VOLUME I
CASE-Based Reasoning

CASE-Based Reasoning

Rules and Precedents as Complementary Warrants, L. Karl Branting, University of Wyoming; and Bruce W. Porter, University of Texas at Austin / 3

An Indexing Vocabulary for Case-Based Explanation, David B. Leake, Indiana University / 10

Indexing Stories as Social Advice, Eric A. Domeshek, Institute for Learning Sciences, Northwestern University / 16

Improving Rule-Based Systems Through Case-Based Reasoning, Andrew R. Golding, Stanford University; and Paul S. Rosenbloom, Information Sciences Institute, University of Southern California / 22

Transformation in Design

The Roles of Adaptation in Case-Based Design, Thomas R. Hinrichs and Janet L. Kolodner, Georgia Institute of Technology / 28

Prototype-Based Reasoning: An Integrated Approach to Solving Large Novel Problems, Shankar A. Rajamoney and Hee-Youn Lee, University of Southern California / 34

Communication and Cooperation

Education

Student Modelling with Confluences, Daniel Baril, Jim E. Greer, and Gordon I. McCalla, University of Saskatchewan / 43

FITS: A Fraction Intelligent Tutoring System, Hyacinth S. Nwana, University of Liverpool / 49

Teaching Diagnostic Skills Using AI: An Architecture Suitable for Students and Teachers, Jöël Courtois, Institut Supérieur d'Electronique de Paris and Université PARIS VI / 55
User Interfaces

Making Design Objects Relevant to the Task at Hand, Gerhard Fischer, University of Colorado; and Kumiyo Nakakoji, University of Colorado and Software Research Associates, Inc. / 67

A Tool for Achieving Consensus in Knowledge Representation, Loren G. Terveen, AT&T Bell Laboratories; and David A. Wroblewski, US West Advanced Technologies / 74

Piction: A System That Uses Captions to Label Human Faces in Newspaper Photographs, Rohini K. Srihari, State University of New York at Buffalo / 80

Generation and Interaction

Generating Interactive Explanations, Alison Cawsey, University of Cambridge / 86

Automatic Generation of Formatted Text, Edward H. Hovy and Yigal Arens, USC-Information Sciences Institute / 92

Generating Adjectives to Express the Speaker’s Argumentative Intent, Michael Elhadad, Columbia University / 98

Interpreting Prepositions Physically, J. K. Kalita, University of Colorado; and N. I. Badler, University of Pennsylvania / 105

Syntax and Semantics I

Semantics-First Natural Language Processing, Steven L. Lytinen, The University of Michigan / 111

A Cognitively Plausible Approach to Understanding Complex Syntax, Claire Cardie and Wendy Lehnert, University of Massachusetts / 117

From Syntax to Meaning in Natural Language Processing, Alexander G. Hauptmann, Carnegie Mellon University / 125
Tense Interpretation in the Context of Narrative, Fei Song and Robin Cohen, University of Waterloo / 131

Syntax and Semantics II
ULINK: A Semantics-Driven Approach to Understanding Ungrammatical Input, Jeffrey D. Kirtner and Steven L. Lytinen, The University of Michigan / 137

A Tabular Method for Island-Driven Context-Free Grammar Parsing, Giorgio Satta and Oliviero Stock, Istituto per la Ricerca Scientifica e Tecnologica / 143

High Performance Memory-Based Translation on IXM2 Massively Parallel Associative Memory Processor, Hiroaki Kitano, Carnegie Mellon University and NEC Corporation; and Tetsuya Higuchi, Electrotechnical Laboratory / 149

Disambiguation of Prepositional Phrases in Automatically Labelled Technical Text, Lois Boggess, Rajeev Agarwal, and Ron Davis, Mississippi State University / 155

Formalisms for Coordination
A Probabilistic Model of Plan Recognition, Eugene Charniak, Brown University; and Robert Goldman, Tulane University / 160

The Utility of Communication in Coordinating Intelligent Agents, Piotr J. Gmytrasiewicz, Edmund H. Durfee, and David K. Wehe, University of Michigan / 166

The Clarke Tax as a Consensus Mechanism Among Automated Agents, Ethan Ephrati and Jeffrey S. Rosenschein, Hebrew University / 173

The Function of Time in Cooperative Negotiations, Sarit Kraus, Hebrew University; and Jonathan Wilkenfeld, University of Maryland / 179

Multiagent Architectures
A Dynamic Organizational Architecture for Adaptive Problem Solving, Les Gasser, University of Southern California; Toru Ishida, NTT Communications and Information Processing Laboratories / 185

Sophisticated Cooperation in FA/C Distributed Problem Solving Systems, Norman Carver, Zarko Cvetanovic, and Victor Lesser, University of Massachusetts / 191

Combining Specialized Reasoners and General Purpose Planners: A Case Study, Subbarao Kambhampati, Mark Cutkosky, Marty Tenenbaum, and Soo Hong Lee, Stanford University / 199

Toward an Intelligent Agent Framework for Enterprise Integration, Jeff Y-C Pan and Jay M. Tenenbaum, Enterprise Integration Technologies Corporation and Stanford University / 206
Constraint Reasoning and Component Technologies

Constraint-Based Reasoning

Conditional Existence of Variables in Generalized Constraint Networks, James Bowen and Dennis Bahler, North Carolina State University / 215

Arc-Consistency in Dynamic Constraint Satisfaction Problems, Christian Bessiere, Laboratoire d'Informatique, de Robotique et de Microelectronique de Montpellier / 221

Eliminating Interchangeable Values in Constraint Satisfaction Problems, Eugene C. Freuder, University of New Hampshire / 227

On Generalized Interval Calculi, Gérard Ligozat, LIMSI, Université Paris-Sud / 234

Temporal Constraints

Integrating Metric and Qualitative Temporal Reasoning, Henry A. Kautz, AT&T Bell Laboratories; and Peter B. Ladkin, International Computer Science Institute / 241

Temporal Reasoning During Plan Recognition, Fei Song and Robin Cohen, University of Waterloo / 247

Metric Constraints for Maintaining Appointments: Dates and Repeated Activities, Massimo Poesio, University of Rochester; and Ronald J. Brachman, AT&T Bell Laboratories / 253

Combining Qualitative and Quantitative Constraints in Temporal Reasoning, Itay Meiri, University of California, Los Angeles / 260

Extensions of Truth Maintenance

Efficiency of Production Systems When Coupled with an Assumption Based Truth Maintenance System, Geneviève Morgue and Thomas Chehire, Thomson-CSF/RCC / 268

Using Attention in Belief Revision, Xueming Huang, Gordon I. McCalla, and Eric Neufeld, University of Saskatchewan / 275

CATMS: An ATMS Which Avoids Label Explosions, John W. Collins, University of Illinois; and Dennis DeCoste, Northwestern University / 281

Context Maintenance, Charles J. Petrie, Jr., Microelectronics and Computer Technology Corporation / 288

Parallel Support for Rule-Based Systems

IXM2: A Parallel Associative Processor for Knowledge Processing, Tetsuya Higuchi, Electrotechnical Laboratory; Hiroaki Kitano, Carnegie Mellon University; Tatsumi Furuya, Ken-ichi Handa, Akio Kokubu, Electrotechnical Laboratory; Naoto Takahashi, University of Tsukuba / 296
Implementation of Multiple Rule Firing Production Systems on Hypercube, Steve Kuo and Dan Moldovan, University of Southern California / 304

Control Issues in Parallel Rule-Firing Production Systems, Daniel E. Neiman, University of Massachusetts / 310

Using Abstraction to Automate Program Improvement by Transformation, Ian Green, University of Cambridge / 317

Verification of Rule-Based Systems
Verification of Multi-Level Rule-Based Expert Systems, Pedro Meseguer, C.S.I.C. / 323

Formal Verification of Pure Production System Programs, Rose F. Gamble, Gruia-Catalin Roman, and William E. Ball, Washington University / 329

Learning Meta Knowledge for Database Checking, Jeffrey C. Schlimmer, Carnegie Mellon University / 335

Formal Methods in Knowledge Representation

Time and Action
A Logic of Situated Know-How, Munindar P. Singh, University of Texas / 343

Provably Correct Theories of Action (Preliminary Report), Fangzhen Lin and Yoav Shoham, Stanford University / 349

A Critique of Yoav Shoham's Theory of Causal Reasoning, Antony Galton, University of Exeter / 355

A Logic and Time Nets for Probabilistic Inference, Keiji Kanazawa, Brown University / 360

Nonmonotonic Reasoning I
The P-Systems: A Systematic Classification of Logics of Nonmonotonicity, Wolfgang Nejdl, Technical University of Vienna / 366

Some Variations on Default Logic, Piotr Rychlik, Polish Academy of Sciences / 373

Default Logic, Propositional Logic, and Constraints, Rachel Ben-Eliyahu, University of California, Los Angeles; and Rina Dechter, University of California, Irvine / 379

Strong Introspection, Michael Gelfond, University of Texas at El Paso / 386

Nonmonotonic Reasoning II
Default Reasoning From Statistics, Fahiem Bacchus, University of Waterloo / 392

System-Z+: A Formalism for Reasoning with Variable-Strength Defaults, Moisés Goldszmidt.
and Judea Pearl, University of California, Los Angeles / 399

Incorporating Nonmonotonic Reasoning in Horn Clause Theories, James P. Delgrande, Simon Fraser University / 405

Step-Logic and the Three-Wise-Men Problem, Jennifer J. Elgot-Drapkin, Arizona State University / 412

Issues in Automated Reasoning

General Deduction Systems

Logic Morphisms as a Framework for Backward Transfer of Lemmas and Strategies in Some Modal and Epistemic Logics, Ricardo Caferra, Stephane Demri, and Michel Herment, LIFIA-IMAG / 421

Mechanization of Analytic Reasoning About Sets, Alan F. McMichael, AT&T Bell Laboratories / 427

Search

Depth-First Versus Best-First Search, Nageswara Rao Vempaty, University of Central Florida; Vipin Kumar, University of Minnesota; and Richard E. Korf, University of California, Los Angeles / 434

Optimal Satisficing Tree Searches, Dan Geiger and Jeffrey A. Barnett, Northrop Research and Technology Center / 441

A New Admissible Heuristic for Minimal-Cost Proofs, Eugene Charniak and Saadia Husain, Brown University / 446

Is There any Need for Domain-Dependent Control Information?, Matthew L. Ginsberg and Donald F. Geddis, Stanford University / 452

Terminological Reasoning

Integrating Rules in Term Subsumption Knowledge Representation Servers, Brian R. Gaines, University of Calgary / 458

Deduction as Parsing: Tractable Classification in the KL-ONE Framework, Marc Vilain, The MITRE Corporation / 464

Concept Languages as Query Languages, Maurizio Lenzerini and Andrea Schaerf, Universita di Roma "d’La Sapienza" / 471

Belief Functions

Combining Opinions About the Order of Rule Execution, Jeffrey A. Barnett, Northrop Research and Technology Center / 477

Explanation, Irrelevance, and Statistical Independence, Solomon E. Shimony, Brown University / 482
Conditions for the Existence of Belief Functions Corresponding to Intervals of Belief, John F. Lemmer, *CTA Incorporated*; and Henry E. Kyburg, Jr., *University of Rochester* / 488

**Truth Maintenance Systems**

An Efficient First-Order Horn-Clause Abduction System Based on the ATMS, Hwee Tou Ng and Raymond J. Mooney, *University of Texas at Austin* / 494

ACP: Reason Maintenance and Inference Control for Constraint Propagation Over Intervals, Walter Hamscher, *Price Waterhouse Technology Centre* / 506

Controlling Inequality Reasoning in a TMS-Based Analog Diagnosis System, David Jerald Goldstone, *Massachusetts Institute of Technology and Xerox Palo Alto Research Center* / 512
