List of contents

Preface ix
Committee members x
Dedication xi

TATSUO TOKUOKA
Fundamental relations of plasticity derived from hypo-elasticity 1

A. J. M. SPENCER and J. E. FERRIER
Some solutions for a class of plastic-elastic solids 9

TSUAN WU TING
Solved and unsolved problems in elastic-plastic torsion of solid bars 25

P. STUTZ
Comportement élasto-plastique des milieux granulaires 37

H. D. BUI, A. ZAOUI et J. ZARKA
Sur le comportement élasto-plastique et viscoplastique des mono-
cristaux et polycristaux métalliques de structure cubique à faces
centrées 51

T. H. LIN
Microstress fields of slip bands and inhomogeneity of plastic
deformation of metals 77

KERRY S. HAVNER
An analytical model of large deformation effects in crystalline
aggregates 93

O. C. ZIENKIEWICZ, G. C. NAYAK and D. R. J. OWEN
Composite and ‘overlay’ models in numerical analysis of elasto-
plastic continua 107
List of contents

J. S. GUNASEKERA and J. M. ALEXANDER
Matrix analysis of the large deformation of an elastic-plastic axially symmetric continuum 125

J. H. ARGYRIS and A. S. L. CHAN
Static and dynamic elasto-plastic analysis by the method of finite elements in space and time 147

A. H. SHABAIK and E. G. THOMSEN
Computer aided visioplasticity solution of some deformation problems 177

G. I. N. ROZVANY and S. R. ADIDAM
Recent advances in optimal plastic design 201

Y. HORIE
On the thermodynamic states of plastically deformed solids 219

K. C. VALANIS
Observed plastic behavior of metals vis-a-vis the endochronic theory of plasticity 235

PAUL GERMAIN and E. H. LEE
Plane waves in elastic-plastic solids 257

A. R. RAGAB and J. L. DUNCAN
Superplasticity: Constitutive equations and forming problems 271

P. K. FUNG, D. J. BURNS and N. C. LIND
Yield under high hydrostatic pressure 287

T. C. T. TING
A unified theory on elastic-plastic wave propagation of combined stress 301
List of contents

**HIDEKAZU FUKUOKA**
A note on the strength of the combined tension-torsion waves in elastic-plastic tubes 317

**HANS STRIFORS and BERTIL STORÁKERS**
Uniqueness and stability at finite deformation of rigid-plastic thick-walled cylinders under hydrostatic pressure 327

**GIULIANO AUGUSTI and ALESSANDRO BARATTA**
Theory of probability and limit analysis of structures under multi-parameter loading 347

**V. NAGPAL, F. A. MCCLINTOCK, C. A. BERG and M. SUBUDHI**
Traction-displacement boundary conditions for plastic fracture by hole growth 365

**JEAN MANDEL**
Relations de comportement des milieux élastiques-plastiques et élastiques-viscoplastiques. Notion de repère directeur 387

**J. KRATOCHVÍL**
Finite-strain theory of inelastic behavior of crystalline solids 401

**GIULIO MAIER**
A shakedown matrix theory allowing for workhardening and second-order geometric effects 417

**D. A. GOKHFELD and O. F. CHERNIAVSKY**
Methods of solving problems in the shakedown theory of continua 435

**J. KLEPAČZKO**
Some experimental investigations of the elastic-plastic wave propagation in bars 451

**A. A. LEBEDYEV and N. V. NOVIKOV**
Deformation and fracture of structural metals under complex stress at low temperatures 463
List of contents

E. Shiratori, K. Ikegami and K. Kaneko
Subsequent yield surface determined in consideration of the Bauschinger effect 477

O. A. Shishmarev
Experimental study on one type of plastic anisotropy not considered in simplified flow theories 491

W. Szczepiński
On the concept of influence surfaces of plastic prestraining in the analysis of mechanical performance of metals 507

N. V. Banichuk and F. L. Chernous’ko
The method of local variations for numerical solutions of elastic-plastic problems 519

A. G. Ugodchikov and Yu. G. Korotkikh
Constitutive equations of nonisothermal elastic-plastic deformation and methods of their practical application 535

Z. Mróz
A description of workhardening of metals with application to variable loading 551

Th. Lehmann
On large elastic-plastic deformations 571

V. N. Nikolaevskii
Continuum theory of plastic deformation of granular media 587

I. A. Berezhnoi, D. D. Ivlev and V. B. Tchadov
On constructing models of cohesionless media by specifying the dissipation function 601
