Selected Papers on
Scalar Wave Diffraction

Kurt Edmund Oughstun, Editor
University of Vermont
Department of Computer Science and Electrical Engineering
and Department of Mathematics

Brian J. Thompson
General Editor, SPIE Milestone Series
Selected Papers on
Scalar Wave Diffraction

Contents

xi Preface, Kurt Edmund Oughstun

Section One:
Foundations of the Scalar Theory of the Optical Field

3 On the foundation of the scalar diffraction theory of optical imaging
   O. Theimer, G. D. Wassermann, E. Wolf (Proceedings of the Royal Society A 1952)

15 A scalar representation of electromagnetic fields
   H. S. Green, E. Wolf (Proceedings of the Physical Society A 1953)

24 A scalar representation of electromagnetic fields: II
   E. Wolf (Proceedings of the Physical Society A 1959)

36 Use of scalar theory in optics

Section Two
General Theory

41 A contribution to the theory of acoustic radiation
   C. J. Bouwkamp (Philips Journal of Research 1946)

68 On the theory of diffraction by an aperture in an infinite plane screen. I.
   H. Levine, J. Schwinger (Physical Review 1948)

85 On the theory of diffraction by an aperture in an infinite plane screen. II.
   H. Levine, J. Schwinger (Physical Review 1949)

95 Comparison of the Kirchhoff and the Rayleigh-Sommerfeld theories of diffraction at an aperture
   E. Wolf, E. W. Marchand (Journal of the Optical Society of America 1964)

103 Rayleigh's integral in the near Fresnel region
   H. Osterberg (Journal of the Optical Society of America 1965)

108 Diffraction at a black screen. Part I: Kirchhoff's theory
   F. Kottler (Progress in Optics 1966)

133 Reciprocity theorems in various theories of diffraction
   A. Kujawski (Journal of the Optical Society of America 1966)

137 Consistent formulation of Kirchhoff's diffraction theory
   E. W. Marchand, E. Wolf (Journal of the Optical Society of America 1966)
148 Application of the convolution theorem to Rayleigh's integral formulas
   G. C. Sherman (Journal of the Optical Society of America 1967)

150 Diffraction at small apertures in black screens
   E. W. Marchand, E. Wolf (Journal of the Optical Society of America 1969)

Section Three
Theory of the Boundary Diffraction Wave

165 Die Beugungswelle in der Kirchhoffschen Theorie der Beugungerscheinungen
   A. Rubinowicz (Annalen der Physik 1917)

187 Generalization of the Maggi-Rubinowicz theory of the boundary diffraction wave—Part I
   K. Miyamoto, E. Wolf (Journal of the Optical Society of America 1962)

198 Generalization of the Maggi-Rubinowicz theory of the boundary diffraction wave—Part II
   K. Miyamoto, E. Wolf (Journal of the Optical Society of America 1962)

210 Boundary diffraction wave in the domain of the Rayleigh-Kirchhoff diffraction theory
   E. W. Marchand, E. Wolf (Journal of the Optical Society of America 1962)

Section Four
Geometric and Asymptotic Theories of Diffraction

219 Diffraction by an aperture
   J. B. Keller (Journal of Applied Physics 1957)

238 Diffraction by an aperture. II
   J. B. Keller, R. M. Lewis, B. D. Seckler (Journal of Applied Physics 1957)

248 Boundary layer problems in diffraction theory
   R. N. Buchal, J. B. Keller (Communications on Pure and Applied Mathematics 1960)

272 Geometrical theory of diffraction
   J. B. Keller (Journal of the Optical Society of America 1962)

287 Uniform asymptotic theory of diffraction by a plane screen

306 Uniform asymptotic theory of edge diffraction
   R. M. Lewis, J. Boersma (Journal of Mathematical Physics 1969)

321 Diffraction, asymptotics and catastrophes
   J. J. Stamnes (Optica Acta 1982)

338 Uniform asymptotic theory of diffraction by apertures
   J. J. Stamnes (Journal of the Optical Society of America 1983)

Section Five
Angular Spectrum of Plane Waves Representation

355 Ausbreitung electromagnetischer Wellen über einem ebenen Leiter
   H. Weyl (Annalen der Physik 1919)

375 Diffraction theory in the k-representation
   H. M. Nussenzveig (Anais da Academia Brasileira de Ciências 1959)

381 Conditions for the validity of the angular spectrum of plane waves
   É. Lalor (Journal of the Optical Society of America 1968)
Inverse diffraction and a new reciprocity theorem
J. R. Shewell, E. Wolf (Journal of the Optical Society of America 1968)

Three-dimensional structure determination of semi-transparent objects from holographic data
E. Wolf (Optics Communications 1969)

Generalization of the angular spectrum of plane waves and the diffraction transform

Diffracted wave fields expressible by plane-wave expansions containing only homogeneous waves
G. C. Sherman (Journal of the Optical Society of America 1969)

Plane-wave representations for scalar wave fields

Asymptotic approximations to angular-spectrum representations

The contributions of homogeneous and evanescent plane waves to the scalar optical field: exact diffraction formulae
D. C. Bertilone (Journal of Modern Optics 1991)

Das Verhalten von Lichtwellen in der Nähe eines Brennpunktes oder einer Brennlinie
P. Debye (Annalen der Physik 1909)

Light distribution near focus in an error-free diffraction image
E. Wolf (Proceedings of the Royal Society A 1951)

Phase distribution near focus in an aberration-free diffraction image
E. H. Linfoot, E. Wolf (Proceedings of the Physical Society B 1956)

Measured phase distribution in the image space of a microwave lens
G. W. Farnell (Canadian Journal of Physics 1958)

Attempt to investigate experimentally the intensity distribution near the focus in the error-free diffraction patterns of circular and annular apertures
C. A. Taylor, B. J. Thompson (Journal of the Optical Society of America 1958)

Diffraction by semitransparent and phase annuli
B. J. Thompson (Journal of the Optical Society of America 1965)

Focusing of a perfect wave and the Airy pattern formula
J. J. Stamnes (Optics Communications 1981)

The Luneburg apodization problem in the nonparaxial domain
J. J. Stamnes (Optics Communications 1981)

Conditions for the validity of the Debye integral representation of focused fields
E. Wolf, Y. Li (Optics Communications 1981)

Focal shifts in diffracted converging spherical waves
Y. Li, E. Wolf (Optics Communications 1981)

Focusing at small angular apertures in the Debye and Kirchhoff approximations
J. J. Stamnes, B. Spjelkavik (Optics Communications 1981)
Reciprocity principles for focused wavefields and the modified Debye integral
H. M. Pedersen, J. J. Stamnes (Optica Acta 1983)

An experimental investigation of diffraction patterns in low-Fresnel-number focusing systems
Y. Li, H. Platzer (Optica Acta 1983)

Three-dimensional intensity distribution near the focus in systems of different Fresnel numbers
Y. Li, E. Wolf (Journal of the Optical Society of America A 1984)

Three-dimensional intensity distribution in low-Fresnel-number focusing systems
Y. Li (Journal of the Optical Society of America A 1987)

Wave theory for a converging spherical incident wave in an infinite-aperture system
D. C. Bertilone (Journal of Modern Optics 1991)

Diffraction calculations using fast Fourier transform methods
E. A. Sziklas, A. E. Siegman (Proceedings of the IEEE 1974)

Validity of the Fresnel approximation in the near field
W. H. Southwell (Journal of the Optical Society of America 1981)

Evaluation of diffraction integrals using local phase and amplitude approximations
J. J. Stamnes, B. Spjelkavik, H. M. Pedersen (Optica Acta 1983)

Hybrid integration technique for efficient and accurate computation of diffraction integrals
J. J. Stamnes (Journal of the Optical Society of America A 1989)
