Proceedings of the
ASHRAE/DOE-ORNL CONFERENCE

Thermal Performance of the
Exterior Envelopes of Buildings

December 3-5, 1979
Orlando Hyatt Hotel
Kissimmee, Florida

Co-sponsored by
American Society of Heating, Refrigerating
and Air-Conditioning Engineers, Inc.
and
U.S. Department of Energy
Office of Energy Conservation and Solar Energy
Buildings and Community Systems Division
CONTENTS

Introduction ........................................................................................................ 1
Acknowledgments ................................................................................................. 2
Welcome Address by Dr. Maxine Savitz .............................................................. 3

SESSION I: THERMAL ANALYSIS OF BUILDING ENVELOPES

A Calculator Programming Technique for Estimating Thermally Optimum Wall Construction
John E. Twenty and Lee V. McQueen ................................................................. 9

Proposed Streamlined Residential Heating Energy Budget Analysis by a Variable Temperature Design Method
Gunard E. Hans .................................................................................................. 16

Simple Methods for Predicting Thermal Behaviour and Energy Consumption in Buildings
L. Agnoletto, P. Brunello and R. Zecchin ............................................................ 33

Energy Conservation Design Guidelines for Including Mass and Insulation in Building Walls
Michael E. Dexter ............................................................................................... 52

A Rational Manual Method for Determination of Space Temperature Swing Due to Solar Gains
E.L. Cuplinskas .................................................................................................. 58

Computer-Aided Energy Savings Redesign of the Exterior Envelope of an Apartment Building
Gerhard R. Mueller and Donald C. Pedreyra .................................................... 73

SESSION II: AIR INFILTRATION

The Use of Sound to Locate Infiltration Openings in Buildings
David N. Keast and Hsien-Sheng Pei ................................................................. 85

The Low Pressure Leakage Function of a Building
M.H. Sherman, D.T. Grimsrud and R.C. Sonderegger .................................... 94

A Model Correlating Air Tightness and Air Infiltration in Houses
Ake K. Blonsterberg, M.H. Sherman and D.T. Grimsrud ............................... 122

Analysis of Infiltration by Tracer Gas Technique, Pressurization Tests, and Infrared Scans
Michael B. Stewart, Thomas R. Jacob and Jeffrey G. Winston .................... 138

Field Air Leakage of Newly Installed Residential Windows
J.L. Weidt, J. Weidt and S. Selkowtiz .............................................................. 149

Air Exchange Measurements in a High-Rise Office Building
C.M. Hunt and S.J. Treado ................................................................................ 160

Air Leakage Characteristics and Weatherization Techniques for Low-Income Housing
Richard A. Grot and Roy E. Clark .................................................................. 178

Air Leakage Measurement and Reduction Techniques on Electrically Heated Homes
John O. Collins Jr. .............................................................................................. 195
### SESSION III: TEST PROCEDURE DEVELOPMENT

<table>

SESSION V: MODELING BUILDING ENVELOPE SYSTEMS

Extension of Methods Used in Analyzing Building Thermal Loads
Zulfikar O. Cumali, A. Osman Sezgen, Robert Sullivan and Ronald C. Kammerud ............................. 411

Heat Transmission Coefficients of Concrete Block Walls with Core Insulation
L.S. Shu, A.E. Fiorato and J.W. Howanski ......................... 421

Modeling of Residential Attics
Kenneth E. Wilkes .................................................. 436

Mathematical Modeling and Computer Simulation of Insulation Systems in Below Grade Applications
F.S. Wang .............................................................. 456

A Technical Review of the "M" Factor Concept
Richard D. Godfrey, Kenneth E. Wilkes and Adrienne G. Lavine .......................... 472

SESSION VIA: ECONOMIC OPTIMIZATION

A Method of Rating the Thermal Efficiency of a Home Envelope Relative to an Energy Efficient Standard
Robert S. Blancett .................................................... 493

A Statistical Decision Method for Economic Evaluation of the Exterior Envelopes of Buildings
Anna Maria Ercules .................................................... 508

Economic Considerations in Insulating Masonry and Wood-Frame Walls of Single-Family Housing
Stephen R. Petersen ................................................... 522

Economic Comparison and Thermal Performance of Several Different Insulated Wall Constructions
Grenville K. Yuill and Gary Proskiw ................................ 541

SESSION VIB: STANDARDS FOR ENERGY CONSERVATION

Evaluation of Residential Building Energy Performance Standards
Mark D. Levine, David B. Goldstein, Metin Lokmanhekim and Arthur H. Rosenfeld ..................... 551

Building Envelope Thermal Performance Standard, The Texas Approach
Michael N. Hart, Jerold W. Jones and William Bowen .................................................. 570

Energy Conservation Opportunities in the Building Envelope Through the Enforcement of a Mandatory Energy Code
David R. Miller .......................................................... 587

Implementation of Building Energy Standards in New York State
Raymond J. Albrecht and J. Delaine Jones ......................... 595
SESSION VII: INNOVATIVE CONSTRUCTION PRACTICES

Residential Ventilation with Heat Recovery: Improving Indoor Air Quality and Saving Energy

Ventilated Windows as Solar Collectors, Air as Thermal Carrying Media and Thermal Storage in Hollow Core Concrete Floor Slabs
David Sodergren and Carl E. Dahl

Thermal Spacers Improve Roof Insulation Performance of Metal Buildings
Harold J. Waite and Marvin K. Snyder

Sandwich Panels with Foamed Polyurethane Insulation
Lars-Erik Larsson

The Performance of an Energy Efficient Residence vs a Conventional Comparison Home
Ralph J. Johnson

Thermophysical Properties Database Activities at Owens-Corning Fiberglas
Kenneth E. Wilkes

Analysis and Measurement of the Thermal Behavior of the Walls and Surrounding Soil for a Large Underground Building
George D. Meixel, Jr., Paul H. Shipp and James W. Ramsey

SESSION VIII: FIELD MEASUREMENT OF ENERGY USE

Annual Heating and Cooling Requirements and Design Day Performance for a Residential Model in Six Climates: A Comparison of NBSLD, BLAST 2, and DOE-2.1
William L. Carroll

A New Measurement Strategy for In-Situ Testing of Wall Thermal Performance
P.E. Condon, W.L. Carroll and R.C. Sonderegger

Measurement and Analysis of In-Situ Dynamic Thermal Performance of Building Envelopes Using Heat Flow Meter Arrays
P.E. Condon and William L. Carroll

Transient Thermal Response of an Intermittently Cooled Massive Building
Parambir S. Gujral, Raymond J. Clark and Douglas M. Burch

The Principles of Building Science and Thermography Needed to Diagnose the Performance of Building Enclosures
Peter A.D. Mill

Thermal Performance of the Norris Cotton Federal Building in Manchester, New Hampshire
T.E. Richtmyer, W.B. May, C.M. Hunt and J.E. Hill
SESSION IX: MOISTURE AND CONDENSATION

A Field Study of Moisture Damage in Walls
Insulated Without a Vapor Barrier
George A. Tsongas, F. Glen Odell and
James C. Thompson .......................... 801

The Effect of Moisture on the Thermal
Conductance of Roofing Systems
Lawrence I. Knab, David R. Jenkins
and Robert G. Mathey .......................... 816

Comparative Studies of Vapor Condensation
Potentials in Wood Framed Walls
F.S. Wang ........................................ 836

Moisture Condensation Above Insulated Suspended
Ceilings - Experimental Results
G.H. Hart and Tage C.G. Carlson .................. 847

Ventilation of Back Space of Building Enclosure
Siding for Solar Heat Gain Reduction
Hiroshi Homma and Richard W. Guy .................. 856

An Experimental Investigation of the Effect of Added
Insulation on Water Vapor Condensation in Mobile
Home Roof Cavities
Tage C.G. Carlson and Ross G. Luce .................. 875

Annual Cycle Moisture Analysis
Michael B. Stewart ................................ 887

SESSION X: RETROFITTING FOR ENERGY CONSERVATION

A Field Survey of the Performance Properties of Insulation
Used to Retrofit Cavity Walls of Residences
Walter J. Rossiter, Jr., John L. Weidt
and Robert J. Saxler .......................... 901

Recommended Insulation Retrofit Techniques for Mobile
Homes with a Simple Payback Analysis
Tage C.G. Carlson and Richard S. Bemis .................. 916

The Mobile Window Thermal Test Facility (MoWitt)
J.H. Klems and S.E. Selkowitz .................. 930

Energy Conservation Study for Puerto Rico Aqueduct and
Sewer Authority Building
Sam R. Fogleman ................................ 942

Aged Thermal Resistance (R Value) of Foil-Faced
Polyisocyanurate Foam Thermal Insulation Board
Morton Sherman ................................ 952

The Effective Thermal Performance of an Insulated
Standard Stud Wall Containing Air Gaps
R.P. Tye, A.O. Desjarlais, J.G. Bourne
and S.C. Spinney .......................... 965

The Direct Approach to Retrofitting - Protected
Membrane Roofing
Peter N. Deal .......................... 978

The Impact of Insulation Placement on the Seasonal
Heat Loss Through Basement and Earth-Sheltered Walls
George D. Meixel, Paul H. Shipp and Thomas P. Bligh ......... 987
