Contents

Preface v

Twelfth American Peptide Symposium Committees viii

Sponsors, Donors and Contributors ix

Abbreviations xi

Eighth Alan E. Pierce Award Lecture

Design and discovery in the development of peptide analogs 3

D.F. Veber

Session I: Peptide hormones

Structure-activity relationships of neuropeptide Y 17

A.G. Beck-Sickinger, W. Gaida, E. Hoffmann, H. Dürr, G. Schnorrenberg, H. Köppen and G. Jung

Structural determinants for the design of superpotent analogs of human calcitonin 20

C. Basava and K.Y. Hostetler

Implications of improved metabolic stability of peptides on their performance in vivo: Resistance to DPP-IV-mediated cleavage of GRF analogs greatly enhances their potency in vivo 23

Synthesis of a fast-acting insulin based on structural homology with insulin-like growth factor I 26

Toward the solution structure of an engineered insulin monomer 29

M.A. Weiss, Q.-X. Hua, M. Kochoyan, C.S. Lynch, B.H. Frank and S.E. Shoelson

xxii
Contents

Structure activity relationships (SAR) of somatostatin, gonadotropin, corticotropin and growth hormone factors releasing factors

Parathyroid hormone domain for protein kinase C stimulation located within amphipilic helix

Cyclic bombesin/GRP analogs which retain either agonist or antagonist activity

Receptors for mammalian bombesin/GRP and neuromedin B have greatly differing ligand binding requirements

GRF(1–29) analogs with high in vivo and in vitro potencies in the rat

S.J. Hocart, W.A. Murphy and D.H. Coy

Characterization and developmental phosphorylation of a membrane protein P46

X.-F. Chen, J.-W. Zhang, T. Tang and Y.-C. Du

LH-RH analogs with cytotoxic moieties

Amide bond substitutions and conformational constraints applied to bombesin antagonists

J.V. Edwards, B.O. Fanger, E.A. Cashman, S.R. Eaton and L.R. McLean

Metabolically stabilized agonists of luteinizing hormone-releasing hormone (LHRH)

Bpa-insulins: Photoactivatable analogs for identifying site-site interactions between insulin and the insulin receptor

S.E. Shoelson, C.S. Lynch, S. Chatterjee, M. Chaudhuri and Y.-M. Feng
Use of a monomeric insulin template for studying structural effects of substitutions within insulin's receptor-binding surface
S.E. Shoelson, Z.-X. Lu, L. Parlaustan, C.S. Lynch and M.A. Weiss

Novel GRP analogs which are potent antagonists of bombesin-like peptides
M. Mokotoff, K. Ren, P.C. Lee and A. LeFever

Human and rat amylin: Syntheses, structures and binding sites
A. Balasubramaniam, S. Sheriff, M. Borchers, V. Renugopalakrishnan, M. Stein, W.T. Chance and J.E. Fischer

Neuropeptide Y(17–36) exhibits a biphasic effect on rat cardiac adenylate cyclase activity: Structure-function studies
S. Sheriff, J.E. Fischer and A. Balasubramaniam

Probing the hormone-binding site of the insulin receptor with photo-reactive derivatives
M. Fabry, E. Kojro, F. Fahrenholz and D. Brandenburg

Receptor binding and subunit interaction by the N-terminal (1–15) region of LH/hCG β subunit shown by use of synthetic peptides
H.T. Keutmann, D.A. Rubin, K.A. Mason, K. Kitzmann, M. Zschunke and R.J. Ryan

Biologically active cyclic (lactam) analogs of growth hormone-releasing factor: Effect of ring size and location on conformation and biological activity

Synthesis and biological evaluation of growth hormone-releasing factor analogs resistant to degradation by dipeptidylpeptidase IV
E.P. Heimer, J. Bongers, M. Ahmad, T. Lambros, R.M. Campbell and A.M. Felix

Effect on histamine release by LHRH antagonists featuring translocation of the cationic amino acid
G. Flouret, K. Mahan and T. Majewski

High in vivo bioactivities of position 2/Ala15-substituted analogs of bovine growth hormone-releasing factor (bGRF) with improved metabolic stability
Contents

Human insulin analogs with rapid onset and short duration of action
H.B. Long, J.C. Baker, R.M. Belagaje, R.D. DiMarchi, B.H. Frank,
L.K. Green, J.A. Hoffmann, W.L. Muth, A.H. Pekar, S.G. Reams,
W.N. Shaw, J.E. Shields, L.J. Slieker, K.S.E. Su, K.L. Sundell and
R.E. Chance

Chemical potentiation of growth hormone releasing hormone analogs
DiMarchi

A-C-B human proinsulin: A novel insulin agonist and intermediate in
the synthesis of human insulin
H.B. Long, R.M. Belagaje, G.S. Brooke, R.E. Chance, R.D. DiMarchi,
J.A. Hoffmann, S.G. Reams, C. Roundtree, W.N. Shaw, L.J. Slieker,
K.L. Sundell and W.F. Heath

Session II: Neuropeptides

Conformational restriction of the Phe\(^3\) residue in a cyclic dermorphin
analog: Effects on receptor selectivity and stereospecificity
P.W. Schiller, G. Weltrowska, T.M.-D. Nguyen, C. Lemieux and N.N.
Chung

Design of cholecystokinin analogs with high affinity and selectivity for
brain CCK receptors
A.M. Nadzan, D.S. Garvey, M.W. Holladay, K. Shiosaki, M.D. Tufano,
D.G. Witte, B.R. Bianchi, C.A.W. Wolfram, S. Burt and C.W. Hutchins

Synthesis and structure-activity relationships of cyclic casomorphins
R. Schmidt, K. Neubert, C. Liebmann, M. Schnittler, N.N. Chung and
P.W. Schiller

\(^{111}\text{In-DTPA-D-Phe}^1\)-Octreotide (SDZ 215-811) to image somatostatin
receptor positive tumors
J. Pless, R. Albert, C. Bruns, P. Marbach, B. Stolz, W.H. Bakker,
E.P. Krenning and S.W.J. Lamberts

Identification of an abnormal phosphorylation site in Alzheimer's disease
paired helical filaments using synthetic peptides
V.M.-Y. Lee and L. Otvos Jr.

New and highly potent bradykinin antagonists
J. Knolle, G. Breipohl, S. Henke, H. Gerhards and B. Schölkens

Computer modeling of opioid selective ligands: Possible new topographical relationships to bioactivity are examined with new analogs designed for the δ opioid receptor

A. Misicka, A.W. Lipkowski, G.V. Nikiforovich, W.M. Kazmierski, R.J. Knapp, H.I. Yamamura and V.J. Hruby

Development of models for the bioactive conformations of ligands for CCK A and B receptors and their use in the design and synthesis of highly potent and selective analogs

S. Fang, G.V. Nikiforovich, R.J. Knapp, D. Jiao, H.I. Yamamura and V.J. Hruby

Molecular determinants in the δ selectivity of delorphins

L.H. Lazarus, S. Salvadori, R. Tomatis and W.E. Wilson

A conformational study of achatin-I, an endogenous neuropeptide containing a D-amino acid residue

T. Iwashita, Y. Kamatani, H. Minakata, T. Ishida and K. Nomoto

Characterization of the modulation of neuronal response to NMDA by neuropeptide Y

F.P. Monnet, A. Fournier, G. Debonnel and C. de Montigny

Identification of the binding pharmacophores of vasoactive intestinal peptide (VIP)

Activity of dynorphin-like peptides on neuropeptide Y receptors

J.J. Leban, D. Heyer, J. Matthews and A.J. Daniels

The topochemical basis for morphiceptin and dermorphin bioactivity

T. Yamazaki, S. Ro and M. Goodman

Two novel neuropeptides from bovine brain

A.A. Karelin, E.V. Karelina, V.V. Ul'yanov, T.N. Alyonycheva, A.P. Alexandrov, T.M. Volkova, V.I. Tsetlin, E.V. Grishin, V.T. Ivanov, O.N. Dolgov, N.P. Nikitin, M.V. Pletnikov, N.N. Galeva, V.V. Sherstnev, V.I. Spiglazov and N.A. Dimitriadi

Structure-activity studies of α-conotoxin: The importance of disulfide bridges for biological activity

T. Sabo, C. Gilon, A. Shafferman and E. Elhanaty
Contents

The membrane mediated conformation of Dynorphin A(1–13) as studied by transferred nuclear Overhauser effect spectroscopy
L.C.M. van Gorkom, C.R.D. Lancaster, S. St-Pierre, A.A. Bothner-By and R.M. Epand

Calcium binding by acyclic peptides: NMR and computational studies
A. Saint-Jean, B. Cheesman and V.S. Ananthanarayanan

Correlation of conformation with antibody affinity for fibrinogen γ-chain carboxyl terminal peptide segment
M. Blumenstein and G.R. Matsueda

Multicyclic peptides synthesized using the Kaiser oxime resin: Helix stabilizing effects of lactam bridges
G. Osapay, J. Gulyás, A.A. Profit, E.S. Gulyás and J.W. Taylor

1H-NMR studies of the structure and calcium binding behavior of the first EGF-like domain in blood coagulation factor IX

Comparative studies on solid-phase synthesis and conformation of glycosylated and phosphorylated peptides
L. Otvos Jr., J. Thurin, L. Urge, I. Elekes, I. Laczko, E. Kollat and M. Hollósi

Preferred conformation of (αMe)Val peptides

Circular dichroism studies of tryptophan residues in gramicidin
G.A. Woolley and B.A. Wallace

Molecular properties of lipopolysaccharide-binding and antimicrobial tachyplesin I from Tachypleus tridentatus
N.G. Park, S. Lee, H. Aoyagi, M. Ohno, T. Muta and S. Iwanaga

1H NMR spectroscopic studies reveal multiple conformers of cyclic opioid peptide analogs
B.J. Marsden, B.C. Wilkes and P.W. Schiller

Molecular dynamics simulations of opioid peptide analogs containing multiple conformational restrictions
B.C. Wilkes and P.W. Schiller

</table>
Conformation of the *Torpedo* AChR α67–76 fragment in the free state and in the bound state to an anti-AChR antibody

Synthesis of Ψ(CH(CN)NH) pseudopeptides: A new peptide bond surrogate

Structural analysis of holo-neocarcinostatin by two-dimensional NMR method

H. Takashima, S. Amiya and Y. Kobayashi

β-Folding in N-hydroxy and N-amino peptides

A. Aubry, V. Dupont, A. Lecoq, G. Boussard and M. Marraud

Session V: De novo design

Studies on the nucleation in DMSO and water of β-sheet structures with peptide-epindolidione conjugates

D.S. Kemp, D.E. Blanchard and C.C. Muendel

Synthetic model proteins: Positional effects of interchain α-helical hydrophobic interactions on protein conformation and stability

N.E. Zhou, C.M. Kay and R.S. Hodges

The TASP-concept: From template-assembled synthetic proteins to protein surface mimetics

Design and synthesis of four-helix bundle channel proteins

A. Grove, J.M. Tomich, T. Iwamoto, S. Marrer, M.S. Montal and M. Montal

Artificial helical proteins with metal templates

M. Lieberman, M. Tabet and T. Sasaki

Studies on chymohelizyme-1, a designed synthetic enzyme

J.M. Stewart, J.R. Cann, K.W. Hahn and W.A. Klis
Contents

The design of peptide secondary structure: An application to thioredoxin
M.J. Di Grandi, S.R. Wilson and A. Spector 337

Solution conformation of a model 4-helix bundle protein

Effect of hydrophobic residues in the N- and C-terminal α-helices of the synthetic Ca^{2+}-binding site III of TnC on Ca^{2+}-affinity and formation and stability of a dimeric two-site domain
O.D. Monera, G.S. Shaw, B.D. Sykes, C.M. Kay and R.S. Hodges 341

Switch peptides: Medium induced α-helix to β-sheet transitions of bis-amphiphilic secondary structures and their membrane activity
M. Mutter, K.-H. Altmann, U. Buttikus, R. Gassmann, L. Kürz and A. Seelig 344

Stabilities of coiled-coil dimers as a model for leucine zippers
A.L. Rockwell, K.T. O'Neil and W.F. DeGrado 346

Apolipoprotein class of the amphipathic helix: Peptide analogs with variation in interfacial alkyl chain lengths and nature of basic residues
Y.V. Venkatachalapathi, J.P. Segrest, K.B. Gupta and G.M. Anantharamaiah 348

3_{10}-Helix nucleation with a macrocyclic triproline template
D.S. Kemp and J.H. Rothman 350

Development of a 3-state equilibrium model for the helix-nucleation template Ac-Hel_{12}-OH
D.S. Kemp, T.J. Allen and S.L. Oslick 352

Design, synthesis and characterization of DNA binding peptides
S.A. Jackson and W.F. DeGrado 356

Biochemical and spectroscopic properties of DNA-binding zinc fingers: Application of Fmoc-mediated synthesis on PEG-polystyrene
S. Biancalana, C.E. Dahl, H.T. Keutmann, D. Hudson, M.A. Marcus and M.A. Weiss 358

Designing homodimers and heterodimers with sequence simplified leucine zipper models
T. Graddis and I. Chaiken 360

xxxiv
Facilitation of protease catalyzed splicing of segments of human α-globin by the cosolvent-induced helical conformation of a contiguous segment

Protein engineering of betabellin 12

_R.D. McClain, Y. Yan, R.W. Williams, M.E. Donlan and B.W. Erickson_

Molecular tools for the design of γ-turn in peptides

_V. Pavone, A. Lombardi, G. D'auria, M. Saviano, B. Di Blasio, L. Paolillo and C. Pedone_

Design, folding and immunochemical properties of peptides with parallel and antiparallel αα supersecondary and 4α-helical bundle structural motifs

_H. Lee and P.T.P. Kaumaya_

Bifunctional peptides composed of helical segment and sugar, crown ether, or cyclic peptide, and the function regulation

_S. Kimura and Y. Imanishi_

Polycyclic peptides: A new type of cavitand

De novo design and the synthesis of TIM barrel proteins

_T. Tanaka, H. Anaguchi, M. Hayashi, K. Fukuhara, T.J.P. Hubbard, H. Nakamura and M. Ikehara_

Design of α-helical coiled coil peptide containing periodic proline residues

_E. Kitakuni, Y. Oda and T. Tanaka_

Session VI: Structure-activity relationships

Conformational studies of the RGD containing peptide echistatin

_J.T. Pelton, R.A. Atkinson, C. Brockel, P. Lepage, V. Saudek and D. Cowley_

A molecular model of angiotensin II for rational design of small antagonists with enhanced potency

Design of different conformational isomers of the same peptide: α-Melanotropin
   G.V. Nikiforovich, S.D. Sharma, M.E. Hadley and V.J. Hruby

Regulation of G proteins by mastoparan
   T. Higashijima and E.M. Ross

Structure-activity relationships in motilin peptides

Facile synthesis of reduced dipeptides for bradykinin analogs
   L. Gera, R.J. Vavrek and J.M. Stewart

Site-specific fluorescent-labeled glucagon analogs: Probes for the glucagon receptor
   C.G. Unson, M. Fleischer and R.B. Merrifield

Alanine scan of endothelin

D-Amino acid scan of endothelin

Boc-CCK-4 derivatives containing side chain ureas and amides as potent and selective CCK-A receptor agonists

Structure-activity of C-terminal modified analogs of Ac-CCK-7

EGF-Receptor binding peptides from transforming growth factor α (TGFα): Evidence for a multi-domain interaction

Structure-activity and X-ray crystallographic analysis of potent inhibitors of rhizopuspepsin: Design, kinetics and active site modeling of synthetic peptidyl substrate/inhibitor templates

xxxvi
Synthesis of α-fragment of mouse metallothionein I and related peptides and studies on the structure-heavy metal-binding activity relationship  
Y. Okada, S. Matsumoto, Y. Matsumoto, K.-S. Min, S. Onosaka and K. Tanaka

Evaluation of structural modifications in the helical stretch of NPY  
D. Gagnon, R. Quirion, Y. Dumont, S. St-Pierre and A. Fournier

A peptide model for the heparin binding site on antithrombin III  
A.I. Coffman and P.T. Lansbury Jr.

Syntheses and chemotactic activities of [2,3-methanophenylalanine³] chemotactic peptides  
H. Kodama, M. Miyazaki, M. Kondo, K. Sakaguchi, C.H. Stammer and H.-C. Chen

Studies of dimeric fMLF with high chemotactic activities  
M. Kondo, M. Miyazaki, J. Fan, T. Watanabe and H. Kodama

Site specific biotinylation of endothelin-1: Potential use for characterization of endothelin-receptor populations  
H.I. Magazine, A.B. Malik, M.S. Goligorsky, C.A. Bruner and T.T. Andersen

A melanotrophic peptide induces pigmentation (tanning) of human skin  

Synthetic metalloproteins  
J.M. Tomich and J.H. Richards

The relationship between potential induced conformation of melittin and its hemolytic activity  
S.E. Blondelle, D.E. Burcin, N. Salazar and R.A. Houghten

PYL³ and a PYL³-melittin hybrid are antibacterial peptides  
D. Wade, S.A. Mitchell, H.G. Boman, A. Boman and R.B. Merrifield

A SAR study of the complete Ala and partial Aib scans of the growth hormone releasing factor: [Nle²⁷]hGRF(1-29)-NH₂  
Contents

Conformationally constrained glucagon analogs: New evidence for the conformational features important to glucagon-receptor interactions
Y. Lin, D. Trivedi, M. Siegel and V.J. Hruby 439

Synthesis and activity of human amylin and analogs
E. Albrecht, Y. Harada, G.J.S. Cooper, H. Jones and L.S. Lehman de Gaeta 441

CCK heptapeptide analogs: Effect of conformational restrictions and standard modifications on selectivity and activity at CCK-A and CCK-B receptors

Detection of tumor-associated MUC-2 epitopes by means of monoclonal antibodies and synthetic peptides
D. Andreu, G. Gambús, G. Jodas, C. de Bolòs and F.X. Real 446

Penicillin and cephalosporin conjugates with lipidic amino acids and oligomers
I. Toth, R.A. Hughes, P. Ward, A.M. McCollm, D.M. Cox and W.A. Gibbons 448

Synthesis of lipidic peptide conjugates of nucleoside antiviral and cytostatic agents
R. Hussain, I. Toth and W.A. Gibbons 450

Synthesis and biological activity of heteroalkyl lipidic amino acids
E. del Olmo, I. Toth, A.N. Fonteh and W.A. Gibbons 452

Antagonist and agonist activities of synthetic peptide fragments of g-CSF and their protein conjugates

Structure-activity of Trp30 modified analogs of Ac-CCK-7

α-Amidating enzyme catalyzed synthesis of peptide-amides from glycine-extended precursors: Human growth hormone releasing factor and analogs as examples
J. Bongers, E.P. Heimer, R.M. Campbell, A.M. Felix and D.J. Merkler 458

xxxviii
N-terminal region of snake venom neurotoxic phospholipase A₂ is involved in its binding to presynaptic receptors

I.-H. Tsai and M.-C. Tzeng

Photoinduced electron transfer in lysine-based redox triads

B.M. Peek, S.W. Edwards, S.L. Mecklenburg, T.J. Meyer and B.W. Erickson

Binding of a coiled-coil protein to planar platelet membranes by fluorescence microscopy

M. Engel, M.L. Pisarchick, N.L. Thompson and B.W. Erickson

The regulation of G protein by substance P-related peptide: Inhibition of the effects of mastoparan and receptor

H. Mukai, Y. Abe, E. Munekata and T. Higashijima

Analysis of structure-activity relationships in human tumor necrosis factor α (TNFα)

D.N. Männel, K. Ashman, R. Stiemer and R.W. Frank

Mathematical models for the kinetics of peptidyl-prolyl cis-trans isomerases

P. Kuzmič, J.L. Kofron, V. Kishore and D.H. Rich

Synthesis of the N-terminus of the cytochrome subunit in the photosynthetic reaction center from purple bacterium *Rhodopseudomonas viridis*

A.G. Beck-Sickinger and J.W. Metzger

Biological activities of cionin and some synthetic analogs

M. Amblard, M. Rodriguez, M.-C. Galas, M.-F. Lignon, N. Bernad and J. Martinez

SAR studies of cycloseptide: Effects of cyclization and charge at position 6

C. Gilon, D. Halle, M. Chorev, Z. Selinger and G. Byk

Studies on thioether modifications: S-oxidation, S-oxide reduction and regeneration of methionine peptides from their S-benzyl-sulfonium derivatives

E. Krause, M. Beyermann, R. Winter, R. Haseloff, I.E. Blasig and M. Bienert

Structure-activity relationships of conformationally restricted deletion analogs of neuropeptide Y

Contents

Session VII: Synthetic methods

Using an epitope library to identify peptide ligands for antibodies against folded epitopes
   G.P. Smith and J.K. Scott

Light-directed combinatorial peptide synthesis
   S.M. Gruber, P. Yu-Yang and S.P.A. Fodor

The selectide process: Rapid generation of large synthetic peptide libraries linked to identification and structure determination of acceptor-binding ligands
   K.S. Lam, S.E. Salmon, E.M. Hersh, V.J. Hruby, F. Al-Obeidi, W.M. Kazmierski and R.J. Knapp

The relative tendencies of activated residues to racemize during couplings of segments in dimethylformamide
   N.L. Benoiton, Y.C. Lee and F.M.F. Chen

A highly selective and effective reagent for disulfide bond formation in peptide synthesis and protein folding

Solid phase synthesis on polymeric support with allylic anchoring groups
   H. Kunz, W. Kosch and J. März

Towards elimination of segment insolubility during SPPS
   R. Baril, K.-D. Klöppel and R. Frank

Design and characteristics of the novel eight channel multiple solid phase peptide synthesizer using disposal reaction and amino acid vessels
   K. Nokihara and R. Yamamoto

Chlorotrimethylsilane-phenol, a mild deprotection reagent for the Boc-group

Cyclic peptides containing an ethylene glycol cross-linked amino acid
   M. Ho and C.P. Dwyer

Enzymatic peptide synthesis: The effect of polar solvents on proteolysis and esterolysis
   L.A. Littlemore, P.A. Schober and F. Widmer
A novel approach to the synthesis of chiral non-proteinaceous α-amino acids from L-serine
   M.A. Blaskovich and G. Lajoie

Asymmetric synthesis of β-hydroxy L-α-amino acids using aldolase from Pseudomonas sp

Spot-synthesis: A novel technique for facile and rapid peptide screening
   R. Frank and S. Güler

Screening pools of synthetic peptides for biological activity
   E.L. Brown, J.L. Wooters and H.K. Sookdeo

Schiff base analog formation during in situ activation by HBTU and TBTU
   H. Gausepohl, U. Pieles and R.W. Frank

The solid phase synthesis of protected peptides combined with fragment coupling in solution
   B. Kamber and B. Riniker

New enzymatic protecting group techniques for the construction of peptides and glycopeptides
   P. Braun, H. Kunz and H. Waldmann

Monosized 15 micron grafted microspheres for ultra high speed peptide synthesis
   W. Rapp, H. Fritz and E. Bayer

Design and applications of a novel amino acid analyzer for d/l and quantitative analysis with the use of gas chromatography
   J. Gerhaldt, K. Nokihara and R. Yamamoto

A new two-dimensional protection strategy for solid phase peptide synthesis: Use of a safety-catch type of ester linkage-resin cleavable by reductive acidolysis
   Y. Kiso, T. Kimura, H. Itoh, S. Tanaka and K. Akaji

A study of intrachain and interchain reactions during peptide cyclization on the Kaiser oxime resin
   M. Bouvier and J.W. Taylor

Fmoc-Trp(Boc)-OH: A new derivative for the synthesis of peptides containing tryptophan
   P. White

Fmoc-Arg\textsuperscript{\alpha,\alpha'}(Boc)\textsubscript{2}-OH and Z-Arg\textsuperscript{\alpha,\alpha'}(Boc)\textsubscript{2}-OH: New arginine derivatives for peptide synthesis
A.S. Verdini, P. Lucietto, G. Fossati and C. Giordani

Use of N-Fmoc amino acid chlorides and 2-alkoxy-5(4H)-oxazolones in solid phase peptide synthesis

Comparison of peptide synthesis methods Boc/HOBt vs. Fmoc/HBTU
P.A. Baybayan, D. Kesuma, L.S. Bartell, K.-N. Tu, C.C. Chang, L. Huang and A.L. Hong

Correlation between rate of coupling reaction and swelling of resin beads: Influence of solvents, peptide sequence, chaotropic salt and acylation methods
E. Oliveira, R. Marchetto, G.N. Jubilut, A.C.M. Pativa and C.R. Nakaie

Improved resins for Fmoc-solid phase peptide synthesis II: Carboxyl Amide Terminal (CAT) resin
M. Pai and R.J. Webber

Diastereomer-free incorporation of reduced amide (-CH\textsubscript{2}NH-) pseudodipeptides in solid phase peptide synthesis
T.P. Curran, S.M. Abelleira, R.J. Messier and G.F. Musso

Cysteine in peptide chemistry: Side reactions associated with and strategies for the handling of peptides containing cysteine
C.A. Hoeger, D.A. Kirby and J.E. Rivier

Applications for peptides found with solid phase synthesis
E. Fridell, U. Rudén, A. Linde and B. Wahren

Surface mapping of peptides by computer graphics and HPLC
M.I. Aguilar, M.C.J. Wilce, A.J. Round and M.T.W. Hearn

Allyl based side-chain protection for SPPS
M.H. Lyttle and D. Hudson

New active esters and coupling reagents based on pyrazolinones
C.R. Johnson, S. Biancalana, R.P. Hammer, P.B. Wright and D. Hudson

Glycosylation of tyrosine derivatives and their application for solid phase synthesis
K.J. Jensen, M. Meldal and K. Bock
Contents

Conformation dependent coupling and deprotection: Diagnosis and cure 589
  E. Bayer and C. Goldammer

Alternative strategies for the Fmoc solid phase synthesis of phospho-tyrosine-containing peptides 591
  E.A. Kitas, R. Knorr and W. Bannwarth

High pressure aminolysis of unactivated esters as an alternative approach to peptide synthesis 593
  V. Gut, Z.G. Makarova, V.M. Menshov, Y.A. Davidovitch and V.M. Zhulin

Conotope phage libraries 595
  J.K. Scott, B.M. Olivera, R. Myers, J.E. Rivier, G.P. Smith and D. Hillyard

Solid phase peptide synthesis on hydrophilic supports: Preliminary studies using perloza beaded cellulose 597
  D.R. Englebretnsen and D.R.K. Harding

Multivalent ligands for diagnosis and therapeutics 599
  S.D. Sharma, V.J. Hruby, M.E. Hadley, M.E. Granberry and S.P.L. Leong

Synthesis and applications of XAL, a new acid-labile handle for solid-phase synthesis of peptide amides 601
  R.J. Bontems, P. Hegyes, S.L. Bontems, F. Albericio and G. Barany

Biopolymer syntheses on novel polyethylene glycol-polystyrene (PEG-PS) graft supports 603

Novel cysteine protecting groups for the Nα-9-fluorenlymethyloxycarbonyl (Fmoc) strategy of peptide synthesis 605
  M.C. Munson, C. García-Echeverría, F. Albericio and G. Barany

Convergent solid-phase peptide synthesis 607
  F. Albericio, P. Lloyd-Williams, M. Gairí, G. Jou, R. Eritja and E. Giralt

Novel synthetic route to phosphorous peptido-mimetics: Synthesis of phosphonic (and phosphinic) analogs of aspartic and glutamic acid peptides 609
  G. Ósapay and I. Szilágyi
A novel approach to the synthesis of thiazole amino acids
   T.D. Gordon and B.A. Morgan

Deprotection of Arg(Pmc) containing peptides using TFA-trialkylsilane-methanol-EMS: Application to the synthesis of a prepeptide of nisin
   W.C. Chan and B.W. Bycroft

New supported biocatalyst for peptide synthesis
   V. Rolland-Fulcrand, R. Jacquier, R. Lazaro and P. Viallefont

Computer-aided design and synthesis of protecting groups and reagents in peptide chemistry
   B. Penke, L. Nyerges, A.T. Szabó and M. Zarándi

The solid-phase synthesis of a range of O-phosphorylated peptides by post-assembly phosphitylation and oxidation
   D.M. Andrews, J. Küchlin and P.W. Seale

General approaches to carba peptide bond surrogates
   M. Rodríguez, A. Heitz, A. Aumelas and J. Martínez

In situ neutralization in Boc chemistry SPPS: High yield assembly of difficult sequences
   M. Schnölzer, P.F. Alewood, A. Jones and S.B.H. Kent

TPyClU: A new peptide coupling reagent
   F. Roux, J. Coste, E. Frérot, D. Le-Nguyen, P. Jouin and A. Loffet

Chemoselective one-step purification method for peptides synthesized by the solid-phase technique
   S. Funakoshi, H. Fukuda and N. Fujii

Formation of hydroxy amino acid-O-sulfonates during removal of the Pmc-group from arginine residues in SPPS
   E. Jaeger, G. Jung, H.A. Remmer and P. Rücknagel

Studies on synthesis and application of polyethylene glycol benzhydrylamine resin for solid phase peptide synthesis
   X. Liang, G. Mao and H. Chang

Bromoacetyl-derivatized synthetic peptides: Starting materials for counteless new biologically active materials
   F.A. Robey, T.A. Harris, D. Batinic and N. Kolodny
Contents

Novel class of silicon-based protective groups for the side chain of tyrosine  
*N. Fotouhi and D.S. Kemp*  
635

Bovine serum albumin: A new support for solid-phase peptide synthesis  
*P.R. Hansen, A. Holm and G. Houen*  
637

Solid phase synthesis of a number of venom toxins containing two to six cysteine residues  
*R. Cotton, A.S. Dutta, M.B. Giles and C.F. Hayward*

Investigations of the side reactions associated with the use of Bom and Bum groups for histidine protection  
*J.C. Gesquière, J. Najib, E. Diesis, D. Barbry and A. Tartar*  
641

The 3-(3-pyridyl)allyloxycarbonyl group: A new protecting group for peptide synthesis even in water  
*K. von dem Bruch and H. Kunz*  
643

Enzymatic glycosylation of O-glycopeptides  
*M. Schultz and H. Kunz*  
645

Use of 2-(1H-benzotriazol-1-yl)-1,1,3,3-tetramethyluronium tetrafluoroborate (TBTU) in rapid coupling of Boc-amino acids: Adaptation to automated SPPS  
*G.E. Reid and R.J. Simpson*  
647

Improved synthesis and enzymatic resolution of the stable phospho-tyrosine analog p(CH₂PO₃H₂)Phe: Use in solid phase synthesis of β₂-adrenergic receptor sequences  
*C. Garbay-Jaureguiberry, D. Ficheux and B.P. Roques*  
649

Synthesis of large numbers of peptides for rapid screening of bioactive sequences  
*W.M.M. Schaaper, N.J.C.M. Beekman, M. Hage-van Noort, P. Briel, D. Kuperus and R.H. Meloen*  
651

Dihydroorotyl-peptides  
*P.J. Romanovskis*  
653
Session VIII: Large-scale peptide synthesis

Large-scale synthesis of L-367,073, a potent cyclic heptapeptide platelet fibrinogen receptor antagonist

Peptide synthesis by a combination of solid phase and solution methods

R. Nyfeler, U. Wixmerten, C. Seidel and M. Mergler

Adapting lab scale synthesis to production-mature processes, illustrated by a large-scale industrial synthesis of [d-Ala¹]-Peptide T-amide

J. Velling, L.A. Slot, O. Pedersen and A.J. Andersen

Expression and processing of peptides in yeast exemplified by the production of insulin and other peptides

E. Rasmussen, J. Markussen, L. Snel and H.O. Voigt

Biosynthetic human insulin: Manufacturing a pharmaceutical peptide

M.W. Riemen

Large-scale peptide synthesis through continuous flow Fmoc-polyamide

V. Caciagli, M.G. Longobardi and A. Pessi

Large-scale pharmaceutical production of eledoisin by HYCRAM technology

C. Birr, G. Becker, H. Nguyen-Trong, T. Müller, M. Schramm, H. Kunz and W. Kosch

Session IX: Viruses and vaccines

Using peptides and peptide sera toward studying the principal neutralization determinant of HIV

Three-dimensional structure of the RNase H domain of HIV-1 reverse transcriptase at 2.4 Å resolution

Contents

RNA binding by the HIV-1 Tat protein
  B.J. Calnan, S. Biancalana, B. Tidor, D. Hudson and A.D. Frankel 685

Amphipathic helical peptides derived from the C-terminus of the HIV
glycoprotein interact with membranes and inhibit virus-induced cell
fusion
  S.K. Srinivas, R.V. Srinivas, R.W. Compans, Y.V. Venkatachalapathi,
  J.P. Segrest and G.M. Anantharamaiah 688

Anti-FeLV synthetic peptide vaccine development
  C. Birr, K. Friebel, W. Heinzl, R. Pipkorn, G. Becker, W. Nader,
  S. Koch, T. Nebe, G. Hunsmann, H. Bayer, J. Klaws, S. Nick, H.
  Bauer, T. Tamura-Niemann, M. Reinacher, D. Schuler-Teebken, G.
  Schuler, W. Hardegg and G. Kuhn 691

M-protein peptides of influenza virus: Application as antiviral agents
  A.K. Judd, A. Sanchez, I. Kharitonenkov, A. Moscona, E. Nasser and
  D.J. Bucher 694

Mapping of the immunodominant B- and T-cell epitopes of the outer
membrane protein P1 of H. influenzae type b using overlapping synthetic
peptides
  P.C.S. Chong, G. Zobrist, Y.-P. Yang, R. Fahim, C. Sia, B. Tripet,
  Y. Choi and M. Klein 697

Enhancement of the immune response to synthetic viral peptides using
the multiple antigenic peptide (MAP) system
  B. Tripet, H.-S. Gao, Y. Choi, M. Klein and P.C.S. Chong 699

The HIV protein gp41 contains a tachykinin-like peptide
  D.E. Wright and H.I. Jacoby 701

Conformational studies on synthetic peptide models of the intersubunit
region of influenza virus hemagglutinin
  M. Hollósi, I. Laczko, L. Otvos Jr., B. Penke, G.D. Fasman, H.H.
  Mantsch and E. Rajnavolgyi 703

Total chemical synthesis of HIV-1 protease using Fmoc/t-butyl pro-
tection strategy
  Craik 705

Evidence for neurotoxic activity of Tat from human immunodeficiency
virus type 1
  J.-M. Sabatier, K. Mabrouk, E. Vives, A. Benjouad, A. Duval, B. Hue,
  H. Rochat, J. Van Rietschoten and E. Bahraoui 707

xlviii
Complementary peptides as inhibitors of HIV-1 protease
P.P. Roller, M. Nomizu, S.W. Snyder, S. Oroszlan and J.B. McMahon

Common conformational features of phylogenetically conserved regions of envelope glycoproteins in HIV-1, HTLV-1 and MuLV
K.-H. Han, P.J. Klasse, J. Blomberg, L. Pipkorn and J.A. Ferretti

Design and synthesis of an intramolecular fluorescent energy-transfer substrate for HIV-1 and HIV-2 proteases
K.C. Lee, S. Sundberg, D.L. DeCamp and C.S. Craik

Comparison of the humoral responses amongst groups of HIV-1-infected chimpanzees and humans directed toward a panel of HIV-1 gp160 synthetic peptides

Totally synthetic retroviral proteins: Proteases and nucleic acid binding proteins
T.D. Copeland, I. Bláha, J. Tözsér and S. Oroszlan

Synthetic and immunological studies of protein p12 from African swine fever virus

P₃ and P₃' substituted analogs of hydroxyethylamine inhibitors of HIV protease

Human and monoclonal recognition of linear epitopes within the hepatitis B core and e antigens assayed by synthetic peptides

HIV-1 protease substrate based on the p17/p24 cleavage site of gag-pol polyprotein: Synthesis and assay
M.S. Deshpande and S.P. Manly

Investigating the stereochemistry of binding to HIV-1 protease with inhibitors containing isomers of 4-amino-3-hydroxy-5-phenyl-pentanoic acid
B.G. Raju and M.S. Deshpande
Contents

Peptide inhibitors of HIV-1 protease containing phenylnorstatine as a transition state element
B.G. Raju

Protein mimetics: Total chemical synthesis of an active HIV-1 protease analog containing a rigid bicyclic $\beta$-turn mimic
M. Baca, A. Jones, C. Dragar, P.F. Alewood and S.B.H. Kent

Synthesis of biotinylated peptides and their application in immunometric immunoassay

The synthesis and conformational studies of T-epitopes from HIV p24

SIV protease: Chemical synthesis and purification by affinity chromatography
C.A. Bannow, A.G. Tomasselli, H.A. Zuricher-Neely, C.W. Smith and R.L. Heinrikson

Structure-activity studies and antiviral properties of hydroxyethylene transition state inhibitors of HIV-1 protease

Antibodies designed to mimic the active site of HIV aspartyl protease
C.-F. Liu, M.-N. Dufour, N. Galeotti, P. Jouin, V. Hanin, J.-C. Mani and B. Pau

Solid phase synthesis and spectroscopic studies of nucleocapsid proteins from MoMuLV and HIV: Characterization of nucleic acid recognition sequences

Session X: Peptide mimetics

Highly potent, orally active, P$_2$-P$_1'$ linked macrocyclic human renin inhibitors
Peptide mimetics of the RGD sequence

Small cyclic RGD containing peptides as potent inhibitors of platelet aggregation

Conformationally constrained analogs of L-prolyl-L-leucylglycinamide

M.J. Genin, U. Sreenivasan and R.L. Johnson

New tryptophan derived CCK antagonists

Potent fibrinogen receptor antagonists bearing conformational constraints

Design and synthesis of novel disulfide mimetics

J.L. Flippen-Anderson and I.L. Karle

Asymmetric synthesis of unusual amino acids designed for topographical control of peptide conformation

Antithrombotic peptides as heparin mimics

L.G. Melton, B.W. Erickson and F.C. Church

CP-96,345: The first nonpeptide substance P antagonist

Utility of cyclic peptides for studying side chain-side chain interactions

M. Rao and A.F. Spatola
Contents

Compatibility studies of $\psi[\text{CH}_2\text{NH}]^\psi/\psi[\text{CH}_2\text{NH}]$ backbone modifications with reverse turn structures
S. Ma and A.F. Spatola

The design and development of PD-134308 (CI-988): A CCK-B 'dipeptoid' antagonist with antianxiety and antigastrin properties
D.C. Horwell, M.C. Pritchard, R.S. Richardson and E. Roberts

Peptidyl epoxides as potent, active site-directed irreversible inhibitors of HIV-1 protease

Session XI: Peptide inhibitors

Cis-trans isomerization of the 9–10 bond in CsA is partially responsible for time-dependent inhibition of cyclophilin by CsA
J.L. Kofron, P. Kuzmić, V. Kishore, S.W. Fesik and D.H. Rich

Novel trifluoromethyl-containing peptides as inhibitors for angiotensin-converting enzyme and enkephalin-aminopeptidase

Development of peptidomimetic inhibitors of a newly isolated atrial peptide-degrading enzyme

Proposed mechanism of interaction of type II cystatins with papain
S. Oldziej, F. Kasprzykowski, L. Łankiewicz, P. Kanta, A. Liwo and Z. Grzonka

Synthesis and anti-elastase activity of amide-cyclized peptide analogs of $\alpha_1$-antitrypsin
A. Crivici and G. Lajoie

Analogs of growth inhibitors of hemopoietic and epidermal cells
A. Balázs, I. Schön, T. Szirtes and L. Kisfaludy

Prevention of reocclusion by a thrombin inhibitor (LY282056)
A series of highly selective thrombin inhibitors 801

The rational design of peptide serine protease inhibitors 803
K.S. Wibley, S. Bansal and D.J. Barlow

Synthetic bifunctional thrombin inhibitors: Linker design 806
Z. Szewczuk, S.-Y. Yue and Y. Konishi

Design and synthesis of a specific endothelin-1 antagonist 808
M.J. Spinella, J. Everitt, A.B. Malik and T.T. Andersen

The inhibition of fibrin stimulated t-PA-induced plasminogen activation by the A chain fragment 149–157 of urokinase 810
J. Liu, A. Song, D. Zhu and V. Gurewich

Endothelin antagonistic cyclic pentapeptides with high selectivity for ETA receptor 812

Homologation of the P1' site of hirutonins: A new prototype of thrombin inhibitors 814
J. DiMaio, B. Gibbs, Y. Konishi, J. Lefebvre and D. Munn

Design and synthesis of conformationally restricted renin inhibitors 816
C.E. Brotherton-Pleiss, S.R. Newman, L.D. Waterbury and M.S. Schwartzberg

Synthesis of 5-fluoroproline derivatives 818
J.R. Kagel, J.L. Kofron and D.H. Rich

Peptide inhibitors of matrix metalloproteases 820

Syntheses of substrate-related peptidyl phosphonate diphenyl esters as a new type of thrombin inhibitors 822
L. Cheng, C. Goodwin, M.F. Scully, V.V. Kakkar and G. Claeson
### Contents

**Novel peptide mimetics as highly efficient inhibitors of thrombin based on modified \( \text{D}-\text{Phe-Pro-Arg} \) sequences**  
G. Claeson, L. Cheng, N. Chino, J. Deadman, S. Elgendy, V.V. Kakkar, M.F. Scully, M. Philipp, R. Lundin and C. Mattson  
824

**Session XII: Immunology**

Peptides and proteins act as bridges between the immune and the endocrine systems  
C. Rivier, J.E. Rivier, S. Rivest and W. Vale  
829

Sequence motifs of peptides eluted from MHC molecules are allele specific  
832

Possible processing of exogenously added synthetic peptide by cells serving as targets for a cytotoxic T lymphocyte response  
T.J. Tsomides and H.N. Eisen  
835

Regulation of immune responses by peptides of T-cell receptor variable region  
D. MacNeil, E. Fraga and B. Singh  
839

Synthetic vaccines: The mixotope strategy  
H. Gras-Masse, J.-C. Ameisen, C. Boutillon, F. Rouaix, M. Bossus, B. Deprez, A. Capron and A. Tartar  
842

Complete synthetic vaccine with built-in adjuvant  
J.-P. Defoort, B. Nardelli, W. Huang, D.R. Shiu and J.P. Tam  
845

Synthetic vaccine mimetic  
W. Huang, B. Nardelli, D.R. Shiu and J.P. Tam  
847

Synthesis and characterization of immunoglobulin variable region heavy and light chain fragments  
L.M. Martin and R.B. Merrifield  
849

Synthetic peptides as model substrates for the study of site-specificity of a truncated v-\( \text{abl} \)-derived tyrosine kinase  
P. Ruzza, A. Calderan, F. Marchiori, A.D. Deana, L.A. Pinna and G. Borin  
851
Synthetic peptides of intercellular adhesion molecule-1
C.F. Hassman, L. Ross, L. Molony and J.M. Berman

Helical stability as a means of predicting peptide T-cell epitopes
J.L. Nauss, R.H. Reid and E.C. Boedeker

Cytotoxic T-lymphocyte serine proteases: Substrate and inhibitor studies with granzymes A and B, and human Q31 chymase
S. Odake, C.-M. Kam, M. Poe, J. Tschopp and J.C. Powers

Inhibition of human leukocyte elastase (HLE) by disulfide-cyclized analogs of α-antitrypsin (αAT)
J.G. Adamson and G. Lajoie

Specific binding of a major T-cell epitope of mycobacteria to HLA-DR3 molecules
A. Geluk, W. Bloemhoff, R.R.P. de Vries and T.H.M. Ottenhoff

Haptenic conjugates of peptides and proteins: A comparative study of immunogenicity
T. Schneider, Z. Zhao and C.H. Schneider

Characterization of keyhole limpet hemocyanin cleavage fragments which contain an inducer of T-helper cell proliferation
T. Taylor and P. Kanda

Comparison of structural and functional approaches for the study of peptide-mAb interactions
C. Pinilla, J.R. Appel, S.E. McPherson and R.A. Houghten

Small peptide haptens in ELISA: A method for hapten immobilization and improved sensitivity
P. Dagenais and E. Escher

Immunosuppressive activity of cyclolinopeptide A analogs

Synthesis and characterization of novel antigen-specific immunosuppressive agents and their utilization in the (NZB X NZW)F1 murine model of systemic lupus erythematosus
J.K. Blodgett, C.M. Coeshott, E.F. Roper, C. Ohnemus, L.G. Allen, B.L. Kotzin and J.C. Cheronis
Contents

Enhanced binding of peptide to HLA-DR1 by point substitution 875

Studies on the role of antigen processing in T cell determinant selection and hierarchy 877
  K.P. Williams, D.B. Kassel and J.A. Smith

Proteolysis of acute phase proteins: Implication to the anti-inflammatory response 879
  O. Rosen, P. Landsmann, M. Pras, D. Levartowsky, M. Pontet, E.G. Shephard and M. Fridkin

Effect of O-glycosylation on the bioactivity of tuftsin 881
  R. Rocchi, L. Biondi, F. Filira, E. Tzehoval and M. Fridkin

Immunogenicity and antigenicity of a promiscuous T-cell epitope and a topographic B-cell determinant of the protein antigen LDH-C4 883

Multivalent B- and T-cell epitope vaccine design 886
  S.F. Kobs-Conrad, A. Gerdau and P.T.P. Kaumaya

Antigenicity of lysozyme/T-cell epitope conjugates 889
  J.-P.Y. Scheerlinck, A. Michel and P. De Baetselier

Comparison of peptide and protein substrates for interleukin-1β convertase 891

Multiple antigen peptide (MAP) system: Detailed study of immunogenic and antigenic properties 893
  J.P. Briand, C. Barin, M.H.V. Van Regenmortel and S. Muller

Theoretical and experimental epitope mapping of thymosin β4 895
  W. Voelter, F.P. Armbruster, A. Kapurniotu, E. Livaniou, M. Mihelić and C. Perrei

Session XIII: New biologically active peptides

Structure-activity relationships of the Saccharomyces cerevisiae α-mating factor 899
  C.-B. Xue, S. Marcus, G.A. Caldwell, D. Miller, J.M. Becker and F. Naider

lvi
A novel calciotropic hormone, parathyroid hormone-related protein, biology and structure/function studies
M.P. Caulfield, R.L. McKee, S.W. Gibbons, J.J. Levy, R.F. Nutt and M. Rosenblatt

Purification, characterization, synthesis and cDNA cloning of indoliciдин: A tryptophan-rich microbicidal tridecapeptide from neutrophils
M.E. Selsted, J.N. Levy, R.J. Van Abel, J.S. Cullor, R.J. Bontems and G. Barany

Synthesis and characterization of tick anticoagulant peptide

Solution synthesis and disulfide structure determination of rat cytokine-induced neutrophil chemoattractant, a member of the interleukin-8 family

Development of novel, highly selective fibrinogen receptor antagonists as potentially useful antithrombotic agents

Study of a parallel bis-cysteine peptide as a potential ionophore
C. Garcia-Echeverría, F. Albericio, M. Pons and E. Giralt

Nα-acyl analogs of didemnin A
B. Kundu, G.R. Wilson and K.L. Rinehart

Ring expansion leads to enhanced potency in small atrial natriuretic peptide (ANP) analogs

A protein kinase C substrate peptide derived from MARCKS protein
R.E. Williams, B.R. Chakravarthy, M. Sikorska, J.F. Whitfield and J.P. Durkin
Contents

Synthetic laminin-like peptides and pseudopeptides as potential anti-metastatic agents
   M. Mokotoff, M. Zhao and H.K. Kleinman 925

Synthetic studies on mosquito oostatic hormone
   J. Kochansky 927

Granulins: A new family of peptides from inflammatory cells
   A. Bateman, R.G.E. Palfree and V. Bhandari 929

Synthesis and biological activity of peptide analogs of Bordetella pertussis
   tracheal cytotoxin
   K.M. Erwin, J.L. Collier, G.R. Marshall and W.E. Goldman 931

Tetrapeptides compete with p21ras for farnesylation catalyzed by protein
   farnesyltransferase
   S.J. Stradley, Y. Reiss, M.S. Brown, J.L. Goldstein and L.M. Gierasch 933

Truncated analogs of the α-factor of Saccharomyces cerevisiae synergize
   the activity of the native pheromone
   E. Eriotou-Bargiota, J.M. Becker, C.-B. Xue and F. Naider 935

Two new neurohypophysial hormones, asvatocin and phasvatocin:
   Evolutionary duplication of the oxytocin-like peptide in dogfishes
   R. Acher, J. Chauvet, M.T. Chauvet and Y. Rouillé 937

Total screening of bovine brain and bone marrow extracts for active
   peptides
