Scotland

BRITISH CERAMIC PROCEEDINGS

No. 35

SEPTEMBER 1984

UB/TIB Hannover 89
103 085 033

RN 439(35)

22885/3

Published by The British Ceramic Society,
Shelton, Stoke-on-Trent

Contents

	Page
Introduction	vii
1. Surface Composition of Anhydrous Calcium Silicates <i>M. C. Ball, R. E. Simmons and I. Sutherland, Dept. of Chemistry, University of Technology, Loughborough.</i>	1
2. Quantitative X-Ray Powder Diffraction in the Study of Some Cementive Materials <i>W. A. Gutteridge, Cement and Concrete Association, Wexham, Berks.</i>	11
3. Characterisation of Calcium Hydroxide in Set Cements Using Some Established and Novel Techniques <i>Alison P. Barker and P. Barnes, Dept. of Chrystallography, Birkbeck College, London.</i>	25
4. Prediction of Cement Hydration <i>L. J. Parrot and D. C. Killoh, Cement and Concrete Association, Wexham, Berks.</i>	41
5. Solid State NMR Studies of Cement Hydration <i>N. J. Clayden, C. M. Dobson, G. W. Groves, C. J. Hayes and S. A. Rodger, Dept. of Metallurgy, University of Oxford, Oxford.</i>	55
6. Studies on the Chemistry and Microstructure of Cement Pastes <i>H. F. W. Taylor, Dept. of Chemistry, University of Aberdeen, Scotland.</i>	65
7. Structure and Properties of Tricalcium Silicate Doped with MgO, Al ₂ O ₃ and Fe ₂ O ₃ <i>S. Abdul-Maula and I. Odler, Technical University Clausthal, Clausthal-Zellerfeld, W. Germany.</i>	83
8. The Structure of Alites <i>W. Sinclair and G. W. Groves, Dept. of Metallurgy, University of Oxford.</i>	93

9. The Mineralizer Effect of Fluorspar in Relation to the Form of Addition to an Industrial Raw Mix
A. Palomo, T. Vázquez, M. T. Blanco-Varela and F. Puertas, Instituto Eduardo Torroja de la Construcción y del Cemento, Madrid. 101
10. Effect of the Cooling Rate of Clinkers on the Formation of the Liquid Phase
T. Vázquez, M. T. Blanco-Varela and A. Palomo, Instituto Eduardo Torroja de la Construcción y del Cemento, Madrid. 115
11. Effect of Fluorine on Extracted Phases from Portland Cement Clinkers
M. Pérez Méndez, F. Triviño Vázquez and T. Vázquez Moreno, Instituto Eduardo Torroja de la Construcción y del Cemento, Madrid. 127
12. Chemical Reactions in Magnesia-Phosphate Cement
B. E. I. Abdelrazig, J. H. Sharp, P. A. Siddy and B. El-Jazairi, Dept. of Ceramics, Glasses and Polymers, University of Sheffield, and F.E.B. Services, Manchester. 141
13. Ferrite Cements as Binders for Iron Ore Fines
S. Karlsson and R. Carlsson, Swedish Institute for Silicate Research, Sweden. 155
14. Characterisation of the Dehydration Products of Calcium Sulphate Dihydrate by Conduction Calorimetry
G. C. Bye and M. J. Coole, Blue Circle Industries, Greenhithe, Kent. 167
15. Chemical and Morphological Studies of the Hydration of Tricalcium Silicate
P. J. Le Sueur, D. D. Double and G. W. Groves, Dept. of Metallurgy, University of Oxford, Oxford. 177
16. Relationships Between Microstructural Development and the Physico-Chemical Nature of OPC Pastes
J. E. Bailey and H. R. Stewart, Dept. of Metallurgy and Materials Technology, University of Surrey, Guildford. 193

17. Microstructural Studies of the Hydration of C_3A and C_4AF Independently and in Cement Paste
K. L. Scrivener and P. L. Pratt, Dept. of Metallurgy and Materials Technology, Imperial College, London. 207
18. Early Stages of the Hydration of Tricalcium Aluminate and its Sodium-Containing Solid Solutions
F. P. Glasser and M. B. Marinho, Dept. of Chemistry, University of Aberdeen, Scotland. 221
19. Electrical Conductivity of Pastes Made of Clinker + Gypsum
F. D. Tamás, E. Farkas and D. M. Roy, University Veszprém, Veszprém, Hungary and Pennsylvania State University, U.S.A. 237
20. Characterization of the Porosity of Hydrated Cement Pastes
A. A. Rahman, Dept. of Chemistry, University of Aberdeen. 249
21. Diffusion of Chloride Ions in Hardened Cement Pastes Containing Pure Cement Minerals
P. Lambert, C. L. Page and N. R. Short, Dept. of Metallurgy and Materials Engineering, University of Aston, Birmingham. 267
22. Transport of Oxygen Through Concrete
C. D. Lawrence, Cement and Concrete Association, Wexham, Berks. 277
23. Volume Changes During Hydration of Cements and Plasters
J. F. Raffle, Dept. of Physics, University of Technology, Loughborough. 295
24. The Mechanism of Retardation of Setting of OPC by Sugars
J. D. Birchall and N. L. Thomas, I.C.I., Mond Division, Runcorn, Cheshire. 305
25. Effect of Aeration on the Properties of Class G Oilwell Cement
J. Bensted, Blue Circle Industries, Greenhithe. 317

26.	The Effect of High-Range Water-Reducing Admixtures on Cement-Water Systems <i>A. Al-Kurwi, W. E. Worrall and B. El-Jazairi, University of Leeds, Dept. of Ceramics, Leeds, and FEB Services, Manchester.</i>	339
27.	A Study of Inorganic and Organic Admixtures Using Combined Calorimetric and Ultrasonic Pulse Velocity Techniques <i>C. R. Wilding and D. D. Double, Dept. of Metallurgy and Science of Materials, University of Oxford, Oxford.</i>	349
28.	Influence of Fly Ash on the Structure of OPC and Pure Calcium Silicates <i>N. Tenoutasse and A. M. Marion, Redco N.V., Belgium and Universite Libre de Bruxelles, Brussels.</i>	359
29.	On the Influence of Alkalis on Strength Development of Blended Cements <i>B. Osbaeck, F. L. Smidth & Co. A/S, Copenhagen, Denmark.</i>	375
30.	Calorimetric Studies of the Hydration Behaviour of Extended Cements <i>M. J. Coole, Blue Circle Industries, Greenhithe, Kent.</i>	385
31.	Calorimetry and Microscopy of Flyash and Silica Fume Cement Blends <i>Y. Halse, D. J. Goult and P. L. Pratt, Dept. of Metallurgy and Materials Technology, Imperial College, London.</i>	403
32.	The Effect of Mineral Additives on the composition of Cement Pore Fluids <i>F. P. Glasser and J. Marr, Dept. of Chemistry, University of Aberdeen, Scotland.</i>	419
	Subject Index	431
