CONTENTS

Opening speech
  King Carl XVI Gustaf of Sweden xvii

Opening address to Rockstore 77 Exhibition
  Staffan Burenstam Linder xix

Foreword
  Magnus Bergman xx

SESSION 1. Demand for Subsurface Storage

Introduction
  G. Harthbraeus 3

The identification and preliminary design of existing mines for the U.S. Strategic Petroleum Reserve Program
  R. L. Davies and D. C. Willett, USA 19

Underground hydrocarbon storage
  S. Hirakawa, Japan 25

Past and present use of underground openings excavated in volcanic tuffs at Cappadocia area
  A. K. Erguvanli and A. E. Yuzer, Turkey 31

Potential for deep underground storage in Canada
  F. Simpson, Canada 37

The building proprietor's experience in designing and construction of rock store plants for petroleum products
  A. Tauson, H. Rockstrom and L. Johansson, Sweden 43

Assessing the economics of underground gas-storage
  F. Moavenzadeh, N. J. Markow and K. S. Chew, USA 49

Feasibility of underground storage plants in metropolitan areas—a study of important economic factors
  S-O Nilsson, Sweden 57

Thermal energy storage in large underground systems and buildings
  T. P. Bligh, USA 63

Energy economy in rock stores. A study of heat requirement in air conditioned stores, freestanding and in rock caverns
  N. Dftrn, Norway 73

Storage of additional heat in the use of the heat pump
  R. Cedarberg, R. Lindskog, K. Lindqvist and T. Tarandi, Sweden 79
Contents

Site reservation policies for large underground openings 83
P. Duffaut, France

Favorable bedrock formations for deep, man-made caverns in New England (USA) 89
O. C. Farquhar, USA

Underground storage in sewerage systems 95
E. Isagard, Sweden

Storage—a part of the physical distribution 101
L. Magnusson, Sweden

A systems concept of space utilization in Gulf Coast salt domes 105
J. D. Martinez and R. L. Thomas, USA

Problems and method of investigation for large-scale excavation in rocks 111
S. Ohya and T. Takahashi, Japan

Siting potential for compressed air and underground pumped hydro energy storage facilities in the United States 117
M. Walia and D. R. Mccreath, USA

Cavern storage: A client's viewpoint 125
L. S. Wills and W. J. Rigden, England

Introduction to discussion 131
B. Jansson

Economic considerations in the selection of sites for strategic petroleum reserve 135
R. L. Davies

Discussion 137

Summary of ITA session 138
H. C. Fischer

Conclusion 139
B. Jansson

SESSION 2. Experience in Use of Subsurface Storage

Introductory Address 143
N. G. Danielsson

Crude oil storage in rock caverns 145
S. Ullgren, Sweden

Storage of heavy fuel oil in rock caverns during three decades 149
S. H. Moberg, Sweden

Rock cavern plants for storage of motor gasoline and light fuel oils—experiences from 20 years of operation 157
F. Nolsttter and H. Rockstrom, Sweden

Experience from cold storage plant in rock cavern 163
T. F. Barbo and P. Bollingmo, Norway
Kansas City's use of limestone mines for business, industry and storage
T. P. Stauffer, Sr., USA

"Untertage-Deponie Herfa-Neurode", hazardous wastes emplacement in mined openings—4 years experience in the disposal of special industrial wastes in a mined-out section of a potashmine in the Werra-Basin (Summary)
G. Johnsson, Federal Republic of Germany

Underground storage for military purposes, experience and development
H. Brunk, Federal Republic of Germany

Experience of designing and construction of military facilities in rock
W. von Essen, T. Hahn and J. Holmgren, Sweden

Environmental protection, monitoring and operation at the May-sur-Orne underground oil storage facility
V. Maury, France

Lightning and stray current protection for rock storage facilities
O. Fredholm and S. Lindquist, Sweden

A review of Norwegian rock caverns storing oil products or gas under high pressure or low temperature
R. Lien and F. Løfset, Norway

Discussion

Appendix A

Appendix B
