SURFACE EFFECTS IN CRYSTAL PLASTICITY

edited by

R.M. LATANISION

associate professor of materials science and engineering
Massachusetts Institute of Technology
Cambridge, Mass., U.S.A.

and

J.T. FOURIE

head of the Electron Microscopy Division
National Physical Research Laboratory
Pretoria, South Africa
## CONTENTS

**Preface**  
Page V

### INTRODUCTORY LECTURES

- **R. M. Latanision**  
  Surface Effects in Crystal Plasticity: General Overview  
  Page 3

- **F.R.N. Nabarro**  
  Surface Effects in Crystal Plasticity: Overview from The Crystal Plasticity Standpoint  
  Page 49

- **T. E. Fischer**  
  Surface Effects in Crystal Plasticity: Overview from A Surface Science Point of View  
  Page 127

### TUTORIAL LECTURES ON SURFACE SCIENCE

- **C. B. Duke**  
  Atomic Geometry and Electronic Structure of Solid Surfaces  
  Page 165

- **H. C. Gatos and Jacek Lagowski**  
  Space Charge Layers  
  Page 221

- **W. Henry Weinberg**  
  Surface Chemistry I: Multi-Component Systems  
  Page 267

- **J. H. van der Merwe**  
  Surface Chemistry II: Overlayers (New Phases)  
  Page 301

### TUTORIAL LECTURES ON CRYSTAL PLASTICITY

- **R. Bullough**  
  Microplasticity  
  Page 321

- **A. S. Argon**  
  Inelastic Deformation and Fracture of Crystalline Solids  
  Page 383
WORKSHOP SESSION 1: SURFACE EFFECTS IN UNIAXIAL TENSION AND FATIGUE

Z. S. Basinski
Survey Lecture

Contributed Papers:

D. J. Duquette, H. Hahn, and P. Andresen
The Role of Surface-Environment Interactions on Cyclic Deformation

H. Mughrabi
A Surface Effect Specific to Cyclically Deformed BCC Metals - The Surface Roughening of Polycrystalline α-Iron During Cyclic Deformation

O. Lohne
Dislocation Mobility in the Surface Layer

S. Kitajima
Role of Free Surface in Yielding and Easy Glide Deformations of Highly Perfect Copper Crystals

Ch. Schwink and H. Neuhaüser
Microcinematographic Studies of the Development of Slip Bands

J. T. Fourie
The Plastic Flow Stress in the Core and Surface Regions of Deformed Crystals

J. T. Fourie
An Analysis of the Unloading Yield Point With Reference to the Pre-Macro-Yield Region

H. Mughrabi
New Studies of Surface Effects in Deformed Copper Single Crystals

S. Weissmann
Influence of Surface Plasticity on the Deformation Behavior and Fracture Mode of Silicon
E. Kröner
On the Residual Stresses in Plastically Deformed Polycrystals and Composites

Workshop Summary

WORKSHOP SESSION 2: THE INFLUENCE OF SURFACE FILMS ON MECHANICAL PROPERTIES

H.G.F. Wilsdorf and G. E. Ruddle
Survey Lecture

Contributed Papers:

R. M. Johnson
Surface Damage Resulting from Film Cracking

V. K. Sethi and R. Gibala
Effect of Anodic Oxide Films on Low Temperature Mechanical Behavior of Niobium Single Crystals

I. G. Greenfield and A. Purohit
The Effect of Near-Surface Diffusion Layers on Fatigue of Copper

Workshop Summary

WORKSHOP SESSION 3: CHEMISORPTION-INDUCED VARIATIONS IN THE PLASTICITY AND FRACTURE OF NONMETALS

N. H. Macmillan
Survey Lecture

Contributed Papers:

R. F. Firestone and A. H. Heuer
Surface Effects on the Yield Point of Sapphire

C. A. Brookes
Microdeformation of Hard Non-Metallic Crystals By Softer Indenters and Sliders

W. Schröter and P. Haasen
The Chemomechanical Effect in Semiconductors
## Workshop Summary

**WORKSHOP SESSION 4: ENVIRONMENTALLY-INDUCED LOWERING OF SURFACE ENERGY AND THE MECHANICAL BEHAVIOR OF SOLIDS**

E. D. Shchukin  
Survey Lecture

**Contributed Papers:**

E. M. Gutman  
Chemical-Induced Variations in the Plasticity and Fracture of Metals and Minerals - Chemomechanical Effect

**Workshop Summary**

**WORKSHOP SESSION 5: SURFACE EFFECTS IN DISSOLUTION-RELATED EMBRITTLEMENT PHENOMENA**

H.-J. Engell  
Survey Lecture

**Contributed Papers:**

R. E. Cuthrell  
Mechanical Behavior of Oxide Free Stainless Steel Surfaces in a Low Pressure Hydrogen Environment

W. Frank and L. Graf  
A Unifying Model of Intergranular Corrosion, Intergranular Penetration of Liquid Metals, Stress Corrosion Cracking and Liquid Metal Embrittlement of Substitutional Solid Solutions

W. R. Tyson  
Cleavage vs. Shear At Crack Tips in Metal Crystals

D. L. Davidson  
Nondestructive, Near-Surface Plasticity, Determination by Electron Channeling

Z. Szklarska-Smialowska  
Correlation Between Pitting and Stress
Corrosion Cracking of Stainless Steels
in Chloride Solutions

R. W. Staehle
What I Know and Would Like to Know
Concerning Environmental Effects on
the Mechanical Properties of Metals

Workshop Summary

APPLICATIONS OF SURFACE EFFECTS IN CRYSTAL PLASTICITY TO
TECHNOLOGY

A.R.C. Westwood and J. J. Mills
Survey Lecture: Applications of Chemomechanical
Effects to Fracture-Dependent Industrial Processes

N. V. Pertsov
Environmentally-Assisted Hard Materials
Machining

C. M. Preece
Erosion of Metals and Alloys

I. R. Kramer
Enhancement of Fatigue, Creep, and Stress
Corrosion Resistance By Surface Treatments

J. F. Prins
Microcutting: A Method to Study Surface
Plasticity at Very High Strain Rates

SUMMARY SESSION

F. C. Frank
Surface Effects in Crystal Plasticity:
Concluding Summary Lecture

LIST OF PARTICIPANTS
