Scandinavian Conference on Artificial Intelligence – 91

"Odin's ravens"

Proceedings of the SCAI '91
Roskilde, Denmark
21-24 May 1991

Edited by

B. Mayoh
Aarhus University

IOS Press
1991
Amsterdam • Washington, DC • Tokyo
Contents

Invited Lectures

L. C. Aiello, D. Nardi, M. Schaerf .............................................. 4
Reasoning about knowledge: the metalevel approach

D. M. Gabbay  Theoretical foundations of non-monotonic reasoning: .......... 19
part 2 Structured non-monotonic theories

Y. Shoham  Theories of agenthood ............................................... 40

P. Smolensky  Distributive recursive structured processes .......................... 47

Practice

R. Benjamins, A. Abu-Hanna, W. Jansweijer ....................................... 54
Models in model-based diagnosis: classification and construction

A. Bulsari, B. Saxén, H. Saxén ..................................................... 62
Application of the symmetric logarithmloid as an activation function for neurons in a feed-forward network

A. Bulsari, H. Saxén ................................................................. 71
A feed-forward NN as a chemical reactor selection ES

U. Dindorp  Literature analysis for knowledge acquisition ......................... 77

E. Giunchiglia  A set of hierarchically structured decision procedures for ........ 83
some subclasses of first order logic

H. B. Herrestad  AI and Law: Will the marriage last? ............................. 90

J. Hynynen  DUKPIE: the bread 'n' butter for finite capacity activity ............ 99
scheduling

P. Jackson  Computing minimal refutations ......................................... 107

Jaidev, N. Parameswaran ............................................................ 119
Coding plan logic in a dependency net: the PLANET system

J. Karpf  Categorical modelling in Law ............................................. 131

N. Lavrač, S. Džeroski, V. Pirmat, V. Križman ..................................... 138
Learning rules for early diagnosis of rheumatic diseases

C. F. Nourani  Planning and plausible reasoning in artificial intelligence ........ 150
H. L. Pedersen, W. Bergstrøm, M. Lind
Knowledge based operator support for cogeneration
plants (not in this volume, appears in proceedings of
ESAP91 conference)

G. Ravi Prakash, E. Subrahmanian, H. N. Mahabala
Verification of OPS5-based AI applications

K. Trans
An expert system shell for planning with automatic feed-
back learning

F. Verner Jensen
Calculation in Hugin of probabilities for specific
configurations-a trick with many applications

Theory

L. Asker
Using partial explanations: an approach to solving the
incomplete theory problem in EBL

A. Bansal, D. S. Poduval
Static analysis to identify vectorizable numerical do-
mains in logical programs for efficient execution of sci-
entific expert systems

M. Egmont Petersen
Mental models as cognitive entities

P. Eklund
Negotiating inheritance taxonomies in conceptual structures

B. Filipič
Reducing search complexity by start node selection

F. Giunchiglia, L. Serafini
Multilanguage first order theories of propositional attitudes

E. Hyvonen
Global consistency in interval constraint satisfaction

C. G. Jansson, H. Boström, P. Idestam-Almquist
Optimising Horn clause logic programs for particular
modes of use: an analysis of explanation based learn-
ing and partial evaluation

J. Malec
How to pass an intersection or automata theory is still useful

T. Ohkawa, T. Mori, N. Babaguchi, Y. Tezuka
Class directed generalization

L. M. Pereira, J. Alferes, J. N. Aparício
A practical introduction to well founded semantics
