PREFACE ............................................................... ix

POLYMERS

NONLINEAR OPTICAL PROCESSES IN ORGANIC AND POLYMER STRUCTURES
A.F. Garito ......................................................... 3

GROWTH OF THIN FILM SINGLE CRYSTALS OF POLYDIACETYLENES
M. Thakur and S. Meyler ........................................... 5

TIME RESOLVED SOLID STATE NONLINEAR SPECTROSCOPY OF PTS POLYDIACETYLENE ON THE PICOSECOND TIME SCALE
Gary M. Carter, Mrinal Thakur, Yung Jui Chen, John Hryniewicz, and Stephen Meyler .................................................. 7

NONLINEAR OPTICAL GLASSY POLYMER FILMS
K.D. Singer, J.E. Sohn, and S.J. Lalama ............................ 11

Polarization Phenomena and Resonance Effects in Cubic Susceptibility of Polydiacetylene Thin Films
P.A. Chollet, F. Kajzar, and J. Messier .............................. 15

PHOTOREFRACTIVE MATERIALS

MATERIALS REQUIREMENTS FOR PHOTOREFRACTIVE VOLUME HOLOGRAPHIC OPTICAL DEVICES
A.R. Tanguay ......................................................... 20

OPTICAL MEASUREMENTS OF THE PROPERTIES OF PHOTOREFRACTIVE IMPURITIES NEEDED FOR DEVICE DESIGN
R.W. Hellwarth ...................................................... 23

INVESTIGATION OF DEEP LEVELS IN Bi₁₂GeO₂₃ BY PHOTOINDUCED CURRENT TRANSIENT SPECTROSCOPY
Jean-Paul Zielinger, Mayer Tapiero, Nadia Benjelloun, Jean-Claude Launay, Jean-Marc Bassat, and Michel Devallet .............................................. 25

FERROELECTRIC TUNGSTEN BRONZE CRYSTALS FOR PHOTOREFRACTIVE APPLICATIONS
Ratnaker R. Neurganokar and Warren K. Cory .......................... 29

TENSOR PHOTOVOLTAIC EFFECT IN BaTiO₃
D.A. Temple, R.S. Hathcock, and C. Warde ........................ 33

OPTICAL CHARACTERIZATION OF PHOTOREFRACTIVE STRONTIUM BARIUM NIOBATE
M.D. Ewbank, M. Khoshnevisan, R. Neurgaonkar, W.K. Cory, and J. Feinberg .................................................. 37

SEMICONDUCTORS AND MICROSTRUCTURES I

QUANTUM WELL STRUCTURES FOR NONLINEAR OPTICS
A.C. Gossard ......................................................... 41

GIANT NONLINEARITIES WITH FAST RESPONSE: ION IMPLANTATION OF BOND EXCITONS IN CdS AND APPLICATIONS IN BISTABLE DEVICES
M. Dagenais, W.F. Sharfin, M. Prise, and B.S. Elman ................ 45
NONLINEAR ABSORPTION AND ELECTRO-ABSORPTION IN GaAs/AlGaAs WELL WAVEGUIDES

FEMTOSECOND POLARIZATION AND SPECTRAL HOLE-BURNING IN GaAs ABSORPTION SATURATION
J.L. Oudar, D. Hulin, A. Migus, and A. Antonetti ...................... 53

SIMULTANEOUS MEASUREMENT OF THE TWO-PHOTON COEFFICIENT AND FREE-CARRIER CROSS SECTION ABOVE THE BANDGAP IN A SEMICONDUCTOR
Arthur L. Smirl, K. Bohnert, Thomas F. Boggess, and Kamjou Mansour . 55

THE NONLINEAR OPTICAL PROPERTIES OF SEMICONDUCTOR QUANTUM WELLS
Shi Long-pei ........................................... 59

SEMICONDUCTORS AND MICROSTRUCTURES II

OPTICAL NONLINEARITIES OF COMPOSITE MATERIALS
D. Ricard, P. Roussignol, and C. Flytzanis ............................ 65

TWO-PHOTON ABSORPTION, NONLINEAR REFRACTION AND OPTICAL LIMITING IN SEMICONDUCTORS

LINEAR AND NONLINEAR ABSORPTION OF ROOM TEMPERATURE EXCITONS IN GaInAs/AlInAs QUANTUM WELLS

OPTICAL BISTABILITY IN ZnSe BULK MATERIAL, AND OPTIMIZATION OF BISTABLE INTERFERENCE FILTERS
B.S. Wherrett, A.K. Kar, D. Hutchings, and D. Russell ............... 77

NONLINEAR EXCITONIC ABSORPTION OF (Zn,Mn)Se SUPERLATTICES

ORGANICS

BULK AND WAVEGUIDING NONLINEAR STRUCTURES FOR LONG- AND SHORT-PULSE PARAMETRIC EFFECTS
Isabelle Ledoux, Peter Vidakovic, and J. Zyss .......................... 87

LASER INDUCED THIN FILMS PHOTODEPOSITION OF NONLINEAR OPTICAL ORGANIC MATERIALS
J. Flicstein, Y.I. Nissim, and D. Morin ................................ 91

GROWTH, CHARACTERIZATION, AND APPLICATIONS OF UREA CRYSTAL
C.L. Tang, K. Cheng, and M. Rosker .................................. 95

OPTICAL SECOND-HARMONIC GENERATION IN AN ORGANIC CRYSTAL-CORE FIBER
S. Umegaki, Y. Takahashi, A. Manabe, and S. Tanaka .................... 97

INORGANICS

PROGRESS AND NEW CONCEPTS IN INORGANIC NONLINEAR MATERIALS
R.L. Byer .............................................. 103
