Deformation of Polycrystals: Mechanisms and Microstructures

Proceedings of the 2nd Risø International Symposium on Metallurgy and Materials Science
September 14-18
1981

Editors
N. Hansen    A. Horsewell    T. Leffers
H. Lilholt
Contents

Invited papers:

Flow in polycrystals and the scaling of mechanical properties
   M.F. Ashby and A.M. Brown

Materials with ultra-fine grain sizes
   H. Gleiter

Microstructure and strengthening of superalloys
   E. Hornbogen

How many slip systems, and which?
   U.F. Kocks and G.R. Canova

Deformation of polycrystalline materials at high temperatures
   T.G. Langdon

Microstructures and mechanisms of polycrystal deformation at low temperature
   T. Leffers

Low temperature deformation of polycrystals
   H. Mecking

Cyclic deformation of face-centred cubic polycrystals: a comparison with observations on single crystals
   H. Mughrabi and R. Wang

Microstructures and strengthening of aluminium alloys
   I.J. Polmear

The structure of grain boundaries and their effect on mechanical properties
   B. Ralph, R.C. Ecob, A.J. Porter,
   C.Y. Barlow and N.R. Ecob

Influence of rolling schedule on the critical transition temperature of an industrial zinc-copper-titanium alloy
J. Węgria and A. Piccinin

Texture development in experimentally deformed limestone
H.-R. Wenk, H. Kern and F. Wagner

The deformation microstructure and mechanisms of ultrafine-grained MgO at high temperature
J. Crampon

Microstructural changes and deformation mechanisms during creep of an unidirectionally solidified $\gamma/\delta$ and $\gamma/\gamma'-\alpha$ eutectic alloy at elevated temperature
S.F. Dirnfeld and D. Schwamm

Grain boundary dislocation creep during high temperature deformation of polycrystals
G.L. Dunlop and P.R. Howell

The effect of stability of disperse phase on the creep properties of ferritic steels
V. Foldyna, A. Jakobová, R. Říman, and J. Purmenský

Dynamics of microstructural changes in a superplastic aluminium alloy
A.K. Ghosh

Dynamic recovery of titanium microalloyed structural steels during hot working
J. Hertel

Temporary superplastic behaviour in single and two-phase brasses
C. Homer and B. Baudelet

On the possible role of Stoneley waves in high temperature deformation
A. Horsewell and A.R. Thölén

Dynamic recrystallisation - the influence of crystal structure
F.J. Humphreys

Strain hardening behaviour of Cu-Be alloys at elevated temperatures
M. Jovanović, B. Djurić and Dj. Drobnjak

Creep and superplasticity in a fine-grained copper alloy
T. Kainuma, A. Arieli and A.K. Mukherjee

Length memory phenomenon in directionally solidified composites and its application to improve the creep potential of turbine blades
T. Khan and J.F. Stohr

Kinetics of the spreading of extrinsic grain boundary dislocations on random grain boundaries in metals
W. Lojkowski and M.W. Grabski
Examination of recovered substructures in aluminium by SEM channelling contrast
H.J. McQueen and W.B. Hutchinson

Influence of strain-rate on the flow stress and ductility of copper and tantalum
G. Regazzoni, F. Montheillet, R. Dormeval and M. Stelly

Creep deformation induced substructure in polycrystalline molybdenum
A. Rosen, L. Bendersky and Y. Komem

Creep cracking in type 304 stainless steel at 550-600°C
H.I. Shaaban, F.H. Hammad and G. Piatti

Superplastic deformation of an oxide-dispersion strengthened superalloy
R.F. Singer and G.H. Gessinger

Isothermal ferrite formation from deformed austenite in a V-bearing HSLA steel
R.M. Smith, T. Chandra and D.P. Dunne

Creep behaviour of age-hardened copper-cobalt alloys
P. Tautzenberger and V. Gerold

Stress-strain behaviour and microstructure of polycrystalline alpha-titanium
W. Truszkowski, A. Łatkowski and A. Dziadoń

Transparent analogue materials as an aid to understanding high temperature polycrystalline plasticity
P.D. Tungatt and P.J. Humphreys

A model for the deformation resistance during hot strip rolling
H. Vegter, A. Hurkmans and Th. M. Hoogendoorn

Cyclic deformation of polycrystalline pure metals and of precipitation strengthened alloys
A.S. Cheng, J.C. Figueroa, C. Laird and J.K. Lee

Fatigue of pseudoelastic CuZnAl alloys
J.M. Cook and W.M. Stobbs

Microstructural evolution and constitutive equations in low cycle fatigue at 20°C, 300°C and 550°C for 316 L stainless steel
C. Donadille and R. Penelle

Microstructural effects on fatigue crack growth in steels
B. Karlsson and K. Hamberg

Strain hardening in monotonic and cyclic deformation of polycrystalline fcc metals
P. Kettunen and T. Tiainen

The effects of very high cumulative deformation on structure and mechanical properties of aluminium
A. Korbel, M. Richert, J. Richert
Persistent slip in copper polycrystals
O.B. Pedersen

An experimental study of the Bauschinger effect and the mean stress in Cu-Al$_2$O$_3$ polycrystals
P. Brøndsted

The microstructure and mechanical properties of cold-drawn patented steel wire
S. Paetke and D.V. Edmonds

Microstructural evidence of additive strengthening
B. Ralph and N. Hansen

Strength enhancements and work-softening phenomena during thermomechanical processings in Cu-Ti alloys
S. Saji, S. Ikeno and S. Hori

Microstructure and order strengthening in Cu$_2$NiZn
