Introduction
F. Arendt, M. Hinsenveld & W.J. van den Brink

CONTAMINATED SOILS - RELEVANCE TO AND PERSPECTIVES FOR THE PROTECTION OF THE ENVIRONMENT IN THE INDUSTRIAL SOCIETY
H.W. Thoenes

1. STRATEGIES, POLICIES, LEGAL AND ECONOMIC ASPECTS

1.1 INDUSTRIALIZED COUNTRIES

SOIL PROTECTION POLICY IN THE NETHERLANDS, THE SECOND DECADE
K.W. Keuzenkamp, H.G. von Meijenfeldt & J.M. Roels

THE BILL IS PRESENTED; MOTIVES BEHIND THE RECOVERY OF SOIL CLEAN-UP COSTS IN THE NETHERLANDS
H.G. von Meijenfeldt & E.C.M. Schippers

CONTAMINATED INDUSTRIAL SITES IN THE NETHERLANDS
L.J.J. Gravesteyn

THE PUBLIC NEED OF NEW SOIL PURIFICATION TECHNIQUES
S.H. Brunekreef

SUPERFUND STATUS AND EXPERIENCE - TOWARD FINDING NEW SOLUTIONS TO OLD PROBLEMS
W.W. Kovalick, Jr.

TECHNICAL AND ADMINISTRATIVE BASES FOR THE SANITATION OF CONTAMINATED SITES IN AUSTRIA
K.L. Zirm

AREA OF CONTAMINATED SOIL IN PRATTEN (SWITZERLAND) - CREATION OF METASTASES AND NECESSITY OF A LAND REGISTER OF CONTAMINATED SOILS
D. Winistorfer
Analysis of contaminated soil site inventory methodology on the basis of a pilot survey
T. Assmuth & O. Lääperi 43

Reclamation strategies and programs for contaminated sites in Italy
W. Ganapini, F. Perghem & A. Milani 53

Contribution to the Workshop 'Contaminated Industrial Sites'
R. Goubier 59

Contaminated industrial sites - Statement
G. Zimmermeyer 61

Contaminated industrial sites
E.F. Thairs 63

Expert model for calculation of soil sanitation costs - early insight in time and costs involved
L.N.J.M. van der Drift 65

A new approach to soil pollution control in the Rotterdam 'Europoort-Botlek' industrial area
W. Visser & F. Rodewijk 73

Soil sanitation of industrial sites: cluster concept and consensus
F.H. Mischgofsky, F.A. Weststrate & W. Visser 81

Living on soil cover systems - conflicting interests of local residents and government
A.Ch.E. van de Vusse & J.D. de Rijk 91

Liability of the person responsible for conditions for already decontaminated industrial sites
K. Fritsch 99

Permit approval of plants and processes for thermal soil treatment and river sediment utilization
E. Beitinger, E. Gläser & J. Spanier 103

Positive consequences of the old waste problem regarding disposal of low contaminated wastes
F. Konz 107

1.2 Eastern European countries

The situation as regards contaminated sites in Poland
E.S. Kempa 109
Volume 1

Soil contamination by prior landfills in the Czech and Slovak Federative Republic
J. Mikolás 121

Soil contamination in Hungary
L. Vermes 1447)

Contaminated soil problem in Estonia
E. Gabowitsch 131

1.3 Newly industrialized and developing countries

Soil pollution in developing countries with special reference to India
N. Gebremedhin, P. Khanna & P.V.R. Subrahmanyam 133

The illegal traffic of hazardous toxic wastes in Turkey
I. Alyanak & Z. Yöntem 139

Heavy metals and arsenic in soils and plants of polluted urban sites and their extensive distribution in the city of Metro Manila, Philippines. Part II: Situation in plants
E.-M. Pfeiffer, J. Freytag & H.-W. Scharpenseel 143

Waste-oil management in developing countries
J. Porst & U. Frings 145

2. RISK ASSESSMENT, STANDARDS, etc.

2.1 Standards, Trigger values

Development and implementation of soil quality and cleanup criteria for contaminated sites
R.L. Siegrist 149

Ecotoxicological risk assessment as a base for development of soil quality criteria
C.A.J. Denneman & J.G. Robberse 157

On the adequacy of standards-based risk evaluation methods for contaminated land
J.J. Vegter, J. van Wensem & J. de Jongh 165

') This contribution was received during the production process of these Proceedings and therefore had to be included at the rear end of Volume 2. The Editors.
2.2 Contamination sources, Background concentrations, Spatial distribution

Atmospheric deposition as a source of heavy metals and organic contaminants to agroecosystems
K.C. Jones

Experience gained in applying the minimum investigation programme for arable land
W. König

Lead pollution of soil and groundwater at clay pigeon shooting ranges
R. Hahn

Impact of coal ash lagoons upon the surrounding soils
E.S. Kempa & A. Jedrczak

Heavy metal contamination in the Culebro river basin soils
M. Rodríguez Barrera, M.D. Tenorio Sanz & M.E. Torija Isasa

The spatial distribution of nitrate concentrations in the coastal aquifer - Hadera region
B. Azmon

Background concentrations of dissolved compounds in Northrhine-Westphalian groundwaters
W. Leuchs & H. Friege
Volume 1

Soil and plant contamination with harmful substances after long time trials of sewage sludge application on arable land and grassland
G. Gelbert & E. von Boguslawski 219

Exposure remediation of soil radioactivity
C. Winder, P.B.J.M. Oude Boerrigter & F.B. de Walle 221

Behaviour of 'alkylbenzolsulfonates' in the system 'soil - seeping water - ground water'
W. Thomas & W. Ebel 227

2.3 Risk assessment

Environmental hygienic principles and aspects in establishing limit values for toxic substances in soil
Th. Eikmann, S. Michels, Th. Krieger & H.J. Einbrodt 229

Toxicological considerations in the compliance of regulatory standards in soil decontamination projects
M. Steigmeier & A. Bachmann 237

Environmental cleanup objectives standard procedure (ECOSP)
K.T. von der Trenck & P. Fuhrmann 245

AGAPE - a model for estimating the relative risk of potential contaminated sites
A. Krischok-Peppernick 253

Contaminated sites and masters plan - example Hamburg
A. Krischok-Peppernick 255

A use-oriented evaluation system for contaminated sites, taking into account human health, economic considerations and the natural environment
H. Stolpe & H. Junge 257

Health and safety concepts applicable to contaminated soil clearance
D. Gönner 259

Development of a general impact assessment concept for the sanitation of uncontrolled hazardous sites
N. Simmleit & I. Wegemann 261

Development of an action frame to improve the social acceptance of measures to clean up contaminated sites
A. Rahrbach, R. Hachmann & W. Ulrici 263
Spatial impact assessment for cleaning up contaminated sites - a research-approach within the R&D-project in Dortmund
F. Claus, S. Kraus & W. Würstlin 265

Evaluation and selection of a risk assessment method for sanitation technologies for contaminated land
H.L. Jessberger & M. Musold 267

Risk assessment of uncontrolled hazardous sites: conception and preliminary results
R. Hempfling, T. Mathews, N. Simmleit & P. Doetsch 269

Harmonizing plan approval procedures for soil cleaning projects
J. Lohrengel-Goeke & H.-J. Ziegeler 271

2.4 Safety of workers

Assessment of human exposure in relation to redevelopment plans for contaminated sites
L.M. Keiding & D. Borg 273

Occupational medicine in the cleaning up of old hazardous waste sites
R. Rumler 281

Occupational safety at landfills
V. Wilhelm 283

Safety aspects of the planning, construction and operation of biogas plants
V. Wilhelm 285

Selection of investigation technique of workers at an old dumping site
Th. Poller 287

Occupational protection measures during investigation and cleanup of former waste dumps and industrial sites. Two practical examples
M. Vuga & L. Friman 289

2.5 Reuse of cleaned sites

Recultivation of decontaminated soil by a thermic treatment
I. Campino, H.D. Mühlberger & W. Schoknecht 291
Recultivation of thermically cleaned soils according to natural succession
D. Bruns, Chr. Reimann & M. Jochimsen 297

Recultivation of phytotoxic miocene sands
H. Greinert 303

Decontaminated soils: properties and potential for use
D. Goetz & A.N.H. Claussen 311

Hazard potential of a reclaimed landfill site presently used as recreational park
M. Stammler, O. Schuster & R. Rohde 313

The microbial community of landfill soils and the influence of landfill gas on soil recovery and revegetation
S.D. Wigfull & P. Birch 315

Reutilization of a former coking plant and mining site following unsupervised demolition
H.G. Meiners & U. Lieser 317

Redevelopment of a machine-tools factory for residential and commercial use
H.G. Meiners, A. Borgmann & S. Wittke 319

3. FUNDAMENTAL ASPECTS OF SOIL AND OF CONTAMINANT BEHAVIOUR

3.1 Adsorption, Solubility

Enhanced leaching of organic chemicals in soils due to binding to dissolved organic carbon?
I. Kögel-Knabner, P. Knabner & H. Deschauer 323

Contribution of soil constituents in adsorption of chemicals
H. Kishi & Y. Hasimoto 331

Interactions of organic pollutants with soil constituents in aqueous and oil-contaminated systems
J. Gerth, W. Calmano & U. Förstner 337

Desorption kinetics of volatile organic contaminants from aquifer materials
P. Grathwohl, J. Farrell & M. Reinhard 343

Retention of mercury II on a natural quartz sand: non linear behaviour at very low concentrations
J.M. Strauss, M.A. Bues & L. Zilliox 351
Physico-chemical models for metal ion behaviour in soil
W.H. van Riemsdijk, J.C.M. de Wit, M.M. Nederlof,
L.K. Koopal & F.A.M. de Haan 359

The solubility of iron-cyanide in soils
J.C.L. Meeussen, M.G. Keizer & W.H. van Riemsdijk 367

The importance of chemical and physical properties of
new agrochemicals for their sorption to bulk soil
material and dissolved organic carbon
H. Deschauer & I. Kögel-Knabner 375

Phenol and benzene removal by sorption on soil
E.S. Kempa, T. Butrymowicz & A. Jedrczak 377

Studies on total sorption of Cd, Pb, Zn and Cu by some
Polish soils
I. Szymura 381

Sequential extraction of heavy metals from floodplain
sediments
H. Leenaers 383

Solubility of Cd, Pb and Zn in soils containing high
geneous and additional anthropogeneous charges
M. Filipinski & M. Grupe 385

3.2 Mobility

Retention of lead and zinc from a furnace dust dump by
a clayey subsoil
J.-F. Wagner 387

Mobilization of harmful substances by decomposition
processes
P. Spillmann 393

Strategies for the examination of contaminated sites
M. Zarth 411

In-situ measurement of rock permeability in borings
and at ground water measuring points - a comparison
of methods
M. Bruns 413

Regulation of the trace metal solubility during
anaerobic decomposition of solid municipal waste
S. Peiffer, K. Pecher & R. Herrmann 415

Extraction procedure evaluating the potential mobility
of heavy metals in soil
S. Düreth-Joneck & J. Reich 417
An experimental model approach to the behaviour of an organophosphorus pesticide in a saturated porous medium. Effect of the composition of the solid phase
C. Penelle, A. Exinger, P. Muntzer & L. Zilliox

The influence of organic substances and of the sampling pipe arrangement in aquifers on the representation of the measured values
K. Münnich

Pesticide leaching through heterogeneous unsaturated soils
S.E.A.T.M. van der Zee & F.A.M. de Haan

Solute transport in holocene marsh sediments - experiments and mathematical models
W. Schneider, A. Baermann, P. Döll & W. Neumann

Interactions between clay or clay-stones and selected percolation fluids
K.-H. Hesse & H.-D. Schumacher

CABADIM - a computer model for dimensioning of capillary barriers
S. Wohnlich

3.3 Toxicity

Toxic effects of pollutants on the mineralization of substrates at low environmental concentrations in soils, subsoils and sediments

A higher plant test for contaminated soil
M. Hauschild

Use of bioassays for studying oil contamination in soil
J. Gunkel & W. Ahlf

Microbial nitrate elimination in subsoils of an agriculturally used water catchment area
M. Lehn-Reiser, G. Benckiser, A. Pitzer & J.C.G. Ottow

3.4 Biodegradability

Solubility and degradability of the gasoline additive MTBE, methyl-tert-butyl-ether, and gasoline compounds in water
H. Møller Jensen & E. Arvin
Chemodynamics of chlorophenols during sequential degradation of solid municipal wastes
K. Pecher, S. Peiffer & R. Herrmann

The fate and long-term persistence of polynuclear aromatic hydrocarbons (PAHs) in agricultural soils amended with sewage sludges
S.R. Wild, M.L. Berrow & K.C. Jones

Large scale sample tests for a biological in-situ remediation of soils polluted by hydrocarbons
N.-Ch. Lund & G. Gudehus

Biodegradation of polycyclic aromatic hydrocarbons (PAH) in the subsurface
M. Stieber, K. Böckle, P. Werner & F.H. Frimmel

Kinetics of mineralization of dibenzofurane and dibenzo-p-dioxin in heterogeneous systems by soil bacteria
K. Figge, R.-M. Wittich, A. Wernitz, A. Uphoff, H. Harms & P. Fortnagel

PAH-degradation by bacteria - bioassay for the evaluation of microbial soil remediation
W.D. Weißenfels, U. Walter, M. Beyer & J. Klein

Biological investigations for feasibility studies and process control in bioremediation of contaminated soils with special respect to mineral oil
M. Sellner

Investigations on changes in the composition of microbial communities during microbiological treatment processes
P. Kämpfer, P.M. Becker & W. Dott

Influence of biosurfactant producing microorganisms on the degradation of a model oil by an original soil population
E. Goclik, R. Müller-Hurtig & F. Wagner

Effect of microbial surfactants on hydrocarbon mineralization in different model systems of soil
R. Müller-Hurtig, A. Oberbremer, R. Meier & F. Wagner

Relationship between phenylmercuric (II) acetate biodegradation rates and microbial activities on porous medium surfaces
C. Bicheron & M.A. Bues
Volume 1

Bacterial degradation of dibenzo-p-dioxin and chlorinated derivatives by the bacterium Pseudomonas spec. RW1
R.-M. Wittich, H. Wilkes, K. Figge, W. Francke & P. Fortnagel 495

Aerobic mineralization of 1,2,4-trichloro- and 1,2,4,5-tetrachlorobenzene by Pseudomonas strains
P. Sander, R.-M. Wittich & P. Fortnagel 497

Enhancing the biodegradation of polynuclear aromatic hydrocarbons in soils
J. Birnstingl, S.R. Wild & K.C. Jones 499

The toxicity of trichloroethene and 1,1,1-trichloroethane towards methane-oxidizing bacteria
K. Broholm, T.H. Christensen, B.K. Jensen & L. Olsen 503

4. INVESTIGATION AND CONTROL OF SITES

4.1 Decision support, Expert systems

A decision support system for management of polluted soils
W. Visser, R. Janssen & M. van Herwijnen 507

Neural networks as decision support systems - new tools for handling soil contaminations
R. Huele 515

Selection criteria and selection of remediation measures and their application; presented on the example of a former factory in the iron- and steel-business in Düsseldorf, FRG
K. Hoffmann 521

Evaluation of hazardous sites for the determination of priority and need of action
C. Hillmert 527

Computer-based register of pollutants used by a local authority agency - Ways of recognizing conflicts and solving problems
B. Stuck 535

Experiences gained when assessing contaminated sites with support of the XUMA expert system
W. Eitel, W. Geiger & R. Weidemann 543

XUMA expert system for support of investigation and evaluation of contaminated sites
W. Geiger, R. Weidemann & W. Eitel 549
Role of expert systems in evaluation of contaminated soil and groundwater
R. Huele, R. Kleijn & W. van der Naald 551

Ranking system to estimate the potential of hazard for groundwater below contaminated sites
H. Bremer & U. Rohweder 553

A databank and information system for investigating abandoned bituminous coal mining sites
M. Böhmer & W. Skala 555

The role of soil science in reclamation of contaminated land
W. Burghardt 557

Soil survey instruction of urban, commercial and industrial sites - fundamentals of investigation assessment and reclamation of contaminated soils
Arbeitskreis Stadtböden der Deutschen Bodenkundlichen Gesellschaft - W. Burghardt 559

Presentation within the framework of the cooperative venture Georgswerder
J.H. Fischer 561

4.2 Site assessment, Sampling strategies, Methodology

Evaluation of groundwater sampling techniques for the investigation and monitoring of contaminated sites
G. Teutsch, B. Barczewski & H. Kobus 563

Geophysical methods in surveying old landfills
R. Cossu, G. Ranieri, M. Marchisio, L. Sambuelli, A. Godio & G.M. Motzo 575

Model sites in Baden-Württemberg - results concerning the practice of site investigation
H. Neifer 583

Use of different investigation techniques at the 'Mühlacker' model site for the purposes of comparison
R. Crocoll & W. van der Galiën 589

Sampling strategy and testing procedure of excavated and cleaned soils
C.W. Versluijs 597

Burning chemical waste disposal site: investigation, assessment and rehabilitation
D.L. Barry, J.M. Campbell & E.H. Jones 607
Sanitation-model Povel/Nordhorn - Strategies, experiences and results
P. Rongen, D. Schuller & A. Virmani 629

Phasis of sanitation of waste dumps at the example of sanitary landfill Bielefeld-Senne
J. Peters & A. Wiebe 637

Clustering of sites in investigation of contaminated industrial areas
J.W. van Vliet & W.D.E. van Pampus 645

Environmental geophysics in contaminated site exploration
A. Straßburger 651

Statewide historical survey of suspected contaminated and abandoned sites in Baden-Württemberg
P. Fuhrmann 659

Usage of different methods in the investigation of contaminated sites by the example of the 'Modellstandort'
Osterhofen
G. Battermann & A. Bender 673

Contamination of soils by hazardous gases: investigation, monitoring, diagnosis and treatment
G. Grantham & M.K.D. Eddis 681

Remediation measures on the site of the gas supply utilities in Munich
E. Holzmann, M. Koch & J. Schuchardt 691

Manual of groundwater investigation in fractured rocks in connection with contaminated land
W.G. Coldewey & L. Krahn 693

Potential hazards of four abandoned dumping sites within a water work catchment area
L. van Straaten 695

Behaviour of halogenated hydrocarbons in soil
M. Stammier, R. Rohde & P. Geldner 697

A simple method for estimating the potential contamination of soil by organic chemicals
N. Litz & H.-P. Blume 699

Multi-phase approach to pollution assessment of waste dump sites in polder areas
M. Siegerist & D. Langemeijer 701
Soil contamination at an old lead smeltery, investigation and alternative remedial action techniques
M. Wahlström, P. Vahanne & L. Maidell-Münster 703

Rehabilitation programme for abandoned dumping sites in Lower Saxony - purpose-oriented follow-up investigations
D. Horchler 705

Grid sampling and simulation models in groundwater pollution investigations
B. Lamoree & J. Manschot 707

Mapping of aquicludal horizons in quaternary sediments using reflection seismic techniques
H. Stümpel, W. Rabbel & R. Kirsch 709

Investigation and rehabilitation of a hydrocarbon contamination under airfield conditions
N. Molitor, P. Ripper & R. Schmidt 711

Development of standardized sampling strategies for soil investigation in the Netherlands
D. Hortensius, R. Bosman, J. Harmsen & D. Wever 713

Evaluation of soil data for closure of surface impoundments
W.E. Kelly, I. Bogardi & A. Bardossy 721

Expert knowledge and (geo)statistical methods: complementary tools in soil pollution research
J.P. Okx, G.B.M. Heuvelink & A.W. Grinwis 729

Investigation of soil and waste at contaminated sites
H. Friege 737

Systematic sampling strategies for the investigation of soil and waterbottom contamination
R. Bosman & F.P.J. Lamé 745

The influence of sample size and sampling location on the quality check of decontaminated soil
F.P.J. Lamé, M. Albert & R. Bosman 747

Improving cost effectiveness in soil pollution research
J.P. Okx 749

Examination of contaminated sites by means of geophysical exploration techniques
B.-M. Schulze & R. Huckleman 751

Detections of abandoned waste sites by remote sensing using a thermal-/multispectral scanner system
H. Henseleit, M. Sartori & B. Jourdan 753
Volume 1

Investigation strategies on contaminated sites: sampling and analyses
P. Friesel, M. Sellner & S. Sievers 755

Pore vapour sampling as an investigation technique for soil contamination sites
W. van Oosterom & F. Spuy 757

Three dimensional pollutant detection in the aquifer by horizontated groundwatersampling with pneumatic sealed plunger pump equipment in observation wells
D. Quantz 759

Methods development for sampling contaminated soils and sediments for volatile organic compound measurements
R.L. Siegrist 761

4.3 On site analysis

Introductory workshop: on-site analysis
H. Seng 765

Fast on-site analysis: a mobile GC/MS system in comparison with laboratory analytics
G. Matz, W. Schröder & P. Kesners 767

Fiber optic modified spectroscopic analytical methods for the monitoring of environmental pollutants
J. Bürcck, W. Faubel, E. Gantner, U. Hoeppener-Kramar & H.J. Ache 775

Field analysis and site characterization activities of the U.S. Environmental Protection Agency
E.N. Koglin & J.C. Tuttle 783

On-site analysis tailored to site clean-up projects
J. Jager & L. Schanne 785

On-site analyses, future or fantasy? Some aspects of on-site analyses
D.H. Meijer 789

New strategies for determining the level of contamination of sites using a mobile mass spectrometer
M. Zarth 793

Rapid screening of soil samples for chlorinated organic compounds
R. Darskus, H. Schlesing, C. von Hoist & R. Wallon 795
On-site analysis for hazardous organic compounds in soil, groundwater, and soil air samples from a former town gas production site using a mobile gas chromatograph/mass spectrometer unit
J. Köbel-Boelke & A.G. Loudon 797

Membrane-ATR-method for the continuous determination of chlorinated hydrocarbons in air and water

Development of a cadmium-selective sensor based on an ion-selective field effect transistor
U. Jegle, J. Reichert & H.J. Ache 801

Determination of contaminants in water with detector tubes
C. Herziger 803

Field methods for soil air investigation on contaminated sites
M. Kerth 805

Extensive on-site analysis of light aromatic and chlorinated hydrocarbons in soil gas by means of a mobile gas chromatograph (GC)
A. Rosenberger & M. Koch 807

Possibilities and limits for representative sampling of solid waste resp. contaminated soils and the consequences for waste analysis
E. Thomanetz 809

4.4 Analysis of samples

A comparison of methods for the PAH-analysis in solid samples
I. Blankenhorn 811

Mineral exploration techniques applied to remedial action of contaminated soils
G. Zeibig 817

X-ray micro analysis for a more differentiated approach of the environmental hazard of soil pollutions and waste matters containing heavy metals
G.P.M. van den Mumukhof & M.A. Smithers 823

Analytical investigations of heavy metals in gaseous effluents from a garbage dump
K. Koch & O. Vierle 827
Volume 1

Examination of contaminated soils with detector tubes
E. Eickeler 829

A new method for the evaluation of the total organic burden of tar-oil contaminated gas-work-soils
D. Maier, C. Lund & G. Gudehus 831

Analytical methods for the determination of volatile halogenated organic substances in sludges, wastes and soils
J. Alberti, A. Brocksieper, P. Bachhausen & H. Friege 833

An optical sensor for the detection of heavy-metal-ions
R. Czolk, J. Reichert & H.J. Ache 835

A fiber-optic sensor for the detection of ammonium in environmental waters
J. Reichert, W. Sellien & H.J. Ache 837

Analytical methods to control the success of microbiological treatment of contaminated soil
W. Püttmann & W. Goßel 839

Addresses of first-named authors LXIII
