tetrahydro- and Quinoid-Dihydro-Pterins
S.W. Bailey, J.E. Ayling .................................................. 51

The Structure of Quinonoid Dihydropterins
[2-Amino-7,8(6H)-Dihydropteridin-4-ones]
W.L.F. Armarego, P. Waring ........................................... 57

Some Simple $s$-Triazolopteridines
D.J. Brown, K. Shinozuka .................................................. 63
Linear Tricyclic Analogs of Pteridines
W. Pendergast, J.H. Chan ........................................ 69

Reactions of Furazano [3,4-d]Pyrimidines and their Application to Pteridine Synthesis
P.H. Boyle, R.J. Lockhart ................................. 73

Syntheses of some Blocked 7,8-Dihydropterdines
R.C. Cameron, W.J.S. Lyall, S.H. Nicholson,
D.R. Robinson, C.J. Suckling, H.C.S. Wood ............... 79

Synthesis of Chiral Reduced Pteridine Coenzymes
P. Doyle, A. Szakolcai, D.W. Young ......................... 85

Report on Discussions
S.J. Benkovic .................................................. 91

Chemical Aspects (2)

Reactivity of Pteridines
W. Pfleiderer, R. Baur, M. Bartke, H. Lutz ............... 93

Synthesis and Antitumor Activity of 10-Deazaminopterins
J.I. DeGraw, V.H. Brown, H. Tagawa, R.L. Kisliuk,
Y. Gaumont, F.M. Sirotnak .................................. 109

Synthesis and Biological Activity of 5-Deazaflorig Acid and 5-Deazaaminopterin
E.C. Taylor, C. Tseng, P.J. Harrington, G.P. Beardsley,
A. Rosowsky, M. Wick ....................................... 115
The Nor-Analogues of Folic Acid
M.G. Nair, M.K. Rozmyslovicz, R.L. Kisluik, F.M. Sirotnak, Y. Gaumont ........................................... 121

Report on Discussions
B. Roth ................................................................. 127

Neurochemical and Clinical Aspects

Metabolism of Pteridine Cofactors in Neurochemistry
C.A. Nichol, O.H. Viveros, D.S. Duch, M.M. Abou-Donia, G.K. Smith .................................................. 131

Pteridines in Cancer and Other Diseases
K. Rokos, H. Rokos, H. Frisius, M. Hüfner ..................... 153

Dihydropteridine Reductase Activity in Human Breast Cancer. Studies of 580 Cases and Correlations with Hormone Receptors and Cellular Typing
J.L. Dhondt, C. Herlin, J. Bonneterre, M.C. Vie, J. Lefebvre, A. Demaille ................................. 159

A Critical Appraisal of Methods for the Quantitative Analysis of Tetrahydrobiopterin, Dihydrobiopterin and Biopterin in Human Urine, Serum and CSF
J.A. Blair, S.B. Whitburn, A.E. Pheasant, R.J. Leeming, C. Morar, A. Al-Beir ................................. 165

Inhibition of Pterin Biosynthesis in the Adrenergic Neuroblastoma N1E115 by Tetrahydrobiopterin and Folate
G. Kapatos, S. Kaufman ........................................... 171
Penetration of Reduced Pterins into Rat Brain: Effect on Biogenic Amine Synthesis

Neopterin Deficiency (GTP Cyclohydrolase I Deficiency), a New Variant of Hyperphenylalaninemia

Folate Pathways in Cells from Fragile X Syndrome Patients and Carriers
R.W. Erbe, J.C. Wang ........................................ 189

Report on Discussions
R.G.H. Cotton .................................................. 195

Enzymology

The Interaction of Substrates and Inhibitors with Dihydrofolate Reductase
G.C.K. Roberts ................................................ 197

Catalytic Site of Dihydrofolate Reductase

Structure, Function and Affinity Labelling Studies of Dihydrofolate Reductase
Methylen Tetrahydrofolate Reductase: Studies in a Human Mutant and Mammalian Liver
G.P. Lewis, P.B. Rowe ................................................. 229

Studies on Methylenetetrahydrofolate Reductase from Pig Liver: Catalytic Mechanism and Regulation by Adenosylmethionine

Role of Methylenetetrahydrofolic Acid Reductase in Regulation of Folic Acid Metabolism and its Relation to the Methyl Trap Hypothesis
E.L.R. Stokstad, M. M.-S. Chan, J.E. Watson ..................... 241

The Mechanism of Action of the Transformylase Enzymes

Folypolyglutamate Synthesis in Neurospora Crassa
E.A. Cossins, P.Y. Chan ............................................... 251

Report on Discussions
D.P. Baccanari, L.F. Kuyper ................................ ........ 257

Clinical Aspects: Cancer

Folates and Cancer Chemotherapy
J.R. Bertino, J.J. McGuire ........................................... 263
Inability to Increase the Mobilisation of Liver Folates During Folate Deficiency Suggesting that this and Other Organs do not act as a Potential Folate Store for Marrow and Other Rapidly Proliferating Cells
J.M. Scott, A. Molloy, A. Smithwick, P. McGing, D.G. Weir ...................................................... 275

A High Molecular Weight Nonfunctional Immunoreactive Form of Dihydrofolate Reductase in L1210 Leukaemia Cells
S.P. Rothenberg, M.P. Iqbal ................................. 281

Further Characterization of the Pteridine Binding Variant of Alpha 1-Acid Glycoprotein, Accumulated in the Blood of Patients with Malignant Diseases
I. Ziegler, W. Armarego, M. Pink ......................... 287

Structure-Activity Relationships among 5-Substituted Lipophilic Diaminopyrimidine Antineoplastic Antifolates
V. Cody, E. DeJarnette, S.F. Zakrzewski .................. 293

Attempts to Design Inhibitors of Dihydrofolate Reductase Using Interactive Computer Graphics with Real Time Energy Calculations
E.A. Potterton, A.J. Geddes, A.C.T. North ............... 299

Control of Methotrexate Polyglutamate Synthesis in Cultured Rat Hepatoma Cells
J. Galivan, M. Balinska ........................................ 305

Differential Effects of Methotrexate or Fluorodeoxyuridine upon Mitochondrial and Cellular Nucleotide Pools

Report on Discussions
J.M. Whiteley .................................................. 317
Bioorganic Chemistry and Enzymology

Chemical Mechanisms in the Action of Pteridine Coenzymes
D.W. Young .......................................................... 321

Irreversible Inactivation of Rat Liver Phenylalanine Hydroxylase by Reaction with (6S)-L-Erythro-Tetrahydrobiopterin
M. Parniak, S. Kaufman ............................................. 345

p-Azidophenylalanine: A Potential Photoaffinity Probe for Rat-Liver Phenylalanine Hydroxylase
S. Webber, J.M. Whiteley ........................................... 351

Pyrimidine Models for the Cofactor of Phenylalanine Hydroxylase. Autoxidation of 2,4,5,-Triamino-6-Hydroxy-pyrimidines
J.A. Jongejan, H.I.X. Mager, W. Berends ....................... 357

Activation of Molecular Oxygen by Tetrahydropterin Monooxygenases
J.E. Ayling, S.W. Bailey ............................................. 363

Mechanistic Studies on Phenylalanine Hydroxylase: Structural Determination of the Tetrahydropterin Intermediates
R.A. Lazarus, C.W. DeBrosse, S.J. Benkovic ................. 369

Properties of Thymidylate Synthase from Streptococcus Faecium
R.L. Kisliuk, K.N. Rao, Y. Gaumont, R. Deschenes, K. Vestal, M. Karasik, G.F. Maley, M.G. Nair, C.M. Baugh . 375
Cloning the Gene for Eukaryotic C_{1}-THF Synthase
C. Staben, J.C. Rabinowitz ................................. 381

Report on Discussions
W.L.F. Armarego ............................................. 387

Biochemistry and Biology

The Enzymatic Synthesis of the Drosopterins: Identification of a Pyrimidodiazepine as an Intermediate
G.J. Wiederrecht, D.R. Paton, G.M. Brown .................. 391

The Common Precursor of Sepiapterin and Drosopterin in Drosophila: Enzymatic and Chemical Synthesis
W.G. Hearl, D. Dorsett, K.B. Jacobson ...................... 397

The Role of Pteridines in Regulation of Growth
H. Wachter, D. Fuchs, A. Hausen, G. Reibnegger .......... 403

The Regulation of Molybdenum Cofactor in Escherichia Coli
N.K. Amy, J.B. Miller ......................................... 409

Evidence for a Folate Bound to Rat Hepatic Uroporphyrinogen III Cosynthase and its Role in the Biosynthesis of Heme
W.N. Piper, J. Tse, R.P. Clement, M. Kohashi .............. 415

Report on Discussions
P.H. Boyle ...................................................... 421
Presented Papers

Aerobic Oxidation of 5,6,7,8-Tetrahydronopterin
W.L.F. Armarego, D. Randles ........................................ 423

The Conformations of 7,8(6H)-Dihydropterin Substrates and the Activity of Dihydropteridine Reductase (E.C.1.6.99.10)
W.L.F. Armarego, P. Waring ......................................... 429

Dihydrofolate Reductase: The Stereochemistry of Inhibitor Selectivity
D.A. Matthews, J.T. Bolin, D.J. Filman, K.W. Volz, J. Kraut ......................................................... 435

Synthesis of an 8-Deaza Analog of the Intermediate in the Thymidylate Synthetase Reaction (1)
A.D. Broom, A. Srinivasan ........................................... 445

The Synthesis of Analogs of Pteroylglatamyl-γ-Phosphate as Potential Inhibitors of Folylpolyglutamate Synthetase
K.C. Tang, J.K. Coward ................................................ 451

Synthesis and Activity of 8,10-Dideazaminopterin
J.I. DeGraw, L.F. Kelly, R.L. Kisliuk, Y. Caumont, F.M. Sirotnak ......................................................... 457

CND0/2 Molecular Orbital Calculations on the Antifolate DAMP and Some of its Analogues: Conformational Characteristics
W.J. Welsh, J.E. Mark, V. Cody, S.F. Zakrzewski .............. 463
Fluorescent Analogues of Methotrexate as Probes for Folate Antagonist Molecular Receptors
J.H. Freisheim, A.A. Kumar, A.M. Black, G.M. Anstead, R.J. Kempton, S.S. Susten .............................. 469

Dihydrofolate Reductase Overproduction Identified by Flow Cytometry Using a Fluorescent Methotrexate Analogue
A. Rosowsky, J.E. Wright, G.P. Beardsley, H.M. Shapiro ... 475

New Syntheses and Transformations of Some Pteridines and Pteridine 3-Oxides
M. Kočevar, B. Stanovnik, M. Tišler ....................... 481

Photooxidation of Mercaptopteridines
A. Heckel, W. Pfleiderer ........................................ 487

Reactivity of 6,7-Dichloro-1, 3-Dimethylumazine
K. Abou-Hadeed, W. Pfleiderer ................................. 493

Synthesis, Reactivity and Properties of 8-Substituted 2-Thio- and 2,4-Dithiolumazines
W. Hübisch, W. Pfleiderer ....................................... 499

The Activity of Sulfonamide-Substituted Benzylpyrimidines Against Dihydropteroate Synthase, Dihydrofolate Reductase, and Bacterial Cell Cultures

Structural Studies of Antifolate Drugs
C.H. Schwalbe, V. Cody ........................................... 511
Isolation and Characterization of a Novel Folate Antagonist
G. Schlingmann, E.L.R. Stokstad .......................... 517

Synthesis and Biological Properties of the S-8 Analog of 7,8-Dihydropteridinealcohol
K. Visser, J.K. Seydel ....................................... 523

Synthesis of Dihydrobiopterin from Dihydroneopterin Triphosphate in Rat Tissues and Human Blood Corpuscles: Diagnosis of Atypical Phenylketonuria due to Biopterin Deficiency by Assay of an Enzyme Involved in the Synthesis
M. Akino, S. Yoshioka, M. Masada, K. Inoue, T. Yoshida, T. Mizokami, N. Matsuo ............................... 529

Stereospecific Enzyme Mediated Syntheses of Tetrahydrofolate Derivatives
L. Rees, C.J. Suckling, E. Valente, H.C.S. Wood ............ 533

Immobilization of Dihydrofolate Reductase from Amethopterin Resistant Lactobacillus Casei
F. Ahmed, R.B. Dunlap ...................................... 539

X-Ray Studies of the Binding of Trimethoprim, Methotrexate, Pyrimethamine and Two Trimethoprim Analogues to Bacterial Dihydrofolate Reductase

A New Spectrophotometric Method for the Assessment of Tight Binding Benzylaminopyrimidine Inhibitors of Dihydrofolate Reductase
J.G. Dann ..................................................... 551
Two Interconverting Conformers of a Drug-Receptor Complex: The *Lactobacillus Casei* Dihydrofolate Reductase-NADP+ Trimethoprim Complex

Multiple Conformations of the Dihydrofolate Reductase-Folate-NADP+ Complex

The Three-Dimensional Structure of Mouse L1210 Dihydrofolate Reductase
D.K. Stammers, J.N. Champness, J.G. Dann, C.R. Beddell ... 567

Isolation and Amino Acid Sequence Studies of Dihydrofolate Reductase from *Neisseria Gonorrhoeae*
D. Stone, S.J. Paterson, R. Tansik, D.P. Baccanari ....... 573

Purification of 7,8-Dihydropteroate-Synthetase from *E. Coli* by Affinity- and Hydrophobic Interaction Chromatography
R. Bartels, L. Bock ............................................ 579

Isolation and Characterization of an *E. Coli* Mutant Affected in Dihydrofolate- and Folylpolyglutamate-Synthetase

Purification and Properties of 5-Formyltetrahydrofolate Cyclodehydrase from Rabbit Liver
L. Schirch, S.E. Hopkins ....................................... 591

Structural Studies on Formyl-Methenyl-Methylene Tetrahydrofolate Synthetase from Rabbit Liver
D. Peterson, L. Schirch ....................................... 597
Utilization of Folate Polyglutamate for Growth by *Lactobacillus Casei*
M. MacIntyre, B.A. Cooper, H. Lue-Shing .......................... 603

Folate and Folate Enzymes as Structural Components of Bacteriophage Particles
L.M. Kozloff, D. Sadewasser, M. Lute ................................. 609

Studies on the Substrate Specificity of Mammalian Polylpolyglutamate Synthetase
J.J. McGuire, P. Hsieh, J.R. Bertino, J.K. Coward ............... 615

Properties of Corynebacterium Species Dihydrofolate Synthetase-Polylypolyglutamate Synthetase
B. Shane ........................................................................ 621

Purification and Characterization of Polylpolyglutamate Synthetase from *Lactobacillus Casei* and Hog Liver
A.L. Bognar, D.J. Cichowicz, B. Shane ............................... 627

The Molybdenum Cofactor from Xanthine Oxidase: Quantitative Assay of the Molybdenum Cofactor by Activation of Nitrate Reductase Activity in Extracts of the Nii-1 Mutant of *Neurospora crassa*
T.R. Hawkes, R.C. Bray .............................................. 633

Structural Studies of Calf Thymus Thymidylate Synthase
C.M. Dwivedi, R.L. Kusliuk, G.F. Maley .............................. 639

A Comparison of the T-Even Phage Induced and *Escherichia Coli* Thymidylate Synthases
G.F. Maley, M. Belfort, F. Maley ................................. 645
Thermophilicity of Dihydrofolate Reductase and Thymidylate Synthetase from a Thermophilic Microorganism
F. Mandelbaum-Shavit, J. Reizer, N. Grossowicz ............. 651

Chemical Characterization of Two Folate-Binding Proteins from Mitochondria: Dimethylglycine Dehydrogenase and Sarcosine Dehydrogenase
R.J. Cook, C. Wagner ........................................... 657

Allosteric Mung Bean (Vigna radiata) Serine Hydroxymethyl-Transferase
D.N. Rao, N.A. Rao ........................................... 663

Comparative Study of the Eye Colour Mutants of Drosophila Melanogaster: Quantification of the Eye-Pigments and Related Metabolites
J. Ferré, F. Silva, M.D. Real, J.L. Ménsua .............. 669

Studies on Sepialumazine, the Characteristic Larval Integument Pigment of the Bombyx Mori Kiuki Mutant
M. Tsusue, T. Mazda, S. Sakate ................................. 675

Macromolecular Regulation of Sepiapterin and Drosopterin Synthesis in the Purple Mutant of Drosophila
K.B. Jacobson, J.J. Yim, C.R. Wobbe ......................... 681

The Hydroxylation of Phenylpropanoids by Euglena gracilis: Role of Pteridines
R. Fink, E. Paur, E.F. Elstner ................................. 687

Studies with Old Yellow Enzyme, Reconstitution with Lumazine Analogs as Coenzyme
G. Wetzel, S. Ghisla ............................................. 693
Biosynthesis of Riboflavin. Origin of the Xylene Ring
A. Bacher, Q. Le Van, M. Bühler, P.J. Keller, H.G. Floss ........................................... 699

Biosynthesis of Riboflavin. Synthesis of the Substrate and of Substrate Analogues for Pyrimidine Deaminase
P. Nielsen, A. Bacher .................................................. 705

Metabolism and Function of Pterin Compounds in Seed Germination
M. Kohashi, K. Tomita, K. Iwai ....................................... 711

Thymidylate Synthetase During Proliferation and Differentiation of Physarum polycephalum
P. Gröbner, P. Loidl ..................................................... 717

Influence of Vitamin B₁₂ on Folate Metabolism in Lactobacillus leichmannii
C.P.P. Nair, J.M. Noronha ........................................... 723

High-Affinity Binding of Folate to a Small and Large Molecular Size Protein from Human Milk
S.I. Hansen, J. Holm, J. Lyngbye .................................... 729

High-Affinity Folate Binding in Leukocytes from Normal Subjects Displays Positive Cooperativity, and the Affinity Depends on the Protein Concentration
J. Holm, S.I. Hansen, J. Lyngbye ................................... 735

Characteristics of 5-Methyltetrahydrofolate Binding to the Folate-Binding Protein from Cow's Whey
J. Lyngbye, S.I. Hansen, J. Holm ................................. 741
Interactions of Folate-Dependent Enzymes of DNA Precursor Metabolism in T4 Phage-Infected Bacteria

The Regulation of Biopterin Biosynthesis in the Rat
S. Milstien, S. Kaufman .................................. 753

Biosynthesis of Tetrahydrobiopterin in Mammalian Tissues by De Novo and Salvage Pathways
C.A. Nichol, G.K. Smith, D.S. Duch ....................... 759

Perspectives on Tetrahydrobiopterin Biosynthesis in Mammals
H.-Ch. Curtius, M. Häusermann, D. Heintel, A. Niederwieser, R.A. Levine ......................... 765

Human Dihydropteridine Reductase (DHPR) Deficiency

Coordinate Regulation of Guanosine Triphosphate Cyclohydrodrolase and Tetrahydrobiopterin in Adrenal Medullary Chromaffin Cells
M.M. Abou-Donia, A.J. Daniels, S.P. Wilson, C.A. Nichol, O.H. Viveros ............................. 777

Regulation of Adrenocortical Guanosine Triphosphate Cyclohydrodrolase and Tetrahydrobiopterin in Normal and Spontaneously Hypertensive Rats
M.M. Abou-Donia, A.J. Daniels, C.A. Nichol, O.H. Viveros 783

Inhibition of Brain Sepiapterin Reductase by a Catecholamine and an Indoleamine
S. Katoh, T. Sueoka, S. Yamada .......................... 789
Mouse Mastocytoma Tryptophan Hydroxylase: Role of Iron and Catalase in the Expression of Enzyme Activity after Activation by Anaerobic Preincubation with Dithiothreitol
H. Hasegawa, M. Yanagisawa, F. Inoue, A. Ichiyama .......... 795

Folic Acid Induced Kindling in Rats: Changes in Brain Amino Acids
R.A. O'Donnell, M.J. Leach, A.A. Miller, R.A. Webster .... 801

Impaired Pteroylpolyglutamate Synthesis in the Cobalamin-Inactivated Rat
J. Perry, I. Chanarin, R. Deacon, M. Lumb ................. 807

A Radioimmunoassay for Determination of D-Erythro-Neopterin
H. Rokos, K. Rokos ........................................... 815

Radioimmunoassay for Neopterin in Body Fluid and Tissues
T. Nagatsu, M. Sawada, T. Yamaguchi, T. Sugimoto,
S. Matsuura, M. Akino, N. Nakazawa, H. Ogawa .......... 821

A Specific Antiserum Against Tetrahydrobiopterin: Its Preparation and Application to Immunohistochemistry
S. Matsuura, T. Sugimoto, I. Nagatsu, T. Yamaguchi,
T. Nagatsu ..................................................... 827

Speculation on the Mechanism of Therapeutic Action of Tetrahydrobiopterin in Human Disease
R.A. Levine, W. Lovenberg, H.-Ch. Curtius,
A. Niederwieser ............................................. 833

Correlation of Tetrahydrobiopterin Content and Guanosine Triphosphate Cyclohydrolase Activity in Cells and Tissues
D.S. Duch, C.A. Nichol ..................................... 839
Unconjugated Pteridines in Human Physiological Fluids. Normal and Pathological Profiles

Biopterin and Phenylalanine Metabolism During Early Liver Regeneration
J.-L. Dhondt, G. Kapatos, M. Parniak, H. Wilgus, S. Kaufman ......................................................... 851

GTP-Cyclohydrolase Activities in Rat Liver
J.-L. Dhondt, Z. Bellahsene, J.P. Farriaux, M. Deutrevaux .............................................................. 857

Phenylalanine Hydroxylase Assay Using Biopterin and Synthetic Pteridine
H.K. Berry, M. Hsieh ........................................................... 863

Dihydropteridine Reductase Levels in Human Normal and Neoplastic Tissues
C. Eggar, P.A. Barford, J.A. Blair, A.E. Pheasant, A.E. Guest, D.G. Oates ........................................... 869

Investigations of Tissue Folates in Normal and Malignant Tissues
A.E. Pheasant, J. Bates, J.A. Blair, R. Nayyir-Mazhir .... 875

Blood Cell Biopterin as an Indicator of Transplanatation-Induced Hemopoiesis and Leukemic Cell Proliferation
M. Fink, I. Ziegler, H.J. Kolb, U. Bodenberger, W. Wilmanns ......................................................... 879
Assessment of Urinary Neopterin in the Early Diagnosis of Human Allograft Rejection

D. Fuchs, A. Hausen, G. Reibnegger, H. Wachter, C. Huber, M. Margreiter, M. Spielberger

Behaviour of Neopterin Levels in Patients with Haematological and Gynaecological Neoplasms

G. Reibnegger, D. Fuchs, A. Hausen, H. Wachter, A. Bichler, H. Hetzel, K. Grünewald, C. Huber

Pteridines in Dictyostelium discoideum and Physarum polycephalum

Biochemical and Chemotherapy Studies on BW 301U, a Novel Lipophilic 2,4-Diaminopyridopyrimidine Antifolate

D.S. Duch, C.A. Nichol

Toxicity of a Series of Antifolate Compounds in a Methotrexate-Resistant Cell Line

M.R. Hamrell

Interaction of Methotrexate Poly(L-Lysine) with Transformed Hepatic Cells in Culture

J.M. Whiteley, J. Galivan, M. Balinska

A Novel Technique for Producing Folate-Deficient Hepatica Cells
