Innovations in Mining Backfill Technology

Edited by
F.P. HASSANI & M.J. SCOBLE
McGill University, Canada
T.R. YU
Kidd Creek Mines Ltd, Canada

A.A.BALKEMA / ROTTERDAM / BROOKFIELD / 1989
Contents

1 Review

Backfill research in Canadian Mines
J.E.Udd 3

Fill research at Mount Isa Mines Limited
A.G.Grice 15

Developments in Sweden of the rock mechanics of cut and fill mining
N.Krauland 23

The experimental and practical results of applying backfill
J.Palarski 33

Backfilling on gold mines of the Gold Fields group
N.Kamp 39

2 Laboratory testing

Analysis and modelling of sill pillars
R.J.Mitchell & J.J.Roettger 53

Use of a flue-gas desulphurization by-product for stabilizing hydraulic mine backfill
H.T.Chan, H.M.Johnston, L.Konecny, R.D.Hooton & R.Dayal 63

An experimental study to investigate the effect of backfill for the ground stability
U.Yamaguchi & J.Yamatomi 71

Fill-induced post-peak pillar stability
G.Swan & M.Board 81

The influence of material composition and sample geometry on the strength of cemented backfill
A.W.Lamos & I.H.Clark 89

New materials technologies applied in mining with backfill
R.F.Viles, M.S.Boily & R.T.H.Davis 95
3 Modelling and design

Application of high-strength backfill at the Cannon Mine
C.E.Brechtel, M.P.Hardy, J.Baz-Dresch & J.S.Knowlson  
Instrumentation and modelling of the Cannon Mine’s B-North ore body
D.R.Tesarik, J.B.Seymour & J.D.Vickery  
Numerical modelling as a basis for evaluating the effectiveness of backfill as local support in deep mines
R.G.Gürtunca & I.H.Clarke  
The use of models in sill mat design at Falconbridge
B.O’Hearn & G.Swan  
Modelling of cut-and-fill mining systems – Näsliden revisited
W.Justrulid, Y.Qianyuan & N.Krauland  
Computer models for improved fill performance
R.Cowling, A.Voboril, L.T.Isaacs, J.L.Meek & G.Beer

4 Rockburst control

Backfilling in deep level tabular stopes
A.J.Barrett, H.A.D.Kirsten & T.R.Stacey  
The in situ behaviour of backfill materials and the surrounding rockmass in South African gold mines
Assessment of a new mine layout incorporating concrete pillars as regional support
D.J.Adams, R.G.Gürtunca, A.J.Jager & N.C.Gay  
Examination of the support potential of cemented fills for rock burst control
J.K.Whyatt, M.P.Board & T.J.Williams  
The assessment of cemented rockfill for regional and local support in a rockburst environment, LAC Minerals Ltd, Macassa Division
W.J.F.Quesnel, H.de Ruiter & A.Pervik  
Spiral slot-and-pillar mining with backfill
J.D.Dixon

5 General topics

Stability of classified tailings backfills containing reinforcements
R.J.Mitchell  
Field studies by full displacement pressuremeter in mine backfills
L.Piciacchia, M.Scoble & J.-M.Robert  
Delayed consolidation of slag backfill for pillar recovery
L.A.Beauchamp, M.J.Scoble & H.S.Mitri
In situ determination of high density alluvial sand fill  
D.Thibodeau  

Laboratory testing on high density tailing backfill mixes  
W.G.Hunt  

Some factors relating to the stability of consolidated rockfill at Kidd Creek  
T.R.Yu  

The use of backfill for improved environmental control in South African gold mines  
M.K.Matthews  

6 Soft rock mining  
Preparation of an early-strength fill material for roof support in longwall mining of coal  
E.G.Thomas, R.D.Lama & K.Wiryanto  

The flow characteristics through hydraulic filling materials produced from coal washery rejects  
G.Senyur  

Backfilling at IMC Canada K-2 potash mine  
L.M.Kaskiw, R.M.Morgan & D.C.Ruse  

The use of relaxation tests to predict the compaction behaviour of halite backfill  
C.J.Fordham, M.B.Dusseault, D.Mraz & L.Rothenburg  

Utilization of salt tailings backfill at Denison-Potacan Potash Company  
G.Herget & S.R.Munroe  

Field monitoring of salt tailings used as backfill in cut-and-fill potash mining  
R.J.Beddoes, B.V.Roulston & J.Streisel  

7 System design  
Backfilling on the base metal mines of the Gold Fields Group  
D.A.J.Ross-Watt  

Fill operating practices at Isa Mine – 1983-1988  
J.D.McKinstry & P.M.Laukkanen  

Total tailings backfill properties and pumping  
J.D.Vickery & C.M.K.Boldt  

The role of hydrocyclone technology in backfilling operations  
A.L.Hinde & C.P.Kramers  

Hydraulic transportation of high density backfill  
C.P.Kramers, P.M.Russell & I.Billingsley  

A simulation model for efficient hydraulic fill transport  
A.Sellgren  

VII
8 **General topics**

A study on liquefaction potential of paste backfill
*K.Aref, F.P.Hassani & D.Churcher*  
405

The time effect on flow through mine backfill materials
*G.Senyur*  
415

The basics of preparation of deslimed mill tailing hydraulic fill
*E.G.Thomas & P.N.Holtham*  
425

The convergence resistance of mine backfills
*P.H.Oliver & D.Landriault*  
433

Ground movement prediction as an aid to back-fill mine design
*K.V.Shanker & B.B.Dhar*  
437

Double-wall hardened abrasion resistant steel pipeline systems for hydraulic and pneumatic mine backfill conveying
*H.Fuss & M.Jost*  
443

An evaluation of binder alternatives for hydraulic mill tailings
*P.H.Hopkins & M.S.Beaudry*  
447
