SATELLITE REMOTE SENSING FOR HYDROLOGY AND WATER MANAGEMENT THE MEDITERRANEAN COASTS AND ISLANDS

Proceedings of an International Training Course sponsored by The Council of Europe and held at the Grand Hotel Verdala, Rabat, Malta, 2nd–12th October 1988. The training course was co-organised by the Euro-Mediterranean Centre on Marine Contamination Hazards, Foundation for International Studies, Malta, in conjunction with the Remote Sensing Unit of the University of Bristol, UK.

Edited by
Eric C. Barrett, Clare H. Power
Remote Sensing Reviews Unit
University of Bristol, UK

and

Anton Micallef
Euro-Mediterranean Centre on Marine Contamination Hazards
University of Malta, Valletta

CONTENTS

Preface viii
Forewords
   Jean-Pierre Massue x
   Salvino Busuttil xi
   Victor Axiak xii
Introduction to the Series xiii

   Eric C. Barrett 1

2. Satellite Monitoring of Synoptic Weather Systems and Related Rainfall Events
   Eric C. Barrett 25

3. Mid- to Long-term Objective Rainfall Estimation Techniques
   Giles D'Souza 47

4. Satellite Monitoring of High Intensity Rainfall Events and Related Hazards and Disasters
   Giles D'Souza and Eric C. Barrett 73

   Eric C. Barrett and Giles D'Souza 95

6. A Review of Radiometric Data from Satellite-Borne Sensors for Phytogeographical Applications
   Daniel Lloyd 117

7. The Relationships between Remotely Sensed Vegetation Indices and Plant Canopy Properties
   Bernard Lacaze 137

8. The Use of High Spatial Resolution Satellite Data for Mapping Land Cover and Land Use in Mediterranean Areas
   Bernard Lacaze 153
   Daniel Lloyd  
   167

10. Image Interpretation for Hydrogeological Research
    Pauline Waters  
    185

11. Methodology of Lineament Analysis for Hydrogeological Investigations
    Pauline Waters  
    197

12. Application of Remote Sensing Techniques to the Hydrogeology of the Mediterranean Region with Special Reference to Crete
    Marianthi Stefouli  
    215

    Boris Sturm  
    243

14. European Responsibilities in Studying and Monitoring Changes in Climate and Environment, with Special Reference to Marine and Coastal Problems in the Mediterranean Sea
    Roberto Frassetto  
    279

SHORTER CONTRIBUTIONS

Oil Pollution in the Mediterranean. Victor Axiak  
297

298

Coastal Sewage Pollution. Vincent Gauci  
299

Factors to Consider before Using Remotely Sensed Data in Environmental Management Projects. Annie Harel  
301

303

Satellite Sensing within an Environmental Information System. Thomas Kämpke  
306
