Selected Papers on

Holographic Particle Diagnostics

Chandra S. Vikram, Editor
University of Alabama in Huntsville

Brian J. Thompson
General Editor, SPIE Milestone Series

SPIE Milestone Series
Volume MS 21
Selected Papers on
Holographic Particle Diagnostics

Contents

xvii Preface, Chandra S. Vikram

Section One

Historical

3 Diffraction by opaque and transparent particles
B. J. Thompson (SPIE Journal 1963)

7 On the Fraunhofer (far field) diffraction patterns of opaque and transparent objects with coherent background
G. B. Parrent, Jr., B. J. Thompson (Optica Acta 1964)

18 A laser fog disdrometer
B. A. Silverman, B. J. Thompson, J. H. Ward (Journal of Applied Meteorology 1964)

28 A new method of measuring particle size by diffraction techniques

34 A readout technique for the laser fog disdrometer

40 Holographic microscopy as a technique for recording dynamic microscopic subjects
C. Knox (Science 1966)

42 Holographic photography of high-speed phenomena with conventional and Q-switched ruby lasers

45 Application of hologram techniques for particle size analysis

Section Two

General

55 Fraunhofer holography applied to particle size analysis—a reassessment
G. A. Tyler, B. J. Thompson (Optica Acta 1976)

71 Particle sizing using far-field holography: new developments
Particle field holography
J. D. Trolinger (Optical Engineering 1975)

Measurement of the size and position of aerosol droplets using holography
W. Grabowski (Optics and Laser Technology 1983)

Holographic recording of three-dimensional ensembles of fast-moving particles
D. I. Staselko, V. A. Kosnikovskii (Optics and Spectroscopy 1973)

Near-field Lorenz-Mie theory and its application to microholography

Magnification in aerosol sizing by holography
R. Bexon (Journal of Physics E: Scientific Instruments 1973)

Holography of fast-moving cloud droplets

Holographic particle sizing techniques

Advances in far-field holography— theory and applications
B. J. Thompson, P. Dunn (SPIE Proceedings 1980)

Holographic methods of dynamic particulate measurements—current status
B. J. Thompson (SPIE Proceedings 1982)

A review of holography applications in multiphase flow visualization study

Holographic methods for particle size and velocity measurement— recent advances

Measurement of fine particulate in pollution control
B. J. Matthews (SPIE Proceedings 1971)

Holographic velocimetry of submicron particles
H. Royer (Optics Communications 1977)

Object shape, fringe visibility, and resolution in far-field holography
P. Dunn, B. J. Thompson (Optical Engineering 1982)

Letter to the editor: far-field diffraction pattern of an opaque object with rectangular cross section
C. Özkul (Optical Engineering 1984)

In-line holography with interference filters as Fourier processors

Gaussian beam effects in far-field in-line holography

Filtering effects in far-field in-line holography
Section Five
Image Enhancement

237 Resolution factors in edgeline holography
   J. D. Trolinger, T. H. Gee (Applied Optics 1971)

242 Improved microimages from in-line absorption holograms
   P. Dunn, J. M. Walls (Applied Optics 1979)

244 Absorption and phase in-line holograms: a comparison
   P. Dunn, J. M. Walls (Applied Optics 1979)

248 Improvement of image quality in holographic microscopy

254 Holographic image subtraction of high-velocity dust using a Pockels cell
   K. M. Hagenbuch, S. P. Sarraf (Optics Letters 1982)

257 Optimizing image-to-background irradiance ratio in far-field in-line holography

261 Nonlinearities of an aperture-limited in-line far-field hologram
   C. Özkul (Applied Optics 1986)

264 Digital decoding of in-line holograms
   L. Onural, P. D. Scott (Optical Engineering 1987)

273 Phase retrieval and twin-image elimination for in-line Fresnel holograms
   G. Liu, P. D. Scott (Journal of the Optical Society of America A 1987)

280 Holocinematographic velocimetry: resolution limitation for flow measurement
   J. A. Liburdy (Applied Optics 1987)

286 Object reconstruction from noisy holograms
   G. Liu (Optical Engineering 1990)

Section Six
Very Small Objects

295 Holographic detection of submicron particles
   B. J. Thompson, W. R. Zinky (Applied Optics 1968)

297 Optical reconstruction of image from Fraunhofer electron-hologram

298 X-ray biomicroholography
   J. C. Solem, G. F. Chapline (Optical Engineering 1984)

309 Experiments in x-ray holographic microscopy using synchrotron radiation
   M. R. Howells, M. A. Iarocci, J. Kirz (Journal of the Optical Society of America A 1986)
Section Seven
Transparent Objects

327 Interference phenomena in Fraunhofer holograms and in their reconstructions of tapered glass fibers
G. M. Lomas (Applied Optics 1969)

332 Holographic imaging of semitransparent droplets or particles
I. Prikryl, C. M. Vest (Applied Optics 1982)

339 Holography of semi-transparent spherical droplets

Section Eight
Finite Aperture Effects

349 A calculation of edge smear in far-field holography using a short-cut edge trace technique
D. M. Robinson (Applied Optics 1970)

351 Characteristics and measurements of an aperture-limited in-line hologram image
R. A. Belz, F. M. Shofner (Applied Optics 1972)

359 A theoretical calculation of edge smear in far-field holography

369 Effects of finite aperture on linewidth measurement using in-line Fraunhofer holography
C. Özkul (Optics and Laser Technology 1986)

Section Nine
Cylindrical Test Sections

375 Far-field holography of ampule contaminants

381 Window curvature effects and tolerances in Fraunhofer holography in cylindrical tunnels

385 Fraunhofer holography in cylindrical tunnels: neutralizing window curvature effects
C. S. Vikram, M. L. Billet (Optical Engineering 1986)

Section Ten
Aberrations

391 Holographic microscopy through tubes and ducts

396 Holographic image of a point source in the presence of misalignment
I. Banyasz, G. Kiss, P. Varga (Applied Optics 1988)

401 A system for viewing holograms

414 Aberration limited resolution in Fraunhofer holography with collimated beams
C. S. Vikram, M. L. Billet (Optics and Laser Technology 1989)

417 Aberration-free Fraunhofer holography of micro-objects
Section Eleven

Far-Field
Pattern
Analysis

An investigation of Fraunhofer holography for velocimetry application
R. Menzel, F. M. Shofner (Applied Optics 1970)

Holographic measurements of velocity distribution of particles accelerated by a shock wave

Simplified optical path-averaged rain gauge
T. Wang, K. B. Earnshaw, R. S. Lawrence (Applied Optics 1978)

Phase visualization of diffraction patterns and its application
M. Yonemura (Proceedings of the 14th Congress of the International Commission for Optics 1987)

Accuracy of measurement in coherent imaging of particulates in a three-dimensional sample
B. J. Thompson, P. H. Malyak (SPIE Proceedings 1985)

Processing of diffraction patterns scanned with a photodiode array— influence of the optical transfer function of diodes on linewidth measurements

Section Twelve

Analysis by Misfocusing

Far-field holography at non-image planes for size analysis of small particles

An approach for automated analysis of particle holograms

Automated analysis of particle holograms
H. J. Caulfield (Optical Engineering 1985)

Section Thirteen

Image Fourier Plane Analysis

Fraunhofer plane analysis of particle field holograms
B. C. R. Ewan (Applied Optics 1980)

Measurement of transient spray size distributions

Particle field holography data reduction by Fourier transform analysis
C. F. Hess, J. D. Trolinger (Optical Engineering 1985)

Section Fourteen

Automated Analysis

Automatic assessment of aerosol holograms

A high resolution holographic particle sizing system
W. K. Withrow (Optical Engineering 1979)

Determination of size and position of fast moving gas bubbles in liquids by digital 3-D image processing of hologram reconstructions
Section Fifteen

**Velocimetry and High-Speed Holography**

524 Image analysis techniques for holograms of dynamic oceanic particles

533 Velocity synchronized Fourier transform hologram camera system

541 Hypervelocity particle measurements by a holographic method
   M. L. A. Gassend, W. M. Boerner (SPIE Proceedings 1976)

550 Particulate velocity and size measurements using holographic and optical processing methods

559 Particle velocity measurement using holographic methods

567 Cavitation bubble dynamics studied by high speed photography and holography: part one
   W. Lauterborn, W. Hentschel (Ultrasonics 1985)

576 Cavitation bubble dynamics studied by high speed photography and holography: part two
   W. Lauterborn, W. Hentschel (Ultrasonics 1986)

585 Bibliography
595 Author Index
597 Keyword Index
