FLOWS IN NON-ROTATING TURBOMACHINERY COMPONENTS

presented at
THE WINTER ANNUAL MEETING OF
THE AMERICAN SOCIETY OF MECHANICAL ENGINEERS
CHICAGO, ILLINOIS
NOVEMBER 27-DECEMBER 2, 1988

sponsored by
THE FLUIDS ENGINEERING DIVISION, ASME

edited by
U. S. ROHATGI
BROOKHAVEN NATIONAL LABORATORY

A. HAMED
UNIVERSITY OF CINCINNATI

J. H. KIM
ELECTRIC POWER RESEARCH INSTITUTE
CONTENTS

Numerical Simulation of the Three-Dimensional Flow Around a Butterfly Valve
C. Lacor and C. Hirsch ......................................................... 1

Application of a Fractional Step Algorithm to the Solution of Inviscid Turbomachinery Flow
Problems

Simulation of Three-Dimensional Internal Turbulent Flows
M. Agouzoul, M. Reggio, and R. Camarero .................................. 19

A Systematic Procedure for the Aerodynamic Design of Vaned Diffusers
R. H. Aungier ........................................................................... 27

A Performance Analysis for the Vaneless Components of Centrifugal Compressors
R. H. Aungier ........................................................................... 35

Acceleration of Standard Full-Potential and Elliptic Euler Solvers, Using Preconditioned
Generalized Minimal Residual Techniques
K. Giannakoglou, P. Chavariopoulos, and K. D. Papailiou ............................... 45

Improvement of Planar Diffuser Performance Using Boundary Layer Blowing Along the Diverging
Walls
D. A. Hassinger and T. R. Lalk .................................................... 53

An Integral Calculation Method for Three-Dimensional Boundary-Layers in Axisymmetric Diffusers
F. T. F. Morgado and L. M. C. Gato ........................................... 63

An Experimental Study on the Performance of Mixed-Flow-Type Conical Walled Annular Diffusers
K. Ishikawa and I. Nakamura ...................................................... 73

Measurement of Three-Dimensional Periodic Flow in a Conical Draft Tube at Surging Condition
M. Nishi, S. Matsunaga, M. Okamoto, M. Uno, and K. Nishitani ..................... 81

The Application of Low Solidity Diffusers in Centrifugal Compressors
C. Osborne and J. Sorokes ....................................................... 89

A Simple Approximate Method to Evaluate the 3-D Aerodynamic Field Around a Streamline and
to Determine the Validity of the Quasi-Three Dimensional Hypothesis
J. -M. Duchemin and F. Jean .................................................. 103

Secondary Flows in a Transonic Cascade: Comparison Between Experimental and Numerical
Results
F. Bassi, C. Osnaghi, A. Perdichizzi, and M. Savini .................................... 111
