Developments in the Use of Superplasticizers

V. M. Malhotra

Editor

Publication SP–68
American Concrete Institute, Detroit
CONTENTS

PREFACE ........................................................................................................... i

CONTENTS ........................................................................................................ v

EXPERIENCES IN THE USE OF SUPERPLASTICIZERS IN SOME SPECIAL FLY ASH CONCRETES By Kirsten Eriksen and Palle Nepper-Christensen ........................................ 1

USE OF A SUPERPLASTICIZER IN THE MANUFACTURE OF EXTRA-HIGH-STRENGTH BLOCK By Lucas E. Pfeiffenberger and Thomas B. Ray .................................................. 21

STUDIES ON THE UTILIZATION OF WATER-REDUCED HIGH-STRENGTH CONCRETE FOR MONORAIL PIERS By Jiro Murata, Tadashi Kawai, and Katsuro Kokubu .................................................................................. 41

USE OF MELAMINE-BASED SUPERPLASTICIZER AS A WATER REDUCER By A. Aignesberger and A. Kern .............................................................................. 61

TIME-DEPENDENT BEHAVIOR OF HIGH-EARLY-STRENGTH CONCRETE CONTAINING A SUPERPLASTICIZER By J. J. Brooks, P. J. Wainwright, and A. M. Neville ................................................................. 81

APPLICATION OF SUPERPLASTICIZER TO REDUCE DRYING SHRINKAGE AND THERMAL CRACKING OF CONCRETE By Hiroshi Tokuda, Masami Shoya, Makoto Kawakami, and Makoto Kagaya ......................................................................................... 101

SEGREGATION CHARACTERISTICS OF CONCRETE CONTAINING A HIGH-RANGE WATER-REDUCING ADMIXTURE By T. Soshiroda .............................................................................. 121

ON WORKABILITY AND PUMPABILITY OF SUPERPLASTICIZED CONCRETE WITH LARGE SIZE AGGREGATE By H. Yoshida, H. Kasami, S. Suzuki, T. Takahashi, and Y. Yoshioka ............................................................................. 139

SUPERPLASTICIZED SHRINKAGE-COMPENSATING CONCRETE By M. Collepardi, M. Corradi, and M. Valente ........................................................................... 159

EFFECT OF SUPERPLASTICIZERS ON SLUMP, STRENGTH, AND DEGREE OF CONVERSION OF HIGH-ALUMINA CEMENT CONCRETE By D. H. H. Quon and V. M. Malhotra ...................................................... 173
AIR VOID SYSTEM AND FROST RESISTANCE OF CONCRETE CONTAINING SUPERPLASTICIZERS  
By L. R. Roberts and P. Scheiner.................................189

FREEZE-THAW RESISTANCE OF SUPERPLASTICIZED CONCRETES  
By E. Okada, M. Hisaka, Y. Kazama, and K. Hattori...........215

ENGINEERING PROPERTIES OF SUPERPLASTICIZED CONCRETES  
By K. Kishitani, H. Kasami, M. Iizuka, T. Ikeda,  
Y. Kazama, and K. Hattori........................................233

CHLORIDE PENETRATION IN STANDARD CONCRETE,  
WATER-REDUCED CONCRETE, AND SUPERPLASTICIZED CONCRETE  
By Walter Lukas......................................................253

FROST RESISTANCE OF SUPERPLASTICIZED CONCRETE  
By M. Kobayashi, E. Nakakuro, K. Kodama, and S. Negami.....269

MECHANICAL PROPERTIES AND DURABILITY OF  
SUPERPLASTICIZED SEMI-LIGHTWEIGHT CONCRETE  
By V. M. Malhotra...................................................283

VIBRATION ENERGY OPTIMIZATION IN PREFABRICATED  
CONCRETE CASTING USING SUPERPLASTICIZERS  
By Paolo De Lama and Salvatore Tavano.........................307

ASPECTS OF CEMENT AND ENERGY ECONOMY IN PRECasting  
PLANTS BY THE USE OF SUPERPLASTICIZERS  
By Traian Ispas and Ion Ionescu.................................319

CURE TEMPERATURE REDUCTION BY THE USE OF  
HIGH-RANGE WATER-REDUCING ADMIXTURES  
By Lawrence R. Roberts............................................337

ROLE OF LIGNOSULFONATES AS SUPERPLASTICIZERS  
By M. R. Rixom and J. Waddicor.................................359

RELEVANCE OF CONCRETE SUPERPLASTICIZERS IN A  
DEVELOPING ECONOMY  
By V. G. Gokhale and R. Paranjpe.............................381

EFFECT OF RETARDERS/WATER REDUCERS ON SLUMP LOSS  
IN SUPERPLASTICIZED CONCRETE  
By V. S. Ramachandran............................................393

EXTENDED WORKABILITY OF CONCRETE CONTAINING  
HIGH-RANGE WATER-REDUCING ADMIXTURES IN HOT WEATHER  
By James S. Hampton...............................................409

RHEOLOGICAL STUDY OF SUPERPLASTICIZED CONCRETE  
By K. Kishitani, F. Tomosawa, and S. Oka.....................423
RHEOLOGICAL PROPERTIES OF SUPERPLASTICIZED CONCRETE
By Shinzo Nishibayashi, Kiyoshi Yamura, and Shoichi Inoue
........................................................................441

ORIFICE RHEOMETER AS A TEST FOR FLOWING CONCRETE
By Peter Bartos........................................................................................................467

INFLUENCE OF POLYMERIZATION OF SULFONATED NAPHTHALENE
CONDENSATE AND ITS INTERACTION WITH CEMENT
By M. Collepardi, M. Corradi, and M. Valente.................................485

 ADSORPTION OF SUPERPLASTICIZERS ON CALCIUM
ALUMINATE MONOSULFATE HYDRATE
By Franco Massazza, Umberto Costa, and Alessandro Barrila......................499

PERFORMANCE CHARACTERISTICS OF STEEL FIBER REINFORCED
SUPERPLASTICIZED CONCRETE
By V. Ramakrishnan, W. V. Coyle, Peter A. Kopac, and
Thomas J. Pasko, Jr..................................................................................515

SULFATE RESISTANCE OF MORTARS CONTAINING
SUPERPLASTICIZERS WITH FLY ASH OR BLAST FURNACE SLAG
By N. P. Mailvaganam, R. S. Bhagrath, and K. L. Shaw.........................535

SI (Metric) TABLES....................................................................................557

INDEX........................................................................................................559
