Preface xi
Committee members xiii
Dedication xv
Address of Welcome xvii
Session Program xix

Invited lectures

WILLIAM PRÄGER
Limit analysis: the development of a concept 3

D. C. DRUCKER
On plastic analysis of the microstructure of metallic alloys 25

E. KRÖNER and C. TEODOSIU
Lattice defect approach to plasticity and viscoplasticity 45

F. FARDHISHEH and E. T. ONAT
Representation of elastoplastic behavior by means of state variables 89

E. H. LEE and P. GERMAIN
Elastic-plastic theory at finite strain 117

JEAN MANDEL
Director vectors and constitutive equations for plastic and visco-plastic media 135

PIOTR PERZYNA
Internal variable description of plasticity 145
Problems of Plasticity

Papers contributed to the international symposium on foundations of plasticity

Warsaw, August 30 – September 2, 1972

Edited by

A. SAWCZUK

Polish Academy of Sciences, Warsaw
List of contents

J. J. Gilman
The microdynamics of plastic flow 177

A. Phillips
Experimental plasticity. Some thoughts on its present status and possible future trends 193

H. G. Hopkins
Mathematical methods in plasticity theory 235

Philip G. Hodge, Jr.
Computer solutions of plasticity problems 261

N. Cristescu
Rate-type constitutive equations in dynamic plasticity 287

J. L. Duncan
Superplasticity: the behaviour and uses of ultra-fine grain alloys 311

Dragos Radenkovic
Constitutive laws for granular media 333

Discussion notes

F. Andreussi and P. Podio Guidugli
An axiomatic approach to the theory of thermomechanically constrained materials 359

T. Z. Blazynski
Basic underwater explosive forming systems 365

Zbigniew Bychawski
Distributional aspects of the theory of plastic time dependent phenomena 370
List of contents

T. J. CHUNG, J. K. LEE and N. C. COSTES
   Boundary value problems with incremental plasticity in granular media 375

R. N. DUBEY
   On objective stress-rate in the constitutive relation for elastic-plastic solids 382

M. I. ERKHOV
   Extremum principles in the dynamics of rigid-plastic bodies and mathematical programming 386

JAMES GRAHAM
   Plasticity analysis in soil mechanics problems 392

TOMASZ HUECKEL
   A note on the behaviour of hardening – softening granular media 397

NORMAN JONES
   Some remarks on the strain-rate sensitive behavior of shells 403

JAN A. KÖNIG
   On shakedown criteria 408

J. KRATOCHVÍL
   Comment on elastic and plastic rotations 413

L. H. N. LEE and C. M. NI
   A minimum principle in dynamics of elastic-plastic continua at finite deformation 417

W. J. MORALES
   A note on displacement bounding techniques for dynamically loaded inelastic structures 420

ZENON MRÓZ
   Optimal design criteria for reinforced plates and shells 425
List of contents

B. E. Pobedria
Coupled thermo-plastic problems 430

Jean Salençon
Un exemple de non validité de la théorie classique des charges limites pour un système non standard 432

B. R. Seth
Elastic-plastic transition 440

Donald C. Stouffer and Alvin M. Strauss
The constitutive aspects of aging metals 444

Piero Villaggio
Formulation of some homogeneous thermodynamic processes as variational inequalities 448

Michael P. Wnuk
Stable growth of a crack in a rate-sensitive Tresca solid 453

Discussions to papers contributed

J. H. Agyris and A. S. L. Chan
Static and dynamic elasto-plastic analysis by the method of finite elements in space and time 461

G. Augusti and A. Baratta
Theory of probability and limit analysis of structures under multi-parameter loading 464

H. D. Bui, A. Zaoui et J. Zarka
Sur le comportement élasto-plastique et viscoplastique des monocristaux et polycristaux métalliques de structure cubique à faces centrées 474

P. K. Fung, D. J. Burns and N. C. Lind
Yield under high hydrostatic pressure 477
