</table>
Experience with cross-measure boreholes for gob gas control on retreating longwalls
_J.Cervik, F.Garcia & T.W.Goodman_

Direct coal mine ventilation with dilute methane-fueled gas turbines
_Carl R.Peterson & Byron Miller_

### 4 Dust

Generation and control of mine airborne dust
_G.Knight_

An update of the reduced standards problem and overview of improved control technology for respirable coal mine dust
_Robert A.Jankowski, Robert E.Nesbit & Fred N.Kissell_

Evaluation of portable hand-held respirable dust monitors (Abstract)
_Raymond R.Gadomski_

Portable coal dust/stone analyzer
_P.A.Krzystolik, K.Lebecki, P.Bartoń, R.Dworok & J.Śtiz_

### 5 Fans and shafts

An analysis of mine fan irregularities relative to underground conditions, ventilation, and potential fan defects (Abstract)
_Stephen R.Harrison & Vic Kutay_

A cost-basis justification for streamlining service-equipped ventilation shafts
_Jerry L.Fuller_

Reduction of miner noise exposure using reactive silencers
_C.J.Opatrny & D.L.Johnston_

The operating point and selection of the fan in mine areas of high altitude
_Zhao Zi-Cheng_

### 6 Recirculation

The use of controlled recirculation ventilation to conserve energy
_A.E.Hall_

Firedamp accumulations and their dispersal with special reference to the use of controlled recirculation systems
_I.O.Jones_

The feasibility of controlled air recirculation around operating longwall coal faces
_I.Longson, R.D.Lee & I.S.Lowndes_

Computer predicted airborne respirable dust concentrations in mine air recirculation systems
_S.G.Hardcastle_

### 7 Radon

Membrane barriers for radon gas flow restriction
_James F.Archibald & H.James Hackwood_

A controlled study of the evolution of radon gas and decay products in radioactive mine environments
_F.A.Calizaya, R.H.King & J.C.Franklin_
Characterization of radioactive dust in Canadian underground uranium mines

J. Bigu & M.G. Grenier

An approach to calculate amount of air for eliminating the radon daughters in uranium mines

Wu Gang

The safe design of a uranium mine

R.W. Thompkins

8 Nuclear waste site ventilation

Critical aspects of ventilating a civilian nuclear waste repository in salt (Abstract)

F. Djahanguiri

The concept of designing two independent ventilation systems for the nuclear waste repository in basalt

Paul C. Miclea

Effects of retrieval on ventilation and cooling requirements for a nuclear waste repository

Douglas F. Hambley

An experimental determination of mixed and forced convection heat transfer coefficients in a modeled nuclear waste repository

R.L. Osborne & R.N. Christensen

The exploratory shaft and the design ventilation system

B.K. Schroeder

9 Methane control

Methane occurrence in US metal/nonmetal mines: Emanation mechanisms and gas volumes

William E. Bruce & William H. Donley

An overview of coal and gas outburst

Alan A. Campoli, Michael A. Trevits & Gregory M. Molinda

Characterization of the occurrence of methane in Gulf Coast domal salt mines

Anthony T. Iannacchione & Steven J. Schatzel

Determining face methane liberation patterns during longwall mining

Andrew B. Cecala, Robert A. Jankowski & Fred N. Kissell

Effect of gas pressure on permeability of coal

Satya Harpalani & Malcolm J. McPherson

10 Case studies

The most disastrous explosion in Turkish coalfields

N. Bilgin

A laboratory evaluation of spray-applied rigid urethane foams

Robert J. Timko, Mervin D. Marshall & Edward D. Thimons

Designing mine ventilation systems — Case studies

Floyd C. Bossard

Selection of proper ventilation system in the Jui-San coal mine

Sheng-Shyong Huang

Ventilation experiences with longwall mining at Macquarie Colliery

S. Battino & P.B. Mitchell
11 Underground heat flow and climate

The computation of heat loads in mine airways using the concept of equivalent wetness
M.G.Mack & A.M.Starfield

Simplified method to calculate the heat transfer between mine air and mine rock
Xintan Chang & Rudolf E.Greuer

The computer simulation of mine climate on a longwall coal face
I.Longson & M.A.Tuck

A prediction of mine climate around a longwall district
J.Fiala, J.Kout & A.Taufer

The reduction in heat flow due to the insulation of rock surfaces in mine airways
P.Bottomley

Mathematical modelling of diffusive and heatmass transfer processes in ventilating mining workings of an arbitrary form
A.A.Baklanov & G.V.Kalabin

12 Microcomputers

Mine ventilation computer modeling — More practical, economical, and available
Chuck R.McLendon & Abdul J.Kudiya

Ventilation surveys and networks using microcomputers
C.J.Hall

Modelling and prediction of climatic conditions in a deep level development tunnel
M.A.Ouederni, E.P.Déliac & P.Cassini

Algorithm for fast simulation of mine ventilation using dual microcomputers
Yuusaku Tominaga, Hiroaki Matsukura & Kiyoshi Higuchi

An interactive microcomputer program for mine ventilation network analysis
Zacharias G.Agioutantis & Ertugrul Topuz

13 Face ventilation I

Characterization of the performance of large capacity face ventilation systems for oil shale mining
C.E.Brechtel, M.E.Adam, J.F.T.Agapito & E.D.Thimons

The resistance to airflow on a longwall face
Malcolm J.McPherson

Extended advance face ventilation systems
S.K.Ruggieri, J.C.Volkwein, C.McGlothlin & F.N.Kissell

An operator’s experience using antitropal and homotropal longwall face ventilation systems
J.W.Stevenson

14 Air cooling and refrigeration

Geothermal air heating in a southwestern Wyoming trona mine
D.T.Moore

Energy recovery turbines for use with underground air coolers
R.Ramsden & S.J.Bluhm
Novel mine cooling methods for future deep level mines
C.J. Csatary

Power generation from mine refrigeration system
Robert Torbin, Edward Thimons & Steven Lautenschlaeger

Spray cooling developments
Edward D. Thimons, John F. McCoy & John R. Marks

15 Diesel

The effects of maintenance and time-in-service on diesel engine exhaust emissions
Robert W. Waytulonis

Measuring diesel particulate emissions in underground coal mines (Abstract)
William J. Francart & Richard T. Stoltz

Heat emissions of diesel engines and their effects on the mine climate
P. Burgwinkel

Mine planning with diesel-powered equipment: Ventilation considerations
Sukumar Bandopadhyay & Raja V. Ramani

Control of diesel engine exhaust emissions in underground mining
S. Snider & J. J. Stekar

16 Ventilation network analysis

Linear analysis for the solution of flow distribution problems in mine ventilation networks
Sastry S. Bhamidipati & James A. Procarione

Ventilation models for longwall gob leakage simulation
Daniel J. Brunner

Mine ventilation network design (Abstract)
Randal J. Barnes & Thys B. Johnson

Recent developments in mine ventilation network theory and analysis
Y. J. Wang, Howard L. Hartman & Jan M. Mutmansky

Fixed flow network solutions using linear equation and linear equivalence
W. H. Griffin

17 Miscellaneous

Tunnel boring machines in Norway — Ventilation and dust problems
Tom Myran

The analysis of post detonation fumes in an underground operating environment — A case study
M. Hine & I. O. Jones

Application of biotechnology for methane control in coal mines
R. N. Chakravorty & P. I. Forrester

Analysis of friction factors in mine ventilation systems
M. K. Gangal, K. R. Notley & J. F. Archibald

A survey of English language mine ventilation literature with emphasis on literature sources and databases
Mary B. Ansari & Anne Amaral

Mary B. Ansari & Anne Amaral
18 Face ventilation II

Laboratory investigation on the effectiveness of an air spray system for dust control on longwall faces
Sandip K. Mukherjee, Anthony W. Laurito, Madan M. Singh & Natesa I.Jayaraman

The use of water-powered scrubbers on NMS Marietta\textsuperscript{R} drum miners
John Jeffrey Sartaine

Extended advance of continuous miner successfully ventilated with a scrubber in a blowing section
Jon C. Volkwein, George Halfinger, Jr. & Edward D. Thimons

Pressure diffuser device for use with auxiliary face fans
David L. Bartsch

19 Monitoring

Ventilation experience using computer monitoring and control systems at major US coal mines (Abstract)
Albert E. Ketler

Justification of a chromatograph for mine air analyses
T. E. McNider

An analysis of decision-making aspects in mine ventilation systems
R. V. Ramani, R. Bhaskar & R. L. Frantz
