Contents

Part One. Symposium Presentations

A. Receptor Binding Techniques in Drug Development
   Solomon H. Snyder  3

B. Development of In Vitro Techniques to Measure the Inflammatory Response
   1. Chairman’s Introduction
      Peter A. Ward  23
   2. Determination of Photosensitivity by an In Vitro Assay as an Alternative to
      Animal Testing
      D.J. McAuliffe, T. Hasan, J.A. Parrish, and I.E. Kochevar  29
   3. Prostaglandin Production as an Index of In Vitro Cytotoxicity
      Norman H. Dubin  43
   4. Surface Topography and Tight Junctional Organization of Epithelial Cells
      Michael A. Edidin, Markus Ammann, and Laura Major  53
   5. An In Vitro Screen for Potential Inflammatory Agents Using Cultured
      Fibroblasts
      H. Lei, K. Carroll, L.-C. Au, and S.S. Krag  73
   6. Chairman’s Summary
      Gareth M. Green  87

C. Cytotoxicity—Acute Toxicity
   1. Chairman’s Introduction
      Donald Reed  93
   2. Protective Effects of Calcium in the Amelioration of Cadmium-Induced
      Cytotoxicity in Cultured Murine Parenchymal Hepatocytes
      Elsie M.B. Sorensen and Daniel Acosta  99
   3. An In Vitro Model for Acute Toxicity Screening Using Hepatocytes Freshly
      Isolated From Adult Mammals
      G. Krack, P. Vossen, D. Deboys, F. Goethals, and M. Roberfroid  141
   4. Use of Primary Hepatocyte Cultures for Studies on the Toxicological
      Significance of Peroxisome Proliferation
      T.J.B. Gray, B.G. Lake, J.A. Beamand, and S.D. Gangolli  169
   5. Specific Protein Synthesis as an Indicator of Cellular Injury
      John M. Frazier  189
   6. Chairman’s Summary
      Leon Golberg  199
D. Cell and Organ Specific Responses

1. Chairman's Introduction
   Andrew Rowan
   205

2. The Use of Renal Medullary Cell Cultures as Alternatives to Live Animals for Studying Renal Medullary Toxicity
   S.E. Benns, M. Dixit, I. Ahmed, C. Ketley, and P.H. Bach
   211

3. Inhibition of Organic Acid/Base Transport in Isolated Rabbit Renal Tubules by Nephrotoxins
   L.A. Rylander, A.J. Gandolfi, and K. Brendel
   235

4. Arrhythmogenicity of Volatile Compounds in Beating Heart Cell Cultures
   D.J. Miletich, S. Holshouser, and R.F. Albrecht
   249

5. The Establishment of In Vitro Systems to Evaluate Neuronal Toxicity
   Harvey S. Singer and Michael Tiemeyer
   267

6. Lymphocyte Toxicity Induced by Chlorphentermine
   293

7. Use of Amniotic Fluid Cells for Testing Teratogens
   Nicole Bournias-Vardiabasis
   315

8. Chairman’s Summary
   Paul Kotin
   333

E. Alternatives to the Draize Eye Test

1. Chairman’s Introduction
   David Maurice
   341

2. Macroscopic Assay of Focal Injury in the Chorioallantoic Membrane
   J. Leighton, R. Tchao, J. Verdone, and J. Nassauer
   355

3. Comparison of Several Alternative Assays for Measuring Potential Toxicants
   D.M. Stark, E. Borenfreund, J. Walberg, and C. Shopsis
   371

4. A Tissue Culture Model of the Human Corneal Epithelium
   Marcia M. Jumblatt and Arthur H. Neufeld
   391

5. An In Vitro Alternative to the Draize Test
   Kwan Y. Chan
   405

6. Chairman’s Summary
   James McCulley
   423

F. Technology Transfer in Toxicology
   David J. Brusick
   427

Part Two. Poster Presentations

A. Posters

1. The Effects of Time on Cytotoxicity Testing In Vitro Using Primary Cultures of Adult Rat Hepatocytes
   Brian I. Carr
   439

2. Neurotoxic Esterase in Cultured Cells: An In Vitro Alternative for the Study of Organophosphorous Compound-Induced Delayed Neurotoxicity
   C.D. Carrington, M.N. Carrington, and M.B. Abou-Donia
   455

3. Surfactant-Induced Primary Irritancy: An In Vitro Model
   V.A. De Leo, L.C. Harber, B. Kong, and S. De Salva
   467
4. ELISA for Rapid Detection of Botulinum Toxin and Direct Identification of Clostridium botulinum Colonies
   Manouchehr Dezfulian and John G. Bartlett

5. Cultured Rat Hepatocytes: In Vitro Model for the Study of Peroxisomal Proliferation by Hypolipidemic Drugs
   D.R. Feller, Y. Singh, V. Shirhatti, C.T. Liu, and G. Krishna

6. Approaches to the Prediction of Dermal Absorption and Potential Cutaneous Toxicity
   Bruce A. Firestone and Richard H. Guy

7. Development of an Alternative Dermal Sensitization Test: Mouse Ear Swelling Test (MEST)
   S.C. Gad, B.J. Dunn, and D.W. Dobbs

8. In Vitro Bioassay for Dioxinlike Activity
   John F. Gierthy and Deborah Crane

9. Comparison of In Vivo and In Vitro Eye Irritancy Test Systems: A Study With 34 Substances
   Herman B.W.M. Koëter and Menk K. Prinsen

10. Procaryotic Model Membrane System for Studies of Toxic Compounds: Preliminary Characterization
    Alan Liss and Brenda E. Ritter

11. HET-Chorionallantois-Test: An Alternative to the Draize Rabbit Eye Test
    Niels P. Luepke

12. The Importance of Vehicle Composition, Osmolality and pH for the In Vitro Assessment of Intraocular Drug Toxicity
    D.R. Meyer, J.P. McCulley, and M.E. Stern

13. Statistical Analysis for the Characterization of the Joint Action of Two Chemicals in an In Vitro Test System
    Joel G. Pounds and Ralph L. Kodell

14. Use of In Vitro Cytotoxicity to Rank Ocular Irritation of Six Surfactants
    J.A. Shadduck, J. Everitt, and P. Bay

15. Beating Cardiac Myocytes Maintained in Culture: A Model for Screening and the Study of Mechanisms of Drug-Induced Cardiotoxicity
    Vilas Shirhatti and Gopal Krishna

16. Tetrahymena thermophila (30377) as an Indicator of Ocular Irritancy in Rabbits
    Jerald Silverman and Stephen Pennisi

17. An In Vitro Nephrotoxicity Assay Utilizing Proximal Tubule Suspensions from Rabbit Kidney
    J.F. Sina, C.L. Bean, C. Noble, and M.O. Bradley

18. Hypoxia Potentiates the Toxicity of Leukotrienes, Hydroperoxyeicosatetraenoic Acids, or Calcium Ionophore A 23187 in a Hepatocyte Monolayer In Vitro Test System
    J.R. Trudell, M. Bendix, and B. Bosterling

B. Poster Summaries
   1. Robert Scala
   2. Michael Wooder
