# TABLE OF CONTENTS

## PREFACE

## QUANTUM MEASUREMENTS

- Quantum mechanics of macroscopic systems and measurement processes
  M. Namiki

- The haunted measurement in quantum theory
  D. M. Greenberger and A. YaSin

- A quantum-statistical model of quantum measurement
  K.-E. Eriksson

- Potential and real states in quantum mechanics
  E. I. Bitsakis

- Wave function collapse in the ensemble interpretation
  P. T. Landsberg and D. Home

- Nonlinear models for quantum-mechanical measurements
  S. Bergia and F. Cannata

- Meaning and measurability of nonlocal quantum states
  L. Vaidman

## NEW DEVELOPMENTS OF QUANTUM THEORY

- The mathematical expression of the uncertainty principle
  J. Hilgevoord and J. B. M. Uffink

- Quantization of Hamiltonian theories based on a probability operator
  E. E. Entralgo, V. V. Kuryshkin and Yu. I. Zaparovanny

- Classical to quantum: A generalized phase transition
  Y. Ne'eman

</table>
Locality, causality, quantum events, and all that
P. Jasselette 295

The Einstein-Bohr debate: I. The background
A. Avramesco 299

Contingency and lawfulness: Conditions for encounter
J. Fennema 309

EPR PARADOX: CRITICAL EXAMINATIONS

Towards a realist theory of measurement
T. W. Marshall 325

The tacit postulate on single events and the comparison
of classical and quantum spin correlation experiments
A. O. Barut 341

Weak realism for pairs of correlated systems
F. Selleri 347

Comments on EPR, locality and reality
S. Welin 363

The EPR and the proposal of action at a distance
O. Piccioni and W. Mehlhop 375

The description of separated systems and quantum
mechanics and a possible explanation for the
probabilities of quantum mechanics
D. Aerts 391

Against dualism: An observation concerning
non-locality
D. Bedford 409

Bell's theorem: A note on locality
K. R. Popper 413

EPR paradox considered as a criticism of the state-
vector reduction in the quantum mechanical
description of correlated separated systems
W. De Baere 419

EPR and the strange nature of the quantum state or
why I can live with EPR
J. Rosen 431

Why the EPR paradox has been resolved in favor
of Einstein
J. P. Wesley 435
Probability and the way out of the great quantum muddle
T. A. Brody 443

Where lies the mistake in the Clauser and Horne proof of Bell's theorem?
T. D. Angelidis 457
