TELETRAFFIC SCIENCE
for New Cost-Effective Systems, Networks and Services

ITC-12
Proceedings of the Twelfth International Teletraffic Congress
Torino, Italy, June 1-8, 1988

Edited by:
Mario BONATTI
Italtel Central Research Labs-CL4B
Settimo Milanese
Italy

Part 2
ATM SYSTEMS

Fluid Flow Loading Analysis of Packet Switching Networks
J.S. Turner
Contents

Asynchronous Transfer Modes — Options and Characteristics
B. Eklundh, K. Sällberg and B. Stavenow 794

Traffic Design for an Asynchronous Transfer Mode Switching Network
S. Abe, K. Hajikano and K. Murakami 801

Traffic Studies of Switching Networks for Asynchronous Transfer Mode (ATM)
K. Rothermel and D. Seeger 808

WIDEBAND SYSTEMS & NETWORKS 1

Contestation Probabilities in Packet Switching Networks with Strung Input Processes
A. Descloux 815

Performance Analysis of ISDN Packet Switching System
S.-I. Kuribayashi and Y. Takahashi 822

Traffic Analysis of Multirate Switching Networks for Broadband-ISDN
G. Niestegge and E. Wallmeier 829

Analytic Models for Switching Networks with Wideband Traffic
M. Butto' and G. Colombo 836

Analysis of Loss Probability Equalized by Trunk Reservation for Mixtures of Several Band Width Traffic
K. Takagi and Y. Sakita 843

A Method for Analyzing Circuit-Switched Networks with Multiple Bit Rate Classes
T. Oda and Yu Watanabe 850

Multichannel Services: Performance of Switching Networks
M.E. Beshai and D.R. Manfield 857

WIDEBAND SYSTEMS & NETWORKS 2

Performance Models for a Multislot System
L.G. Mason, K. Liao, L. Fortier and Y. Deserres 865

Comparison of Access Control Strategies for ISDN-Traffic on Common Trunk Groups
R. Kleinewillinghöfer-Kopp and E. Wollner 873

Trunk Reservation and Grade of Service Issues in Circuit Switched Integrated Networks
P. Lindberg, K. Nivert and B. Sagerholm 880

Design Methods and Routing Control in Integrated Services Networks with Alternative Routing
M. Pióro, U. Körner and B. Wallström 887

An Approximation for the Grade-of-Service Calculation of a Broadband ISDN
King-Tim Ko 894
Contents

Some Exact Closed-Form Expressions on the Performance of Integrated Networks
Y.N. Doğanata 901

On Congestion in Switching Networks Composed of Digital Switching Matrices
A. Jajszczyk, J. Kleban and J. Kubasik 908

SIGNALLING SYSTEMS

Engineering Common Channel Signaling Networks for ISDN
R.A. Skoog 915

Modelling the Common Channel Signalling Network for Planning the Structure of a Target Network
J. Sole Gil 922

Modelling and Performance Evaluation of Multi-Layered Signalling Networks Based on the CCITT No. 7 Specification
G. Willmann 930

Common Channel Traffic in an ISDN Environment
B. Amici and A. Lazzari 941

Routing Planning in a Large-Scale Signalling Network
W. Klein 948

A Method for Dimensioning Signalling Networks in Brazil
M. Garcia 957

ROUTING 1

Adaptive Routing of Voice and Data in Burst Switched Networks
P. O'Reilly and Chang-Hao Zhou 964

Consideration on Advanced Routing Schemes for Telecommunications Networks
K. Mase and H. Uose 973

Dimensioning of Adaptive Routing Telephone Networks
E. Szybicki 980

Cost-Effective Use of Networks Employing Dynamic Alternative Routing
P.B. Key and M.J. Whitehead 987

On Adaptive Call Routing Strategies in Circuit Switched Networks – Maximum Revenue Approach
Z. Dziong, M. Pióro, U. Körner and T. Wickberg 998
Contents

ROUTING 2

Performance Analysis of State-Dependent Routing in Circuit-Switched Networks  
N.T. Koussoulas  

An Efficient Algorithm for Optimal Routing in Large Multifacility Circuit-Switched Networks  
A. Gersht and A. Shulman  

Dynamic Alternative Routing — Modelling and Behaviour  
R.J. Gibbens, F.P. Kelly and P.B. Key  

Forward-Looking Routing: A New State-Dependent Routing Scheme  
K.R. Krishnan and T.J. Ott  

A Study of the TRANSPAC Adaptive Routing Algorithm  
P. Brown, J. Roumilhac and P. Bonnard  

Routing in Packet Switching Computer Networks with Discrete Cost Function  
T. Uhl  

An Adaptive Routing Algorithm for Telephone Networks  
K. Blunar and M.M. Konvit  

FLOW CONTROL

Packetized Queueing Networks and Window Flow Control  
P. Le Gall  

Throughput Analysis of an Adaptive Window-Based Flow Control Subject to  
Bandwidth Management  
D.T.D. Luan and D.M. Lucantoni  

Window Flow Control on a Trunked Byte-Stream Virtual Circuit  
S.P. Morgan  

Two-Level Control of an Integrated Transport Network  
G.J. Fitzpatrick and G.M. Woodruff  

Efficiency of Store-and-Forward Deadlock Prevention Controllers in Packet Networks  
J. Swiderski  

PROTOCOL ANALYSIS

Analytic Modelling of Single Link, Multi-LAP Connections with Application to the  
ISDN User-Network Access  
W. Fischer  

Performance of LAPD Frame-Relay Networks: Transmission Error Effects and Congestion Control  
K.-J. Chen, B.T. Doshi, H.Q. Nguyen and K.M. Rege
Contents

Simulation of the X.224 Transport Protocol over X.25 Networks
E. Vazquez, J. Vinyes and R. Colella 1109

T. Saito, H. Aida, A. Shirahata, M. Hamaogi, W. Takahashi and H. Ishihara 1116

Performance Analysis of the Class 4 Transport Protocol
A. Pach, P. Brown and B. Delosme 1123

Performance Analysis of a Two-Hop Star Network with S-Aloha Multiple Access Scheme
L. Fratta and J. Wozniak 1130

FLEXIBLE MANUFACTURING SYSTEMS

Deadlock and Thrashing in a Flexible Manufacturing System
E. Gelenbe, J.-M. Fourneau and P. Thevenin 1139

A Queueing Network Analyzer for Manufacturing
M. Segal and W. Whitt 1146

Modelling and Performance Comparison of Two Application Layer Protocols for Manufacturing Automation
M. Bosch, O. Gihr and W. Kiesel 1153

ROBUST DESIGN

Performability Evaluation of Telecommunication Networks
J.F. Meyer 1163

A Unifying Approach to Performance and Reliability Objectives
Y. Levy and P.E. Wirth 1173

Reliability Considerations of Networks and Hierarchical Systems
K. Fischer and G. Hertel 1180

New Planning Architecture for Reliable and Cost-Effective Network Design
M. Yoshida and H. Okazaki 1193

A Systematic Design Method of Highly Reliable Communication Networks by the Use of Graph Theory
Y. Tanaka, M. Akiyama and B. Wallström 1200

Setting a Blocking Standard for Designing Survivable Networks
E.J. McCarthy and R.E. McGorman 1207
PERFORMANCE DESIGN & PLANNING TOOLS

Visual Simulation of Teletraffic Models
H. Heffes and B. Melamed 1214

Software Tools to Support a Performance Modelling Environment
A.F. Pais 1222

Method for Local Network Planning
Xiong Jian Liang 1231

MINDER: An Interactive Planning Tool for Network Planners
R.J. Harris 1235

OTARIE: An Interactive Tool for Performance Evaluation Studies in Telephone Networks
J.-P. Guerineau, M. Dao and C. Becque 1242

An Interactive Computer Aided Planning Package for Rural Telephone Networks
C. Henggeler Antunes, J. Climaco, P. Nordeste, J. Diogo and J. Craveirinha 1249

SIMULATION

Effective Control of Simulation Runs by a New Evaluation Algorithm for Correlated Random Sequences
F. Schreiber 1256

Subcall-Type Overload Simulation: A Method to Adapt the Call Terminating Rate to the Rate of Accepted Calls in the Case of Transient Processes
P. Hanselka 1265

Sequential Procedures in Simulation Studies of Satellite Communication Protocols
K. Pawlikowski and M. Asgarkhani 1270

Performance Analysis of a Cost Effective Multiprocessor for Teletraffic Simulation
B. Kluth and C. Görg 1277

An Environmental Simulation Tester as Applied to Traffic Characteristics Evaluation
Z. Koono, S. Matsumoto, R. Ozaki, M. Soga and K. Ozaki 1284

On Performance Analysis and Selection Criteria of Random Number Generators for Simulations
M.K. Mertsch 1291

GENERAL TELETRAFFIC MODELS 1

Last Exit Decomposition in Teletraffic
R. Syski 1298
## Contents

A Discrete-Time Single Server Queue with Bernoulli Arrivals and Constant Service Time  
J.-R. Louvion, P. Boyer and A. Gravey  

On Generalized State Equations, Cyclic Processes and Cut-Off Priority Systems with Hysteresis  
R.G. Schehrer  

Markov Chain Description of Telephone Networks: A Numerical Algorithm for Performance Evaluation  
F. Le Gall and J. Bernussou  

A Multi Server System with Rejection and Priorities  
Å. Arvidsson  

New Approximation for General Distributions by N-Stage Markov Processes Based on Continued Fractions  
S. Nojo and G. Kimura  

### GENERAL TELETRAFFIC MODELS 2

Extremals of Functions of Random Variables, Optimal Control Theory, and Teletraffic Theory  
J.M. Holtzman  

Alternative Routing Networks and Interruptions  
W. Henderson and P. Taylor  

 Parcel Overflows in Queues with Multiple Inputs  
K.S. Meier-Hellstern  

The Transient Behavior in Erlang's Model for Large Trunk Groups and Various Traffic Conditions  
D. Mitra and A. Weiss  

Numerical Analysis of Overflow Traffic and a Decomposition Technique for the Performance Evaluation of Overflow Systems  
P. Buchholz and B. Müller-Clostermann  

Blocking Probabilities for Customers with Limited Access in Public Networks  
E.E. Cohen and M. Ouaily  

### INPUT PROCESS MODELS

Generalizations of Basic Assumptions in Teletraffic Theory — C. Palm's Ideas and other Approaches  
G. Lind  

Superposition of Interrupted Poisson Processes and its Application to Packetized Voice Multiplexers  
I. Ide
Contents

The Switched Poisson Process and the SPP/G/1 Queue
M.H. Rossiter 1406

The Influence of Repeated Calls on the Performance Measures of Loss Systems
M. Paterok, U. Herzog and C. Bleisteiner 1413

Simple Approximation for Blocking Seen by Peaked Traffic with
  Delayed, Correlated Retattempts
P.K. Reeser 1420

Optimal Calculation of Characteristics of Models with Repeated Calls
S.N. Stepanov 1427

QUEUEUING THEORY 1

Waiting-Time Approximations for Cyclic-Service Systems with Mixed Service Strategies
W.P. Groenendijk 1434

Algorithms and Approximations for Batch-Arrival Queues
H.C. Tijms 1442

Dependence in Packet Queues: A Multi-Class Batch-Poisson Model
K. Fendick, V. Saksena and W. Whitt 1450

Dynamic Routing in Polling Systems
S. Browne and U. Yechiali 1455

Sojourn Times in Feedback and Processor Sharing Queues
J.L. van den Berg and O.J. Boxma 1467

QUEUEUING THEORY 2

Performance Optimization in an M/G/1 System Based on Priority Assignment Rules
G.H. Petit and R.N. Andries 1476

Expected Response Times in a Non-Symmetric Time Sharing Queue with
  a Limited Number of Service Positions
B. Avi-Itzhak and S. Halfin 1485

A Priority Queuing System with Finite Buffers
T. Shioyama and K. Ohno 1494

A Gate with Periodic Openings and Bulk Service
G. Hébuterne 1501

Completion Time of Service Unit Interrupted by PH-Markov Renewal Customers
  and its Applications
F. Machihara 1508
Contents

Service Protection by Time-In
B.F. Nielsen 1515

QUEUEING NETWORKS

Aggregative Modelling of Queueing Networks
P.J. Schweitzer 1522

Insensitive Bounds for Performance Measures
A. Hordijk 1529

Approximate Solution of Queueing Networks Based on Exact and
Bounded Aggregation Technique
S. Balsamo 1536

Distributed Processing Systems Analysis of Response Time
N. Redding 1545

Analysis of some Queueing Models with Flow Control
O. Østerbø 1553

FUTURE TLC SCENARIOS

The Telecom Scenario and Future Trends in the EC
B. Schaffer 1562

Advanced Traffic Routing as Part of the USA Intelligent Telecommunications Network
E.P. Gould 1571

Teletraffic and International Standardization — The Case for Doing Less
A. Lewis 1578

Systems Engineering and Traffic Engineering
O. Hashida 1582

Teletraffic and Cost-Effectiveness
P. De Ferra 1589

Author Index 1596
