Control and prediction of the temperature development in a clay formation during the construction of a deep frozen shaft in Germany

P. Jordan & R. Jagow-Klaff

Influence of soil properties on ice-wall formation

Zhang Yan

Discussion on engineering design

4 Case histories

General report on case histories

J.S. Harris

Construction of a shallow tunnel under protection of a frozen soil structure: Fahrlachtunnel at Mannheim, Germany

D. Borkenstein, P. Jordan & P. Schäfers

Discussion on case histories

Reports of working groups

Testing methods for frozen soils

ISGF Working Group 1

Frozen ground structures – Basic principles of design

ISGF Working Group 2

Summaries of poster presentations

Recent ground freezing in Scandinavia

A.-L. Berggren

Frost heaving of a saturated soil under various temperature conditions and overburden pressures

Takeshi Ishizaki & Masami Fukuda

Thermal analysis of frozen soil wall during partially stopping of cooling

Hiroyasu Ito, Kazunori Naganuma & Akira Nogi

Minimum ice-wall thickness in freeze shaft design

J. Klein

Apparatuses and methods for determining of mechanical properties of freezing and thawing soils

Y. R. Orzhehovskiy, L. B. Ganeles & B. V. Niculin

Sinking of main shaft in Chensilou Mine without freeze tube breakage

Pang Rongqing

A cold storage of agricultural products surrounded by artificial permafrost using heat pipes

Fujio Tsuchiya, Kimitoshi Ryokai & Masataka Mochizuki
Application of ground freezing method to two underground projects in water-bearing sand layer
Zhang Naizhu 543

Freeze sinking construction of Xie Qiao coal mine
Zhang Yongxin 547

Discussion on poster presentation 553
