TECHNOLOGY OF GLASS, CERAMIC, OR GLASS-CERAMIC TO METAL SEALING

presented at
THE WINTER ANNUAL MEETING OF THE AMERICAN SOCIETY OF MECHANICAL ENGINEERS
BOSTON, MASSACHUSETTS
DECEMBER 13-18, 1987

sponsored by
THE MATERIALS DIVISION, ASME

edited by

D. P. KRAMER
EG&G ELECTRONIC COMPONENTS
## CONTENTS

Chemical Bonding at Glass-To-Metal Interfaces  
*J. A. Pask.* ................................................................. 1

Properties of Seals Made With Li$_2$O-A$_2$SiO$_2$-Glass Ceramics and Aluminum-Containing Austenitic Stainless Steels  
*R. T. Cassidy and P. N. Fagin* ........................................ 9

Improved Glass-Ceramic to Metal Seals in Actuator and Detonator Applications With an Aluminum-Containing Austenitic Stainless Steel  
*J. C. Birkbeck, R. T. Cassidy, P. N. Fagin, and W. E. Moddemann.* ......................................................... 15

Reactions and Bonding Between Glasses and Titanium  
*R. K. Brow and R. D. Watkins* ........................................ 25

Processing of Glass to Aluminum Seals Via an Injection Molding Technique  
*D. P. Kramer, R. T. Massey, and D. L. Halcomb* .................. 31

Processing and Interfacial Analysis of Glass-Ceramic to Metal Seals  
*R. E. Loehman* .............................................................. 39

Analysis of End Stresses in Glass-Metal Bimaterial Strips  
*F. P. Gerstle, Jr. and R. S. Chambers.* ................................. 47

Stress Analysis of Header Material Sets  
*C. M. Woods and C. W. Merten* ........................................ 61

Diffusion Zone Model of a Ceramic/Metal Interface  
*F. Delale* ........................................................................ 69

A Review of the Mechanical Testing of the Coating-Substrate Bond Strength in Ceramic-Metal Systems  
*B. A. Chapman, H. D. DeFord, G. P. Wirtz, and S. D. Brown.* ................................................................. 77

Interfacial Mechanics of Seals  
*C. W. Lau, A. Rahman, and F. Delale* .................................. 89
