POST-IRRADIATION EXAMINATION TECHNIQUES
FOR WATER REACTOR FUEL

PROCEEDINGS OF A TECHNICAL COMMITTEE MEETING
ORGANIZED BY THE
INTERNATIONAL ATOMIC ENERGY AGENCY
AND HELD IN WORKINGTON, CUMBRIA, UNITED KINGDOM,
11–14 SEPTEMBER 1990

INTERNATIONAL ATOMIC ENERGY AGENCY, VIENNA, 1991
CONTENTS

Summary of the Technical Committee Meeting ................................................................. 7

HOT CELL EXAMINATION (Session 1)

Hot cell facility of the European Institute for Transuranium Elements: Non-destructive
and destructive examinations of individual rods ............................................................ 19
  M. Coquerelle

Hot cell facility: non-destructive examinations for light water reactor fuel rods ............... 25
  J. Van de Velde, A. Gys, L. Mies

Overview of PIE techniques for LWR fuels at Saclay hot cells with special emphasis
on new apparatus and on mechanical testing ............................................................... 45
  J.-Y. Blanc, J.-L. Hardy, M. Trotabas

Post-irradiation examination and evaluation of PWR 14 × 14 fuel assemblies .................. 50
  Seung-Gy Ro, Eun-Ka Kim, Key-Soon Lee, Duck-Kee Min

Eddy current testing system for measuring oxide layer thickness of fuel rods .................. 55
  Y. Yamaguchi, T. Ando, T. Kamimura, S. Abeta, M. Oishi, S. Yamauchi, S. Inoue

Application of PIE techniques to the study of corrosion of spent oxide fuel in deep-rock
groundwaters .................................................................................................................. 63
  R.S. Forsyth

Technical experience on PIE of high burnup fuel at RFEF/ JAERI, Japan: Gas fluidity in
fuel rod and defueling procedure ..................................................................................... 70
  A. Kikuchi, H. Amano, T. Yamahara, H. Itami

Link between in pile instrumentation and hot cell measurements for fuel behavior analysis .... 77
  E. Porrot, G. Eminet, C. Baudusseau, C. Lemaignan

Post-irradiation non-destructive testing of leaky fuel pin clad in Zr-1% Nb ....................... 82
  V.V. Novikov, Yu.K. Bibilashvili, I.S. Golovnin, A.V. Demin, M.G. Golovachev,
  A.N. Timokhin, E.N. Shcherbakov

Development of technology for mass post-irradiation examinations of BN reactor fuel pins .... 87
  V.B. Ivanov, V.G. Dvoretskij, B.A. Kanashov, V.S. Neustroev, A.V. Povstyanoko,
  V.P. Smirnov

Measurement methods of geometry dimensions and shape of irradiated fuel assembly for
power reactors ................................................................................................................... 95
  V.G. Dvoretskij, V.B. Ivanov, N.S. Glushak, S.M. Glushak, E.D. Karaulov, V.P. Smirnov

SPECIAL PIE TECHNIQUES AND DATA ACQUISITION (Session 2)

Application of mercurometric analysis methods to radioactive (and/or toxic) samples:
pycnometry and porosimetry ............................................................................................. 107
  L. Sannen

Study of the feasibility of using matrix isolation spectroscopy to characterise the chemical
forms of fission products evolving from heated irradiated fuel samples .......................... 111
  R.A. Gomme, R.A. Green

Application of X-radioscopy techniques to LOCA simulation tests on irradiated PWR fuel .... 117
  A.J. Manley, P. Hindmarch, A. Garlick
Hot cell examination of corrosion films on zirconium alloys using infrared spectroscopy, impedance and anodization techniques ......................................................... 124
N. Ramasubramanian, V.C. Ling, M.H. Schankula, R.S. Chenier

Use of local X-ray microanalysis methods in studies of VVER fuel elements ...................... 135
K.P. Dubrovnin, A.V. Novikov, Ja.I. Sh trombakh

ED-WARF (Session 3)

Pool-side inspection of spent reactor fuel in Argentina ......................................................... 143
M.J. Sametband, G. Ruggirello, P. Adelfang
On-site examination of individual fuel rods ............................................................................. 148
D. Beunèche

A new computed tomography system in the ECN hot cell laboratory, Netherlands ............... 151
G. Dassel, G.P. Leendertse, J.J. van Wijk

Permanent measurement of the primary coolant activity with the PIGAL experimental facility ................................................................. 158
D. Parrat, R. Warlop, F. Montagnon

List of Participants .................................................................................................................. 163
