Residual Stresses
Measurement, Calculation, Evaluation

Editors:
V. Hauk, H. Hougardy, E. Macherauch
CONTENTS

I. Measurement and Evaluation of Residual Stresses

Problems of the X-Ray Stress Analysis (RSA) and Their Solutions 3
V. Hauk, Aachen, FRG

Residual Stresses in Martensitic Steels — Determining the Peak Position and the Width at half Maximum of X-Ray Interferences Lines 21
J. Betzold, Wolfsburg, FRG

X-Ray Measurement of Residual Stresses in Thin Layers 27
L. De Buyser, P. Van Houtte, E. Aernoudt, Leuven, Belgium

Micromagnetic Measurement of Residual Stresses in Components 33
I. Altpeter, W. A. Theiner, Saarbrücken

Mechanical Methods of Determining Residual Stresses 37
H. Kockelmann, Stuttgart, FRG

Methods of Determining Residual Stresses in Metal Parts using Strain Gauges 53
S. Keil, Darmstadt, FRG

Strain Distributions in Textured and Uniaxially Plastically Deformed Materials 59
H. Behnken, V. Hauk, Aachen, FRG

X-Ray Residual Stress Determinations in Texturized Steel Ck45 Using Different Evaluating Techniques 69
G. Maurer, Ludwigshafen; B. Scholtes, E. Macherauch, Karlsruhe, FRG

An Instrument for the Automated Evaluation of Stress States (AUSTRA) using Ultrasonic Techniques 75
R. Herzer, E. Schneider, H. Frotscher, D. Bruche, Saarbrücken, FRG

Plastic Deformation of Individual Crystallites in the Matrix 81
W. Reimers, Berlin; M. Wrobel, Dortmund; G. Eckold, Aachen and Jülich, FRG

II. Calculation of Residual Stresses

Present State of Methods for the Calculation of Residual Stresses 87
H. P. Hougardy, Düsseldorf, FRG

Coupled Temperature, Phase Transformation, Stress Calculation Model for Quenching of Steels. Example of Use 99
S. Denis, A. Simon, Nancy, France; S. Sjöström, Linköping, Sweden
III. Residual Stresses in Technical Components

Residual Stress Measurements on Aero Engine Turbine Components of Nickel-Base Materials
P. Adam, H. U. Baron, München, FRG

3D-Residual Stresses in AA 7075 and AA 7050 with 15 vol% SiC Whiskers after Thermal Cycling under Constant Applied Load
T. Ericsson, Linköping, Sweden; B. Vigneron, Nancy, France

The Generation of Residual Stresses Due to Joining Processes
Th. Nitschke-Pagel, H. Wohlfahrt, Kassel, FRG

Non-Destructive Methods for Residual Stress Measurements of Thin Films
E. Brinksmeier, H. Siemer, Hannover, FRG

Determination of Residual Stresses in Fibrous Composites by Means of X-Ray Diffraction
B. Prinz, E. Schnack, Karlsruhe, FRG

Phase and Stress Analysis of Plasmasprayed ZrO₂-Coatings
U. Selvadurai, Dortmund; W. Reimers, Berlin; G. Eckold, Aachen and Jülich, FRG

IV. Effects of Residual Stresses on Structural Parts

Residual Stresses and Fatigue of Metallic Materials
D. Eifler, D. Löhe, B. Scholtes, Karlsruhe, FRG

Fatigue Life Calculation for Surface-Strengthened Components
A. Bäumel jr., T. Seeger, Darmstadt, FRG

Increasing the Operating Strength of Forged Conrods by Shot-Peening under pre-load
F. Engelmohr, B. Fiedler, München, FRG

V. Effects of Residual Stresses on Service Behaviour

Residual Stress State and Bending Fatigue Strength of Notched Specimens of Sintered Material after Surface Rolling
H. Steindorf, E. Broszeit, K. H. Kloos, Darmstadt, FRG

Comparative Examinations Regarding the Consequence of Residual Stresses in Different Surface Treated Vehicle Components on the Fatigue Strength
A. Hirchenhain, Remscheid, FRG

The Influence of Different Compressive and Tensile Residual Stress Distributions on the Alternating Bending Fatigue Behaviour of Heat Treated Steels in Air and in Seawater
A. Sollich, H. Wohlfahrt, Kassel, FRG
VI. Manufacturing-Induced Residual Stresses

Residual Stresses Induced by Manufacturing
K. H. Kloos, B. Kaiser, Darmstadt, FRG

205

The Influence of Process Quantities in Grinding on Residual Workpiece Stresses
E. Brinksmeier, Hannover, FRG

227

The Near Surface Residual Stress State of Machined Ceramic Materials
B. Eigenmann, M. Wüst, B. Scholtes, E. Macherauch, Karlsruhe, FRG

233

Influence of Grinding on Near-Surface Regions of High-Strength Ceramics: Characterization by X-Ray Diffraction and Effect on the Strength
W. Pfeiffer, Freiburg, FRG

239

State of Residual Stresses and Texture After Surface Rolling of Sintermaterials
E. Broszeit, H. Steindorf, Darmstadt; V. Hauk, Aachen, FRG

245
