HBT 1

**FITNESS FOR DUTY**

*Fitness for Duty: The Psychological Dimensions,*
Gisele Richardson (861629) ............................................. 3

*Fitness for Duty: Proposed FAR Amendment to Air Crew Flight Time Limitations and Rest Requirements,*
Harold L. Sprogis, Airline Pilots Association (861857) ............................................. 13

HBT 2

**ROTORCRAFT — INNOVATIVE TECHNOLOGY FOR FUTURE SYSTEMS**

*Development of Three-Dimensional Audio Signals,* Theodore J. Doll,
Human Performance Branch, Georgia Tech Res. Inst., Georgia Inst. of Tech. (861660) ............................................. 21

HBT 3

**SPACE STATION AND AIRCRAFT: WINDOWS — DO WE NEED THEM?**

*Space Station Viewing Requirements,* J. L. Lewis, Space Station, NASA Johnson Space Ctr. (861754) ............................................. 41

*Low Cost Windowless Research Vehicle,* Ross E. Ailsieger and David T. Palmer, Boeing Military Airplane Co. (861755) ............................................. 45

*Presentation of Information on Multifunction Displays: Abnormal and Emergency Spacecraft Operations,* Gary Gershzohn, McDonnell Douglas Astronautics Co. (861756) ............................................. 51

HBT 4

**AIR TRANSPORT**

*An Integrated Display for Vertical Situation Awareness in Commercial Transport Aircraft,* Roger Houck, Brian D. Kelly, and John Wiedemann, Boeing Commercial Airplane Co. (861770) ............................................. 61

*Flying Complex Approach Paths Using the Microwave Landing System,* Charles E. Knox, NASA Langley Res. Ctr. (861771) ............................................. 65

*Comparison of Programmable Legend Keyboard and Dedicated Keyboard for Control of the Flight Management Computer,* Jean M. Crane, George P. Boucek, Jr., Boeing Commercial Airplane Co., Wayne D. Smith, Boeing Military Airplane Co. (861772) ............................................. 83

*The Impact of New Technology on Pilot Workload,* Alan H. Roscoe, B. S. Grieve, Britannia Airways Ltd. (861773) ............................................. 91
HBT 5
INTUITIVE SITUATION DISPLAYS

The Advantages of A Primary Flight Display, John Hutchinson,
IFALPA (861730) ................................................................. 101
A Situation Display of Traffic Information, Jack D. Howell,
ALPA (861731) ................................................................. 105
Improvements in Aircraft Safety and Operational Dependability
from a Projected Flight Path Guidance Display, John P.
Desmond, Flight Dynamics, Inc. (861732) ................................ 113
The Advantages of Flight Path Oriented Situation Displays During
Microburst Encounters, J. G. Oliver, ALPA (861733) ......................... 125

HBT 6
HUMAN PERFORMANCE ACCIDENT INVESTIGATION AND ANALYSIS

No papers were received for this session. ........................................ 129

HBT 7
CURRENT AND ADVANCED DISPLAYS

No papers were received for this session. ........................................ 131

HBT 8
WORKLOAD

Evaluating the Subjective Workload of Directional Orientation Tasks
with Varying Display Formats, Ronald C. Miller and Sandra G. Hart,
Sterling Software, NASA Ames Res. Ctr., Michael R. Bortolussi,
BITS, Inc. (861640) ................................................................. 135
Assessment of Pilot Workload: Converging Measures from Performance
Based, Subjective and Psychophysiological Techniques, Art Kramer,
Erik Sirevaag, and Rolf Braune, Dept. of Psychology, Univ. of
Illinois (861641) ................................................................. 139

9AC5
FLY BY WIRE TRANSPORT AIRCRAFT

Airbus A320 Side Stick and Fly By Wire — An Update,
S. G. Corps, Airbus Industrie (861801) ........................................... 149
FADEC — Every Jet Engine Should Have One, Richard J. Scoles,
Central District, General Electric Co., Dayton, OH (861802) .................. 163
Flight Testing TECS — The Total Energy Control System,
James R. Kelly and Lee H. Person, Jr., NASA Langley Res. Ctr.,
Kevin R. Bruce, Boeing Commercial Airplane Co., Seattle, WA
(861803) ................................................................. 169
Airline Requirements on a Fly-By-Wire Aircraft — A Pilot's View,
Peter H. Heldt, Lufthansa German Airlines (861804) ................................ 177
HBT 10
MAN AND MACHINE: CURRENT PILOT DECISION AIDING TECHNOLOGY ISSUES

No papers were received for this session. .................................................. 181

HBT 11
HUMAN ATTRIBUTES AND AIRCREW EFFECTIVENESS

An Investigation of the Relationship Between Basic Attributes Test Scores and Learning to Fly A VTOL Simulator, Darlene A.
Couchman, New Mexico State Univ. (861668) ........................................ 185

HBT 12
SIMULATION TECHNOLOGY

Flight Simulator Visual Systems — An Overview, R. E. Barrette,
Visual System Dev., CAE Electronics Ltd. (861708) ................................ 193

HBT 13
COLOR FOR ELECTRONIC DISPLAYS

Color Display Technology — An Overview, J. Robert Trimmier,
Sperry Corp. (861692) ................................................................. 201
Effective Use of Color on Avionics Displays, Gerald Murch
and Joann M. Taylor, Tektronix, Inc. (861694) .................................... 219
U.S. Air Force Color Display Issues, David L. Post, Wright
Patterson Air Force Base (861695) ...................................................... 227
Color Formatting Issues in Pictorial Displays, John M. Reising
and John Zenyuh, Wright Patterson Air Force Base, Robin L.
Martin, Boeing Military Airplane Co. (861696) .................................... 249

APPENDIX

Summary of the 1986 Activities of the G-10 Committee ...................... 257
Update on the Development of the Boeing 7J7, Kenneth Higgins .............. 259
Minutes of the G-10 Committee Meeting .............................................. 271
Crew/Controller Communication Issues .............................................. 299
