## CONTENTS

### Session 1: GENERAL

A. Armor, EPRI

**Expert System Technology - An EPRI Perspective**  
S. Divakaruni, J. Scheibel, G. Poe, A. Armor, EPRI

**EPRI Projects: Technical Progress Update**  
B. Sun, J. Naser, D. Cain, EPRI

### Session 2: EXPERT SYSTEM TECHNOLOGY

**Expert System Technology -- The Implementation Process**  
C. Saylor, S. Lipton, Niagara Mohawk Power Corporation

**Tutorial: Introduction to AI**  
A. Agogino, University of California

**Expert System Tools**  
L. Lidsky, MIT

**Selecting Expert Systems Applications**  
D. Cain, EPRI

### Session 3: EXPERT SYSTEMS: APPLICATIONS FOR POWER PLANT OPERATIONS

**Expert System Applications in Power Generation and Distribution: A Survey on the Ongoing Projects at CISE**  
A. Stefanini, M. Gillanti, CISE (Italy)

**AI Aided Operation Guidance System in Thermal Power Station**  
S. Aoki, K. Kawai, H. Masuyama, H. Takaoka, Toshiba, Ltd. (Japan)

**A Scheduling Support System Based on Fuzzy Inference for Startup of Fossil Power Plants**  
H. Matsumoto, D. Iba, S. Nigawara, Hitachi, Ltd. (Japan)

**Expert Systems Applications in Water Treatment**  
D. Sopocy, A. Glazer, J. Montanus,  
Sargent and Lundy Engineering Company

**WELDER: An Expert System Welding Engineer's Aide**  
R. Antinoja, S. McMillan, T. Wiesner, C. Cook,  
Bechtel National, Inc.
A Case Study in Development and Delivery of an Expert System to Assist in Electrical Distribution Planning
M. Huyck, Niagara Mohawk Power Corporation

The Development and Application of TURBOMAC, An Expert Machinery Diagnostic System
P. Parge, J. Stuart, J. Vinson, Radian Corporation

EXPERT SYSTEMS: APPLICATIONS IN FOSSIL POWER PLANTS

Gas Turbine Expert System - An Overview
C. Dohner, EPRI
S. Acierno, Jersey Central Power and Light Company

EXACT - An Expert System for Gas Turbine Troubleshooting
R. Shah, B. Pomeroy, R. Salemme, R. Irving, General Electric Company

Intelligent User Interface for Expert Systems Applied to Gas Turbine Maintenance and Troubleshooting
C. Koch, B. Isle, A. Butler, Honeywell, Inc.

The TIP Expert System for Heat Rate Improvement
R. Pack, J. Nasal, General Physics Corporation
R. Mancini, New York State Electric and Gas Company

COREX - An Expert System for Corrosion Analysis and Treatment
S. Rinehart, G. Koch, Battelle Memorial Institute

A Boiler Tube Failure Analysis Expert System
R. Cleland, Central and South West Services, Inc.

An Expert System for Supporting Coal Fired Plant Operation
Y. Kitamura, M. Mizuno, The Hokkaido Electric Power Company
T. Kojima, Mitsubishi Heavy Industries (Japan)

EXPERT SYSTEMS: APPLICATIONS IN NUCLEAR POWER PLANTS

An Expert System for Technical Specifications
G. Finn, F. Whittum, R. Bone, Stone and Webster Engineering Co.

A Fuel Insert Shuffle Planner Expert System
J. Naser, R. Colley, EPRI, J. Gaiser, Intellicorp
T. Brookmire, Virginia Electric Power Company
S. Engle, Expert-EASE Systems, Inc.

Expert System Application to Fault Diagnosis and Procedure Synthesis
B. Hajek, S. Hashemi, R. Bhatnagar, D. Miller, J. Stasenko, Ohio State University
Realm: An Expert System for Classifying Emergencies
R. Touchton, A. Gunter, Technology Applications, Inc.
D. Cain, EPRI

TRIBES - A CPC/CEAC Trip Buffer Expert System
R. Lang, Middle South Utilities System Services

A Production System for Computerized Emergency Procedures Tracking
W. Petrick, K. Ng, C. Stuart, Nuclear Software Services
D. Cain, EPRI

CSRL Application to Nuclear Power Plant Diagnosis and Sensor Data Validation
S. Hashemi, W. Punch, B. Hajek, Ohio State University

An Expert System Technology for Work Authorization Information Systems
J. Munchausen, K. Glazer, Southern California Edison Company

6 EXPERT SYSTEMS: UTILITY DEVELOPMENT PROGRAMS

Expert Systems Applications at PSE&G - A Task Force Approach
H. Roman, F. Marian, R. Mears, E. Hyman,
Public Service Electric and Gas Company

The Development of Pilot Alarm Response Expert Systems at Consolidated Edison
L. Olsen, Consolidated Edison Company

Artificial Intelligence in Process Design and Operation
A. Sudduth, Duke Power Company

TU Electric Experience with On-Line Generator Monitoring and Diagnostics
J. Carlson, TU Electric
M. Coffman, Westinghouse Electric Corporation

Expert Systems Applications within the Central Electricity Generating Board
G. Thomas, CEGB (England)

7 EXPERT SYSTEMS: APPLICATIONS FOR POWER PLANT DIAGNOSTICS

EPRI Demonstration of Decision Tree Approach to Heat Rate Diagnostics for Fossil Power Plants
A. Tome, IT/Delian Corporation
S. Divakaruni, EPRI
INSPECTR: An Interactive Power Plant Performance Diagnostic Assistant
R. Lucier, Yankee Atomic Electric Company

A Generator Expert Monitoring System (GEMS)
B. Lloyd, Ontario Hydro (Canada)
D. Sharma, EPRI
C. Brede, SRI International

Expert System for Turbine Thermal Performance Diagnostics
W. Bertch, Energy, Inc.
R. Brandon, Brandon Engineering
M. Hunt, Louisiana Power and Light Company

An Expert System for Rotating Equipment Vibration Diagnosis
G. Finn, J. Hall, Stone and Webster Engineering Company

Early Fault Detection and Diagnosis for Nuclear Power Plants
O. Berg, R. Grini, OECD Halden Reactor Project (Norway)
M. Yokobayashi, Japan Atomic Energy Research Institute (Japan)

A User-Friendly Expert System for Diagnosing Boiler-Tube Failures in Fossil Power Plants
G. Singh, University of Texas at San Antonio
H. Bains, Karta Technology, Inc.
S. Gehl, J. Scheibel, EPRI

Models Applied in Knowledge Based Diagnosis
R. Skatteboe, K. Berge, Kongsberg Kvatro Company (Norway)
G. Tangen, Norwegian Research Institute of Electricity

Application of C-E's Generic Diagnostic System to Power Plant Diagnostics

Expert System Applications in Energy Management and Utilization at EPRI, D. Hu, EPRI

8 WORKING GROUP DISCUSSIONS

Appendix A: Attendance List
Appendix B: Agenda
Appendix C: Questionnaire Results
