CHAPTER 7 - MATERIALS

Alloy design of superalloys by the d-electrons concept
N. Yukawa, M. Morinaga, H. Ezaki, Y. Murata

Development of Nickel-base superalloys for a national project in Japan
M. Yamazaki

Liquid-solid equilibria in the system Ni3Al-Ni3Ta and Ni3Al-Ni3Ti
P. Willemin, M. Durand-Charre, I. Ansara

UDM 56: a new nickel base equiaxed superalloy
G. Lamanthe, J.M. Theret, W.J. Boesch, G.E. Maurer

The effect of stress and environment on low-expansion superalloys
C.H. Symonds, D.F. Smith, D.J. Tillack

New materials for honeycomb structures with improved resistance to high temperature oxidation
F. Duflos, C. Duret, V. Gossart, M. Kumar, A. Walder

Development of a new austenitic steel for exhaust valves of internal combustion engines
G. Lanfranco, U. Franzoni, G. Sapegno, R. Schlatter

CHAPTER 8 - ODS MATERIALS

Development of ODS alloys for high temperature service
L. Coheur, M. Geladi-Heylen, P. Delavignette

Particle-strengthening mechanisms in ODS superalloys
B. Reppich, W. Listl, T. Meyer

High temperature strength of ODS superalloys due to dispersoid dislocation interaction
E. Arzt, J.H. Schröder

HTLCF properties of MA 6000
A.J. Huis in't Veld, P.M. Bronsveld, J.T.M. De Hosson

Fatigue crack growth behaviour of MA 6000
J.W. Martin, A. Tekin

High temperature low cycle fatigue of Inconel MA 6000
J. Bressers, E. Arzt
Vapour deposited TiN and TiC diffusion barriers
A. Telama, K. Torkkell, T. Mäntylä and P. Kettunen 1081

High temperature low cycle fatigue properties of superalloy MA 6000
A. Hynna, V.T. Kuokkala, T.K. Lepistö, T. Mäntyla, P. Kettunen 1091

CHAPTER 9 - CORROSION 1103

Contaminated fuel combustion and material degradation life prediction model
D.V. Rathnamma, D.W. Bonnell 1105

Experimental verification of corrosive vapor deposition rate theory in high velocity burner rigs
S. Gökoglu, G.J. Santoro 1117

Erosion and corrosion resistance of materials for fluidized bed combustors
T. Tiainen, P. Siitonen, P. Kettunen 1127

Characterisation of deposits formed in fluidised bed combustors
S.R.J. Saunders, S.J. Spencer 1141

CHAPTER 10 - PROTECTIVE SYSTEMS 1155

Coatings for the protection of low-alloy and carbon steels against corrosion attack in waste heat recovery systems of coal gasifiers
D.J. Baxter 1157

The use of various coatings for the protection of high temperature stainless steels in sulphidizing environments
T. Fransen, E. Polman, M.M.A. Perik, P.J. Gellings 1173

Interdiffusion of MCrAlY coating with the substrate
P. Mazars, D. Manesse, C. Lopvet 1183

The protection of conventional substrate alloys in aggressive environments by FeCrAlloy (FeCrAlY) steel co-extruded overlayers
Burner rig tests on coated anisotropic high temperature alloys
H.J. Rätzer-Scheibe, K. Fritscher, G. Wirth 1205

The mechanical properties of coated nickel-based superalloy single crystals
M.I. Wood, J.E. Restall 1215

Process and equipment for PVD and LPPS overlay coatings on aircraft gas turbine parts
A. Feuerstein, W. Dietrich, E. Muehlberger, P. Meyer 1227

Simulated service test behaviour of various internal and external coatings applied on CF6-50 first stage turbine blades
A.J.A. Mom, J.A.M. Boogers 1245

CHAPTER 11 - COMBINED STRESS-ENVIRONMENTAL EFFECTS 1265

Behaviour of alloy 800H under cyclic deformation and superimposed oxidation
J. Barbehön, A. Rahmel, M. Schütze 1267

Environmental effects and protection - combined stress - environmental effects
K.H. Kloos, J. Granacher, U. Struth 1279

Some environmental effects on creep testing and extrapolation using minor specimens
K. Borggreen, P. Huntley 1295

Corrosion in simulated coal gasification atmospheres and its effect on creep behaviour

Effect of 15MPa hydrogen on creep-rupture properties of iron-base superalloys
S. Bhattacharyya, R. Titran 1317

Characterization of hydrogen embrittlement in Ni-base superalloy single crystals
J. Chêne, C.L. Baker, I.M. Bernstein, J.C. Williams 1333
CHAPTER 12 - CREEP

The relationship between microstructure and internal stress in creep
M. Steen

Improved boron-containing 12%Cr steels with high creep rupture strength for steam turbine, gas turbine and other applications
P.N. Ernst, P.J. Uggowitzer, M.O. Speidel

Evaluation and qualification of uniaxial creep of X10 NiCrAlTi 32 20
H.P. Degischer, H. Aigner, R. Danzer, W. Mitter

Identification of creep mechanisms and quantitative description of stress regimes relevant to design
H. Lahodny, K. Spiradek, H.P. Degischer

Effects of the microstructural instability on the creep and fracture behaviour of cast IN-738 LC Ni-base superalloy
R. Castillo, A. Koul

Tertiary creep in the cast nickel-base superalloy IN 738 LC
G. Engberg, L. M. Camus

The creep deformation of a cast superalloy containing trace elements
S. Osgerby and T.B. Gibbons

Long term stability of Inconel alloy 718 for turbine disc applications
J.W. Brooks, P.J. Bridges

The creep behaviour of a nickel-base single crystal superalloy
Dehou Chen, Shuyue Wei, Zhongtang Wu, Yafang Han

CHAPTER 13 - FATIGUE AND CREEP FATIGUE

The effect of frequency on the cyclic creep behaviour of a directionally solidified superalloy
S.A. Morley, M.R. Winstone

Near-threshold fatigue crack initiation and propagation behavior in Ni-base superalloys
B. Weiss, A. Fathulla, R. Stickler
Geometry effects on creep/fatigue crack growth in a Ni-base superalloy
K.M. Nikbin, G.A. Webster 1477

A fracture mechanics characterization of creep crack growth in Incoloy 800H
T. Hollstein 1491

The behaviour of Nimonic 105 and IN 738 LC under creep and LCF testing
P.O. Persson, C. Persson, G. Burman, Y. Lindblom 1501

Fatigue and creep damage interaction in alloy 800H at 800°C
K. Bothe, B. Kempf, V. Gerold 1517

Creep-fatigue-interaction for two nickel-base alloys and a martensitic heat-resistant-steel
H.J. Martens, A. Rosselet, B. Walser 1527

Time dependent effects in long term creep-fatigue tests on a microstructurally unstable ferritic steel
V. Bicego, L. Borghi, N. Ricci 1537

Thermal-mechanical fatigue crack growth in B-1900 + Hf
N. Marchand, R.M. Pelloux 1547

Thermal-mechanical fatigue behaviour of IN-100 superalloy
J.L. Malpertu, L. Remy 1559

CHAPTER 14 - LIFE TIME PREDICTION 1569

Experiences with remanent life evaluation testing
M. De Witte, J. Stubbe 1571

Fracture criteria and prediction of creep life
V. Sklenicka, J. Cadek 1585

Metallurgical investigations on creep-exposed components for a better assessment of service behavior in power stations
W. Bendick, H. Weber 1595

The application of stress rupture data for the prediction of the high-temperature, low cycle fatigue lives of two nickel-base alloys
R. Danzer, J. Bressers 1605
