STRUCTURE AND EMISSION PROPERTIES
OF ACCRETION DISKS

Proceedings of the Sixth IAP Astrophysics Meeting / IAU Colloquium n° 129

July 2–6, 1990

Institut d’Astrophysique de Paris

Edited by

C. BERTOUT
S. COLLIN-SOUFFRIN
J.P. LASOTA
and
J. TRAN THANH VAN

Editions Frontières
CONTENTS

Foreword

REVIEW AND INVITED PAPERS

I. Observations of Disks :

Variability and structure of accretion disks in cataclysmic variables. K. HORNE 3

Accretion discs in low-mass X-ray binaries. M.G. WATSON 19
A.R. KING

Protostellar disks. S. BECKWITH 33

The signatures of an accretion disk in the electromagnetic spectra of quasars and AGNs. M.-H. ULRICH 43

A 45 AU radius source around L1551-IRS5 : a possible accretion disk. C.R. MASSON 55
J. KEENE
Polarization properties of YSO disks.  F. MENARD 59
High-resolution VLA NH₃ observations of HH 7–11.  A. RUDOLPH 63
Circumstellar structure around young low mass stars.  C.A. BEICHMAN, T.N. GAUTIER, J.J. HESTER, P.C. MEYERS, S.N. VOGEL 67
Evidence for disks in AGN and QSOs from polarimetric observations J.S. MILLER 71
Continuum emission in AGN, can we isolate the disc component ? T.J.L. COURVOISIER, J. CLAVEL 75

II. Physical Processes in Disks:
On the nature of disk viscosity. J.P. ZAHN 87
Angular momentum transport in self–gravitating gaseous disks. J.C. PAPALOIZOU, G.J. SAVONIJE 99
The role of magnetic fields in accretion disks. J. HEYVAERTS 109
Spiral instability of magnetized accretion disks. M. TAGGER, R.N. HENRIKSEN, R. PELLAT 119
Protostellar disks and planetary system formation. D.N.C. LIN 123
The nonlinear development of gravitational instabilities in thick disks. J.E. TOHLINE 131

III. Disk Structure and Models:
Fuelling accretion disks in AGN. J. FRANK 135
Acretion disk models of AGN: a crucial role for reprocessing ? M.C. BEGELMAN, M. de KOOL 143

Accretion models of some AGN and observational constraints
S. TSURUTA 289

Variability of active galactic nuclei.
M.A. ABRAMOWICZ 299

Self-consistent description of convective domains in geometrically thin accretion disks.
W.J. DUSCHL 305

IV. Boundary Layers and Winds from Disks:

Modelling accretion disk boundary layers.
O. REGEV 311

Radiation hydrodynamics in accretion disks and the boundary layer.
W. KLEY 323

The neutron star boundary layer and general relativity.
W. KLUŽNIAK 327

Winds in cataclysmic variables.
J.E. DREW 331

Protostellar and T Tauri winds.
N. CALVET 343

The relationship between accretion disks and stellar winds in T Tauri stars.
M. COHEN 353

Conference summary
M. LIVIO 357

POSTER CONTRIBUTIONS

J. ADAM
Line formation in accretion disks.

D. ALLOIN, R. BARVAINIS, R. ANTONUCCI, M. GORDON
CO emission from the radio-quiet quasar E 1821+64 at z = 0.301: implication regarding the origin of its far infrared radiation.

C. BARTOLINI, A. GUARNIERI, A. PICCIONI, L. SOLMI, M. TEODORANI
The candidate black hole A 0620-00.

P. BASTIEN, A.-C. LEVASSEUR-REGOURD
Towards better scattering properties for a mixture of realistic grains.
F. BERRILLI, G. CORCIULO, G. INGROSSO, D. LORENZETTI, B. NISINI, F. STRAFELLA
Circumstellar structures around Herbig Ae/Be stars.

G. BJÖRNSSON, R. SVENSSON
A recipe for making hot accretion disks.

N.G. BOCHKAREV, E.A. KARITSKAYA, N.I. SHAKURA, S.A. ZHEKOV
UBVR colours of accretion disks and power–low sources of radiation with interstellar reddening.

N.G. BOCHKAREV, E.A. KARITSKYA
Limb darkening for irradiated accretion disks and accretion disk parameters in CYG X–1.

N.G. BOCHKAREV
Physical conditions in a gas around outer rim of Hercules X–1 accretion disk.

G. BODO, A. CURIR
The influence of the self–gravity in thick accretion discs.

D.A.H. BUCKLEY, D. O'DONOGHUE, D. KILKENNY, R.S. STOBIE

D. CADITZ, A. WANDEL
Luminosity–function evolution of quasar accretion–disks.

P. CALLANAN, E. HARLAFTIS, P. CHARLES and the ITP team.
A long term, multiwavelength campaign on SU UMa.

M. CALVANI, J.W. SULENTIC, P. MARZIANI, W. ZHENG
Line emission from accretion disks: observation vs. theory.

M. CALVANI, S. D'ODORICO, T. ZWITTER
Photometry of SS433: its implication on the nature of the system.

N. CALVET, A. PATIÑO, G. MAGRIS, P. D'ALESSIO
Irradiation of accretion disks around young objects: near infrared CO bands.
N. CALVET, L. HARTMANN 401
Effects of non-spherical mass loss and accretion on T Tauri line profiles.

S.K. CHAKRABARTI 403
Solving time dependent problems: the brute force method.

S.K. CHAKRABARTI 405
Magnetohydrodynamic transonic flows around compact objects.

S.K. CHAKRABARTI 407
On the instability of spiral flows around compact objects.

S.K. CHAKRABARTI 409
Shocks in isothermal transonic flows in black hole geometry.

A. CHELLI, I. CRUZ-GONZÁLEZ, B. REIPURTH 411
Near IR spatial observations of T Tauri multiple systems.

D.M. CHRISTODOULOU, R. NARAYAN 413
Dynamical instabilities in self-gravitating annuli.

I. CRUZ-GONZÁLEZ, A. CHELLI 415
Near IR high spatial resolution observations of the nuclear region of the active galaxies: NGC 5506, NGC 7469, NGC 7582 and IC 4329A.

C. DONE, K. KOYAMA, H. KUNIEDA, G. MADEJSKI, R. MUSHOTZKY, T.J. TURNER 417
Quasi-periodic continuum variability of NGC 6814.

B. DUBRULLE 419
On turbulent transport in accretion discs.

A.M. DUMONT, S. COLLIN-SOUFFRIN, A.R. KING, J.P. LASOTA 421
Optically thin accretion discs in close binaries: non-LTE calculations.

M. FERNANDEZ, C. EIROA, J.F. LAHULLA 423
Photometric variability of pre-main-sequence objects.

L. FERRARIO 425
A theoretical model for the low-amplitude velocity variations in intermediate polars.
M. FRIEDJUNG, G. MURATORIO, C. ROSSI, R. VIOTTI
Possible properties of a VV Cephei type binary accretion disc.

J. FUKUE
Magnetohydrodynamical winds from an accretion disk: driving by
the magnetic pressure and tension.

G. GEERTSEMA, A. ACHTERBERG
Time evolution of a magnetic seed-field in a turbulent accretion disk.

I. GOLDMAN
On the turbulent viscosity in accretion disks.

A. GUARNIERI, C. BARTOLINI, R. CIVELLO, A. PICCIONI,
M. TEODORANI
A search for evidence of accretion disk in two suspected Be-X transient
binaries.

E.T. HARLAFTIS, B.J.M. HASSALL, T. NAYLOR, P.A. CHARLES,
G. SONNENBORN
UV observations of Z Cha in superoutburst and normal outburst.

M.H.M. HEEMSKERK, G.J. SAVONIJE
Non-axisymmetric unstable modes in a thin differentially rotating gaseous disc.

F.V. HESSMAN, J. EISLOFFEL, R. MUNDT, L.W. HARTMANN,
W. HERBST, J. KRAUTTER
The many states of Z Canis Majoris.

M.G. HOARE, D. HOWIE, J.E. DREW
Boundary layer temperatures in high accretion rate cataclysmic variables.

J.M. HURÉ, S. COLLIN–SOUFRIN, J. LE BOURLOT,
G. PINEAU DES FORÊTS
Molecules in AGN's accretion discs.

M. JOLY, S. COLLIN–SOUFRIN, A.M. DUMONT
Statistical properties of AGN emission line spectrum in relation with
illuminated accretion disc model.

J.S. KAASTRA
Soft X-ray variability and the accretion disk of NGC 5548.
S.-W. KIM, J.C. WHEELER, S. MINESHIGE 451
Evolution and outbursts properties of GK Per.

M. KOLMAN, J.P. HALPERN, C.R. SHRADER, A.V. FILIPPENKO 453
The ultraviolet spectrum of the bright QSO H1821+643 and its continuum energy distribution.

M. KUSUNOSE 455
Two-temperature accretion disks with winds.

E. KUULKERS, A. HOLLANDER, T. OOSTERBROEK, J. VAN PARADIJS 457
Photometry of WX HYI during quiescence and outburst.

C. LA DOUS 459
A statistical analysis of IUE spectra of dwarf novae and nova-like stars.

S.A. LAMZIN 461
HeII 4686 line profile and the nature of hot regions of T Tauri stars.

A. LAOR, H. NETZER, T. PIRAN 463
Massive thin accretion discs II : Polarization.

A. LAOR 465
Massive thin accretion discs III : Comparison with the observations.

J.P. LASOTA, D. PELAT 467
Variability of accretion discs around compact objects.

D. LEITER, E. BOLDT 469
Spectral/luminosity evolution of active galactic nuclei.

T. LILJESTRÖM 471
Large scale rotating molecular disks around L1551 IRS-5 and the HH 49/50 outflow source.

J. McDOWELL, O. KUHN, M. ELVIS, B. WILKES 473
Inclination effects for Kerr disks.

A.B. MAKALKIN, V.A. DOROFEYEVA 475
Thermal conditions in a protostellar disk.

F. MANNUCCI, R.M. STANGA, G.M. STIRPE 477
Deconvolution of broad emission line profiles in Seyfert 1 galaxies: disk kinematics and line emissivity.
