RESIDUES OF VETERINARY DRUGS IN FOOD

Edited by:

N. Haagsma
A. Ruiter
P. B. Czedik-Eysenberg

Proceedings of the EURORESIDUE conference
Noordwijkerhout, The Netherlands
May 21-23, 1990

Organizing societies:

Working Party on Food Chemistry (WPFC), division of the Federation of Chemical Societies (FECS)

Nederlandse Vereniging voor Voedingsleer en Levensmiddelentechnologie (NVVL; Netherlands Society for Nutrition and Food Technology)
KEY LECTURES

M. Debackere
Veterinary medicine products: their pharmacokinetics in relation to the residue problem 26

N. Haagsma
Sample pretreatment in drug residue analysis 40

M. Petz
Trends and perspectives in analytical methodology 53

Ch. Schlatter
Toxicological assessment of xenobiotics in food of animal origin 65

R.W. Stephany
Quality criteria in drug residue analysis 76

G.M. Telling
Control of veterinary drug residues in food 86
ORAL AND POSTER COMMUNICATIONS

An analytical strategy for the regulatory control of residues of chloramphenicol in meat and milk 96

Arneth, W.
Multimethod for the residue analysis of some tranquillizers and carazolol in animal tissue and urine 101

Arts, C.J.M. and M.J. van Baak
'Residue' levels of natural steroid hormones in edible tissues of veal calves implanted with Implix BF® and the effect of removal of the implant prior to slaughtering 105

Kinetics of carbadox residues in pigs 110

Beeck, L. van, H. Deelstra, R. van Cauwenbergh and P. van Dael
Determination of residues of inorganic veterinary drugs in food 114

Berger, K. and M. Petz
Labelling of penicillin residues with 4-bromomethyl-7-methoxy-coumarin for HPLC with fluorimetric detection 118

Brinkmann, B., N. Haagsma and H. Bünning-Pfaue
Investigations of enrofloxacin residues in trout 123

Residues of dichlorvos and its major metabolite: in vitro studies in cattle tissue 129

Analytical methodology for measuring BST in milk 134

Cravedi, J.-P.
Residue pharmacokinetics of virginiamycin in rainbow trout 139

Dagorn, M.
Residues of lindane in fat sheep after dipping or spraying 144

Delahaut, Ph., G. Degand, M. Dubois, P. Schmitz and G. Maghuin-Rogister
Determination by enzyme and radio-immunoassay of clenbuterol levels in urine of treated cattle 149

Desplenter, L., J. Frens, B. Schmit and C. Verschueren
EEC requirements for safety evaluation: Industry's view 154
Ellerbroek, L.I.
Control of withdrawal times for enrofloxacin and flumequine in veal calves, cattle and pigs 159

Ellinghaus, U.
Improved quick-test systems for detecting drug residues in the urine of fattening pigs 166

Epstein, R.L., T. Phillippo, W. Koscinski and G. Vasco
Organotin residue determination in poultry 171

Farrington, W.H.H., J. Tarbin and J. Bygrave
Trace residue analysis of tetracyclines in animal tissues 179

Farrington, W.H.H., S. Chapman and D. Tyler
A method of analysis for benzimidazole-type anthelmintics at trace residue levels in animal tissues 185

Ginkel, L.A. van, P.L.W.J. Schwillens, M. Jacquemyns and G. Zomer
The detection and identification of quinoxaline-2-carboxylic acid, a major metabolite of carbadox, in swine tissue 189

Gottmanns, H., R. Kroker and F.R. Ungemach
Secondary bioavailability of mebendazole: Studies in the isolated perfused rat gut 196

Graaf, C.J. de, Th.J. Spierenburg and A.J. Baars
GC-MS determination of quinoxaline-2-carboxylic acid, the terminal metabolite of carbadox, in porcine meat, liver and kidney 202

Haagsma, M., L.M.J. Mains, W. van Leeuwen and H.W. van Gend
Rapid determination of sulphadimidine, chloramphenicol and flumequine in cultured fish 206

Hassett, T., A.L. Patey and G. Shearer
Effect of cooking on drug residues in meat and offal 211

Heeschen, W.H.
Significance of residues of teat disinfectants in milk 216

Hoogenboom, L.A.P., M. van Kammen, M.C.J. Berghmans and H.A. Kuiper
Detection of protein bound metabolites of furazolidone 221

Hubbert, W.T.
Planning a national residue program 226

Kan, C.A., H.W. van Gend and M.M.L. Aerts
The carry-over of low levels of coccidiostats from layers feed to eggs 231

Keukens, H.J., G.M. Binnendijk and M.M.L. Aerts
Determination of residues of carbadox and metabolites in edible tissues - In vitro stability studies 235

Klee, S., F.R. Ungemach and R. Kroker
Secondary bioavailability of furazolidone: Studies in isolated perfused gut, intestinal and liver cells 240
Komar, M., J. Marinšek, K. Šinigoj-Gaćnik, S. Ivanc and M. Milohnjoja
Survey of sulphonamide residues in urine samples, animal tissues and food of animal origin in Slovenia in 1986, 1987 and 1988 246

Kreidel, I., R. Kroker and F.R. Ungemach
Secondary availability of mebendazole: Studies in the isolated perfused liver and isolated hepatocytes 248

Lockyer, J.R., A. Bucknall and I.C. Shaw
The distribution of streptomycin in the kidney - An important consideration in residues analysis 254

Macdonald, A., H. Laurencot and L. Elsom
The use of bioavailability studies in the evaluation of tissue residues 259

Macri, A., A. Grassitelli, E. Pierdominici, G. Brambilla and S. Castelli
Residues of nicarbazin in liver of chicken reared under different conditions 264

Meetschen, U. and M. Petz
Sensitive confirmatory method for determination of seven penicillins in bovine tissues and milk 267

Mellergaard, S., K. Buchmann and J. Bjerregaard
Mebendazole residues in eels after anthelmintic treatment in intensive eel-culture systems 272

Determination of sulphadimethoxine, sulphamethoxazole, trimethoprim and their main metabolites in lung and edible tissues from pigs by column switching liquid chromatography 276

Moats, W.A.
Determination of ampicillin in milk by liquid chromatography using an automated LC cleanup 280

Mooser, A. and M. Rychener
A practical method for quantification and confirmation of sulphonamide residues in meat by HPLC-UV/VIS and GC-MS 284

Niemi, A., S. Suortti, A. Rizzo, T. Hirvi and H. Kallio
Determination of synthetic, anabolic agent residues in bovine tissue by radioimmunoassay 289

Patel, R.K.P., R.M. Parker, M. Chaplin and H. Hassanali
HPLC analysis of dimetridazole and its metabolite hydroxydimetridazole in porcine tissues 294

Poucke, L. van and C. van Peteghem
Gaschromatographic confirmation of sulphonamide residues after HPTLC screening of edible animal tissues 299
Rietveld, E.C., M.J. van Baak and J.M. Fentener van Vlissingen
