CONTENTS

Preface v
Acknowledgements vii
Editor’s Notes ix

1. CRYPTOGRAPHIC SYSTEMS - I.

Generating Multiprecision Integers with Guaranteed Primality.
N. Demytko. 1

A Proposed Design for an Extended DES
L. Brown. 9

2. SECURE DATA BASES

AI and 4GL : Automated Detection and Investigation Tools.
W. Tener. 23

Sentinel : A Secure Relational Database.
G. Shore. 31

3. EFTS AND BANKING

The Practical Restraints and Solutions to Large Scale EFTPOS.
C. Reilly. 39

Security Aspects of Smart Cards.
S. Draper. 51

4. CRYPTOGRAPHIC SYSTEMS - II

Permutations that Maximise Non-Linearity and their Cryptographic Significance.
J. Pieprzyk and G. Finkelstein. 63

The Use of Automated Cryptographic Check-Sums.
H. Beker. 75
5. ORGANIZATIONS AND EDUCATION.

Getting Organizations Involved in Computer Security: The Role of Security Awareness.
E. Markey. 83

Experiences from a One-Year Academic Programme in Security Informatics.
L. Yngström. 87

6. COMPUTER CRIME

M. Kratz. 101

7. CRYPTOGRAPHIC SYSTEMS - III

Evaluating Cryptographic Strategies.
J. Carroll and M. Kantor. 119

A RSA Card for PC's.
M. Dupuy. 135

8. OFFICE AUTOMATION

T. Keenan. 139

Authorization and Access Control in the Office-Net System.
M. Fugini and R. Zicari. 147

9. SECURITY PRODUCTS AND SYSTEMS

Computer Security at Digital.
J. Derosier. 163

The Role of Classification of Information in Controlling Data Proliferation in End-User PC Environment.
J. Feuerlicht and P. Grattan. 167
10. CRYPTO-KEY SYSTEMS.

A Cryptographic Key Distribution Mechanism for Secret Communications.
T. Kobayashi. 177

11. SECURE / TRUSTED SYSTEMS.

A Manufacturer’s Approach to the Security of Computer Systems.
C. Blatchford. 187

M. Henning and A. Rohde. 197

12. ACCESS / AUTHENTICATION CONTROL

Extended User Authentication: The Next Major Enhancement to Access Control Packages.
C. Cresson Wood. 223

Choosing a Logical Access Control Strategy.
K. Fitzgerald. 235

13. AUDITING

Considering Security when Auditing Applications Under Development.
R. Moeller. 245

Experiences of the Use of the SBA Vulnerability Analysis for Improving Computer Security in Finland.
R. Voutilainen. 263

14. SECURE / TRUSTED SYSTEMS - II

Rendering a Commercial Operating System Secure: A Case Study.
J. Legge. 273

Industrial Espionage and Theft of Information.
M. Kratz. 279
15. ACCESS / AUTHENTICATION CONTROL - II

Meeting Data Security Needs.
D. Ewing.

Experience of Using a Type Signature Password System for User Authentication in a Heavily Used Computing Environment.
M. Newberry and J. Seberry.

16. SECURE / TRUSTED SYSTEMS - III (KEYNOTE)

Perspectives on Trusted Computer Systems.
W. Ware.

17. DOCUMENT INTERCHANGE AND NETWORKS

Secure Electronic Data Interchange.
J. Snare.

The World Meganetwork and Terrorism.
C. Madsen.

18. NETWORKS / EFT

Securing the Micro-Mainframe Link.
R. Bosen.

Australian EFTPOS Security Standards.
R. Davids.

19. EFTS AND COST OF SECURITY

Security in Electronic Funds Transfer: Message Integrity in Money Transfer and Bond Settlements through GE Information Services Global Network.
M. Shain.

Computer Security : Operational or Investment Cost.
E. Orlandi.
20. **AUDITING - II**

Automation of Internal Control Evaluation.
W. Lee. 391

Auditing Changes to MVS.
M. Hahn. 407

21. **NETWORKS, PCs AND WORKSTATIONS**

The PC as a Secure Network Workstation.
I. Graham and S. Wieten. 425

R. Jamieson and G. Low. 439

22. **AUTHENTICATION AND IDENTIFICATION**

Personal Authentication Devices - Data Security Applications.
J. Elsbury. 471

Use of Fingerprint as Identity Verification.
S. Duval, C. André, R. Collot and M. Achemlal. 479

**AUTHOR INDEX** 483

**SUBJECT INDEX** 485
