# TABLE OF CONTENTS

Session B1 - HIGH PERFORMANCE TRENDS AND BUS INTERNALS

B1-1  RISC Microcomputers: Status and Trends  
---Andrew Allison, Contributing Editor Mini-Micro Systems, Consultant, Los Altos Hills, CA  

B1-2  A Technical And Utilization Overview Of The IEEE 960-Fastbus  
---Robert Downing, Senior Computer Engineer, Center For Supercomputing R&D University of Illinois, Urbana, IL  

B1-3  Arbitration: A Comparison Of Backplane Systems  
---Dave Hawley, Product Planning Engineer, Advanced Peripherals, National Semiconductor Corp., Santa Clara, CA  

B1-4  32-Bit System Buses: A Physical Layer Comparison  
---R.V. Balakrishnan, Manager, Interface Circuits and Advanced Peripheral Processors, National Semiconductor Corp., Santa Clara, CA  

B1-5  Physical Layer Design Considerations for Hi-Speed Backplane Buses  
---R.V. Balakrishnan, Manager, Interface Circuits and Advanced Peripheral Processors, National Semiconductor Corp., Santa Clara, CA  

Session B2 - REAL-TIME KERNELS

B2-1  Real Time Multiprocessing Design  
---Robert Brians, Software Components Corp., Santa Clara, CA  

B2-2  iRMX (R) Operating System Distributed Real-Time Control Using The Multibus (R) II Architecture  
---Mayne Mihacsi and William Clemow, Intel Corp., Hillsboro, OR  

B2-3  Real-Time Multiprocessing for Today's Board Technology  
---Jim Ready, VP New Ventures R&D Hunter & Ready, Palo Alto, CA  

B2-4  MTOS--UX--An Operating Systems Kernal  
---Bernard Mushinsky, Industrial Programming, Inc., Jericho, NY
Session B3 - NEW BUS DEVELOPMENTS AND STANDARDS

B3-1 . RME 65: An RM65 Bus Compatible Expansion With A 65C816 16 Bit CPU
   --Dennis E. Starbuck, Vice President Engineering, Dynatem, Irvine, CA

B3-2 . The Newly Revised IEEE 696/S100 Standard and Proposed Extension Of The Bus To 32 Bits
   --Mark Garetz, VP Research & Development, CompuPro Viasyn, Hayward, CA

B3-3 . S-100 Applications and Advances
   --Ernest Wassermann, Chairman, SITA; Director of Marketing, Intercontinental Micro Systems, Anaheim, CA

B3-4 . SITA Meeting (S100 International Trade Association)
   --Opened to all interested parties

Session B4 - ANALOG I/O SYSTEMS

B4-1 . Advanced Process Controller
   --Cosma Pabouctsidis, President, Gespac, Inc., Mesa, AZ

B4-2 . Industrial Analog I/O For VMEbus And Multibus
   --Andrew Ian, Product Marketing Manager, Analogic Corporation, Danvers, MA

B4-3 . Real Time Acqisition And Control
   --Hunt Bergen and Lou Perreta, GE Datel, Mansfield, MA

B4-4 . The Local Applications Bus An Easy To Use I/O Bus
   --Eric Reiter, Founder, Computer Continuum, Daly City, CA
Session B5 - HIGH SPEED BUS SYSTEMS

B5-1. An Advanced Bus Structure In New Applications: Fastbus Has Arrived
   --Dr. John Hoftiezer, Bill Haynes, and Mike Skubic, Kinetic Systems, Lockport, IL

B5-2. Design Tradeoffs In Implementing A Multi-Processor System With Intelligent Peripherals
   --Bill Bunton, Texas Instruments NuBus Group, Austin, TX

B5-3. Designing Departmental Computers Based On The Multibus II Architecture
   --Steve Cooper, Product Marketing Engineer Multibus II, Intel Corp., Hillsboro, OR

B5-4. The Futurebus Tutorial: A Review Of High Speed Bus Shared Memory Architectures (the IEEE-896 Tutorial Committee Report)
   --Randy Davis, National Semiconductor Corp., Santa Clara, CA

Session B6 - REAL TIME OPERATING SYSTEMS

B6-1. "UniFlex", a Real-Time UNIX-Like Operating System
   --Gary Thomas, Technical Systems Consultants, Inc., Chapel Hill, NC

B6-2. Taking Advantage Of The Latest Technology--Migration From The 8086 To The 80286 and/or The 80386
   --Rick Gerber, Senior Software Sostaining Engineer, Intel Corp., Hillsboro, OR

B6-3. PDOS: The Realtime Operating System for Equipment Control
   --Reed W. Cardoza, Senior Software Engineer, Eyring Research Institute, Provo, UT

B6-4. OS/9 - A Real Time Operating System
   --James W. Moore, Jr., Microware Systems Corp., Inc., Des Moines, IA
Session B7 - SYSTEMS STRATEGIES

B7-1. Multiprocessor Architecture and CACHE Techniques
--Bulent Celebi, Marketing Manager Board Level Products
  Signetics Corp., Sunnyvale, CA

--Mark Mertsching, Vice President Engineering
  Dual Systems Corp., Berkeley, CA

B7-3. VAX Bux Architecture and Interfacing Considerations
--John Propper, Technical Applications Engineer
  Digital Equipment Corp., Marlboro, MA

B7-4. Interfacing The 32-Bit Intel 80386 To The VMEbus
--Richard Main, President, Zebu Research Corp., Sunnyvale, CA and Duke Sahelay, Iskra Corp.

Session B8 - SERIAL BUSES

B8-1. I'C: A Bus For Instrumentation And Control
--Carl Fenger and Nabil G. Damouny, Applications Engineer,
  Signetics Corp., Sunnyvale, CA

B8-2. Low Cost High Speed Interconnects: IEEE P1394 Reduces The Tower Of Babel
--Mike Teener, Systems Architect, Networks and Communications,
  National Semiconductor Corp., Santa Clara, CA

B8-3. BitBus On The Factory Floor
--Jack W. Bober, Product Manager, and Mark Budzinski, Author,
  Intel Corp. OEM Microcomputer Systems, Hillsboro, OR

B8-4. VMS Serial Bus Aids Multiprocessing Today
--Jim Magill, Signetics Corp., Sunnyvale, CA
Session B9. APPLICATION SPECIFIC COMPUTERS

B9-1. A New Option For Ultra High Speed Designs The 12 MIPS Novix NC6000
--Bobbie Ling, Product Manager, John W. Rible, John Peers, and Robert W. Murphy, Novix Inc., Cupertino, CA

B9-2. Fairchild Clipper: RISC On VME
--Andrew Allison, Contributing Editor, Mini Micro Systems, Consultant, Los Altos Hills, CA

B9-3. 8 MIPS-Novix/VME: Processor Choices Other Than Black
--Bill H. Holloway, Vice President, Engineering, VME Inc., Milpitas, CA

B9-4. VME Meta-Forth High Performance VME CPU Card: When 32-Bit Super-Micros Can't Cut It
--Phil Burnley and Thomas Harkaway, Xycom, Saline, MI

SESSION B10 - INTELLIGENT I/O SYSTEMS

B10-1. Design Of Intelligent IEEE-488 Interfaces For Various Bus Structures
--William (Bill) Nowlin, Jr., Vice President Engineering, and Robert Koenig, National Instruments, Austin TX

B10-2. Intelligent iSBX Modules Increase System Throughput
--Jim Bairey, PASCOT, Irvine, CA
Ken Tait, Abionics Inc., Mt. Arlington, NJ

B10-3. System Performance-The I/O Bottleneck
--Diana Isaza, Peripheral Controllers Product Manager, Intel Corp., Hillsboro, OR

B10-4. VMEbus I/O Solutions For Plant and Factory Control Systems
--Tom Hospod, Product Marketing Manager, Analogic Corp., Danvers, MA

B10-5. The JEDEC 28-Pin Memory Site as an I/O Bus
--Ken Arnold, President, HiTech Equipment Corp., San Diego, CA
Session B11 - BUS INTERFACE TECHNIQUES

B11-1. BiCMOS Bus Interface Reduces System Power Needs

--Bill Thompson, Strategic Marketing Manager, and Michael Higgs, Texas Instruments Digital Bipolar Logic Products, Dallas, TX

B11-2. VME Bus Interface Chips

--Scott Campbell, Director of Technology, Xylogics, Inc., Burlington, MA

B11-3. The Multibus II Connection

--James J. Farrell, III, Vice President Marketing, and John F. Stockton, VLSI Technology, Inc., Phoenix, AZ

B11-4. Multibus II Architecture Implementations With The Message Passing Coprocessor

--Scott Tetrick, Intel Corp., Hillsboro, OR

Session B12 - PERSONAL COMPUTER EXTENDED TECHNOLOGY

B12-1. High Integration 286 Motherboards

--Henry Potts, Helix Corp., Houston, TX

B12-2. Extending The PC Bus To 32 Bits

--Gary Lyons, Chairman IEEE 1096 Comm. Nestar Systems, Mountain View, CA

B12-3. UNIX Co-Processing For The IBM PC

--George White, President, Corollary Inc., Irvine, CA

B12-4. Extending the PC AT Bus Bandwidth

--Scott Hopkinson, Senior Engineer, Emulex, Cost Mesa, CA

B12-5. Novix Forth Coprocessor For The PC

--George Nicol, President, Software Composers, Palo Alto, CA

B12-6. IEEE P1134 "PC BIOS" Meeting (3:00-5:00 p.m.)

--Carl Warren, Chairman,

B12-7. IEEE P996 "Extended PC Back Plane Bus" Meeting

--Gary Lyons, Chairman
Session B13 - BUS HERESY

B13-1. "Murphy Lives"—or Why Plug Compatible Isn't
   --Tom Gardner, Systems Surety Group, Los Altos, CA

B13-2. Integrated Voice and Data Systems Bus Requirements and Tutorial
   --Dr. Gary Nelson, Chief Scientist, National Semiconductor
     Networks and Communications Div., Santa Clara, CA

   --George White, President, Corollary Inc., Irvine, CA

B13-4. RISC Processor Bus Requirement Compared With
        Nu Multibus II and P896
   N/A

Session B14 - HIGH PERFORMANCE DISC CONTROLLERS

B14-1. The Case For Intelligent Data Management Of Disk
        I/O In 32-Bit Systems
        --Bill Moren, Marketing Engineer, Ciprico, Inc., Plymouth, MN

B14-2. V/ESDI 4201 Panther: An Advanced VMEbus Controller
        --Tom Kent, Director of Marketing, Interphase Corporation,
           Dallas, TX

        of Systems Beyond 21 Card Slots
        --Don Turrell, VP Marketing, Performance Technologies, Inc.
           E. Rochester, New York
Session B15 - DESIGNING AND TESTING SYSTEMS

B15-1. Self Test Diagnostics In Multibus (R) II Architecture
--John Hyde, Multibus II Marketing Manager, and Ed Begun, Intel Corp., Hillsboro, OR

B15-2. Silicon Circuit Board--An Electrically Programmable High Density Interconnect System
--Albert Bogdan, Mosaic Systems, Troy, MI

B15-3. Microresources for Developing Intelligent Test Methodologies
--Dr. James Truchard, President, National Instruments, Austin, TX

B15-4. Disk and Disk Drive Test Methods
--Frank Meijers, Luctor, Phoenix, AZ

Session B17 - STD BUS

B17-0. The New STD Bus
--Jim Eckford and Phil Nash, Ziatech Corporation, San Luis Obispo, CA

--Bob A. Burckle, Vice President, WinSystems Inc., Arlington, TX

--Ken Finster, MicroSys, Glendale, CA

B17-3. STD Bus Controllers Are I/O Workhorses Distributed Processing and Dedicated Processors Are Assuming I/O Dirty Work
--Ray Alderman, Matrix, Raleigh, NC

B17-4. Ladder Language On The STD Bus Provides Obsolescence Protection For A Flexible Programmable Controller
--Paul Virgo, Pro-Log Corp., Monterey, CA
Session S2 - DESIGN FOR PRODUCTION AND RELIABILITY

S2-1. Hardware/Software Systems And Peripherals Reliability
--Irv Doshay, Chairman Los Angeles Chapter IEEE Reliability Society Senior Engineer, TRW, Pacific Palisades, CA

S2-2. A Case Study
--Irv Doshay, Chairman Los Angeles Chapter IEEE Reliability Society Senior Engineer, TRW, Pacific Palisades, CA

S2-3. Taking Printed Circuit Boards From Design To Production
--Peter J. Shaw, President, and David Rager, Calay Systems, Inc., Irvine, CA

S2-4. CAD For Design Engineers
--Tom Lazear, President, VersaCad Corp., Santa Ana, CA
Shelly Robertson, WMD, Irvine, CA

Session S3 - SCSI SESSION

S3-1. SCSI: The Systems Approach
--Tom Thawley, Executive Vice President, Interphase Corp., Dallas, TX

S3-2. The Communications Engine: A Front End Processor
--Leslie N. Yeamans, Vice President, Systems Strategies, Inc., New York, NY

S3-3. Integrating Tape Into A SCSI System
--Don L. Millican, President, Millican Electronics, Yucca Valley, CA

S3-4. Intelligent SCSI Adapter
--Bart J. Besseling, Microproject BV, Haarlem, The Netherlands, and Zion Barel, Microproject Corp., Marina del Rey, CA

S3-5. Using SCSI For Real Time I/O
--Rick Lehrbaum, Vice President Engineering, and William Dollar, Ampro Computers Inc., Mountain View, CA

N/A
Session S6 - LASER PRINTER TOPICS

S6-1. Typographical Quality Fonts Require Customization For Laser Printer Engines
- Yates Canipe, President, and David Harralson, Straightforward, Gardena, CA
432

S6-2. Page Description Languages Drive Laser Printers
- Herb Edelstein, Consultant, Euclid Associates, Berkeley, CA
N/A

S6-3. Laser Printer Interfacing And Compatibility: Bridging The Gap
- Phil Liberman, Zvert Corp., Huntington Beach, CA
436

S6-4. UPS Technology and Applications
- Mike Rasmussen, General Power Systems, Anaheim, CA
N/A

Session S7 - DATABASE ENGINES, FILE SERVERS, AND NETWORKS

S7-1. Optimizing Disk Management For LANS
- George Morrow, PC Editor, Electrical Engineering Times, Intelligent Access Corp., San Rafael, CA
N/A

S7-2. Database Management 1987: Hot Topics, Role of SQL, Distributed DBMS, and Network Support
- Herb Edelstein, Founder, Euclid Associates, Berkeley, CA
N/A

S7-3. Relational Database Management On Industry Standard Platforms Support LANs And Applications
- Stu Schuster, VP Marketing, Sybase, Berkeley, CA
324

S7-4. High-Performance, Dial-Up Communications Systems Using Multi-Carrier Modulation Technology
- Bahman Zargham, Director of Software Engineering, Telebit Corp., Cupertino, CA
328

S7-5. VLSI Makes Star-LAN Practical
- Scott Kesler, Design Engineer, and Barbar Veal, Marketing Manager, Texas Instruments Semiconductor Div., Dallas, TX
336
Session S8 - PROFESSIONAL ISSUES

S8-0 . IRS 1706—The End Of The Independent Contractor & Consultant
    --Jeffry M. Jacobs, Contract Systems Inc., Manhattan Beach, CA

S8-1 . Keeping PACE: Continuing Education For Working Engineers
    --Ron Aschmotal, Member IEEE PACE Committee, Condor Pacific
        Industries, Canoga Park, CA

S8-2 . Manufacturing Representation: A Researched Study
    Into Good Rep-Manufacturer Relations
    --Michael Moore, Zebu Research Corp., Sunnyvale, CA

S8-3 . Meeting The Product Documentation Challenge
    --Roy Laudenblager, D. Ollila, and R. Renes,
        Paladin Publishing Corp., Hillsboro, OR

S8-4 . "Off-Shore" Production--It's Your Decision
    --Dean Hadley, Calmex Manufacturing Co., San Ysidro, CA

S8-5 . Going Public
    --David Tedder, Attorney At Law, Tedder & Wykidal, Orange, CA

Session S9 - STRATEGIES FOR ENHANCING SYSTEM PERFORMANCE

S9-1 . VME System Configuration Parameters Affect UNIX Performance
    --Roger G. Fordham, Motorola Micro Systems, Tempe, AZ

S9-2 . Performance Analysis Techniques For Multibus II
    Message Passing
    --William M. Clemow, Intel Corp., Hillsboro, OR

S9-3 . Optimizing VMEbus I/O Performance Using Intelligent
    SCSI Host Adaptor Techniques
    --John Slusser, President, Donald L. Turrell, and
        John J. Grana, Performance Technologies, Inc.,
        E. Rochester, NY

S9-4 . Optimizing Performance In A Real-Time Multiprocessing
    Application
    --Gary Dool, DY-4 Systems Inc., Nepean, Ont. Canada
