# TABLE OF CONTENTS

## Plenary Session

**THIRTY YEARS OF FINITE ELEMENT ANALYSIS—ARE THERE ISSUES YET TO BE RESOLVED?**

Dr. Richard H. Gallagher ......................................................... ii

## Session 1 - Optimization

**EFFECTIVE USE OF NUMERICAL OPTIMIZATION IN STRUCTURAL DESIGN**

G.N. Vanderplaats ................................................................. 1.1

**TUTORIAL EXAMPLES OF OPTIMUM DESIGN USING ANSYS-PC SOFTWARE**

Robert H. Mallett ................................................................. 1.16

**DESIGN SENSITIVITY ANALYSIS OF NONLINEAR STRUCTURAL SYSTEMS WITH AN ESTABLISHED FINITE ELEMENT CODE**

Jose L.T. Santos, Kyung K. Choi ........................................... 1.35

**OPTIMUM FINITE ELEMENT MESHING WITH THE ANSYS PROGRAM**

Eric Donaldson, H.S. Gopalakrishna ...................................... 1.57

**DESIGN AND ANALYSIS OF AN OPTIMUM BICYCLE RACING WHEEL**

Mark C. Rodamaker ............................................................... 1.58

**STRUCTURAL RELIABILITY ASSESSMENT WITH THE ANSYS PROGRAM**

H.S. Gopalakrishna, Eric Donaldson ....................................... 1.75

## Session 2 - Field Equations

**ANALOG SOLUTIONS TO CONTINUUM PROBLEMS**

Lawrence L. Durocher ............................................................ 2.1

**APPLICATION OF 3-D ANSYS MAGNETOSTATIC ANALYSIS TO DISCRETE COMPONENT DESIGN**

W.E. Archer, R.L. Dickerhoff, E. Kowalski, J.L. Milton .................. 2.18

**USE OF THE GENERAL PURPOSE FINITE ELEMENT CODE ANSYS (ELEMENT STIF55) FOR MODELING GROUNDWATER CONTAMINATION**

T. Son Nguyen, G.J.K. Asmis ................................................ 2.30

**MEGAELEMENT ANALYSIS OF GROUNDWATER FLOW IN LARGE 3-D DOMAINS**

Charles E. Doherty, Gregory Nakhimovsky ................................ 2.46

**THE APPLICATION OF ANSYS FOR TWO-DIMENSIONAL POTENTIAL FLOW CALCULATIONS THROUGH A TURBINE CASCADE**

Ravindra Agarwal, Brian D. Ball ........................................... 2.60

**THERMAL ANALYSIS APPLIED IN AXISYMMETRIC STRUCTURES UNDER THERMAL TRANSIENT WITH FLUCTUATING SODIUM LEVEL**

Claudio Ravera ................................................................. 2.67

## Session 3 - Modeling

**FINITE ELEMENT MODEL VERIFICATION AND CALIBRATION**

Jeffrey M. Steele ............................................................... 3.1

**THE INFLUENCE OF MODELING TECHNIQUE ON NATURAL FREQUENCY PREDICTIONS**

Richard Eberhart .............................................................. 3.18
THE "BLACK ART" OF MODELING FABRICATED STRUCTURES
A. Firmin ................................................................. 3.24

AXISYMMETRIC MODELING OF CONSTRAINED ELASTOMERS IN CURVED GLANDS
Keith A. DiRienz, Raymond Chia ........................................ 3.34

STRESS EVALUATION OF A GEOMETRICALLY COMPLEX HELICOPTER ROTOR COMPONENT
USING ANSYS - AND COMPARISON WITH PHOTO-ELASTIC RESULTS
Bill Newland ............................................................. 3.39

USING ANSYS SOLUTIONS DIRECTLY TO PERFORM AUTOMATIC SAFETY ANALYSES OF
TOWER STRUCTURES
Paul van Gulick, Frank Chang, Jeffrey P. Meeker .................. 3.62

Session 4 - University Applications

CAE APPLICATIONS AT MICHIGAN STATE UNIVERSITY'S A.H. CASE CENTER
FOR COMPUTER-AIDED ENGINEERING AND MANUFACTURING
Erik D. Goodman, Andrew J. Hull ...................................... 4.1

ANSYS APPLICATIONS IN A CONSORTIUM FOR COMPUTER-AIDED
MECHANICS AND MATERIALS DESIGN AND TESTING
James G. Orbison, Thomas P. Rich ..................................... 4.19

PERSONAL COMPUTERS FOR EDUCATIONAL ANSYS USE
Leonard Van Gulick ...................................................... 4.37

ANALYSIS OF CRACKS WITH BUECKNER FIELDS USING THE ANSYS PROGRAM
P. Paolino, D. Naehring, D.J. Cartwright .............................. 4.42

ENGINEERING DESIGN EDUCATION USING THE ANSYS PROGRAM
Leonard Van Gulick ...................................................... 4.52

AN ANSYS APPLICATION IN THE ANALYSIS/DESIGN
OF A STEEL SHELVING SYSTEM
Bernard McNamee, Michalakis C. Constantinou .................... 4.58

Session 5 - Dynamics I

ANALYSIS OF A CABLE SUPPORTED STRUCTURE UNDER RANDOM LOADING
L. Eric Stacy .............................................................. 5.1

ON THE SENSITIVITY OF SAW RESONATORS TO ACCELERATION STRESSES
S. Locke, B.K. Sinha ................................................... 5.19

ISO-RESPONSE CURVES FOR RECTANGULAR PLATES UNDER LATERAL
PRESSURE PULSE ANALYSIS WITH THE ANSYS PROGRAM
Judah Ari-Gur ............................................................ 5.34

DYNAMIC CALCULATIONS OF THE SHOCK RESISTANCE
BETWEEN A TANK AND ITS HOUSING
Lucian Iliia, Luc Vadez ................................................ 5.49

LINEAR TRANSIENT DYNAMIC RESPONSE OF A RIDER-BICYCLE
SYSTEM CAUSED BY HALF SINUSOIDAL EXCITATION
Chia-Lung Chang, John J. Engblom ................................... 5.59

COMPARATIVE CASE STUDIES WITH NASTRAN AND ANSYS
Guenter Mueller, Karl Schweizerhof .................................. 5.69
Session 6 - Nonlinearities I

THE USE OF STRUCTURAL PARTITIONING WITHIN ANSYS TO SOLVE NONLINEARITIES WITHIN HUMAN HIP REPLACEMENT MODELS
Thomas M. Hansen, James B. Koeneman ........................................6.1

APPLICATION OF THE ANSYS PROGRAM TO COAL MINE SUPPORT SYSTEM DESIGN
B.G.D. Smart, P.W.H. Olden .........................................................6.18

ATOMISTIC COMPUTER SIMULATION OF DYNAMIC CRACK PROPOGATION BY FINITE ELEMENT TECHNIQUE
Murari P. Singh, V.D. Frechette .................................................6.30

FINITE ELEMENT METHOD CALCULATIONS OF STRESS STRAIN BEHAVIOR OF ALUMINUM–SILICON ALLOYS
Anil Saigal, Kenneth Preston ......................................................6.45

FINITE ELEMENT METHOD INVESTIGATION OF TURBOMACHINERY CASING SPLIT-LINE FLANGE DESIGN
John G. Klavuhn, James P. Bandstra ...........................................6.54

BUCKLING CASES APPLIED IN THIN AXISYMMETRIC SHELLS UNDER PRESSURE
Ubaldo Barbaris .................................................................6.70

Session 7 - Nonmetallic Materials

PRACTICAL HONEYCOMB AND COMPOSITE DESIGN USING ANSYS
George R. Adamczyk, P.E ..........................................................7.1

ANALYSIS OF ANISOTROPIC LAMINATED SHELLS USING THE ANSYS PROGRAM
Moujalli Hourani, Phillip L. Gould ...........................................7.12

DESIGN OF A CATHODE RAY TUBE WITH A NEARLY-FLAT GLASS FACEPLATE
AND A NON–GLASS FUNNEL USING FINITE ELEMENT ANALYSIS
Arun K. Varshneya, Vijay Jain, Murari P. Singh ..........................7.29

AGRICULTURAL SOIL MODELING USING FINITE ELEMENT ANALYSIS
R.L. Raper, P.W. Gassman, D.C. Erbach, S.W. Melvin ..................7.44

DEFLECTION ANALYSIS OF BEAMS APPLIED TO THERMOPLASTIC SNAP FIT DESIGN
Chul S. Lee, Alan Dubin ...........................................................7.59

FINITE ELEMENT STRESS ANALYSIS OF INNER AND OUTER GLAZED-COATED GLASS CONTAINERS
A.V. Longobardo, Vijay Jain, A.K. Varshneya ................................7.78

Session 8 - Dynamics II

ANALYSIS OF COVENTRY CATHEDRAL TOWER
Kevin Fox ................................................................................8.1

DYNAMIC ANALYSIS AND DESIGN OF CENTRIFUGAL PUMP SYSTEMS
Yesh P. Singh, James H. Ball, Keith E. Rouch, Pradip N. Sheth ..........8.10

PIPELINE SUSPENSION BRIDGE MODAL ANALYSIS
Ralph Alan Dusseau, Michel Elias Haddad ................................8.27

A FINITE ELEMENT APPROACH TO THE SOLUTION OF PROBLEMS OF CRITICAL SPEED AND UNBALANCE IN ROTATING SYSTEMS
Alastair Caldwell .................................................................8.38
FINITE ELEMENT ANALYSIS AND MODAL TEST OF A COMPOSITE SANDWICH STRUCTURE
S.H. Chen, H.R. Radwan ............................................. 8.54

FLUID FILLED VESSELS UNDER ACCELERATION
Fred Jensen, Don Negrelli ........................................... 8.61

Session 9 - Nonlinearities

OBTAINING SOLUTIONS TO NONLINEAR PROBLEMS USING A LINEAR FINITE ELEMENT CODE
Robert J. Sayer ......................................................... 9.1

IMPLEMENTATION OF HYPERELASTIC FINITE ELEMENTS AS USER ELEMENTS IN ANSYS REVISION 4.2
Ernest D. George, Jr., George A. Haduch, Bryan Lane ..................... 9.15

CALCULATING RESIDUAL MANUFACTURING STRESSES IN BRAZE JOINTS USING THE ANSYS PROGRAM
Farrell L. Deibel .................................................. 9.39

THE ANALYSIS OF STRUCTURAL SYSTEMS EXPOSED TO UNWANTED FIRES USING ANSYS REVISION 4.2

ON HEREDITARY EFFECTS IN CREEP COMPUTATIONS
W. Szyzskowski, P.G. Glockner ....................................... 9.56

ANALYSIS OF A NUCLEAR WASTE CASK FOR SPENT NUCLEAR FUEL
M.C. Yaksh, T.C. Thompson, D.E. Miller ................................ 9.67

Session 10 - Interfaces

MECHANICAL COMPUTER-AIDED ENGINEERING (MCAE) COMPUTING TRENDS
Douglas Ingram ....................................................... 10.1

A WORKSTATION-BASED, MENU-DRIVEN PREPROCESSOR FOR THE ANSYS PROGRAM
Christa C. Decker, James G. Orbison ................................ 10.2

CIMPLEX/ANSYS MODELING AND ANALYSIS OF MACHINED PARTS
Richard D. Lowrey .................................................... 10.20

OFFLINE HOME COMPUTER PLOTTING OF ANSYS RESULTS
Carl Panek ............................................................. 10.29

ANSYS-PC TO ANSYS COMMUNICATION
Shuichi Fukano .......................................................... 10.41

PARAMETRIC DESIGN AND ANALYSIS OF A FAN WHEEL USING ROMULUS AND ANSYS
Michael Schubbe, Otto Jandl ........................................... 10.43

Session 11 - Electronics & Electronic Packaging

ANSYS APPLICATIONS IN ELECTRONICS
Mark C. Rodarmaker, D. Dennis Patton ................................ 11.1

AUTOMATIC THERMAL AND DYNAMIC ANALYSIS OF ELECTRONIC PRINTED CIRCUIT BOARDS USING THE ANSYS FINITE ELEMENT PROGRAM
Ruben Nalbandian ..................................................... 11.16
FINITE ELEMENT ANALYSIS IN ELECTRONIC PACKAGING
Ray Iannuzzelli ............................................. 11.34

APTMC: AN INTERFACE PROGRAM FOR USE WITH ANSYS FOR THERMAL AND THERMALLY INDUCED STRESS MODELING/SIMULATION OF VLSI PACKAGING
J.J. Shiang, Z.J. Staszak .................................. 11.55

FREE SURFACE OPTIMIZATION OF OFF-STATE SEMICONDUCTOR DEVICES
J. Middleton, J.B. Waddell ................................ 11.63

Session 12 - Industrial Applications

ANSYS ANALYSES ON THE SHIPPINGPORT STATION DECOMMISSIONING PROJECT
Philip V. DeSantis, Harry G. McNamee .................. 12.1

APPLICATION OF ANSYS TO CHEMICAL ENGINEERING ACTIVITY
Y. Arai, Y. Shibusa ........................................ 12.11

COMPUTER-AIDED DESIGN OF AN INDUSTRIAL WINDING MACHINE
Allen T. Junker, Alan J. Errett ......................... 12.19

STRENGTH ANALYSIS OF A VANE PUMP ROTOR
Yoshiharu Inaguma, Teruo Komatsu, Shuichi Fukano .... 12.32

STRESS ANALYSIS OF ROLLER BEARINGS USING FINITE ELEMENT METHOD
Metin Ozen, Myron R. McKenzie ....................... 12.48

DEVELOPMENT OF A PIPING ELBOW STIFFNESS MATRIX WHICH INCLUDES THE STIFFENING EFFECTS OF ATTACHED PIPING
Evan Westerman, Ray Fasiczka .......................... 12.60

Poster Presentations

APPLICATIONS OF FINITE ELEMENT TECHNIQUES TO AID THE DESIGN OF HAND TOOLS
Jeffrey Annis, Donald Caldwell, Eric Gustafson ........... P.1

SIMULTANEOUS DESIGN AND ANALYSIS USING GEOMETRIC PROGRAMMING AND THE INTEGRATED FORMULATION
S.A. Burns ................................................ P.7

CALCULATING MARGINS OF SAFETY IN RANDOM VIBRATION ANALYSES
Farrell L. Deibel ......................................... P.19

A COMPACT DATABASE SCHEME FOR PARTITIONED FRONTAL SOLUTION ALGORITHM IN FINITE ELEMENT ANALYSIS
Hong-Tsung Lin .......................................... P.26

A FINITE DIFFERENCE INVESTIGATION OF THE FLOW OF WATER IN SOILS
Reda M. Bakeer, Sayed M. Sayed .......................... P.35

INVESTIGATIONS OF FREE CONVECTION HEAT TRANSFER IN ELECTRONIC PACKAGING USING THE ANSYS GENERAL PURPOSE FINITE ELEMENT PROGRAM
C. Rajakumar, D. Johnson .................................. P.44

OPTILIS - A NEW WAVE FRONT OPTIMIZER FOR ANSYS (AN OPTIMIZER FOR LARGE, SPARSE, LINEAR SYSTEMS)
Suresh R. Phansalkar .................................... P.56

MATRIX AND ELEMENT REORDERING
Jan Christian Anker ....................................... P.73
