**MATERIALS SCIENCE
FOR
HIGH TECHNOLOGIES
MASHTEC '90 II**

Proceedings of the International Symposium
held in Dresden, German Democratic Republic
April 24-27, 1990

Edited by

**J. Barthel, W. Pompe, H. Eschrig, M. Weihnacht,
G. Lehmann, J. Schneider and H. Hermann**

Central Institute of Solid State Physics
and Materials Research, Dresden
Academy of Sciences of the GDR

UNIVERSITÄTSBIBLIOTHEK
HANNOVER
TECHNISCHE
INFORMATIONSBIBLIOTHEK

**TRANS TECH PUBLICATIONS
Switzerland - Germany - UK - USA**

Thermodynamical Calculation of the High-Signal Electrostriction	387
J. v. Cieminsky	
Finite Element Modelling of Piezoelectric Composites - Dynamic Behaviour	389
R. Braune, H. Beige and G. Helke	
Metastable States in Ferroelectrics	391
B.N. Prasolov, V.V. Gorbatenko and S.A. Gridnev	
Energetic Crystal Chemistry of Mixed Crystals with the Perovskite-Type Structure	393
N.V. Dergunova	
Condition of Isomorphism in Complex Oxides with Perovskite-Type Structure	395
N.V. Dergunova and G.A. Geguzina	
Monte-Carlo Simulation of Vacancy-Impurity-Pairs (VIP) Migration in Dilute Metallic Alloys	397
B. Fritzsche and A. Zehe	
Modelling of ZnSe CVD	399
P.L. Croupkin	
Modelling of Dielectric Properties of Ceramic Multiphase Materials for MLC's	401
A. Schoenecker, H.-J. Gesemann and M. Weihnacht	

C. HIGHLY CONDUCTING POLYMERS

C1. ELECTRONIC PROPERTIES

Evaluation of Conjugated Polymers as Materials for Molecular Electronics (Invited)	403
S. Roth	
Electronic Structure of Conjugated Polymers (Invited)	407
G. Lehmann	
New Aspects in the Redox Chemistry of Conjugated Polymers (Invited)	411
H.-H. Hoerhold, M. Helbig, D. Weiss and D. Raabe	
Laser Induced Electrical Conductivity in Poly (Bis-Alkylthio-Acetylenes) (Invited)	419
H.-K. Roth, H. Gruber and E. Fanghaenel	
Conducting Polymer Composites (Invited)	423
M. Kryszewski	
Ladder Polymers with Intrinsic High Conductivity (Invited)	427
L. Wuckel and J. Froehner	
Optical Properties of the Soliton Lattice for Polyacetylene	431
H. Puff and H.W. Streitwolf	
On the Theory of Highly Conducting Polyacetylene	433
G. Paasch, G. Lehmann and L. Wuckel	
A Simple Approach for Describing the Optical Properties of Conjugated Polymers	435
H. Hartmann and K. Linsenbarth	
Study of Spin-Lattice and Spin-Spin Relaxation Times in Crystalline Polyacetylene and in Polyenes	437
A.N. Chuvyrov, L.A. Kosykh and G.I. Yusupova	
Investigation of Organic Magnetics Obtained on the Basis of Crystalline Polyacetylene	439
A.N. Chuvyrov, L.A. Kosykh and Y.A. Lebedev	
Generation of Localized Electronic States in Individual Polyenes	441
A.N. Chuvyrov and G.I. Yusupova	

Preparation of Long Conjugated Polyenes by Chemical Dehydrochlorination of PVC

A. Hollaender, H. Zimmermann and J. Behnisch 443

Charge Transfer in New Electroactive Polymers - Polyphthalidilidenarylenes

O. Selezneva and A. Lachinov 445

Electronic Instability in Polydiphenylenephthalide

A. Zherebov, A. Lachinov and O. Scaldin 447

A New Highly Conductive State of Polydiphenylenephthalide

A. Lachinov and A. Zherebov 449

Studies on Materials with Poly-Peri-Naphtalene Structure

M. Schwarzenberg, A. Bartl, J. Froehner and L. Wuckel 451

XPS and EELS Study of Thermally Structurated Polyacrylonitrile

Yu.M. Shul'ga, K. Jobst, L. Sawtschenko, A.F. Zueva and O.N. Efimov 453

Interpretation of Impedance Spectroscopic Data for Thermally Structurized Polymers

G. Paasch, M. Schwarzenberg, K. Jobst and L. Sawtschenko 455

Characterization of Thermally Structurized Polyacrylonitrile by Electrochemical Impedance Spectroscopy, dc Conductivity and ESCA Measurements

M. Schwarzenberg, K. Jobst, L. Sawtschenko and G. Paasch 457

Highly Conducting Pyrocarbon Fibres and Microreliefs from Film Forming PPV Derivatives

D. Raabe, U. Scherf, J. Opfermann, E.-B. Kley and H.-H. Hoerhold 459

C2. ELECTRO-CHEMICAL PROPERTIES

Preparation and Electrochemical Properties of Conjugated Polymers (Invited)

O.N. Efimov 463

Thermally Structured Polymers: Synthesis, Characterization and Electrochemical Properties (Invited)

K. Jobst, L. Sawtschenko and M. Schwarzenberg 467

Electrochemical and "In-Situ" FTIR Characterization of Polypyrroles

P. Novák and W. Vielstich 471

Electrochemical and In-Situ EPR Studies on a Conjugated Material with Polyacenic Structures

M. Schwarzenberg, A. Bartl, J. Froehner and L. Wuckel 473

Charge Storage in Conjugated Organic Compounds

H.-G. Doege, A. Bartl, J. Foehner and G. Domschke 475

Investigation of Poly-(p-Phenylene) Obtained in Electrochemical Oxidation of Benzene in the BuPyCl-AlCl₃ Melt

L.M. Goldenberg, A.E. Pelek, V.I. Krinichnyi, O.S. Roshupkina,
A.F. Zueva, R.N. Lyubovskaya and O.N. Efimov 477

Molecular Dynamics and Decomposition of the Ion-Radical Salt

Poly-(p-Phenylene).BF₄

V.G. Shteinberg, B.A. Shumm, A.F. Zueva, L.N. Erofeev and O.N. Efimov 479

Electrochemical Doping of Conjugated Polymer Powders Assisted by Redox Mediators

A.F. Zueva, Yu.V. Geletii, V.N. Tsarev, O.N. Efimov, A.P. Zuev and
E.P. Krinichnaya 481

Electrochemical Studies of Thermally Structurized PAN

L. Sawtschenko, K. Jobst, M. Schwarzenberg, H. Eichler and A. Zueva 483

Conducting Polymers as the Additives to the Positive Electrode of Lead-Acid Battery	
B.Z. Lubentsov, Ya.H. Samovarov, G.I. Zvereva and M.L. Khidekel	485
Electrochemical Characteristics of Lead-Acid Battery Using Conducting Polymers as the Additives to the Positive Electrode	
B.Z. Lubentsov, G.I. Zvereva, V.E. Dmitrienko and M.L. Khidekel	487
Practical Application of Thermally Structurized Polyacrylonitrile	
K. Jobst, L. Sawtschenko, M. Schwarzenberg L. Wuckel, E. Brackmann, R. Wolf and D. Fehrmann	489

C3. MISCELLANEOUS

A New Class of Organic High-Spin Polymers (Invited)	
N. Tyutyulkov, S. Karabunarliev, C.I. Ivanov and I. Kanev	491
Inorganic Superconductors from Metal Salt-Containing Organic Polymers: Polymeric Amphiphiles as Precursors for Ceramic Thin Films and Hollow Fibers (Invited)	
I. Cabrera, J. Effing, H. Ringsdorf, J.C.W. Chien, B.M.Gong and Y. Yang	495
Poly(Phenylene Amine Imine)s: Thermochemical Synthesis and Study	
Ya. A. Letuchy, E.I. Mirotvortseva, A.N. Mikhailova and V.M. Geskin	497
Extended Pi-Systems - Synthetic Strategy and Realization (Invited)	
A.-D. Schlueter	499
Interaction of Composites Based on Conducting Polymers with Gases	
O. Timofeeva, B. Lubentsov and M. Khidekel	501
Investigation of Microporosity of Thermo-Structured Conducting Polymers (PAN)	
H. Eichler	503
Application of Scanning Acoustic Microscopy for Research and Technology of New Polymer Composite Material	
N.S. Enikolopian and E.Yu. Maeva	505
Synthesis and Crystal Structure of Ion-Radical Salt (BEDT-TTF)₂CdI₃	
E.I. Zhilyaeva, R.N. Lyubovskaya, O.A. Dyachenko, V.V. Gritsenko and S.V. Konovalikhin	507
Organic Bis(Ethylenedithio)tetrathiafulvalene-Based Conductors and Superconductors with Halide-Mercurate Anions, ET₄[Hg_{3-y}X₈]	
R.N. Lyubovskaya, O.A. Dyachenko and R.B. Lyubovskii	509
Study of Conformational Stability of Polyacetylene Films by Infrared Spectroscopy	
O.S. Roshchupkina, G.I. Kozub and L.I. Tkachenko	511
Conducting Cation-Radical Salts BEDT-TTF with Metal Complex Anions	
N.D. Kushch, A.A. Ignatiev, V.N. Laukhin, M.K. Makova, V.A. Merzhanov, L.P. Rozenberg, V.E. Korotkov, R.P. Shivaeva and E.B. Yagubskii	513

D. MAGNETIC MATERIALS

D1. SOFT-MAGNETIC METALLIC AND NON-METALLIC MATERIALS

New Nanocrystalline Soft-Magnetic Materials (Invited)	
H.R. Hilzinger	515
Two Magnetic Phases within the Amorphous State and their Effect on Low	

Field Magnetic Properties of the Amorphous $\text{Co}_{72.8}\text{Fe}_{5.2}\text{Si}_{11}\text{B}_{11}$ Ribbon	521
S. Szymura and J. Swierczek	
Mössbauer Spectroscopy of Amorphous and Nanocrystalline $\text{Fe}_{73.5}\text{Cu}_1\text{Nb}_3\text{Si}_{16.5}\text{B}_6$	523
Z. Zemčík, Y. Jirásková, K. Záveta, D. Eckert, J. Schneider and N. Mattern	
Magnetic Aftereffect in Amorphous and Nanocrystalline $\text{Fe}_{73.5}\text{Cu}_1\text{Nb}_3\text{Si}_{16.5}\text{B}_6$	525
K. Záveta, K. Jurek, J. Schneider, R. Hesske and L. Illgen	
Influence of Lanthanum Oxide Additives on Microstructure and Magnetic Properties of Ba-Ferrite	527
V. Vasiljev, L. Tulchinsky and G. Yaglo	
Structure and Magnetic Inhomogeneities in Ba-Sr Ferrites	529
V. Vasiljev, G. Yaglo, E. Tkalenko, V. Mishalov and L. Korotkova	
Controlled Discontinuous Grain Growth - a Possible Way to Mn-Zn-Ferrite Single Crystals -	531
G. Schnitt, H. Boerner, H.-C. Semmelhack, S. Muenschow and W. Warsitzka	
The Influence of the Complex Conductivity Relaxation on the Dispersion of the Complex Permeability in Mn-Zn-Ferrites	533
G. Dietzmann and M. Schaefer	
Induction of Ferromagnetism in Amorphous Films CdCr_2Se_4 and $\text{CdGeAs}_2\text{:Fe}$	535
I.F. Gribanov, V.D. Okunev and Z.A. Samoilenko	
Study on Ion-Implanted Amorphous FeCrSiB Ribbons	537
G. Serfözö, Cs. Daróczi, L.F. Kiss, E. Kisdi-Koszó and A. Slawska-Waniewska	
Jet Velocity - Coefficient of a Melt Fe-Si-B Flowing out through a Circular Nozzle	539
V. Anchev, Chr. Kondov and L. Karaivanov	

D2. HARD MAGNETS AND MATERIALS FOR MAGNETIC RECORDING

Development and Current Status of Rare Earth Magnets and Bonded Magnets in Japan (Invited)	541
M. Okada and M. Homma	
Magnetic Materials and Exchange Coupled Layer Structures for Magneto-Optic Information Storage (Invited)	547
D. Mergel, P. Hansen and S. Klahn	
Rare-Earth-Transition Metal Boron Based Alloys for Technical Applications (Invited)	553
E. Burzo	
Permanent Magnets Prepared by Hot-Working (Invited)	557
J.P. Nozieres	
Analysis of the Hardening Mechanisms in Sintered and Spin-Quenched Fe-Nd-B-Type Permanent Magnets (Invited)	563
G. Martinek, M. Groenefeld and H. Kronmueller	
Magnetic Pigments and Magnetic Thin Films for Recording Information (Invited)	567
H. Hibst and E. Schwab	
Barium Ferrites for Magnetic Recording Media (Invited)	573
P. Goernert, E. Sinn and M. Roesler	
Magnetization Processes in NdFeB Magnets (Invited)	577
V. Christoph, K.-H. Mueller, L. Jahn and K. Elk	

Superplasticity of the Fe-30% Cr-27% Co Alloy	
A.V. Korznikov and R.Z. Valiev	581
X-Ray Investigation of the Microstructure of the Alloy MnAlC	
I.A. Malinenko, S.A. Chudinova and A.D. Fofanov	583
Influence of the Epsilon-Phase Grain Size in the Mn-Al-C System Alloys on Structure and Properties	
A.Kh. Nurislamov and O.A. Kaibyshev	585
The Effect of Hot Straining on the Microstructure and Magnetic Properties of Cast and Rapidly Quenched Fe-Nd-B Alloy	
V.V. Stolyarov and R.Z. Valiev	587
Magnetization Curves of Rare Earth Based Permanent Magnets	
K.-H. Mueller, D. Eckert, A. Handstein, J. Schneider and U. Heinecke	589
Grain Size Distribution and Coercivity of Sintered NdFeB Permanent Magnets	
P. Nothnagel, K.-H. Mueller and D. Eckert	591
Thermal Remagnetization in Nd₂Fe₁₄B Based Permanent Magnets	
D. Eckert, A. Handstein and K.-H. Mueller	593
Microstructure and Magnetic Properties of Nd₂Fe₁₄B Based Permanent Magnets	
A. Handstein, K.-H. Mueller, D. Eckert, P. Nothnagel and J. Schneider	595
Coercivity of CrO₂ Powder as a Function of Particle Size	
M. Osmolowsky, I. Zvereva, L. Ivanova and A. Petrov	597
Substrate, Underlayer and Magnetic Recording Medium of Metal Thin Film Disk, Structure and Properties	
E.D. Politova and A.V. Firsov	599
Experimental Studies of Sputtered Thin Film Disk with CoNiCr Magnetic Layer and Cr Underlayer	
A.K. Andriatis, L.I. Kosse, A.M. Muraviev and A.A. Faktorovich	601
Uniform-Size Ba-Ferrite Particles for Magnetic Media	
V.V. Pankov	603
The Multilayer Systems for Magneto-Optical Information Recording	
V.G. Kutilin, Yu.A. Lisovsky, I.G. Nikulov, A.M. Umpelev and A.O. Titov	605
A Model for Calculating Metal Thin Film Disks Magnetic Recording Media Parameters According to Experimental Hysteresis Loops	
N.P. Vasilyeva, S.I. Kasatkin and L.I. Kosse	607
Magnetic Behaviour of Iron in R₂Fe₁₄B Based Compounds	
N. Plugaru and E. Burzo	609
Magnetic Properties of RCo_{4-x}M_xB Compounds where M = Fe or Ni and R is a Rare Earth	
E. Burzo, V. Pop and N. Plugaru	611
Magnetization Process in Perpendicular Magnetic Recording Films with Columnar Structure	
I.G. Nikulov, Yu.A. Lisovsky, V.L. Stolyarov, V.G. Kutilin and P.V. Zhorin	613

D3. FUNDAMENTALS OF MAGNETISM AND MAGNETIZATION PROCESSES

Magnetostriction in Amorphous Magnetic Alloys (Invited)	
H. Szymczak	615
Slow Domain Wall Motion and Magnetic Domain Structure in Amorphous TbFe Films	
T.G. Pokhil, B.S. Vvedensky and E.N. Nikolaev	619

Magnetic Properties in Relation to Vacancy Ordering and Distribution of Aluminium Ions in Disordered Gamma-(FeAl) $2O_3$	
E. Wolska	621
Influence of Unidimensional Inhomogeneity of Magnetic Anisotropy Constant on Characteristics of Domain Walls in Ferromagnetics	
M.A. Shamsutdinov, M.M. Farztdinov, V.G. Veselago and E.G. Ekomasov	623
Static and Dynamic Properties of Domain Walls in Crystals with Combined Anisotropy	
R.M. Sabitov and R.M. Vakhitov	625
Magnetic Hysteretic Properties of Pure Ferromagnetics with Submicron Grained Structure	
Kh.Ya. Mulyukov, G.F. Korznikova and R.Z. Valiev	627
Role of Magnetostriction in Forming Domain Structure in Ferromagnetics	
M.A. Shamsutdinov, A.A. Khalfina and M.M. Farztdinov	629
Magnetostriction in Amorphous $Co_{91.5-x}Zr_{8.8}Pt_x$ Thin Films	
R. Zuberek, H. Szymczak, G. Suran and M. Naili	631
Magnetoelastic Properties of Ni/Pb Multilayer Thin Films	
R. Zuberek, H. Szymczak and A. Wawro	633
Magnetic Properties of Iron-Rare Earth Multilayers	
L.T. Baczewski, M. Piecuch, G. Marchal and P. Delcroix	635
Influence of Impurities on Magnetic Transitions in High Purity Rare Earth Metals	
G.S. Burkhanov, L.A. Boyarsky, O.D. Chistyakov and N.B. Kolchugina	637
Study of the Cation Distribution in a Holmium Substituted Magnesium-Manganese Ferrite	
K. Krezhov and I. Nedkov	639
Relaxation Phenomena and Magnetic Phase Transitions AF-F in Magnetic Systems $Mn_{2-x}M_xSb$ ($M = Cr, Cu, Zn, Ti$)	
N.D. Zhigadlo	643
Field-Induced Instability of Magnetic Long-Range Order in Antiferromagnets with Random Anisotropy	
J. Richter, R. Skomski and K. Retzlaff	645
The Calculation of the Electronic Structure and Fermi Surface of the Antiferromagnetic Phase NiMn by the Linear Muffin-Tin Orbital Method	
V.E. Egorushkin, V.V. Kalchikhin, S.E. Kulkova and O.V. Boev	647
SDP-Method: Influence of Misorientation and Texture	
R. Scholl, K. Elk, D. Eckert and L. Jahn	649
Calculated Magnetization Curves of Multiphase Permanent Magnets	
K.-H. Mueller and V. Christoph	653

E. STOCHASTIC MODELS IN MATERIALS SCIENCE

E1. MODELS AND SIMULATION OF STOCHASTIC STRUCTURES

Stochastic Geometry and its Applications in Materials Science (Invited)	
D. Stoyan	655
Monte-Carlo Simulation of Precipitation Phenomena (Invited)	
R. Schmidt	659
Random Spherical Contacts: An Approach to the Characterization of Spatial Arrangement of Particles	
I. Saxl, K. Pelikán and M. Besterci	663
Topological Based Structures in Material Science	
B. Mueller	665

Simulation of the Structure and Properties of High-Tech Materials Using the "Structure" Program Package	
V.L. Prilepo and V.P. Gogolin	667
Distribution of Grain Misorientations in a Model Polycrystal	
V.Yu. Gertsman, A.P. Zhilyaev and A.I. Pshenichnyuk	669
Computer Simulation of Amorphous Carbon Structure Using Spherically - Asymmetric Pair Interaction Potentials	
T.A. Cherepanova, A. Vaivods and H. Hermann	673
Statistical Description of the Interfaces in Condensed Matter	
T.A. Cherepanova and A.V. Stekolnikov	675
Modelling of Thin Film Growth Using Anisotropic Migration	
E. Hacker	677
Stochastic Model of Ionic Polarization Processes in Structure-Irregular Dielectrics	
Yu.S. Skripnikov	679
Histograms of Impurity Distribution Coefficient Values for Solid-Liquid Equilibrium	
V.M. Stepanov and A.R. Fidelmann	681
Formation and Evolution of Fractal Structures upon Interdiffusion	
V.B. Sapozhnikov and M.G. Goldiner	683
Simulation of Random Crack Initiation, Growth, and Coalescence	
T. Winkler, B. Michel and H. Vogt	685
Computer Simulation of the Effect of Crystallographic Texture on Superplastic Flow	
M.G. Zelin and M.V. Aleksandrova	687
Characteristics of Cell-Area Distributions of Planar Voronoi Mosaics	
H. Wendrock and H. Hermann	689

E2. EVOLUTION AND SELF-ORGANIZATION OF STRUCTURES

Microstructural Self-Organization in Crystalline Materials (Invited)	
C. Abromeit and H. Wollenberger	693
A Mesoscopic Theory of Irradiation-Induced Void-Lattice Formation (Invited)	
P. Haehner and W. Frank	697
Structural Development in Growth Processes (Invited)	
W. Pompe, H.-A. Bahr and M. Bobeth	701
Nucleation in Glass-Forming Melts: Recent Results in Anorganic Systems and with Organic Polymers (Invited)	
I. Gutzow and A. Dobrev	707
Theory of Ostwald Ripening for Precipitations with Surface Fractal Dimension	
P. Streitenberger and D. Förster	711
Some Peculiarities of Defect Formation in Scheelite Solid Solutions in $\text{SrMO}_4\text{-Eu}_2(\text{MO}_4)_3$ (M = Mo, W) Systems	
M.B. Vidrevich	715
Defect Structure Evolution Related with Amorphization Processes in Deformed Metals	
I.A. Ovid'ko	717
Dynamic Dragging of Dislocations and Generation of Point Defects in H.C.C. Solids	
L.E. Popov, S.N. Kolupaeva and N.V. Korotaeva	719
Theoretical Investigations on the Evolution of Dislocation Structures in	

Fatigued FCC Single Crystals	
A. Schwab and H.-J. Burmeister	721
Computer Simulation of the Generation of Dislocation Loops by a Frank-Read Source in the Fields of Randomly Situated Obstacles	
L.E. Popov, M.I. Slobodsky and T.N. Golosova	723
On Behaviour of Dislocations in Thin Films	
M.Yu. Gutkin and A.E. Romanov	725
Quantum-Stochastic Modelling of the Inherited Formation of Surface Properties	
M. Anfyorov and A. Rakhmanukulova	727
Computer Simulation of Interface Movement in the Process of Solid-Phase Epitaxy	
A.Ya. Vilenkin, I.P. Boglaev and E.A. Zalem	729
Modelling of Shear and Diffusional Plastic Deformation in Solids	
L.E. Popov, V.A. Starenchenko, S.N. Kolupaeva and T.A. Kovalevskaya	731
Evolution of Crystallization Structures at Constantly Increasing Supersaturation	
A. Dobрева and I. Gutzow	733
Computer Simulation of Primary Recrystallization	
V.Yu. Novikov, E.A. Zalem and I.S. Gavrikov	735
Influence of Nucleation Mechanism on the Evolution of Microstructures During Nucleation and Growth	
B. Lorenz	737
Thin Films of Complex Transition-Element Compounds	
M.Ya. Khodos	739
Simulation of Growth Structure of PVD Thin Films	
J. Musil and J. Prchal	741

E3. STRUCTURE-PROPERTY RELATIONSHIPS

Transport Processes and Chemical Reactions on Fractal Systems (Invited)	
G. Vojta	743
Stochastic Internal Stresses in Heterogeneous Materials (Invited)	
W. Kreher and W. Pompe	747
Structure Models and Some Structure-Property Relationships of Stochastic Microheterogeneous Materials (Invited)	
H. Hermann	751
Microstructure Dependence of Effective Material Constants of Composites	
J. Monecke	755
Violation of the Fluctuation - Dissipation Theorem (FDT) for Specially Prepared Brownian Particles	
K. Handrich	757
Phason Modes Contribution into the Dynamics of Pinned Charge-Density Waves	
I.B. Vendik	759
The Effective Conductivity of Symmetric Multiphase Materials	
K.-H. Mueller	761
Effect of Structure Defects on the Strength of Grained Composite Materials	
N.V. Novikov, A.L. Maistrenko and N.V. Lamashevskaya	763
Attenuation of X-Rays in Stochastic Heterogeneous Materials	
M. Ernrich and H. Hermann	765

Influence of the Intersolubility of Atomic Species on the Curie Temperature of Multilayer Structures	
W. Maciejewski and W. Maciejewska	767
Cluster Formation in an Fe-Si-N Alloy	
B. Beyer, E.-M. Herbst, M. Militzer and J. Wieting	769
Pseudoelastic Hysteresis in a CuZnAl Single Crystal with Shape Memory Effect	
Huibin Xu	771

E4. EXPERIMENTAL INVESTIGATIONS OF STOCHASTIC STRUCTURES

Investigation of Polydisperse, Disordered, and Fractal Systems by Small-Angle X-Ray and Neutron Scattering (Invited)	
P.W. Schmidt, Y. Tang, A. Röhl, M. Steiner, A. Höhr and H.-B. Neumann	775
Laser Generation of Acoustic Waves in Solids with Stochastically Rough Surfaces	
V.V. Krylov	781
Fractals in Irradiated UO₂ Nuclear Fuel Study	
Z. Néda and M. Popov	783
Ion Collision Cascades as Fractals	
B. Rauschenbach	787
Growth of Shape Memory Single Crystals	
H. Xu and S. Tan	789
Structure Evolution During Thin Film Disintegration in Islands	
M.G. Goldiner and V.A. Mazur	793
Rotational Modes of Plasticity in Shock-Induced Structure - Unstable State of Material	
Yu.I. Meshcheryakov, S.A. Atroshenko, V.B. Vasilkov and A.I. Chernyshenko	795
Structural Self-Organization of High-Speed Steels During Electrostimulated Drawing	
V.E. Gromov, L.B. Zuev and S.A. Bashkirova	797
Effect of Ni, Mo, Mn, Si, C on the Mechanical Properties of the Bainitic Spheroidal Graphite Cast Iron	
A.-R.I. Kheder and A.N. Aboud	799
Intensification of Diffusional Mass Transfer in Heterogeneous Fe-Base Powder Materials	
L. Fraimann and E. Zvonaryov	805
Normal Grain Growth in Microcrystalline Thin Films of Ag	
V.G. Sursaeva	807
The Study of Porosity of Anodic Oxide Aluminium Films by the Method of X-Ray Small-Angle Scattering	
V.V. Petrova, N.V. Siromyatina and G.A. Kolesnikova	809
Nonhomogeneous Structure Modeling in Local Analysis	
B.K. Zuev, I.L. Skryabin and L.E. Kordonsky	811
The Influence of Shape, Size and Volume Fraction of Graphite Inclusions on the Propagation of Ultrasound in Cast Iron	
B. Köhler, F. Bergner, B. Bilger and B. Rehmer	815
Electron Microscopic Study of the Distribution of Misorientation Parameters for Grain Boundaries in a Ni-Cr Alloy	
V.Yu. Gertsman, V.N. Danilenko and R.Z. Valiev	817
Electron Spin Resonance Exchange Combinations in Specific Disordered Materials - Application to Study their Microstructure and Technology	
Nguyen Van Tri	819

**OH Diffusion - on the Measurement of Concentration Profiles in Doped
MCVD-Silica Layers Using a Color Center Laser**

G. Braun, J. Kirchhof and P. Kleinert

821
