Selected Papers on
Speckle Metrology

Rajpal S. Sirohi, Editor
Indian Institute of Technology, Madras

Brian J. Thompson
General Editor, SPIE Milestone Series
Selected Papers on
Speckle Metrology

Contents

Section One
Laser Speckle
Metrology

xiii Introduction, Rajpal S. Sirohi
3 Autocorrelation function and power spectral density of laser-produced speckle pattern
   L. I. Goldfischer (Journal of the Optical Society of America 1965)
10 Some fundamental properties of speckle
   J. W. Goodman (Journal of the Optical Society of America 1976)
16 Speckle motions induced by rigid-body movements in free space geometry:
an explicit investigation and extension to new cases
   P. Jacquot, P. K. Rastogi (Applied Optics 1979)
27 Speckle displacement and decorrelation in the diffraction and image fields
   for small object deformation
   I. Yamaguchi (Optica Acta 1981)
42 Three-dimensional correlation coefficient of speckle intensity for
   rectangular and circular apertures
   L. Leushacke and M. Kirchner
   (Journal of the Optical Society of America A 1990)

Section Two
Speckle
Photography

51 Production of multiple beam fringes from photographic scatterers
61 Application of speckling for in-plane vibration analysis
   H. J. Tiziani (Optica Acta 1971)
71 A study of the use of laser speckle to measure small tilts of optically rough surfaces accurately
   H. J. Tiziani (Optics Communications 1972)
76 Displacement measurement from double-exposure laser photographs
   E. Archbold, A. E. Ennos (Optica Acta 1972)
92 Detection of small displacements of diffuse objects illuminated by a speckle pattern
   M. Françon, P. Koulev, M. May (Optics Communications 1975)
Basic physical principles of defocused speckle photography: a tilt topology inspection technique
D. A. Gregory (Optics and Laser Technology 1976)

Observation and explanation of the localization of fringes formed with double-exposure speckle photograph

A strain analysis technique by scattered-light speckle photography
J. Holoubek, J. Růžek (Optica Acta 1979)

Contouring by laser speckle

Direct observation of laser speckles for real-time analysis of lateral motions
C. S. Vikram, K. Vedam (Optics Letters 1981)

Application of fiber optics to speckle metrology—a feasibility study

Use of holographic optical elements in speckle metrology

Measurement of time-varying displacement fields by multiple-exposure speckle photography
J. M. Huntley, J. E. Field (Applied Optics 1986)

Localization of fringes in speckle photography that are due to axial motion of the diffuse object
C. Joenathan, C. S. Narayanamurthy, R. S. Sirohi (Journal of the Optical Society of America A 1988)

Parallel optical evaluation of double-exposure records in optical metrology

On the numerical processing of speckle photograph fringes
G. H. Kaufmann (Optics and Laser Technology 1980)

Speckle photography of lateral sinusoidal vibrations: error due to varying holo intensity

Processing speckle photography data: circular imaging aperture
C. S. Vikram, K. Vedam (Applied Optics 1983)

Elimination of error in speckle photography
C. Joenathan, R. S. Sirohi (Applied Optics 1986)

Spatially local variations of accuracy in speckle photography

Fringe positions in double-exposure speckle photography
K. Hinsch (Applied Optics 1989)
Section Four
White Light Speckle Photography

185 White light speckle photography for measuring deformation, strain, and shape
C. Fomo (Optics and Laser Technology 1975)

190 Theory and applications of the white light speckle method for strain analysis
A. Asundi, F. P. Chiang (Optical Engineering 1982)

201 Complete 3-D deformation analysis in the white light speckle method
C. S. Vikram, K. Vedam (Applied Optics 1983)

203 Double-pulsed white-light speckle photography
G. H. Kaufmann (Applied Optics 1984)

Section Five
Analysis of Speckle Photography Fringes

207 Heterodyne readout of specklegram halo interference fringes
G. B. Smith, K. A. Stetson (Applied Optics 1980)

209 An electro-optical read-out system for analysis of speckle photographs
G. H. Kaufmann, A. E. Ennos, B. Gale, D. J. Pugh

215 Automatic fringe analysis with a computer image-processing system
D. W. Robinson (Applied Optics 1983)

223 Fast image processing with a microcomputer applied to speckle photography
R. Erbeck (Applied Optics 1985)

227 An image processing system for the analysis of speckle photographs

234 Automated fringe measurement in speckle photography
F. Ansari, G. Ciurpita (Applied Optics 1987)

239 Displacement measurement by image-processed speckle patterns
R. Höfling, W. Osten (Journal of Modern Optics 1987)

249 Speckle photography fringe analysis: assessment of current algorithms
J. M. Huntley (Applied Optics 1989)

Section Six
Particle Image Velocimetry

259 The development of scattered light speckle metrology
T. D. Dudderar, P. G. Simpkins (Optical Engineering 1982)

263 Instantaneous velocity field measurements in unsteady gas flow by speckle velocimetry
R. Meynart (Applied Optics 1983)

269 Full-field laser metrology for fluid velocity measurement
T. D. Dudderar, R. Meynart, P. G. Simpkins
(Optics and Lasers in Engineering 1988)

298 Particle image velocimetry: fringe visibility and pedestal removal
C. J. D. Pickering, N. A. Halliwell (Applied Optics 1985)

301 Particle image velocimetry: theory of directional ambiguity removal using holographic image separation

303 Particle image velocimetry: the ambiguity problem

307 Particle image velocimetry: automatic fringe analysis by cross-correlation
Interferometric displacement measurement on scattering surfaces utilizing speckle effect

A double exposure technique for speckle pattern interferometry

Moiré gauging of in-plane displacement using double aperture imaging
  D. E. Duffy (Applied Optics 1972)

Analysis of double-exposure speckle photography with two-beam illumination
  K. A. Stetson (Journal of the Optical Society of America 1974)

Practical speckle interferometry for measuring in-plane deformation
  G. Cloud (Applied Optics 1975)

Strain analysis by one-beam laser speckle interferometry.
  1: Single aperture method
    R. P. Khetan, F. P. Chiang (Applied Optics 1975)

Vibration analysis of plate and shell by laser speckle interferometry
  F. P. Chiang, R. M. Juang (Optica Acta 1976)

Theory for surface displacement and strain measurements by laser speckle interferometry
  J. Brdicko, M. D. Olson, C. R. Hazell (Optica Acta 1978)

New aspects of surface displacement and strain analysis by speckle interferometry
  J. Brdicko, M. D. Olson, C. R. Hazell (Experimental Mechanics 1979)

Strain analysis by one-beam laser speckle interferometry.
  2: Multiaperture method
    F. P. Chiang, R. P. Khetan (Applied Optics 1979)

A laser-speckle strain gauge

Random (speckle) patterns for displacement and strain measurement: some recent advances
  F. P. Chiang, D. W. Li (Optical Engineering 1985)

Hololens in speckle and speckle shear interferometry

Automated measurement of in-plane translation by speckle correlation using a linear image sensor

Comparison of the sensitivity and accuracy of holography and speckle interferometry with Fourier-plane recording
  I. S. Klimenko, V. P. Ryabukho, B. V. Feduleev (Optics and Spectroscopy [USSR] 1986)

Studies of holospeckle interferometry
  Q. B. Li, F. P. Chiang (Optical Engineering 1988)
36 Three-dimensional reconstruction of cardiac displacement patterns on the chest wall during the P, QRS and T-segments of the ECG by laser speckle interferometry
G. Ramachandran, M. Singh (Medical & Biological Engineering & Computing 1989)

Section Eight
Speckle Shear Interferometry

445 An image-shearing speckle-pattern interferometer for measuring bending moments

449 A speckle-shearing interferometer: a tool for measuring derivatives of surface displacements
Y. Y. Hung (Optics Communications 1974)

453 Determination of slope and strain contours by double-exposure shearing interferometry
P. M. Boone (Experimental Mechanics 1975)

461 Full-field optical strain measurement having postrecording sensitivity and direction sensitivity

466 Simultaneous measurement of three displacement derivatives using a multiple image-shearing interferometric camera
Y. Y. Hung, A. J. Durelli (Journal of Strain Analysis 1979)

474 Detection of defects in plates and diaphragms using a split-lens speckle-shearing interferometer
R. Krishna Murthy, R. S. Sirohi, M. P. Kothiyal (NDT International 1982)

Section Nine
Electronic Speckle Pattern Interferometry

481 Holographic and video techniques applied to engineering measurement
J. N. Butters, J. A. Leendertz (Transactions of the Institute of Measurement and Control 1971)

487 De-correlation effects in speckle-pattern interferometry 1. Wavelength change dependent de-correlation with application to contouring and surface roughness measurement
C. Wykes (Optica Acta 1977)

498 De-correlation effects in speckle-pattern interferometry 2. Displacement dependent de-correlation and applications to the observation of machine-induced strain
R. Jones, C. Wykes (Optica Acta 1977)

513 General analysis of fringe contrast in electronic speckle pattern interferometry
G. Å. Slettemoen (Optica Acta 1979)

526 Electronic speckle pattern interferometry using digital image processing techniques

531 Electronic speckle pattern interferometry
O. Løkberg (Physics in Technology 1980)

538 Digital speckle-pattern shearing interferometry
