Proceedings of the Fourth International Ultraviolet Explorer Conference held in Rome, Italy, 15–18 May 1984

Co-sponsored by
The European Space Agency (ESA)
CNR/Istituto Astrofisica Spaziale
Contents

FOREWORD
R Viotti xi

OPENING ADDRESSES
L Gratton xv
P Benvenuti xvii
Y Kondo xix

INVITED PAPERS

Ultraviolet observations of normal galaxies
M A J Snijders 3

UV studies of the interstellar medium
J C Blades 11

Supernovae
N Panagia 21

Corona models tested with IUE and Einstein observations
R Hammer & J L Linsky 25

Spectral analysis of (very) hot stars: Methods and results
R P Kudritzki 33

The stellar wind enigma in early-type stars: The high-velocity,
narrow absorption lines in the UV
H Henrichs 43

IUE impact on the studies of the Zeta Aur, Algol and W Ser
interacting binary systems
M Hack 55

EXTRAGALACTIC OBJECTS

Study of hot spot galaxies
K Nandy & G I Thompson 65

Far-UV excess and gas content of SO galaxies
B Rocca-Volmerange & C Balkowski 69
Ultraviolet study of the stellar population of the giant extragalactic HII region NGC 604
L Sanz Fernández de Córdoba & P Benvenuti

The broad absorption line region in NGC 4151
G E Bromage et al

Component structure in the CIV line in NGC 4151
M V Penston et al

The Seyfert I galaxy NGC 5493 (III). Very rapid variations of its far UV spectrum and their implications
J Clavel

IUE observations of multiple nucleus galaxies
W Kollatschny & K J Fricke

The 1978-1984 fading of the Seyfert I galaxy F-9
W Wamsteker et al

MCG-2-58 = Mkn 926. A high luminosity Seyfert galaxy with two distinct broad-line components
M Jones & M Ward

Multifrequency observations of three active galaxies
L Bassani et al

Multifrequency observations of active galactic nuclei
E G Tanzi et al

UV observations of the variable quasar PG 1351+64
A Treves et al

Quasars as probes of the intergalactic medium
R F Green & J Bechtold

THE INTERSTELLAR MEDIUM

On the distribution of interstellar matter around the Sun
F Paresce

The interstellar absorption in the direction of some nearby A stars
R Freire Ferrero

Use of high resolution IUE spectra of Mg II in cool stars to probe the local interstellar medium
P Molaro et al

Further studies of nearby high velocity interstellar gas
B Bates et al

A general survey of the correlation of interstellar element depletion with line-of-sight density indicators
A W Harris et al
CONTENTS

Interstellar chlorine abundance: results and implications of a large-scale survey
A W Harris & G E Bromage 157

Interstellar lines in high resolution IUE spectra of run-away B-type stars
J Berger et al 161

The interstellar medium in the Scorpius-Ophiuchus region
T H Pwa & S R Pottasch 167

Interstellar and nebular absorption lines in planetary nebulae
T H Pwa et al 175

The diffuse interstellar medium in the Magellanic clouds
K S de Boer 179

STARS - PART 1

UV-bright stars in galactic globular clusters, their far-UV spectra and their contribution to the globular cluster luminosity
K S de Boer 185

Ultraviolet fluxes of blue straggler stars
M Gerbaldi & N Morguleff 187

Ultraviolet and optical observations of metal-deficient red giants and chromospheric models
A K Dupree et al 191

An upper limit to the beryllium abundance in the population II star HD 140283 from a high resolution IUE spectrum
P Molaro et al 197

Emission lines in the UV spectrum of α Tau
S Catalano et al 203

Search for chromospheric indicators in A dwarf stars
R Freire Ferrero & A Talavera 207

The Mg II lines in A dwarf stars
R Freire Ferrero et al 211

The search for superionisation lines in A dwarf stars
R Freire Ferrero & A Talavera 217

IUE spectra of three AOV stars rotating close to their break-up velocity: HD 119921, HD 129685 and HD 181296
P Molaro et al 223

The wind and chromosphere of the Herbig Ae star AB Aur as seen by IUE
C Catala 227
A UV glimpse of T Tauri stars  
*M T Lago et al*  
233

Magnetic activity in lower main sequence stars  
*O Vilhu*  
239

IUE observations of BY Draconis  
*C J Butler et al*  
243

Coordinated IUE and ground-based observations of active stars:  
Flare events on YZ CMi, V 1005 Ori, AD Leo and AR Lac  
*M Rodono et al*  
247

**STARS - PART 2**

An IUE high-resolution atlas of O-type spectra  
*N R Walborn et al*  
255

Statistical classification of IUE stellar spectra by the  
Variable Procrustean Bed (VPB) approach  
*A Heok et al*  
257

IUE low-dispersion spectra reference atlas  
*B J M Hassall et al*  
263

IUE high-resolution study of ONv stars  
*D Schönberner et al*  
267

Spectral analysis of helium-poor hot subdwarfs  
*U Heber & K Hunger*  
273

An analysis of the helium-weak star HD 144334  
*H J Walker & A E Lynas-Gray*  
279

Limb-darkening and metal abundances in the sdOB primary of  
the eclipsing binary LB 3459 (AA Dor)  
*A E Lynas-Gray et al*  
285

Flux variations of 88 Her through phase transition from  
far UV to visual  
*M Barylak & V Doazan*  
291

Possible identifying characteristics of Be stars  
*V Doazan & R W Thomas*  
297

An IUE study of Be stars with Fe II emissions in the visible  
*P L Selvelli & F X de Araújo*  
301

New Fe II lines in IUE spectra of stars  
*S Johansson*  
307

The ultraviolet spectrum of stars having optical Fe II emission lines  
*G Muratorio et al*  
309

COMETS

Search for 'exotic' molecules in bright comets
C B Cosmovici et al

Analysis of hydroxyl data from comet Austin 1982g
M K Wallis et al

IUE - General

The International Ultraviolet Explorer (IUE)
- 6 years in orbit
J Falker

Standard stars: Automatic line identification of
IUE high-resolution spectra
M Ramella et al

IUE data reduction facilities on Starlink
G E Bromage

The NASA IUE data analysis facilities
R Thompson & N R Evans

FUTURE UV EXPERIMENTS

The ultraviolet astronomy mission - Columbus
R Wilson

Instrumentation studies for FUSE/Columbus
J F Osantowski

LATE PAPERS

IUE integrated spectra of galactic globular clusters
V Caloi et al

Search for the radiative decay of a cosmic relic particle
with IUE
F Bochicchio et al

A comprehensive ultraviolet extinction study: Grain model
and grain evolution implications
G Chlewiński et al

Phase-dependent stellar wind absorption in interacting
Wolf-Rayet binaries
G E Bromage
