TABLE OF CONTENTS

GENERAL SESSIONS

President's Address, Carole Medeiros .................................................. 1
Opening Address, Robert C. Sutton ....................................................... 4
Experiment Station Report on Research Projects, Don J Heinz ................. 8
Report to HST on Sugar Legislation, Robert H. Hughes ......................... 11
Economic and Social Feasibility of Brazilian Alcohol Program—Proalcool, Julio Borges ............................................................. 15
Sugar in the Sudan, Wayne Richardson, Jr ............................................. 17
The History of Shipping Sugar, Kent Bowman ....................................... 22
Quality Circles at Ka'u, Clare H. Barton ............................................. 23
Review of the U.S. and World Sugar Markets, James M. Burt ................. 28
"But, I'm an Educator", Sarah Jane Anderson ....................................... 31
Copersucar: The Sugar and Alcohol Cooperative of Centre-South Brazil, Julio Borges ............................................................. 33

AGRICULTURE SECTION

Effect of Chemical Ripeners and Insoluble Solids on Molasses Exhaustibility and Viscosity, T. Moritsugu and G. E. Sloane ..................................................... 37
Effect of Polaris on the 1980 Crop at Waialua Sugar Company, R. V. Osgood ............................................................. 39
Mini-Factory Processing of Smut-Infected Cane, K. Onna and S. Ferreira ......................... 42
HPLC Analysis of Sucrose and Reducing Sugars, Norman Nomura ............. 43
Opportunities of Yield Increases at HC&S and McBryde Sugar Companies, Kobe Shoji ............................................................. 44
Opportunities for Yield Improvement at Davies Hamakua Sugar Company, W. Garvie Hall ............................................................. 46
Progress in Sugar Yield Improvement at Amfac Plantations, Thomas J. O'Brien ............................................................. 49
Opportunities for Yield Improvement at C. Brewer Plantations, William B. Case ............................................................. 52
Yield Improvement—Sugar Recovery, W. W. Paty, Jr ................................ 54
Amfac Proposed Central Seed Processing System, Allen Hall ................... 58
Bundling Characteristics of Long Stalk Seed Cane, Lee Jakeway ................ 60
Fungicides for Seed Treatment, Jack Comstock .................................... 65
Does Bioengineering Have a Role to Play in the Sugar Industry in Hawaii?, A. Maretzki ............................................................. 67
Anther Culture of Sugarcane, Maureen M. M. Fitch ................................ 69
Amounts of Water Versus Yields of Drip-Irrigated Sugarcane at the HSPA .......................... 72
Polado Symptoms and Comparative Effects on Some Horticultural Crops, R. K. Nishimoto ............................................................. 73
Sugarcane Variety Update—1981, Tom Tew .......................................... 74
Fertilizer Trends for the 1980's, R. E. Stenge ...................................... 76
Pre-Harvest Sampling at Olokele Sugar Company, George H. Wachi ........ 78
Pre-Harvest Cane Sampling at Maunakea Sugar Company, Mae Nakahata ........ 83
Installation of the Motorola Irrigation Controller at Oahu Sugar Company, Gary Prothero ............................................................. 86
Automation of Drip Irrigation at Kekaha Sugar Company, Craig Bowden .......... 88
Fertilizer Application through the Drip System at Olokele Sugar Company, Roger D. Ferguson ............................................................. 92
Acceptance and Distribution of Foods in the Big-Headed Ant Colonies, Deborra A. Sanders ............................................................. 94
Alternate Crops: A Summary of Findings and Some Comments Concerning the Search for Alternatives, John Roecklein ........................................ 95
Application of Roundup Herbicide with Selective Equipment, N. E. Jackson ............................................................. 98
FACTORY SECTION

Evaluation of Syrup Clarification at the Haina Factory of the Davies Hamakua Sugar Company, 
T. Moritsugu ................................................................. 100
Pioneer Dewatering Mill, K. D. Stapleton ........................................... 102
Mill Turbinization at HC&S Puunene Factory, Robert Kwok .................. 104
Government Energy Regulations Update, S. Masumoto .......................... 107
Environmental Standards Committee Report, Robert D. Mounts .............. 109
Energy Conservation Practices at the Kekaha Sugar Factory, Jacques R. Albert-Thenet ........................................ 111
Energy Saving Projects at Oahu Sugar Company, Ronald Okawa ............ 114
Areas for Energy Efficiency Improvements in Power Plant Systems, Ted. W. Vorfeld .................................................. 118
Amfac's Hydropower Plans, Ned Broadbent and Bert Hatton ................. 123
Alexander & Baldwin Hydro Programs, S. Masumoto ............................. 125
Ethanol Feasibility Study for Hilo Coast Processing Company, Jerry E. Allen ......................................................... 127

FIELD ENGINEERING SECTION

Update on Drip Irrigation Tubing Used in The Hawaiian Sugar Industry, W. Bui ...................................................... 132
Engine Evolution for Fuel Economy, Charles T. Flatt ............................. 136
Engine Protection System, A. L. Burgess .............................................. 140
Save Those Profits . . . Become Technically Knowledgeable on Fuel/Lube/Hydraulic Oil Purification, J. A. Doot ...................................................... 141
Link-Belt Hydraulic Crane, Peter Borrero, Jr. ......................................... 145
