SOCIETY OF FLIGHT TEST ENGINEERS

14th ANNUAL SYMPOSIUM PROCEEDINGS

"FLIGHT TESTING TODAY: INNOVATIVE MANAGEMENT AND TECHNOLOGY"

Sheraton Newport Hotel
Newport Beach, Calif.
August 15-19, 1983

Sponsored by the Los Angeles Chapter
CONTENTS

SESSION 1: MANAGEMENT
James R. Agar — Session Chairman

- TRAINING AND DEVELOPMENT OF ENGINEERS AT THE
  AIR FORCE FLIGHT TEST CENTER — AN OVERVIEW
  Ronald E. Hart
  United States Air Force — Edwards AFB, California
  ............................................................... 1.1-1

- IMPACTS OF AUTOMATION — AUTOMATION AND FLIGHT
  TEST ENGINEERING
  W. Dijkschoorn
  Fokker B.V. — Schiphol-Z
  ............................................................... 1.2-1

- THE USE OF ENGINEERING SIMULATION TO SUPPORT AIRCRAFT
  FLIGHT TESTING AT THE U.S. AIR FORCE FLIGHT TEST CENTER
  Richard A. Wood
  United States Air Force — Edwards AFB, California
  ............................................................... 1.3-1

- GETTING A PARTNERSHIP INTO THE AIR: TESTING THE
  SAAB-Fairchild 340
  Tomas Sigbjörnsson
  Saab-Scania — Linköping
  ............................................................... 1.4-1

SESSION 2: MANAGEMENT
Richard A. Capiola — Session Chairman

- TESTING SMARTER
  Thomas J. Higgins III and John A. Wiles
  United States Air Force — Edwards AFB, California
  ............................................................... 2.1-1

- FLIGHT TESTING THE DIGITAL ELECTRONIC ENGINE CONTROL
  (DEEC) — A UNIQUE MANAGEMENT EXPERIENCE
  Terrill W. Putnam, Frank W. Burcham and Berwin M. Kook
  NASA — Dryden Flight Research Facility — Edwards, California
  ............................................................... 2.2-1

- 767 FLIGHT TEST PROGRAM OVERVIEW
  Jay W. Deeds
  Boeing Commercial Airplane Company — Seattle, Washington
  ............................................................... 2.3-1

- TEN YEARS OF COMBINED TEST OPERATIONS AT THE
  AIR FORCE FLIGHT TEST CENTER — IN RETROSPECT
  Peter D. Kennedy
  United States Air Force — Edwards AFB, California
  ............................................................... 2.4-1

- THE AUTOMATED KC-135R TEST PROGRAM
  Dennis A. Fletcher and John T. Higgs
  Boeing Military Airplane Company — Wichita, Kansas
  ............................................................... 2.5-1

- GROUND SUPPORT FACILITIES — THE WAY TO EFFECTIVE
  AVIONICS FLIGHT TESTING
  Rodger P. Oetzel
  BDM Corporation — Albuquerque, New Mexico
  ............................................................... 2.6-1

vii
SESSION 3: TEST RESULTS
Virginia A. Clare — Session Chairman

• FLIGHT TEST AND EVALUATION OF THE A-10
  Capt. George Kailiwi III and 2Lt John W. Mathews
  United States Air Force — Edwards AFB, California .................. 3.1-1

• LEAR FAN MODEL 2100 EMERGENCY EGRESS SYSTEM
  George S. Harrison
  Lear Fan Limited — Reno, Nevada ................................. 3.2-1

• QUANTIFYING AFTI/F-16 GUST ALLEVIATION CHARACTERISTICS
  USING FREQUENCY RESPONSE ANALYSIS
  Capt. Robert Crombie
  United States Air Force — Edwards AFB, California .................. 3.3-1

• NATURAL ICING FLIGHT TESTS OF THE BEECH
  MODEL F90-1 PROTOTYPE
  Brian E. Mee
  Beech Aircraft Corporation — Wichita, Kansas ..................... 3.4-1

• CONVENTIONAL TAKEOFF AND LANDING (CTOL) AIRPLANE
  SKI JUMP EVALUATION
  C. P. Senn and Cdr J. A. Eastman, USN
  Naval Air Test Center — Patuxent River, Maryland .................. 3.5-1

• DEVELOPMENT AND QUALIFICATION TESTING OF S-76
  HELICOPTER TAKEOFF AND LANDING PROCEDURES FOR
  REDUCED FIELD LENGTH
  Jeffrey L. Cole
  Sikorsky Aircraft Division, United Technologies Corporation —
  West Palm Beach, Florida ........................................ 3.6-1

SESSION 4: TEST METHODS
Stephen G. Riter — Session Chairman

• THE USE OF OIL FOR IN-FLIGHT FLOW VISUALIZATION
  Robert Curry and Robert Meyer

• IN-FLIGHT FLOW VISUALIZATION — A FLUID APPROACH
  N. Belevtsov, R. E. Brumby and J. P. Hughes
  Douglas Aircraft Corporation — Long Beach, California ................ 4.2-1

• COMMUNITY NOISE TESTING — NEW TECHNIQUES AND EQUIPMENT
  Michael H. Borfitz and Billy M. Glover
  Boeing Commercial Airplane Company — Seattle, Washington ............ 4.3-1

• THE FLYOVER NOISE TEST MONITOR SYSTEM (FONTMS)
  Cliff R. Hogstedt
  Douglas Aircraft Company — Long Beach, California .................... 4.4-1

• FIGHTER AIRCRAFT DYNAMIC PERFORMANCE
  Wayne M. Olson and Yvonne L. Sell
  United States Air Force — Edwards AFB, California .................... 4.5-1

• THE EVOLUTION OF FLUTTER EXCITATION AT MCDONNELL AIRCRAFT
  James J. Meany
  McDonnell Douglas Corporation — St. Louis, Missouri ................... 4.6-1
SESSION 5: TECHNOLOGY - DATA REDUCTION AND ANALYSIS
H. Douglas Stewart — Session Chairman

• GRUMMAN'S DISPLAY AND CONTROL SYSTEM (DCS) — WORK-IN-PROGRESS
  W. Sweeney and R. Melhofer
  Grumman Aircraft Corporation — Calverton, New York .......................... 5.1-1

• THE MICROCOMPUTER IN FLIGHT TEST DATA REDUCTION
  Steven A. Walters
  Aerospatiale Helicopter Corporation — Grand Prairie, Texas .................... 5.2-1

• NOSEBOOM POSITION ERROR PREDICTION DATA BASE UPDATE
  Joseph P. Fuehne and D. KurtTippey
  McDonnell Aircraft Company — St. Louis, Missouri .............................. 5.3-1

• TAKEOFF PERFORMANCE DATA USING ONBOARD INSTRUMENTATION
  Harold K. Cheney
  Douglas Aircraft Company — Long Beach, California ............................ 5.4-1

• PADD'S A PORTABLE AIRBORNE DIGITAL DATA SYSTEM
  Jack Nixon
  Boeing Commercial Airplane Company — Seattle, Washington .................... 5.5-1

SESSION 6: TECHNOLOGY — INSTRUMENTATION AND DATA ACQUISITION
Richard Emmerson — Session Chairman

• 767/757 INSTRUMENTATION SYSTEM
  Thomas E. Smidt
  Boeing Commercial Airplane Company — Seattle, Washington ................... 6.1-1

• HADS DIGITAL PRESSURE TRANSUDER
  Andrew Dimitriou and David Hopmann
  Rosemount, Inc. — Eden Prairie, Minnesota ........................................ 6.2-1

• USES OF A DIGITAL ELECTRONIC THEODOLITE SYSTEM IN A WEAPON SEPARATION PROGRAM
  Joseph G. Turner
  McDonnell Aircraft Company — St. Louis, Missouri ................................ 6.3-1

• CONTINUED DEVELOPMENT OF DISTANCE MEASURING EQUIPMENT FOR REAL-TIME SPATIAL POSITIONING IN MILITARY AIRCRAFT TESTING
  R. G. Allen, J. W. King and M. J. Smith
  Lockheed-Georgia Company — Marietta, Georgia .................................... 6.4-1

• TIME-SPACE-POSITIONING INFORMATION AT EDWARDS AIR FORCE BASE, CALIFORNIA
  Dr. Henry F. Bunch and Dr. Richard W. Sieger
  United States Air Force — Edwards AFB, California ............................ 6.5-1

• IMPACT OF CAD/CAM ON MODIFICATION OF FLIGHT TEST VEHICLES
  P. P. Panzarella
  United States Air Force — Wright-Patterson AFB, Ohio ........................ 6.6-1
